Skyland Broadcast Corp., Dayton, Ohio—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #239, 99.7 mc., and coverage to be determined. Amended to specify population of 1,961,327, change coverage from to be determined to 13,230 square miles and make changes in antenna system and re new stockholders.

Pittsburgh Radio Supply House, Pittsburgh, Penna.—Construction permit for a new high frequency broadcast station to be operated on 46.3 mc., and coverage of 11,400 square miles. Amended to change frequency from 46.5 mc., to Channel #221, 93.7 mc., type of transmitter, coverage from 11,400 to 13,300 square miles, population from 2,695,713 to 3,311,513 and make changes in antenna system.

John J. Laux, Richard Tettelbaum, Myer Wiesenthal, Alex Tettelbaum, Louis Berkman, Jack N. Berkman, Charles C. Swaringen, Joseph Troesch and John L. Merdian, partners, d/b as Liberty Broadcasting Co., Pittsburgh, Penna.—Construction permit for a new high frequency FM broadcast station to be operated on 99.1 mc., and coverage of 15,460 square miles. Amended to change coverage from 15,460 to 13,700 square miles, population from 9,000 to 8,690,973 to 3,545,553 and make changes in antenna system.

WCAE, Inc., Pittsburgh, Penna.—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on 45.5 mc., and coverage of 8,650 square miles. Amended to change frequency

(Continued on next page)
from 45.5 mc, to “To be assigned by FCC,” coverage from 8,650 to 20,510 square miles, type of transmitter and transmitter location from Baldwin Township, Pennsylvania, to Pittsburgh, Pennsylvania, make changes in antenna system and specify population of 4,095,133.

United Garage & Service Corp., Cleveland, Ohio—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on Channel #2, 94.1 mc., Amended to change class of station from Metropolitan to Community, change transmitter and studio locations from Cleveland, Ohio, to Lakewood, Ohio, type of transmitter and make changes in antenna system.

United Television Co., Cleveland, Ohio—Construction permit for a new high frequency broadcast station to be operated on 48.5 mc., and coverage of 8,420 square miles. Amended to change frequency from 48.5 mc., to Channel #208, 98.9 mc., coverage from 8,420 to 12,570 square miles, population from 1,214,505 to 2,631,024, type of transmitter and transmitter location, changes in antenna system.

National Broadcasting Co., Inc., Cleveland, Ohio—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on Channel #215, 96.9 mc., or such other frequency as assigned by Chief Engineer of FCC, and coverage of 27,900 square miles. Amended to change officers, directors and stockholders, and change in corporate structure.

WWZR—Zenith Radio Corp., Chicago, Ill.—Construction permit to specify frequency of Channel #253, 98.5 mc., change frequency from 10,560 to 11,650 square miles, population from 2,501,475 to 2,957,972.

The Times-Mirror Co., Los Angeles, Calif.—Construction permit for a new high frequency FM (Rural) broadcast station to be operated on Channel #215, 96.9 mc., or such other frequency as assigned by Chief Engineer of FCC, and coverage of 27,900 square miles. Amended to change officers, directors and stockholders, and change in corporate structure.

WWZK—Muzik Radio Corp., Chicago, Ill.—Construction permit to specify frequency of Channel #235, 98.5 mc., change coverage from 10,560 square miles to 9,400 square miles, make changes in transmitting equipment and install new antenna, and specify class of station as Metropolitan.

WHNF—Marin Loew Booking Agency, New York, N. Y.—Construction permit to specify frequency of Channel #257, 99.3 mc, change type of transmitter, install new antenna system.

L. J. Duncan, Leila Duncan and Josephine A. Rawls, d/b as A. Frank Katzentine, Orlando, Fla. (P. O. 1759 North Bay Road, Miami Beach, Fla.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #248, 97.5 mc., and coverage of 615.75 square miles. Amended to change frequency from 615.75 square miles to “To be determined.”

Samuel R. Sague, Cleveland Heights, Ohio—Construction permit for a new FM (Community) broadcast station to be operated on 88-108 mc, band and coverage of 1,900 square miles. Amended to change transmitter location.

Surety Broadcasting Co., Charlotte, N. C. (P. O. 112 South Tryon St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #260, 101.1 mc., and coverage of 14,078 square miles.

A. Frank & Josephine Ortenstein, Orla Broadcast Co. (P. O. 1759 North Bay Road, Miami Beach, Fla.)—Construction permit for a new FM (Rural) broadcast station to be operated on frequency to be assigned by Chief Engineer of FCC and coverage of 19,600 square miles.

The Tri-State Broadcasting Co., Cumberland, Md.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage of 16,600 square miles. Amended to specify studio location.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

NEW—Fordham University, New York 58, N. Y.—Construction permit for a new noncommercial educational broadcast station to be operated on Channel #215, 66-72 mc., and coverage of 5700 square miles and power of Vis: 16.4 kw and Auv: 15.6 kw.

NEW—Hughes Productions, Division of Hughes Tool Co., Los Angeles, Calif.—Construction permit for a new commercial television broadcast station to be operated on Channel #2, 60-66 mc, ESR of 500, and coverage of 3,550 square miles. Amended to change frequency from Channel #2, 60-66 mc., to Channel #1, 66-72 mc., type transmitter, specify power as aural 25 kw, visual 50 kw (peak); studio from Los Angeles, California to Hollywood, California, transmitter location and to make changes in antenna system, change applicant to Hughes Production Corp.

NEW—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Construction permit for a new experimental television broadcast station to be operated on 1310-360, 700-750, 900-920 mc, power of Vis: 100 watts (peak), Auv: 100 watts and Emission Vis: A5 and Auv: A1 or FM.

NEW—The Toledo Blade Co., Toledo, Ohio (P. O. 533 Superior St.)—Construction permit for a new commercial television broadcast station to be operated on Channel #13, 210-216 mc, coverage of 5700 square miles and power of Vis: 16.4 kw and Auv: 15.6 kw.

APPLICATIONS TENDERED FOR FILING

WKUM—American Colonial Broadcasting Corp., Arecibo, Puerto Rico—Acquisition of control of licensees corporation by Ralph Perez Perry. (1230 kc.)

KIOX—Bay City Broadcasting Co., a Partnership composed of H. A. Clements, T. C. Dodd and John George Long, Bay City, Texas.—Construction permit to change frequency from 1110 to 1270 kc, power from 1 kw, daytime, to 1 kw unlimited, and install directional antenna for night and new transmitter.

NEW—James G. Thomas, Lubert Barefoot, Lawrence Gooding and Victor H. Nix, as Simpson Broadcasting Co., Clinton, N. C.—Construction permit for a new standard broadcast station to be operated on 1010 kc, power of 1 kw and daytime hours of operation.

(Continued on next page)
NEW—Rome Radio Broadcasting Co., Rome, Ga.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 1 kw and daytime hours of operation.

NEW—Palouse Empire Radio, Inc., Moscow, Idaho—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

KRLC—H. E. Studebaker, d/b as Station KRLC, Lewiston, Idaho—Construction permit to change frequency from 1400 to 1350 kc., power from 250 watts to 1 kw, install directional antenna for night use, new transmitter and change transmitter location.

NEW—James R. Doss, Jr., Huntsville, Ala.—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 250 watts and unlimited hours of operation.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

WPAT—Inc., Schenectady, N. Y.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 1 kw and daytime hours of operation.

NEW—Midnight Sun Broadcasting Co., Anchorage, Alaska—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 5 kw, directional antenna, and unlimited hours of operation.

NEW—Charles Wilbur Lamar, Jr., Morgan City, La.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—J. E. Tighe, Porterville, Calif.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 250 watts and unlimited hours of operation.

NEW—Charles H. Hines, d/b as Station WOBY, Oklahoma City, Okla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 5 kw, directional antenna, and unlimited hours of operation.

NEW—Lincoln Operating Co., Miami, Fla.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 5 kw, directional antenna, and unlimited hours of operation.

NEW—H. M. Williamson and Roy D. Johnson, d/b as Murray Rock & Co. and Glo-Rnz Distributing Co., Dayton, Ohio.—Construction permit for a new standard broadcast station to be operated on 1600 kc., power of 250 watts, and unlimited hours of operation.

NEW—Highlands Broadcasters, Inc., In or Near Oak Ridge, Tenn.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Blanfox Radio Co., Inc., Bristol, Va.—Construction permit for a new standard broadcast station to be operated on 850 kc., power of 1 kw and daytime hours of operation.

NEW—Garl D. Conner and Alden M. Cooper, a partnership d/b as The Adrian Broadcast Co., Adrian, Mich.—Construction permit for a new standard broadcast station to be operated on 1600 kc., power of 250 watts, and unlimited hours of operation.

NEW—Fisher’s Blend Station, Inc., Seattle, Wash.—Modification of construction permit for changes in directional antenna for night use. (1000 kc.)

KOMO—Fisher’s Blend Station, Inc., Seattle, Wash.—Modification of construction permit for changes in directional antenna for night use. (1000 kc.)

**Federal Trade Commission Docket**

**COMPLAINTS**

**Wolf-Raitt, Inc.**—The Federal Trade Commission has issued a complaint charging Wolf-Raitt, Inc., 142 West 39th Street, New York, with violation of the Wool Products Labeling Act and the Federal Trade Commission Act in connection with the interstate sale of women’s suits and coats. The complaint also names as respondents the corporation’s officers, Herman Perman, president, and Gerson B. Wolf, secretary and treasurer. (5338)

**CEASE AND DESIST ORDERS**

The Commission issued the following Cease and Desist Orders last week:

- **Athenson & Passin, Inc.,** 330 Seventh Avenue, New York, manufacturer of fur garments, has been ordered by the Commission to cease using the word “leopard,” either alone or with other words, to designate, describe or refer to any product not made of leopard peltries, or otherwise representing, through words or pictures, that any product is made of leopard skin when such is not the fact. (5334)

- **California Lima Bean Growers Association**—The Commission has issued an order directing California Lima Bean Growers Association, a corporation located at Oxnard, Calif., to cease and desist from violation of the brokerage section of the Robinson-Patman Act in connection with interstate sales of lima beans. (4039)

- **I. Pukel**—The Commission has issued an order prohibiting Isadore Pukel, trading as I. Pukel, 919 47th Street, Brooklyn, from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme. The respondent is engaged in the sale and distribution of musical vanity chimes, toilettries, fountain pens and other merchandise. (5339)

- **Haber & Co.**—The Commission has ordered Harry Haber, trading as Haber & Co., 1205 G Street, N. W., Washington, D. C., to cease and desist from misbranding women’s coats and suits in violation of the Wool Products Labeling Act and the Federal Trade Commission Act. (5125)

**STIPULATIONS**

During the past week the Commission has announced the following stipulations:

- **Alioto & Co.**—A stipulation to discontinue misrepresenting the healing properties of Alioto Compound, a skin ointment, has been entered into with the Commission by Frank Alioto, trading as Alioto & Co., 404 North Jefferson Street, Milwaukee. (63305)

- **James U. Dickson,** operating a sawmill near Sturgis, S. Dak., stipulated with the Commission that he will cease and desist from making false and misleading claims concerning a coal tar hair dye designated Glo-Rnz Hair Rinse that has been entered into with the Commission by Harry P. Rock, Kenneth C. Bradford, Octavio V. Almada, Hazel M. Rock, Dolores Bradford and Beverly Almada, copartners trading as Murray Rock & Co. and Glo-Rnz Distributing Co., Dayton, Ohio. (63306)

MAY 20, 1946—402
RENEWALS NOT PROGRAM APPROVAL
WARNS FCC

COMMISSION, IN APPROVING 95 LICENSES, SAYS
PROGRAM STRUCTURE APPROVAL NOT IMPLIED

Announcing on Wednesday (22) renewal of licenses for
ninety-five stations, the FCC took pains to point out these
renewals did not necessarily constitute approval of the
stations' "program structures."

The FCC announcement of the renewals was prefaced
with the statement that "The Commission's action in
granting current renewals should not be construed as an
indication that in all instances the program structures are
in keeping with the overall public service responsibilities
enunciated by the Commission from time to time pursuant
to the Communications Act of 1934 and reviewed and sum¬
murized in the March 7, 1946 report."

The Commission recalled that the day following issuance
of its program report an announcement had been made
that 300 stations then operating on temporary licenses
would be required to submit their program logs, including
percentage analyses, for a composite week during 1945.

Since the logs covered a period prior to the program
report, the FCC stated that "current renewals are being
granted on the showings made but with the expectation
that all licensees will review their program structure in
the light of the Act and the
Commission's report."

Continued the FCC: "... in instances where there appears
to be extreme disregard of public service responsi-

The Commission's state-
ment, although not clarifying
the standards which the FCC
expects to require, made it
clear that its March 7th "re-
port" has the full effect of a
regulation and that broad-
casters have made no mistake
in assuming that the FCC in-
tends to concern itself ex-
tensively with the "program
structure" of radio stations.

PETRILLO POSITION DISAPPOINTING TO MILLER AS
UNION-INDUSTRY MEETING AWAITED

NAB President Justin Miller, in a letter dated May 20,
expressed to James C. Petrillo his disappointment that the
AFM leader has taken the position that the radio industry
is offering no solutions to current industry-union problems
at a time when the NAB is waiting for the AFM to set
a date for a fourth planned meeting between representa-
tives of the two groups.

Assuring the union head that the industry has "no
desire to use oppressive or unfair methods" and pointing
out that "methods of conflict and aggression ... will stir
up bitterness and delay the very object which we desire,"
Judge Miller recalled that he had met on three occasions
with Mr. Petrillo in an effort to establish a more workable
relationship between the union and the radio industry and
that he had suggested the formation of permanent joint
 advisory committees, with equal representation from both
 groups, to study and suggest means of lessening differences
between union and management.

He pointed out that the
AFM president had accepted
this plan in principle and
that the industry was waiting
for Mr. Petrillo to set the
date for a further meeting
between union and industry
committees to work out final
details for the permanent
body. (See current REPORTS,
pp. 291 and 311).

The April issue of the
International Musician
published a front page editorial
by Mr. Petrillo in which he
reiterated the union's ban on
simultaneous broadcasting of
musical programs over AM
and FM stations and ex-
plained the union's reasons
for not permitting its mem-
bers to perform for television
stations. In this article Mr.
Petrillo stated he considered
this position sound "until
(Continued on next page)
MAY 27, 1946 — 404

in Chicago. The second was a joint meeting of the AFM International Executive Board and a Special Industry-

such time as the radio people have something better to offer, or can convince us that we are wrong.” (See current

Reports, p. 343.)

Judge Miller’s Letter

Judge Miller wrote Mr. Petrillo as follows:

“I was surprised and disappointed by the front-page editorial which appeared in a recent number of The Inte-

national Musician and by the press dispatches which were based thereon. In that editorial you said: ‘I think the position of the International Executive Board, in making the ruling they did, is sound, until such time as the radio people have something better to offer, or can convince us that we are wrong. So far they have not done so.’

“As you know, I have repeatedly requested that a joint committee, representing the AFM and the radio broadcast-

ing industry, be set up for the express purpose of discussing our differences and providing a basis for peaceful settlement; by recommending to our respective groups the adoption of such solutions as may be mutually agreed upon. I have met with you on three occasions for that purpose. When our last meeting adjourned I supposed that we were making good progress toward setting up a joint committee and have been waiting to hear that you were ready to go ahead.

“So far as the radio broadcasters are concerned, we are ready to continue at your convenience. At its last two meetings—in January and again in May—the NAB Board of Directors approved the suggested procedure. Representatives of all segments of the industry have been chosen to serve upon the proposed joint committee. All the national networks are represented.

“We have no desire to use oppressive or unfair methods. We wish to avoid the wasteful procedures of strikes and lawsuits. If such methods and procedures are used, it will still be necessary, eventually, to sit down around the table and reach agreements by methods of discussion and adjustment. Surely, fair-minded people can do this, now.

“Your people and ours are anxious to give to the American listening public the best possible quality of music and to insure employment of all qualified musicians who can be profitably used by the radio broadcasting industry. To this end we should build up good will between our respective groups and employ the methods of education and persuasion. If we do so, we may reasonably hope for long-continued peace and ever-increasing employment of musicians. If we use, instead, the methods of conflict and aggression, we will stir up bitterness and resentment, and delay the very object which we both desire.”

First of the three meetings between Mr. Petrillo and Judge Miller was an exploratory session held last January in Chicago. The second was a joint meeting of the AFM International Executive Board and a Special Industry-

Employee-Employer Relations

NLRB ISSUES PARTIAL DECISION IN CBS WHITE-COLLAR CASE

On Friday (24) the NLRB ordered a collective bargaining election among white-collar employees of CBS in New York City, to determine whether they desire to be represented by IATSE, Office and Professional Workers-CIO, or IBEW (see NAB Reports, Vol. 14, p. 252). At the same time the Board scheduled oral argument to be held on June 4 on the issues raised by IATSE’s contention that television directors and certain other miscellaneous employees in the Television Department should constitute a separate bargaining unit or units.

About 700 white-collar employees will be eligible to vote in the election, which will be held within 30 days. The Board rejected the primary contention of IATSE that all office and professional workers in the Television Department, excluding technicians and stagehands, should comprise a separate group for bargaining purposes. The second contention of IATSE on which oral argument will be heard was that the television directors and assistant directors, plus some six miscellaneous television studio employees, should be separated from the the remaining New York white-collar workers. The Board included in the city-wide unit about 19 television clerical employees whom IATSE had also contended should be represented on a television departmental basis.

Legal Department

CALIFORNIA LIBEL AND SLANDER LAWS CHANGED

The California law of libel and slander with respect to radio broadcasts was modified somewhat by the Cali-

fornia Legislature during its 1945 session.

Section 46 of the California Civil Code makes defama-

tory communications by radio slander rather than libel.

Section 47 extends to radio the same privilege enjoyed by the press in California; namely, freedom from liability for the publication of fair and true report of statements made by a public official in his official capacity, statements made in official proceedings, statements made in lawful public meetings or the publication of matter for the public benefit.

Finally, Section 48 (a) provides that in the event of the broadcast of defamatory matter the defamed person

(Received on next page)
FIELD AGENTS CLAIM STATIONS NOT ELIGIBLE FOR 722 RELIEF

NAB’s General Counsel, Don Petty, has been advised by several attorneys that Internal Revenue field agents have taken the position that radio stations are not eligible for relief under Section 722 (c). It is understood that field agents’ reasoning in their interpretation is that a station has no tangible assets and that capital is an important income producing factor.

Mr. Petty requests that any information on successful industry experience in claims under Section 722 (c), be given to NAB’s legal department at the earliest possible date, in order that the industry as a whole may be given the benefit of related experience.

Small Market Stations

STATIONS SELL 11 P. M. TO MIDNIGHT PROGRAMS

Undertaking a plan to be of assistance to small market stations in selling their late periods on the schedule, J. Allen Brown, head of NAB Small Market Stations Division, is securing information and data that should be of special interest to management of stations in this classification. Now that the early and mid-evening hours on many small stations are largely sold, management is interested in attracting sponsors to the late periods. Larger stations in the metropolitan areas have pioneered in this phase of commercial programming.

Although not a small market station, the success WGAR, Cleveland, has enjoyed in selling the period preceding the midnight hour should be of particular interest to the small stations.

“Parade of Musical Hits,” the late evening WGAR program has been sponsored by the same advertiser for three and one half years. The show is presented from 11:15 P.M. until 12:00 midnight on a Monday through Saturday schedule.

This popular program has been on WGAR since September, 1942 for the Bailey Department Store of Cleveland. The show features twelve of the most popular musical selections of the day and a brief round-up of sports news, results from games played during the day and evening. Jack C. Roeder, Sales Promotion Manager, reports that only three commercials are used during the show, attesting the sponsor’s awareness of good radio production, and the efficiency of radio selling power when based on good taste and high entertainment value.

“Hour of Dreams,” a forty-five minute nightly program, broadcast over WMAH, Washington, D. C., is sponsored by the P. J. Nee Furniture Company. This show of soft classics and semi-classics on recordings is heard each evening from 11:15 until 12:00 midnight. This late hour commercial has been on the air for some six years in Washington. It will soon begin under the same sponsor on WPIK in nearby Alexandria, Virginia.

A studio announcer assumes the job of handling the program, which is done on a “personality” basis—smooth, soft diction to fit in with the music. No price or item of advertising is included, simply institutional plugs for the sponsor.

NETWORK CO-OP SHOWS ATTRACT VARIETY OF SPONSORS

NAB Small Market Stations Divisions is securing information on effective selling of network co-op shows (see NAB REPORTS, page 388). A representative cross-section of stations have been asked to supply complete information on how these shows are sold and serviced.

Simon Goldman, general manager of WJTN, Jamestown, New York, has reported that his sales department has enjoyed above the average, success in selling co-ops. Mr. Goldman reports, “The reason for the success of these shows is based on multiple factors.

1. It is a big-time live show.
2. The cost is very much in line and, in fact, less than most ‘name’ transcribed features.
3. Most co-op shows are on a strip basis.
4. The commercial time allotted is well planned and introduced effectively.
5. Local Production is made easy by accurate timing.
6. Effective merchandising and promotion tie-ins are supplied by the network.
7. Prestige to the local advertiser by a network show.
8. Overall production is always tops.

“I have covered the more obvious of the reasons that co-ops are a success on our station. Naturally, our sales staff finds some of the shows are not as good as others, usually from the standpoint of content. The salesmen themselves are sold on co-ops and have been able to permeate that same feeling among the advertisers. ABC has done an outstanding job in providing our salesmen with all types of sales aids to make selling easier. Each salesman gets individual brochures, rather than just one for the whole staff. All are on the mailing list of the network co-op department and get releases of all the information as it is made available. ABC does an excellent job of preparing sales aids and also in merchandising after the show is sold.”

“We believe in them and feel that most stations feel the same way we do in appreciating the fact that they are available because we can translate them into good vehicles for our local advertisers.

“The promotion tie-ins that the local advertisers use vary on occasion. Usually when the sponsorship is

(Continued on next page)
begun there is a complete campaign. When Bahauke spoke at nearby Chautauqua Institution, Bigelow’s ran quite a promotion on his appearance there, and also on his broadcasting from the High School Auditorium.

"Here’s a list of co-op shows sponsored over WJTN: Martin Agronsky, Mon. through Fri., 8:00-8:15 a.m., sponsored three years by National Worsted Mill (Local Plant); John Kennedy, Mon. through Fri., 2:00-2:15 p.m., two years by Field & Wright Furniture Company, Field and Wright sponsored ‘Correspondents Around the World’ for a year and a half and then switched to this show; Bahauke, Mon. through Fri., 1:00-1:15 p.m., five years, Bigelow’s Department Store; Ethel and Albert, Mon., Wed., Fri., 2:15-2:30 p.m., sponsored for thirteen weeks by Red & White Food Stores; Ethel and Albert, Tues., Thurs., 2:15 to 2:30 p.m., one year, Brown Bilt Shoe Store; Walter Kiernan, Mon. through Fri., 6:30-6:45 p.m., by Kendall Refinery (Gasoline & Oil) for two years; Headline Edition, Mon. through Fri., 7:00-7:15 p.m., one year, Richfield Oil Co. (Gasoline & Oil); Harry Wismer, Saturdays, 6:30-6:45 p.m., sponsored for thirteen weeks by Croydon Clothes (Men’s Wear Store).

PROGRAMS ON VACATION NEWS

Anticipating the greatest interest in vacations and recreations this season, WLAP, Lexington, Kentucky, has inaugurated special informative vacation programs. Among the first scheduled is "Know Your Kentucky," a digest of interesting places to go within the State. Another is "Holiday at Harrington," giving information on lodges, hotels and accommodations, fishing conditions, swimming and other activities centered around this mecca for sportsmen and vacationists. "Vacation Time," a third series, gives the listener information on the Cumberland Mountains, Cumberland Falls, and the scenic beauty that may be enjoyed by trip or vacation into this historical range of mountains.

Your sales department may be interested in the WLAP programs of vacation information. This type of vehicle is a natural for sponsorship by a sporting goods shop, garage (tune up the old motor, etc., for that vacation trip), wearing apparel store and others.

STATION EXECUTIVES VISITING NAB HEADQUARTERS

Station managers, sales managers, program directors and other key personnel of small market stations are making it a point to stop in at NAB headquarters in Washington while on trips to the East. They have found that much valuable information can be obtained on personal contact. Executives from the small stations have found these trips to NAB both educational and informative. The new and enlarged departments are rendering additional services which are helping to improve station operation and increase revenues. All small station executives should make special efforts to stop in at NAB headquarters when in the vicinity of Washington, according to statements by recent small market station visitors.

The committee reports that this formula is now widely used by the majority of stations. Each station, of course, will establish its own hourly base rate; the committee suggests that following the above formula, once the hourly base rate is established, will provide uniformity in the rate structure for lesser time periods.

SALES MANAGERS NAME REQUESTED

Some sales managers at the various NAB district meetings have reported to Frank Pellegrin that they have not been receiving the promotion material from NAB’s Broadcast Advertising department. It is requested that a check be made to see if promotion material is reaching your station.

In cases where sales executives have changed positions during the year, it is possible that promotion material from the Department of Broadcast Advertising is being sent to the former sales manager. The Station or sales manager is requested to furnish NAB with the current name of the sales manager. This will help to assure the receiving by stations of NAB promotion material.

JUDGE MILLER SPEAKS AT UN MEETING

NAB President Justin Miller addressed the Commission on Human Rights of the United Nations Monday (13) on the subject “Freedom to Listen.” His remarks were as follows:

"In the United States there are approximately 1000 broadcasting stations. Needless to say they play a large part in furnishing information to the American people, both international and domestic in nature. The operators of these stations have formed the Association, which I represent here today.

"The broadcasters of America join heartily in the statement recently made by the Secretary General of the United Nations, that: 'The aims and objective of the United Nations can only be achieved if they are fully understood by all the peoples of the world. To reach them it is vital that there should be maximum freedom in all information media, including those two great organs—the press and the radio.'

"General David Sarnoff has proposed to you that the United Nations should: 'Establish the principle of “Freedom to Listen” for all peoples of the world.’ This,' he says, 'is as important as “Freedom of Speech” and “Freedom of the Press”.

"Whether we call it freedom of speech, freedom of the press or freedom to listen, in its essence it is the right of the people to be informed, fully, on all possible subjects, and on all possible occasions, without qualification or reservation.

"Perhaps it is a matter of emphasis or of individual approach to the problem. Freedom to listen would be valueless without freedom to provide information to which one can listen.

"We hope that all will join in acceptance of these general principles; and we hope that it may be possible to secure agreement, also, on methods for vitalizing and implementing them.

"We believe that to achieve the necessary maximum freedom in all information media there must be competent, unfettered reporters and interpreters, who enjoy access to sources of information; who are free to tell what they see and hear; who have adequate facilities for compiling and distributing the information which they discover.

(Continued on next page)
"We believe in order to achieve maximum freedom in information media, internationally, there must be freedom on the local and national level. Government slanting of information, no matter how subtle; government control of opinion, no matter how indirect, is inconsistent with the idea of that maximum freedom which is necessary for understanding, by the peoples of the world, of the aims and objectives of the United Nations."

"We may as well face, frankly, the fact that government 'by the lifted eyebrow'—or by other forms of intimidation—is fatally destructive of the objectives which we seek. And this may be true with respect to control of the facilities, or means, of communication as well as of those who would use them. We believe that unless the people of each country can assure, to themselves, the freedom which we desire for all peoples, the major objective will be largely unattainable.

"We have learned in this country that understanding depends upon freedom to criticize as well as to commend; upon freedom to criticize, as well as commend those in power as well as others; upon freedom to utter ideas with which we do not agree. It is well known that many of the great discoveries of science have had to struggle for recognition against the vested interests of those who have grown old in accepted prejudices. Without maximum freedom in information the progress of scientific discovery would be stalemated.

"It is perhaps not so well understood that this is true, also, in other fields than science. It is a curious fact that some of those who have most to gain, and who have gained most, by reason of such guaranties as freedom of speech, are willing to surrender guarantees, hoping thereby to make secure advantages which have been already gained. It seems to be a human failing to fail government controls to perpetuate, not only the values of the past, but its mistakes as well. Unless we are willing to permit free interchange of ideas, in the marketplace of public and private thinking, there will be no sifting of truth from falsity; no progress in human affairs; no achievement of the aims and objectives of the United Nations.

"I am sure that I speak for the broadcasters of America when I pledge to you, full cooperation in your efforts to secure and maintain that maximum freedom, in all information media, which is vital to common understanding, and unified action among the peoples of the world."

---

**FM Department**

**COMMISSION ACTIONS ON FM SUMMARIZED**

Having announced the granting of six more construction permits for new FM stations and the approval of engineering details of six additional applications previously conditionally granted, the FCC Wednesday (22) outlined the status of its actions on FM applications.

The current picture is as follows:

- 48 stations licensed
- 52 stations under construction (authorized prior to wartime restrictions)
- 441 conditional construction permits issued since October 8, 1945
- 126 applications in hearing
- 261 pending applications on which there has been no action.

In six of the cases granted since last October, the grantees have been authorized to operate with temporary equipment so as to permit the immediate establishment of an FM service to the city in which they are located.

Reporting on the progress it is making in converting the 441 outstanding conditional grants into actual permits, the Commission stated that in 206 of the 441 cases the applications already have been examined as to engineering details. In 115 of these 206 cases additional information has been requested from the applicant and has not yet been received.

In the other 90 cases which have been considered as to engineering plans there are 29 cases in which the engineering plans have been approved by the Commission, but the issuance of a construction permit is delayed by failure of the applicant to submit the requisite statement as to his program plans. In the remaining 61 cases there are 34 where engineering reports have been prepared which will be submitted to the Commission in the near future looking toward the issuance of construction permits (or engineering approvals in lieu thereof), where the required statement of program plans has not been submitted.

In the other 27 cases engineering reports are being prepared. In considering the engineering details of all the applications which have been conditionally granted to date, the Commission has held 69 engineering conferences with the applicants or their representatives. In 62 other cases the engineering department has taken technical questions up with the applicant either by letter or by telephone.

In addition to the 493 cases where construction permits or conditional grants for new stations have been made since October 8, there are 122 cases where the applications have been designated for hearing because the number of applications for the communities involved exceeds the number of channels available. In addition four applications have been designated for hearing on the multiple ownership issue.

There are 261 other applications on file where no action has as yet been taken. These, for the most part, are either applications which have only recently been filed, or applications from a person or concern who has already received one grant.

(Ed. Note: The new construction permits and engineering approvals are listed under "FCC Actions.")

---

**News Clinics**

**CLINICS CONTINUE STRESS IMPORTANCE OF LOCAL NEWS COVERAGE**

Two propositions for improving standards of radio news, originating at the NAB-Minnesota Radio News Clinic, Minneapolis, May 17, may be expected to have a constructive effect throughout the entire industry. The propositions passed unanimously in polled station vote provided:

1. A week of annual study on the campus of the University of Minnesota in which news, special events and public affairs will be included.

2. Yearly Radio News Clinic.

Director Ralph D. Casey of the University's School of Journalism was on hand to accept the plan for the week of campus study. Richard M. Day, WDGY, clinic chairman, who presided throughout the clinic appointed a committee to work with the University. Broadcasters from the 11th NAB District and surrounding states are to be invited to participate.

Approval of the industry's stand for the establishment of news departments, for enlarged local coverage and for more rewriting was detected by current and projected practice as reported by the broadcasters. Managements of two stations said that they had established local news departments with a competent, full-time chief since January 1, 1946. C. R. Closway, KWNO, Winona, announced that as a result of the meeting, KWNO would immediately set...

(Continued on next page)
up its own news department and proceed on an independent basis without newspaper tie-in.

Norman Boogs, new WLOL (Minneapolis) chief, reported that the old order of things was out and that WLOL could be counted on to do a thorough and complete news job henceforth.

Craig Campbell, former station manager and INS bureau chief in Omaha for the past three years, was one of the WDGY staff present. This station has recently come under new ownership. While Mr. Campbell did not announce plans, the fact that a news executive was the first to be brought into the new WDGY picture indicates that this station intends to do a thorough news job.

Chairman Day explained that this was a "working" meeting with everyone present urged and expected to contribute his views and ideas. It turned out to be a "working" clinic. Subject matter was thoroughly explored and conclusions reached. Subjects and discussion leaders follow:

Gathering Local News and Construction of Newscasts, John Verstraete, KSTP; Training Radio News Writers, Mitchell V. Charnley, University of Minnesota School of Journalism; Farm News Formula for Local and Regional Stations, Larry Haeg, WCCO; Importance of State Sports, Dean Sherman, WDGY; Effective "Special Events" Pickups, Sig Mickelson, WCCO; Radio News Writing and Rewriting, Cliff J. Rian, WTCN; Desirable Balance between International and Domestic News, John Raleigh, WCCO; the Future of News, Norman Boggs, WLOL; the NAB Radio News Committee, Arthur Stringer, NAB.

Stations Must Gather Local News

Mr. Verstraete, KSTP, stated that a station must make up its own mind that it has to gather its own local news. No one else can do it. He reported that he had had excellent luck in using non-newspaper-trained writers. One advantage they have, he asserted, was their ability to gather perspectives. While many newspaper-trained writers can give accurate facts, they sometimes fall down when it comes to making the story crystal clear. Mr. Casey, of the University of Minnesota, commenting on Mr. Verstraete's assertions, said that newspaper failure to give perspective may force papers to give the story in a way that can be readily understandable by listeners, and he cited several instances to illustrate.

At KSTP, the entire staff is news-minded. Mr. Verstraete promotes the cooperation of the staff by ordering $2 for every tip given his department which becomes a story. Best story of the month gets an additional $10. There is an average of 25-30 local stories per month with a top cost of $75.

Wally Stone, of AP, a former station manager, reported that in many locations, high school journalism students and others are giving splendid assistance in tipping radio news departments on a regular basis. This plan proved out at KYSM, Mankato. Enough stories are produced for one full program per day.

Ray Thompson, full-time news man at KROC, Rochester, from March, when the department was established, presents the station's prime local news show at 12:45 p.m. On the 5:50 p.m. news program, there are 3-4 minutes devoted to the additional local news. Area news comes at 10:00 p.m. Station now gets excellent cooperation from Mayo Clinic. Station UP, represents special events broadcasts said Sig Mickelson, are roughly parallel to the photographic service of the papers. They should be in the hands of news departments. It is the news department's duty to keep abreast with and anticipate special events.

Larry Haeg, form news director, WCCO, believes it unwise to distinguish farm news from any other kind of news. Generally speaking, so far as news is concerned, farmers are interested in the same thing as other listeners. True weather reports mean more to them and so do markets. But the big difference comes with farm service information. Stations with sizable farm audiences are definitely charged with the responsibility for carrying such programs. This is information on their way of living, on their business. And it is wrong to call "farm service programs", "farm news".

For guidance on what listeners want in sports, Dean Sherman, WDGY sports editor, gets out and listens to what fans have to say.

Jack Dunn, general manager, WDAY, Fargo, N. D., outlined the local and area news procedure at his station. One man is assigned to the local news beat. Most stories are out of the way by noon. Then same man makes regional correspondent checks.

His views specifically requested by those in charge of the clinic, Mitchell V. Charnley, of the University of Minnesota, read a statement on the second function of presenting news—"of pointing it up in its relation to public welfare." His one-page statement is included in this report because it raises the news horizon. It was brought out in discussion that management should attempt this second function only with qualified personnel. Mr. Charnley's statement follows:

Charnley's Statement

"Radio news has always been considered one of the broadcasting industry's significant contributions to the public interest. Too often, however, it has been little noticed. In fact, many times, unfortunately, it has sometimes fallen down when it comes to making the story clear. Furthermore, the public often has not been made aware of its value. This situation has been brought out in discussion that management should attempt this second function only with qualified personnel."

Clinic Asks NAB Help

The clinic by unanimous vote adopted a resolution requesting NAB to prepare a workable treatise on the laws of libel and slander, etc. as applied to radio broadcasting.

Radio News Editor Responsible to Management

During the clinic, information was sought on the responsibility of the news editor. This question was clarified by referring to the recommendation of the NAB radio news committee, endorsed by the NAB Board of Directors, February 28, 1945. It reads in part:

"... in order to insure an accurate and impartial presentation of news station management must exercise (Continued on next page)"
unusual care in the selection of a radio news editor. He must be competent and capable of accepting full responsibility for the content of all news programs and such content must continue to be based entirely on his judgment, without interference by sponsor or any outside agent.” This also means that the news editor is to be responsible directly to management.

**Registration**

**Television**

**COMPETE FOR WEST COAST TELEVISION GRANTS**

Hearings by the FCC on west coast television applications started last Monday (20) in Los Angeles, and were marked by their spirited competition, with eight applicants to date seeking approval for the available seven channels.

During the first two days of the hearings, the testimony covered only two applicants, that of Station KFI and Howard Hughes. On Wednesday, portions of three applicants' testimony was heard including the remaining of KFI's, all of the Don Lee's and the opening testimony of NBC. It was estimated that the hearings would continue into this week.

**General**

**NAB HEAD TO ADDRESS AFA**

President Justin Miller is scheduled to speak at the general session luncheon at the convention of the Advertising Federation of America in Milwaukee on Tuesday (28).

This year's convention is the Federation's first since 1943. The subject of Judge Miller's address is “Broadcasting, Advertising and Free Enterprise.”

**INDUSTRY MEN IN NEW POSITIONS**

Three broadcasting industry executives were named to higher positions by their respective organizations, NAB learned last week.

G. Emerson Markham was named manager of all General Electric broadcasting outlets, including WGY, WGFN and WRGB. Mr. Markham succeeds Kolin Hager in the WGY managerial post, assuming these new duties in addition to his previous work as manager of the FM and television stations.

William E. Rine has been promoted from his position as commercial manager at WWVA, to managing directorship of the Wheeling station, succeeding the late George W. Smith who died on May 9. (REPORTS, p. 371)

In Detroit, Owen F. Uridge, appointed acting general manager of WJR after Leo J. Fitzpatrick resigned two weeks ago, was elected vice president and general manager of the station in a regular session of the organization's board of directors.

**COLESON CITED BY TREASURY**

Robert C. Coleson, NAB west coast representative, has been cited for his work as Deputy Director, OWI, and later with the Treasury Department in handling network allocations and developing special network programs for the bond drives.

Mr. Coleson was awarded the Treasury Department's Silver Medal and a certificate “For distinguished service rendered in behalf of the War Finance Committee” from Secretary Fred M. Vinson.

**STATION “LOANS” STAFF TO COMPETITOR**

Competition took a brief holiday in the Miami vicinity on Wednesday (22) when staff members from WQAM moved to WKAT, Miami Beach, to permit employees of the latter station to enjoy a picnic and boat ride en masse.

The agreement called for a complete operating crew, including announcers and engineers, the program director and traffic manager, to handle programs, business and engineering for the entire day.

WQAM employees will have their day in the near future, when WKAT will send a staff to the Miami Station so that they in turn may enjoy a holiday with the entire staff in attendance.

**PHILADELPHIA OUTLETS AUGMENT NEWS PERIODS DURING NEWSPAPER STRIKE**

When Philadelphia newspaper deliveries were curtailed by the strike of truck drivers, local stations helped to fill the gap in news coverage by augmenting their news services to keep listeners completely informed about world news developments as well as local events.

Though the newspaper publishers continued to print all editions, deliveries were limited to suburban and out-of-town points. This type of delivery was possible since the union controlling out of the city trucking did not strike.

Radio stations inaugurated individual methods of bringing the news to their listeners, including more daily news periods, lengthening of certain news programs, utilization of a public address mobile unit to bring news to shopping centers and other business districts, erection of a news bulletin board at a station's headquarters, the installation of a special switchboard to answer telephone calls to an emergency telephone information service, reading of comic strips and additional sports programs.

**District Meetings**

**DISTRICT MEETINGS SET ATTENDANCE RECORD**

Setting a new record for attendance at NAB district meetings, a total of 1973 representatives of radio broadcasting stations and allied fields registered at the seventeen regular district meetings held this year. From NAB mem-

(Continued on next page)
were made for cooperation by stations in providing NAB's
advertisers presented representative opinions of those groups.
entire industry. Such basic information includes existing
Employee-Employer relations department with essential
musicians' organizations.
It is not intended to take the place of
standings on general problems involved in the union-in¬
efforts being led by Judge Miller to establish basic under¬
committee and the American Federation of Musicians, the
contracts with unions, wage and hour data, etc.

MAY 27, 1946-410

time this fall, basic material for member stations would be
available. It was estimated that some¬
greater extent in selection of music.
BMB has made in its first year of operation. He disclosed
its stand, and pledged support to Judge Miller in his op¬
position to government program control.

In discussions of BMI, station executives showed con¬
tinued interest in the music licensing problems. BMI was
highly commended for the contributions it has made in pro¬
viding an industry music source. The meetings stressed the
importance of station management's supervision to a
viding an industry music source. The meetings stressed the
industry better. One of my deepest impressions from
these meetings is the constructive manner in which the
individual broadcasters participate in the discussions, and
their sincere concern for the welfare of the entire industry.
My thanks go to the broadcasters for the cooperation they
have shown in all our meetings."

Though all district meetings covered the full range of
industry problems, the meetings which were held sub¬
sequent to the issuance of the FCC program report devoted
considerable time to discussion of the action on pro¬
gramming taken by the commission. All meetings held
after the report was issued challenged FCC authority on
its stand, and pledged support to Judge Miller in his op¬
opposition to government program control.

In discussions of BMI, station executives showed con¬
tinued interest in the music licensing problems. BMI was
highly commended for the contributions it has made in pro¬
viding an industry music source. The meetings stressed the
importance of station management's supervision to a
greater extent in selection of music.

BMB was represented at all seventeen district meetings
by its president, Hugh Feltis, who outlined the progress
BMB has made in its first year of operation. He disclosed
that 674 stations are subscribers to BMB, and that the first
survey was well underway. It was estimated that some¬
time this fall, basic material for member stations would be
available.

Mr. Feltis was assisted at each meeting by members of
ANA and AAAA. Leading agency executives and adver¬
sisers presented representative opinions of those groups.
In all districts, BMB was given a vote of confidence.

In the employee-employer relations discussions, requests
were made for cooperation by stations in providing NAB's
Employee-Employer relations department with essential
basic material that will enable it to render service to the
entire industry. Such basic information includes existing
contracts with unions, wage and hour data, etc.

With respect to the discussions between the industry
committee and the American Federation of Musicians, the
efforts being led by Judge Miller to establish basic under¬
standings on general problems involved in the union-industry
relations were approved. It was pointed out
that conclusions which might be reached in the industry-
music conferences are not intended to take the place of
negotiation between individual broadcasters and the local
musicians' organizations.

LAST REGULAR DISTRICT MEETING

With District Director George D. Coleman, WGBI,
presiding, representatives from 89 of the 42 NAB mem¬
er stations in the third district heard President Justin
Miller's opening discussion of the meeting in Philadelphia
on Thursday (16).

Judge Miller stressed the program and music prob¬
lems, and followed with a discussion on the general
problems confronting the broadcasting industry.

One of the highlights of the Philadelphia meetings was
a luncheon address by Alfred C. Paddison, Australian
broadcasting executive. (Reports, p. 386)

A summary of the resolutions adopted by broadcasters
in the third district as recorded by the resolutions com¬
mittee follows:

Resolved, That the Broadcasters here assembled whole¬
heartedly approve and endorse the stand taken by the
NAB with respect to the report of the FCC entitled "Pub¬
lic Service Responsibility of Broadcast Licensees" and
pledge our continued support to President Miller in his
actions relative thereto.

Commend the steps taken to establish a common ground
of understanding on general broad principles between our
industry and the American Federation of Musicians as a
basis for negotiation between individual licensees and the
A. F. of M. Locals in their area.

Commend B. M. B. and urge careful study of techniques
as a basis for the possibilities of its continuance beyond
the present survey.

Pledge larger support to B. M. I. and urge management
of all stations to give greater attention to the selection of
music for use on their facilities.

Extend to President Justin Miller a wholehearted en¬
dorsement of his actions and leadership during the first
six months of his administration and pledge to him our
unswerving support in achieving the objectives which he
has set for the industry and we further extend to President
Miller, Frank Pelegrin, C. E. Arney, Jr., of the N. A. B.
staff, and H. M. Feitls of B. M. B., our appreciation of the
splendid contributions each has made to this meeting.

Extend to the Philadelphia Broadcasters, who have been
our hosts for this meeting, our grateful appreciation for
their many courtesies.

FIFTEENTH DISTRICT RESOLUTIONS

The following resolutions adopted at the Fifteenth District special meeting arrived too late for inclusion in Reports last week. For complete story of the meeting, see previous issue, p. 386:

"Fifteenth District NAB in session in Reno May 13-14, 1946, herewith unanimously requests that the public awards plan as acted upon by the last NAB Board of Directors be submitted to the national convention NAB, for consideration by the membership, and that complete details of the plan be sent to all NAB members at least three weeks prior to said convention."

"Fifteenth District NAB in session in Reno May 13-14, 1946, herewith suggests to NAB that instead of district meetings as held in the past in the 11 Western states, that a consolidated meeting including districts 14, 15, 16 and 17, be held jointly. That said meeting shall be a four-day session, and that one day be allowed for individual districts to hold their own closed meetings, and that the location of the meetings be rotated among the four districts, with each district being host every fourth year. Such a plan would save travel time and expense on the part of NAB staff members and would allow for more NAB department heads to participate in the meetings."

Whereas, this is the first meeting of the 15th district NAB since issuance of the FCC report entitled, "Public Service Responsibility of Broadcast Licensees," and

Whereas, the 15th district NAB at this session is of the belief that said report constitutes a direct threat to freedom of speech, with use of powers by FCC never intended for said body, and

Whereas, radio broadcasting is recognized as the greatest medium of mass communication yet devised, and therefore representatives of this medium in the public interest must resist attempts to abridge the constitutional right of free speech, it is hereby resolved, that 15th district NAB pledge its loyal support to President Justin Miller in his actions and stand on said report.

PETITION:

"To the National Headquarters of NAB:

During the astonishing insurrection of prisoners in Alcatraz prison, in San Francisco Bay, the intense interest in this outstanding news story induced the district directors to hold a news conference, on the island, for the first time in the prison's history.

The nationwide interest in this story by virtue of its unusual developments, plus the fact that it was the first modern news conference held on this historic island made the conference one that no radio, newspaper, or wire service news editor could conscientiously leave un-covered, and one any news reporter would strongly desire to attend for the purpose of reporting the story to the public.

"However, when the warden or his representative, scheduled the news conference and transportation by boat to the island, wire services and newspaper men were notified of the conference, whereas radio news men were never officially notified of the conference. Two radio news men did hear of the conference indirectly, and managed to talk their way onto the boat and into the conference. This fact in no way alleviated the situation that here was discrimination against radio news men. We submit that this is not the first instance concerning lack of understanding on the part of officials or their representatives of the importance of the news broadcasting by radio stations or stations and radio networks of the United States.

"The 15th district of NAB earnestly petitions national headquarters to publicize the radio industry and individual stations, urging vigilance at all times in pressing for equal representation for radio news men to conferences or releases of news."

FCC

FCC VETERANS RETIRE

The Federal Communications Commission on Thursday (22), announced the retirement of two veteran officials, and the change from acting to permanent status for three others.

The retiring employees are V. Ford Greaves and Dr. L. P. Wheeler. Both received commendation from the commission.

James E. Barr was appointed chief of the Standard Division, Cyril M. Braun, chief of the FM Division, and Curtis B. Plumber, chief of the Television Division of the Broadcast Branch of the Engineering Department. The three had served previously in an acting capacity.

Mr. Greaves, one of the commission's earliest employees, entered the radio service of the Commerce Department in 1912. He is retiring as Western Area Supervisor. Dr. Wheeler has been principal physicist since he joined the Technical Information Division of the Engineering Department in 1936.

FCC APPROVES 13 STANDARD BROADCAST CP's

FCC actions on Friday (24) included the granting of thirteen construction permits for new standard broadcast stations.

Complete details on these permits and other commission actions will be found under "FCC Actions" in this issue of Reports.

FCC ANNOUNCES NEW MEETING DAY

The FCC on Wednesday (22) announced that its regular en banc sessions will be held on Thursday at 10:30 a. m. instead of Wednesday as has been the practice.

The new meeting day is scheduled to begin on June 6.

Public Interest Programming

STATIONS TO LEAD IN BOND CAMPAIGN

That the nation's broadcast stations will take their usual place of leadership in promoting bond sales dur-

(Continued on next page)
Emergency Food Collection

500 million men, women and children throughout war-torn Europe and Asia are hungry, an appalling number of them facing actual starvation. In their long tradition of generosity toward those in need, the American people have shown their willingness to share their good fortune. They have shown it in their readiness to limit their consumption of urgently needed relief foods, by voluntarily "saving and sharing" wheat, fats and oils so that more can be shipped overseas. Here is an opportunity for everyone to make a direct and personal contribution to help prevent starvation. Americans are being asked to simply contribute either tinned food or cash to buy and transport food—preferably cash. The food realized from such gifts of foods packed in tin cans. Money contributions are preferred because they eliminate the expenses of collection, packaging, and shipping, and make possible the purchase of more food by buying in quantity lots at lower prices. Cash or checks may be given to the Emergency Food Collection Committees, or mailed to Emergency Food Collection, New York City. If unable to contribute money, listeners should search their pantries and kitchens for tinned food to contribute...locations of food collection depots can be learned from local newspapers or radio stations. (Fact Sheet No. 25-A)

Hospitals Need Student Nurses

A study conducted by the American Hospital Association shows that 2 out of 3 hospitals throughout the country are suffering from acute nurse shortages. In 1945, hospitals registered by the American Medical Association reported an increase of 220,544 admissions over 1944. A large percentage of these hospitals have been forced to close beds and facilities—in some cases, even whole floors or wings. As a result, literally thousands of patients are doing without adequate nursing care. Forty thousand student nurses must be recruited during the remainder of 1946 to help in alleviating the current situation, and insure adequate nursing care for the nation in the future. Recruitment for the U. S. Cadet Nurse Corps was terminated last fall, and today the shortage of local student nurses in training in the hospitals of our country. A strong nation-wide effort must be made, therefore, to interest young women in nursing as a career; to urge them to enroll at once to fill existing vacancies in schools of nursing, and at the same time provide greatly needed help for our hospitals. Explain that nursing is a wonderful opportunity for young women to prepare for a lifetime profession and for superior home-making at very low cost, if they are between the ages of 17 and 35, and are high school graduates or college students of good standing. Emphasize that a number of college schools give a Bachelor of Science degree in nursing. Emphasize the fact, that, compared with average net earnings in other vocations for women, nursing salaries rate high. Point out that complete information on how to become a student nurse should be obtained at once from either The Administrator or the director of nurses of the hospital nearest the interested applicant’s home. (Fact Sheet No. 9-C)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between May and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day unless we help. United Nations Relief & Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 3,300 calories per day. Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The “have” countries, including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share—of the rest of the world—of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June. Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions. By reducing their consumption of all wheat and rice products and fats and oils...Eating more of the plentiful foods...Eliminating all food waste and turning in all used fats...Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-B)

Safety on the Highways

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high of more than one a minute...all day...every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was...$1,450,000,000...almost $1 billion dollars. In the last four months after gas rationing ended, traffic deaths jumped 37%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help “put the brakes” on America’s rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chances he may be taking today...this week...jaywalking...trying to beat the light...speeding...driving when he has had a few drinks...neglecting repairs on his car...ignoring signals at crossings. Your aim is to make each listener decide right then and there never again to take a “little” chance with injury or death. (Fact Sheet No. 20-B)

Federal Communications Commission Docket

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 27. They are subject to change.

(Continued on next page)
Monday, May 27

NEW—Citrus Belt Broadcasters, Inc., Winter Haven, Fla.—C. P. 1490 kc., 250 watts, unlimited time.
NEW—Winterhaven Broadcasting Co., Carl Connie Floyd and Esther Ferris Floyd, partners, d/b as—C. P. 1490 kc., 250 watts, unlimited.
WEAU—Central Broadcasting Co., 293 South Rorstaw St., Eau Claire, Wis.—C. P. 5 KW night, 5 KW day.
KHTH—Texas Star Broadcasting Co., d/b (Roy M. Hofheinz and W. N. Hooper), Houston, Texas—C. P. 790 kc., 1 KW night, 5 KW day.
NEW—Veterans' Broadcasting Co. (Max H. Jacobs, Douglas B. Hicks and Thom J. Harling, Jr.), Downtown Office Bldg., Houston, Texas—C. P. 790 kc., 1 KW night, 5 KW day.
KFYO—Plains Radio Broadcasting Co., Lubbock, Texas—C. P. 790 kc., 5 KW.
NEW—Veterans' Broadcasting Co. (Max H. Jacobs, Douglas B. Hicks and Thom J. Harling, Jr.), Downtown Office Bldg., Houston, Texas—C. P. 1230 kc., 250 watts, unlimited.
NEW—Radio Broadcasting, Inc., 135 Benton St., Hot Springs, Ark.—C. P. 710 kc., 1 KW night, 10 KW day, DA-night, unlimited.
NEW—Arkansas Valley Broadcasting Co., 600 Block, Garrison Ave., Chamber of Commerce Bldg., Fort Smith, Ark.—C. P. 710 kc., 1 KW night, 1 KW day, DA-night.

To Be Held in the Court Room, City Hall, at Griffin, Georgia

KWEU—Radio Station KWEU, Griffin Hotel, West Solomon St., Griffin, Ga.—C. P. 1450 kc., 250 watts, unlimited.
KWEU—Radio Station KWEU, Griffin Hotel, W. Solomon St., Griffin, Ga.—C. P. 1450 kc., 100 watts day, 100 watts night, unlimited.
KWEU—Radio Station KWEU, Griffin Hotel, West Solomon St., Griffin, Ga.—C. P. 1450 kc., 100 watts, unlimited.

Tuesday, May 28

Further Hearing

NEW—The Wm. H. Block Co., Indianapolis, Ind.—For FM facilities.
NEW—Evansville on the Air, Inc., Indianapolis, Ind.—For FM facilities.
NEW—WFBM, Inc., Indianapolis, Ind.—For FM facilities.
NEW—Sciepps-Howard Radio, Inc., Indianapolis, Ind.—For FM facilities.
NEW—Indiana Broadcasting Corp., Indianapolis, Ind.—For FM facilities.
NEW—Capitol Broadcasting Corp., Inc., Indianapolis, Ind.—For FM facilities.
NEW—Universal Broadcasting Co., Inc., Indianapolis, Ind.—For FM facilities.
NEW—Indianapolis Broadcasters, Inc., Indianapolis, Ind.—For FM facilities.

Wednesday, May 29

KYW—Westinghouse Radio Stations, Inc., 1619 Walnut St., Philadelphia, Penna.—C. P. 1060 kc., 50 KW night, 50 KW day, directional antenna, unlimited.

Wednesday, May 29

Further Hearing

Wednesday, May 29

Consolidated Hearing

To Be Held in Madison, Wisconsin, in Hearing Room, State Capitol
NEW—Radio Wisconsin, Inc., Madison, Wisc.—C. P. 1480 kc., 1 KW night, 1 KW day, unlimited, DA-night.

WHBC—The Ohio Broadcasting Co., Canton, Ohio—C. P. 1480 kc., 5 KW, unlimited, DA-night.

Friday, May 31

WGRC—Northside Broadcasting Corp., 407 Vincennes St., New Albany, Ind.—C. P. 790 kc., 1 KW night, 5 KW day, DA-night.
WKPT—Kingsport Broadcasting Co., Inc., 222-224 Commerce St., Kingsport, Tenn.—C. P. 790 kc., 1 KW, unlimited, DA-night.

Friday, May 31

Friday and Saturday, May 31 and June 1

To Be Held in City Council Chamber, City Hall, Danville, Kentucky

NEW—Commonwealth Broadcasting Corp., Danville, Ky.—C. P. 1230 kc., 100 watts, unlimited.
NEW—Danville Broadcasting Co., Danville, Ky.—C. P. 1230 kc., 250 watts, unlimited.

Saturday, June 1

Further Hearing

To Be Held in the Office of Mr. Charles Hubert, Room 7433

NEW—Norfolk Broadcasting Corp., Norfolk, Va.—C. P. 1220 kc., 250 watts, daytime.
NEW—Fidewater Broadcasting Corp., Norfolk, Va.—C. P. 1230 kc., 100 watts, unlimited.

Federal Communications Commission Actions

AM APPLICATIONS GRANTED

NEW—West Memphis Broadcasting Corp., West Memphis, Ark.—Granted CP for a new station to operate on 990 kc., 1 KW, daytime only. (B3-P-4491)
NEW—Tallahassee Appliance Corp., Tallahassee, Fla.—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time. (B5-P-4710)
NEW—Charles R. Love, Calexico, Cal.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-4822)
NEW—Robert L. Weeks, Red Bluff, Cal.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-4972)
NEW—News-Press Publishing Co., Santa Maria, Cal.—Granted CP for a new station to operate on 1100 kc., 250 watts, unlimited time. (B5-P-4710)

(Continued on next page)
NEW—Big Horn Basin Broadcasting Co., Cody, Wyo.—
Granted CP for a new station to operate on 1400 kc.,
250 watts, unlimited time. Site to be determined. 
(B5-P-4497)

NEW—Douglas D. Kahle, et al., d/b as The Northern Colo.
Broadcasting Co., Fort Collins, Colo.—Granted CP
for a new station to operate on 1400 kc., 250 watts,
limited time. (B5-P-4676)

NEW—J. Herbert Hollister, Boulder, Colo.—Granted CP
for a new station to operate on 1490 kc., 250 watts,
unlimited time. (B5-P-4629)

NEW—Upper Mich.-Wise. Broadcasting Co., Iron Moun-
tain, Mich.—Granted CP for a new station to operate
on 1230 kc., 250 watts, unlimited time. (B2-P-4676)

NEW—Alpena Broadcasting Corp., Alpena, Mich.—Granted
CP for a new station to operate on 1430 kc., 250 watts,
unlimited time. (B2-P-4667)

NEW—Ariz. Radio and Television, Inc., Mesa, Ariz.—
Granted CP for a new station to operate on 1400 kc.,
250 watts, unlimited time. (B5-P-4694)

NEW—W. C. Lucas and Roy Cox, d/b as Asheboro Broadcast-
ing Co., Asheboro, N. C.—Granted CP for a new
station to operate on 1290 kc., 1 KW, daytime only.
(B3-P-1641)

NEW—James E. Murray, Hutchinson, Kans.—Granted CP
for a new station to operate on 1190 kc., 1 KW, day-
time only. (B4-P-4735)

**TELEVISION APPLICATIONS GRANTED**

NEW—Hearst Radio, Inc., Baltimore, Md.—Granted CP for
new commercial television station; Channel No. 11,
196-201 mc.; 14.4 KW visual power, aural 7.3 KW;
antenna 456 feet. (Bl-PCT-65; Docket 7290) (Comr.
Durr voting for hearing.)

NEW—Radio-Television of Balto., Inc., Baltimore, Md.—
Granted CP for new commercial television station;
Channel No. 13; 210-216 mc; 31.65 KW visual power;
20 KW aural; antenna 410 feet. (Bl-PCT-171)

Granted CP for new commercial television station;
Channel No. 2, 54-60 mc.; visual power 15 KW;
antenna 8 KW; antenna 18 feet. Overall antenna height:
100 feet above ground; 5240 feet above sea level. (B5-
PCT-60)

**FM FINAL CP'S GRANTED**

The following stations, heretofore granted conditionally
which have received engineering approvals, were granted
regular construction permits:

The Troy Record Co., Troy, N. Y.—CP for Metropolitan
station; 92.5 mc. (Channel 229); 12 KW; antenna
636 feet.

Daily Telegraph Printing Co., Bluefield, W. Va.—CP for
Rural station; 97.9 mc. (Channel 250); 186 KW;
antenna, 1,072 feet.

Radio Service Corp., Pocatelto, Idaho—CP for Metropolitan
station; 102.3 mc. (No. 277); 1.8 KW; antenna 65 feet.

Scranton Broadcasters, Inc., Scranton, Pa.—CP for Meta-
politan station; 100.1 mc. (Channel 261); 7.5 KW;
antenna 731 feet.

E. Anthony & Sons, Inc., New Bedford, Mass.—CP for
Metropolitan station; 97.3 mc. (Channel 247); 20 KW;
antenna 500 feet.

Sacramento Valley Broadcasters (a partnership), Marysville,
Cal.—CP for Rural station; 92.3 mc. (No. 222); 38
KW; antenna 2,056 feet.

**ENGINEERING APPROVAL OF FM CONDITIONAL
GRANTS**

Following is a list of applications for which approval of
basic engineering plans were granted by the Commission.
(Note: power given is effective radiated power; antenna
height given is height above average terrain):

Portland Broadcasting System, Inc., Bangor, Maine—Metropo-
litian; 94.3 mc. (No. 232); 10.8 KW; 886 feet.

Lee Broadcasting, Inc., Quincy, Ill.—Rural; 98.1 mc. (No.
251); 23 KW; 620 feet.

Truth Publishing Co., Inc., Elkhart, Ind.—Metropolitan; 1031 mc. (No. 276); 21.6 KW; 422 feet.

Bradford Publications, Inc., Bradford, Pa.—Metropolitan;
97.1 mc. (No. 246); 2.7 KW; 551 feet.

Minn. Broadcasting Corp., Minneapolis, Minn.—Rural; 97.1
mc. (No. 246); 192 KW; antenna 391 feet.

Hawley Broadcasting Co., Reading, Pa.—Metropolitan; 93.1
mc. (No. 226); 9.0 KW; antenna 712 feet.

**DESIGNATED FOR HEARING**

N C. Broadcasting Co., Inc., Greensboro, N. C.—Adopted an
order designating application for consolidated hearing.

A. J. Fletcher, Greensboro, N. C.—Adopted an order designating
application for consolidated hearing.

Greensboro Broadcasting Co., Inc., Greensboro, N. C.—
Adopted an order designating application for con-
solidated hearing.

Piedmont Publishing Co., Winston-Salem, N. C.—Adopted
an order designating application for consolidated
hearing.

Burlington-Graham Broadcasting Co., Burlington, N. C.—
Adopted an order designating application for consoli-
dated hearing.

**LICENSE RENEWALS**

The following stations were granted renewal of licenses
for the period ending February 1, 1947:

WGAI, Athens, Ga.; WGH, Newport News, Va.; KFYO,
Lubbock, Texas; KMYR, Denver; KPDN,ampa, Texas.

The following stations were granted renewals for the
period ending August 1, 1947:

WGRC, Louisvillle, Ky.; WDEF, Chattanooga; WCONS,
Columbia, S. C.

The following stations were granted renewals for the
period ending February 1, 1948:

WCBS, Springfield, Ill.; WPAD, Pottawattamie; WBBM, Jack-
son, Mich.; WREK, Rocky Mount, N. C.; WCHL, Olean,
N. Y.; WGOV, Valdosta, Ga.; WFNC, Fayetteville, N. C.;
KRIG, Beaumont, Texas; WASK, Lafayette, Ind.; WGL,
Fort Wayne; WGCN, Gastonia, N. C.; WAPA, Wash-
ington, Pa.; WKIP, Poughkeepsie, N. Y.; WLPN, Suffolk,
Va.; WMAS, Springfield, Mass.; WNAB, Bridgeport, Conn.;
WSLL, Jackson, Miss.; WLEU, Erie, Pa.

The following stations were granted renewals for the
period ending August 1, 1948:

WMOG, Brunswick, Ga.; WHBB, Selma, Ala.; KRNR,
Roseburg, Ore.; WKBK, Dubuque; KDRO, Sedalia, Mo.;
KPLC, Lake Charles, La.; KKEW, Hobbs, N. Mex.; KJSR,
Baker, Ore.; WDAN, Danville, Ill.; WKNY, Kingston, N. Y.;
WMC, Ocala, Fla.; WDBC, Escanaba, Mich.; WNLC, New
London, Conn.; WOSH, Oskosh, Wis.; KGGY, Scottsbluff,
Neb.

The following stations were granted renewals for the
period ending November 1, 1948:

KMO and auxiliary, Tacoma; WTHO, Dayton, Ohio; WWDW,
Chattanooga; KFOX, Long Beach, Calif.; KFAC, Los Angeles;
KNTT, Des Moines; KIT, Yakima, Wash.; WOOD, Grand
Rapids; WBBR and auxiliary, Burlington; WJDX, Jackson,
Miss.; WKXE, Keene; WRRR and auxiliary, Dallas; KFGQ,
Boone, Iowa; KKGQ, Albuquerque; KTFI, Twin Falls, Idaho;
KOUA, Siloam Springs, Ark.; WORC, Worester,
Mass.; WTCN, Minneapolis; WBHF, Rock Island;
KGOJ, Mason City, Ia.; WXYZ, Detroit; WSPR, Springfield,
Mass.; WSBM, New Orleans; WSAI, Cinncinati; WKAJ,
Miami Beach; WJHP, Jacksonville; WISH, Indianapolis;
WHAZ, Troy; WFIN, Findlay, Ohio; WFBT, Greenville,
S. C.; KSCI, Sioux City, Iowa; KRIS, Corpus Christi;
KRBI, Westlake, Texas.

KVOA—Ariz. Broadcasting Co., Tucson, Ariz.—Granted re-
newal of license for the period ending November 1,
1948.

(Continued on next page)
The following stations were granted renewal of licenses for the period ending February 1, 1949:

- WCPO, Cincinnati, Ohio.
- WBHP, Tuscaloosa, Ala.
- WHX, Utica, N. Y.
- WMFR, High Point, N. C.
- KGK, Sterling, Colo.
- KODI, The Dalles, Ore.
- KPOW, Powell, Wyo.
- WCOW, Columbus, Ga.
- WMFR, High Point, N. C.
- KGH, Little Rock.

The following stations were granted renewals for the period ending May 1, 1949:

- KXO, El Centro, Calif.
- WMFR, High Point, N. C.
- WCMA, Corinth, Miss.
- WSB, Chicago, Ill.
- WSBC, Radio Station WSBC, Chicago, Ill.
- KGEK, Sterling, Colo.
- KODL, The Dalles, Ore.
- KPOW, Powell, Wyo.
- WCOW, Columbus, Ga.
- WMFR, High Point, N. C.
- KGH, Little Rock.

**MISCELLANEOUS ACTIONS**

Rupert W. Bradford and Harry F. Pihl, a partnership, d/b as Bradford & Pihl, Bemidji, Minn.; Russell E. Kalhier, Bemidji, Minn.—Adopted an order granting the application of Bradford and Pihl (B4-P-3956, Docket 6847) for a new station to operate on 1310 kc., with 250 watts power, unlimited time, subject to the condition that the applicant will within 60 days from date of this action file an application for modification of permit with the Commission specifying a transmitter site and antenna system meeting the requirements of the Commission's standards of good engineering practice. At the same time the application of Russell E. Kalhier (B4-P-4074, Docket 6848) requesting the same facilities, was dismissed. On April 8, 1946, Kalhier petitioned for withdrawal of his application.

KXO—Valradio, Inc., El Centro, Calif.—Granted CP to install new transmitter, RCA BTA-250L, new vertical antenna and ground system, and change transmitter and studio locations from 736 Main St. to Main Street, El Centro, Cali. (B3-P-4469)

WMON—Fayette Associates, Inc., Montgomery, W. Va.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at near Riggs St. and 1st Ave., Montgomery, W. Va. Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's rules, conditions. (B2-MP-1872)

WCMA—The Corinth Broadcasting Co., Inc., Corinth, Miss.—Granted license to cover CP for new station to operate on 1320 kc., 250 watts, unlimited time. (B3-L-1941) Also authority to determine operating power by field measurement. (B3-Z-1767) In addition, granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's rules, conditions.

WMFR—James E. Lambeth, et al., d/b as Radio Station WMFR, High Point, N. C.—Granted CP to install a new (Gates 250-C) transmitter. (B3-P-4702)

WCSH—Congress Square Hotel Co., Portland, Maine—Granted CP to install auxiliary transmitter (RCA 100-W) at same location as main transmitter, Elmwood Ave., near Scarborough, Me., to operate on 970 kc., 300 watts, DA. (B1-P-4726)

Boulder City Broadcasting Co., Area of Boulder City, Nev.—Granted CP for new relay broadcast station to be used with standard station KBNE, Freqs. 1600, 2074, 2102 and 2758 kc.; 100 watts. (B5-P-3067)

Continental Television Corp., Boston, Mass.—Granted special temporary authority to operate composite experimental television relay equipment on 590 to 610 mc., with power not to exceed 200 watts, for experimental television transmission for period May 17 to June 13, 1946.

W3XDA—The Conestoga Television Assn., Area of Lancaster, Pa.—Granted CP for special temporary authority to operate composite experimental television relay equipment on 590 to 610 mc., with power not to exceed 100 watts, at RCA plant at Lancaster, Pa., in order to test equipment to ascertain its characteristics with regard to antenna design and video modulation, and to operate "two-way," two composite transmitters on 590 to 610 mc., with power fed to output stage not in excess of 25 watts, with one transmitter at a plant in Lancaster and the other to be at locations between Lancaster, the Welsh Mts. and Reading, Pa., in order to test best locations for proposed television relay station, for the period May 19 and ending no later than June 17, 1946.

WSTO—Central N. Y. Broadcasting Assn., Inc., Town of Pompey, N. Y.—Granted extension of special temporary authority to use a 70-watt composite transmitter on 93.75 mc., with A0 emission, in order to conduct signal measurement tests from proposed FM transmitter from the period May 22 ending June 29, 1946.

WDSC—The Border Broadcasting Co., Dillon, S. C.—Granted modification of CP which authorized a new station, to change type of transmitter (Gates BC-1-E). (B3-MP-1912)

WPER—Penna. State College, Noshannon State Park, Pa.—Granted extension of special temporary authority to operate a composite transmitter on 106 mc., with 100 watts and an unmodulated emission, in order to make field intensity measurements to determine the location of proposed FM transmitter to operate as an educational broadcast station—the transmitter and half-wave vertical antenna to be located near Rattlesnake Fire Tower at Noshannon State Park, for the period May 15 to June 13.

WCOP—Mass. Broadcasting Corp., Boston, Mass.—Granted CP to move presently licensed main transmitter (RCA 1-D Mod.) to Cordova Ave., Lexington, Mass. (present site of new main transmitter) and install composite 5 KW amplifier to be operated as an auxiliary with power of 5 KW, employing DA for day and night. (B1-P-4720)

Midnight Sun Broadcasting Co., Area of Fairbanks, Alaska—Granted CP for new relay broadcast station to be used with standard station KFAR; frequencies 1616, 2090, 2190, 2830 kc., 30 watts.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine—Granted special temporary authority to operate for limited time for a period of 30 days, pending action on preliminary application and request for increase power and hours of operation, and commencement of operation in accordance with same. (B1-S-801)

KLO—Dalton McMasurier, Grand Forks, N. D.—Granted special temporary authority to operate additional power from 5 to 7 p. m., CST, for the period beginning May 31 and ending no later than June 30, provided station KFJM remains silent. (B4-S-1165)

WJHL—WJHL, Inc., Johnson City, Tenn.—Granted special temporary authority to operate with an RCA BTA-1-L transmitter instead of an RCA 1-G transmitter as licensed, for a period of 30 days, pending completion of construction and commencement of operation under B3-P-4521. (B3-S-988)

The Commission on May 2 adopted an order amending its order of February 1, 1946, designating for consolidated hearing applications for new television stations in the Los Angeles area, to include issue No. 5, in re stock ownership and management interests of Paramount Pictures, Inc., in existing licenses in various applicant companies in connection with the multiple ownership rules.

KGBL, Inc., Roswell, N. Mex.—Granted CP to increase power of station from 100 watts to 250 watts, and install new transmitter. (B5-P-4621)

WFIL—Triangle Publications, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa.—Granted CP to increase power of 1 to 5 KW, with directional antenna for day and night use, change transmitter site and install a new transmitter. (Comm. Durr voting for hearing) (B2-P-4303)

Woodrow Miller, San Bernardino, Cal.—Adopted an order granting from the hearing docket application (B5-P-4240; Docket 7558), which was inadvertently designated for hearing on May 2.

KSOO and KELO—Joseph Henkin, Deceased (Transferee), Morton H. Henkin, et al. (Transferee), Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. Dak.—Granted consent to involuntary transfer of control of Sioux (Continued on next page)
Falls Broadcast Association, Inc., licensee of stations KSOO and KELO, from Joseph Henkin, deceased, to Morton H. Henkin and Ruth J. Henkin, Executors of the estate of Joseph Henkin, deceased. (B4-TC-475)

WCIO—Gazette Printing Co. (Assignor), Southern Wisc. Radio, Inc. (Assignee) Granted petition of the Gazette Printing Co. to transfer voluntary assignment of license of station WCIO from Gazette Printing Co. to Southern Wisconsin Radio, Inc., a new wholly owned subsidiary corporation, for a consideration of $40,000 as of Nov. 3, 1945. (Docket 7255)

WSGN and WJOT (Relay)—Ruth Lawson Hanson, Executor of the estate of Joseph Henkin, deceased. (B4-TC-475)

WRUF—University of Fla., Gainesville, Fla.—Granted petition for leave to intervene in the hearing on application of The News and Observer Co., for a new station in Raleigh, N. C. (Docket 7505)

Earle C. Anthony, Inc., Los Angeles, Cal.—Granted petition for leave to amend its application for new television CP (Docket 7506), so as to specify additional engineering data as requested by the Commission, etc., and the amendment was accepted.

The William H. Block Co., Indianapolis, Ind.—Granted petition for leave to amend its application for a new FM station (Docket 7508), so as to supply additional engineering information, etc., and the amendment was accepted.

Indiana Broadcasting Corp., Indianapolis, Ind.—Granted petition for leave to amend its application for a new FM station (Docket 7509), so as to supply additional engineering information, etc., and the amendment was accepted.

Penn Lincoln Broadcasting Co., Inc., Williamsport, Pa.—Granted petition to dismiss without prejudice its application for a new station. (B3-P-1394; Docket 7426)

WRUF—University of Fla., Gainesville, Fla.—Granted petition for leave to intervene in the hearing on application of The News and Observer Co., for a new station in Raleigh, N. C. (Docket 7505)

The Times-Picayune Pub. Co., New Orleans, La.—Granted petition for leave to amend its application for a new television station (B2-PCT-121; Docket 7265) so as to show a request for Channel #5 in lieu of #2; and submit further engineering data.

KTSL—Don Lee Broadcasting System, Los Angeles, Cal.—Granted petition to amend its application for television CP (B5-MPTC-23), so as to specify 5 KW instead of 50 KW; specify different equipment, supply engineering details in connection therewith, etc., and the amendment was accepted.

General Broadcasting Co., Independence, Mo.—Granted petition for waiver of Sec. 1.384 of the Commission’s rules and accepted petitioner’s written appearance in re application (B4-P-4519; docket 7439).

KRIS—Gulf Coast Broadcasting Co., Corpus Christi, Texas—Granted leave to intervene in the hearing on application of Luce-McDonald Co., for a new station. (B3-P-4413; Docket 7306)

WSAI—Buckeye Broadcasting Co., Cincinnati, Ohio—Granted leave to intervene in the hearing on application of Luce-McDonald Co., for a new station. (B3-P-4413; Docket 7306)

KVGB—KVGB, Inc., Great Bend, Kns.—Granted petition for leave to intervene in the hearing on application of Summit Radio Corp. (B2-P-3814; Docket 7214), now scheduled for June 3, and Sec. 1.355(d) of the Commission’s rules was waived.

Hearst Publications, Inc., San Francisco, Cal.—Granted petition to dismiss without prejudice its application for a new television station (B5-PCT-162; Docket 7285).

Clair L. Stout, Washington, D. C.—Granted motion for admission pro hac vice of Harry V. Booth, a licensed practicing attorney of Shreveport, La., for the purpose of participating in the hearing on application of Frank H. Ford for a new station in Shreveport (Docket 7114), now scheduled to commence June 6.

Warner Bros. Broadcasting Co., Hollywood, Cal.—Granted petition to dismiss without prejudice its application for a new television station. (B5-PCT-66; Docket 7257)

The Outlet Co., Providence, R. I.—Granted motion for leave to amend its application for a new television station (Docket 7303), so as to furnish additional engineering information; to request Channel #11 instead of #7, add exhibits, etc., and the amendment was accepted.

The Times-Mirror Co., Los Angeles, Cal.—Granted petition for leave to amend its application for a new television station, so as to show an increase in the authorized capital stock; show the substitution of Marlan Otis Chandler for Harry Chandler as Chairman of the Board and a Director, etc., and the amendment was accepted. (Docket 7260)

ACTIONS ON MOTIONS

Scripps-Howard Radio, Inc., Cleveland, Ohio—Granted petition for leave to amend its application for a new television station (B2-PCT-121; Docket 7265) so as to show a request for Channel #5 in lieu of #2; and submit further engineering data.

Universal Broadcasting Co., Inc., Indianapolis, Ind.—Granted petition for leave to amend its application for a new FM station (Docket 7036), so as to supply additional engineering information, etc., and the amendment was accepted.

WFBM, Inc., Indianapolis, Ind.—Granted motion for leave to amend its application for a new television station (B3-P-4413; Docket 7306) so as to supply additional engineering information, etc., and the amendment was accepted.

Matheson Radio Co., Inc., Boston, Mass.—Granted petition for leave to amend its application for a new television station, so as to show an increase in the authorized capital stock; show the substitution of Marlan Otis Chandler for Harry Chandler as Chairman of the Board and a Director, etc., and the amendment was accepted.

Suburban Broadcasters, Dearborn, Mich.—Granted petition for leave to add the name of Myron Stevens to the list of witnesses, the depositions of whom were authorized to be taken on order of the Commission dated May 9.

Radio Voice of Springfield, Inc., Springfield, Ohio—Granted petition for leave to amend its application for FM construction permit (Docket 7291), so as to furnish additional engineering information as requested by the Commission, etc., and the amendment was accepted.

Great Trails Broadcasting Corp., Dayton, Ohio—Granted petition for leave to amend its application for FM construction permit (Docket 7291), so as to supply additional engineering information as requested by the Commission, etc., and the amendment was accepted.

The Times-Picayune Pub. Co., New Orleans, La.—Granted petition to dismiss without prejudice its application for a new station (B3-P-1167; Docket 7161), subject to the right of later reinstatement under the provisions of the Commission’s rule of January 5, 1946.

Palmer K. and Lois C. Leberman, New York City—Granted petition to dismiss without prejudice its application for a new television station. (B1-PCT-129; Docket 7251)

Rededge Broadcasting Co., Hendersonville, N. C.—Granted motion Insofar as it requests removal of application (Docket 7483) from hearing docket, and the said application was removed from hearing docket.

Richard T. Sampson, Oceanside, Cal.—Granted petition requesting leave to reinstate its application for a new television station (B5-P-1414; Docket 7270), which was dismissed without prejudice on March 8; the application was reinstated and the amendment accompanying petition was accepted.

Del Norte Broadcasting Co., Inc., El Paso, Texas—Granted petition for leave to amend its application (B3-P-
4700) so as to request frequency 1340 kc., with 250 watts, U., in lieu of 1350 kc., 1 kw. day, 500 watts night. The amendment was accepted and application removed from hearing docket (No. 7354).

Lake Broadcasting Co., Inc., Gary, Ind.—Denied petition insofar as it requests removal of application (B1-P-4541; Docket 7185) from hearing docket; exception noted by counsel.

Lake Broadcasting Co., Inc., Gary, Ind.— Granted petition for continuance of hearing on its application now scheduled for May 23, and the hearing was continued to June 24.

Rochester Broadcasting Corp., Rochester, N. Y.— Granted petition for leave to amend its application (B1-P-3593, Docket 6606) and remove same from hearing docket; the amendment was accepted and said application removed from hearing docket.

Missionary Society of St. Paul the Apostle, New York City— Denied petition for continuance of consolidated hearing now scheduled to be held in New York on May 20 in re petitioner's application and applications of WNEW. Ordered that the order of proof at the hearing on these applications be shifted so that applications of WNEW for renewal of license and for CP be heard first, and that Sec. 1.227 of the Commission's rules be waived for the purpose of permitting the Missionary Society to submit its said pleadings when they are completed.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.— The Commission on its own motion ordered that the hearing on its application of WAML for CP (Docket 7292) now scheduled for May 24, be continued to Monday, June 24.

Mackay Radio and Teleg. Co., Inc.— Upon consideration of petition filed by petitioner, the Commission ordered that the hearing now scheduled for May 14 in re Free Delivery of Foreign Telegraph Messages destined to points in the U. S. (Docket 7492) be postponed to June 4.

In the matter of Boston Chamber of Commerce, et al., Complainants, v. The Western Union Co., et al., Defendants—Upon request from counsel for the parties in this proceeding for a further postponement of the date by which proposed findings and conclusions are to be filed, the Commission ordered that the date of May 17 now fixed for filing of proposed findings and conclusions herein, be postponed to June 17.

In the matter of Rules Relating to Sec. 214 of the Communications Act, Discontinuance, Reduction and Impairment—The Commission ordered that oral argument now scheduled for May 21 in re this matter (Docket 7123) be postponed to June 2, 1946.

H. M. Havener, Attorney on behalf of stockholders of Lincoln Mutual Tel. Co.—Ordered that the petitioners be granted leave to intervene in the proceeding in (Docket 7524; P-C-1125), in the matter of application of Northwestern Bell Tel. Co., for authority to acquire telephone plant and property of the Stuart Exchange of the Iowa State Tel. Co.; denied motion for indefinite continuance of hearing, and ordered hearing postponed from May 16 to June 16.

Wabash Valley Broadcasting Corp., Terre Haute, Ind.—Western Central Broadcasting Co., Peoria, Ill.—Ordered that the consolidated hearing on these applications now scheduled for May 15 be continued to Monday, June 17. (Docket No. 6294 and 7108)

Radio Broadcasting, Inc., W. Memphis, Ark.; W. Wright Esh, Daytona Beach, Fla.—The Commission on its own motion ordered that the consolidated hearing on these applications now scheduled for May 13, be continued to June 25. (Docket Nos. 7068 and 7355)

The Commission on May 17 denied petition of Allen B. DuMont Labs., Inc., (1) for modification of the issues in re the consolidated hearing on applications for new television stations to begin at Los Angeles on May 20, to strike all reference to the petition insofar as it requests to show the complete engineering data; (2) that the petition be received at Los Angeles hearing with respect to any stock ownership or management interest the Paramount Pictures, Inc., may have in the Allen B. DuMont Labs., Inc. The Commission further ordered that no testimony be taken at the Los Angeles hearing regarding the interests of Para-mount in the Allen B. DuMont Labs., and that the hearing record be held open for further hearing in Washington, at which time testimony regarding the additional issue, made a part of the consolidated hearing by the Commission's order of May 2, may be received.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.— Granted petition to dismiss without prejudice its application for a new television station. (B2-PCT-74; Docket 7271)

Pawtucket Broadcasting Co., Pawtucket, R. I.—Granted motion for leave to amend its application for new FM station, so as to supply revised engineering data based on current standards of good engineering practice as requested by the Commission. (Docket 7029)

Indianapolis Broadcasting, Inc., Indianapolis, Ind.— Granted petition for leave to amend its application for a new FM station so as to supply additional engineering information as requested by the Commission; request a Rural station instead of a Metropolitan station, and the amendment was accepted. (Docket 7067)

Balaban & Katz Corp., Chicago, Ill.— Granted petition for leave to amend its application for FM station (Docket 7138), so as to specify various changes in the estimates of installation costs; changes in the antenna and transmitting equipment, and the amendment was accepted.

Jose Bechara, Jr., Mayaguez, P. R.— Granted petition for waiver of Sec. 1.384, and accepted petitioner's late appearance in re application for CP. (Docket 7450)

Charleston Broadcasting Co., Charleston, S. C.—Granted petition insofar as it requests leave to amend its application for CP (Docket 7530), so as to specify frequency 1340 kc. instead of 1350 kc.; change paragraph of application so as to reflect the change in frequency, and the Commission on its own motion removed the application (B3-P-4248) as amended from the hearing docket.

Blue Valley Co., Independence, Mo.—Granted petition for waiver of Sec. 1.384 of the Commission's rules and accepted petitioner's written appearance, in re application for CP. (Docket 7498)

Scripps-Howard Radio, Inc., Cleveland, Ohio— Granted petition to amend its application for new television CP (Docket 7255) so as to show revised information in financial data: revised programming and staffing plans, etc., and the amendment was accepted.

Queen City Broadcasting Co., Inc., Boise, Idaho— Granted petition requesting 30-day extension of time within which to file exceptions to the Commission's proposed decision involving application of petitioner and that of KFND (Dockets 6652 and 6653), and the time within which Queen City Broadcasting Co. may file its exceptions and request oral argument was extended to June 21.

Knight Radio Corp., Chicago, Ill.— Granted petition to dismiss without prejudice its application for FM construction permit. (Docket 7144; B4-PH-629)

Westinghouse Radio Stations, Inc., Pittsburgh, Pa.— Granted motion to dismiss without prejudice its application for a new television station. (Docket 7291; B2-PCT-35)

The Eagle Gazette Co., Lancaster, Ohio— Granted petition to dismiss without prejudice its application for a new station. (Docket 6732; B2-P-3700)

WLAB—Hildebrand & Rogers Co., Lawrence, Mass.— Granted petition for leave to intervene in the hearing on application of Tower Realty Co. for a new station in Baltimore, scheduled for hearing June 6. (Docket No. 7429)

Lee Segall Broadcasting Co., Houston, Texas— Granted motion to dismiss without prejudice application for a new CP (Docket 7332), subject to the right of later reinstatement under provisions of the Commission's public notice of January 5-46.

Don Lee Broadcasting System, San Francisco, Cal.— Granted petition for leave to amend its application for new television CP (Docket 7281), so as to supply complete engineering data; specify exact transmitter site; specify Channel No. 2, and change paragraphs so as to show the complete engineering data.

Federal Trade Commission Docket

COMPLAINTS

No complaints were issued during the past week by the Commission.

STIPULATIONS

Joseph R. Harris Co., Inc. The Commission has approved a stipulation in which Joseph R. Harris Co., Inc., operating a retail store at 1224 F Street, N. W., Washington, D. C., agrees to stop representing that women’s garments made of rayon are composed of butcher linen. (4156)

Kohler Manufacturing Co., Inc., 220 West 19th Street, New York, stipulated with the Commission that it will cease and desist from disseminating advertisements which fail clearly to reveal that the headache remedy it sells under the name of Kohler Powders should not be taken in excess of the dosage recommended, since such use, if too frequent or long continued, may be harmful. The stipulation provides, however, that the advertisements need only contain the statement: “CAUTION: Use only as directed,” if the directions for use on the label, in the labelling or in both, contain a warning to the same effect. (65307)

M.A.C. Laboratories. Dorothy McCoy and Lloyd McCoy, trading as M.A.C. Laboratories and as M.A.C. Products, 4015 Indiana Avenue, Chicago, stipulated with the Commission that in connection with the sale of cosmetics they will cease and desist from representing. (65308)

(Continued on next page)
Nelson Yarns. Jacob Nelson, Josh Nelson and Celia Nelson, trading as Nelson Yarns, 1043 Flatbush Avenue, Brooklyn, stipulated with the Commission that they will cease and desist from using the word “imported,” or other term of like meaning, to designate or describe any yarn which is spun in the United States of America, or otherwise from representing that such product is imported as yarn into this country. (4159)

Thomson's Natural Food Co. John W. Thomson, 4542 41st Street, Long Island City, N. Y., stipulated with the Commission that he will discontinue misrepresenting the therapeutic properties of medicinal preparations he sells. The respondent trades as Thomson's Natural Food Co. and Thomson's Health Food Store. (03309)

CEASE AND DESIST ORDERS

Consumers Home Equipment Co., 4805 Woodward Avenue, Detroit, engaged in the sale, through house-to-house canvassers, of silverware, mattresses, blankets, radios and other merchandise, has been ordered by the Commission to cease and desist from the use of a sales plan and practices found by the Commission to be fraudulent and deceptive. (5174)

Goldwyn Co. Ben Levy and Frances Levy, trading as Goldwyn Co. and as John Baker Co., 731 Plymouth Court, Chicago, engaged in the sale of candy and novelties, have been ordered by the Commission to cease and desist from offering their merchandise by means of a game of chance, gift enterprise or lottery scheme. (5417)

E. H. Hamlin Co. Edward H. Hamlin, trading as E. H. Hamlin Co., Mutual Life Building, Seattle, distributor of canned salmon and other seafood products, has been ordered by the Commission to cease and desist from paying to any buyer anything of value as a commission or brokerage, or any compensation, allowance, or discount in lien thereof, upon purchases made for such buyer’s own account. (5180)

Perma-Rid Co. The Commission has ordered Perma-Rid, Inc., 2947 North 45th Street, Milwaukee, to discontinue misrepresenting the effectiveness of its cosmetic, Perma-Rid, as a depilatory and skin beautifier. (5244)

Pioneer Manufacturing Co. An order issued by the Commission directs The Pioneer Manufacturing Co., 3053 East 87th Street, Cleveland, to cease and desist from violation of the Wool Products Labeling Act and the Federal Trade Commission Act in connection with the sale of its Woolvet floor mops. (5344)

Sherry-Moore Gifts. Elizabeth Scherer and Sherry Moore Scherer, trading as Sherry-Moore Gifts, 100 West 42nd St., New York, have been ordered by the Commission to discontinue selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme. The respondents are engaged in the sale of luggage, vanity chests, toiletries and other merchandise. (5400)

R. B. Semler, Inc. New Canaan, Conn., manufacturer and distributor of Kreml Hair Tonic, has been ordered by the Commission to cease and desist from selling Kreml on the condition or agreement that purchasers who resell it do not handle competing hair tonics. The Commission found that the practice of entering into such exclusive-dealing agreements with jobbers, distributors and other resellers substantially lessens competition between the respondent and its competitors and constitutes a violation of Section 3 of the Clayton Act. (4773)
PETRILLO SEEKS PROSECUTION UNDER LEA ACT

Strike Called at WAAF Chicago in Effort to Test Lea Bill Constitutionality

AFM President James C. Petrillo called a minor strike last Tuesday (28) against WAAF in Chicago with the announced purpose of testing constitutionality of the Lea Bill.

Whether the test desired by the AFM would materialize had not been clarified at the weekend. The Federal District Attorney for the Chicago area, J. Albert Woll, was continuing an investigation into the case.

The strike at WAAF resulted from an AFM demand that the number of union music librarians employed by the station be doubled. At present WAAF has three such librarians. The union insisted that the number be increased to six, and the station refused on the grounds that it has no need for the additional personnel. No persons who actually perform with musical instruments are involved.

Station's Schedule Not Interrupted

The station's operating schedule has not been affected by the strike, since other employees have taken over duties of the music librarians who walked out. WAAF, a daytime only station, is not a network affiliate.

The management of WAAF reports that repeated efforts were made to persuade Mr. Petrillo to discuss the issues but that the union head "persistently refused all of the requests of WAAF to meet and negotiate this matter."

In announcing the strike the union president, James C. Petrillo, said: "The union appreciates that its action is contrary to the restrictions of the Lea Bill," but added that he was "proceeding on the firm and sincere belief that the Lea Bill is in violation of the Constitution of the United States."

The Federal District Attorney, J. Albert Woll, began the investigation immediately after the strike was announced. Commenting, "This is of tremendous public importance," he stated that he (Continued on page 426)

COMMISSION SPEEDS LICENSE RENEWALS

The FCC announced last week the renewal of 137 broadcast licenses, 84 of which are temporary. The temporary grants are for the period ending August 1, 1946. These renewals, in addition to those listed in REPORTS last week, represent a total of 232 renewals approved by the commission for the two weeks ending Friday (31). Eighty-five of the renewals are on a temporary basis. (See Current NAB REPORTS.)

This week's renewals are listed under "FCC Actions."

ONE MILLION SETS SHIPPED IN APRIL

On Thursday (30), the CPA announced that shipments of radio sets during April remained the same as in March, about 1 million sets. This figure represents a 33 percent increase over February, and 91 percent of the pre-war rate.

CPA ORDERS GREATER CONSTRUCTION CUT

The CPA placed more stringent requirements on construction approval on Wednesday (29) for a period of 45 days, when it ordered CPA field offices to scan applications more closely in cutting non-housing projects by two-thirds compared with the two weeks ending May 23.

The administration explained that exemptions remain as previously set, and that broadcasters may apply to the local CPA field office for approval of contemplated construction.

The CPA stated that Wednesday's action was taken because construction already under way and approved had placed a heavy drain on materials and strikes had prevented full production of materials.
Employee-Employer Relations

Petrillo Wants Text of Lea Bill
(Continued from page 425)

would prosecute vigorously under provisions of the Lea Bill if the investigation proved there had been a violation.

The Lea Bill, which has become section 506 of the Communications Act of 1934, makes it unlawful to attempt to coerce a radio station "to employ...any person or persons in excess of the number of employees needed by such licensee to perform actual services." Maximum penalties provided by Act are one year's imprisonment and $1000 fine.

NAB Position

In answer to inquiries from the press, A. D. Willard, Jr., NAB executive vice president, stated on the first day of the strike: "Our position is that enforcement of this law is in the hands of the United States Attorneys. Our suggestion to stations has been that if they think the Lea Bill is being violated, they should take the matter up with the federal prosecutors."

On capitol hill Rep. Priest (D-Tenn.) said: "The Lea Bill was passed in an effort to eliminate certain abuses in broadcasting. I think the Act is constitutional. It is clear that Mr. Petrillo's action at WAAF violates the Act. Since the constitutionality of the Act will be tested sooner or later, then the sooner the better."

The press has attached some significance to the fact that the written announcement of the strike was mechanically reproduced but the station call letters had been filled in later. The inference which some reporters have drawn is that similar action against other stations may be contemplated.

Petrillo Statement

Text of Mr. Petrillo's statement is as follows:

"The WAAF Radio Station of Chicago has refused to comply with our request that it employ six musicians. Until now the company has employed three musicians at this station. It is way below the number it should employ.

"The union, therefore, requested a new agreement to employ three additional musicians so as both to improve the standards and working conditions of the previous employees and to give necessary work to three more union members.

"Apparently hiding behind the Lea Bill, the radio station has arbitrarily refused to negotiate such an agreement. The union was thereby compelled to withdraw services of musicians from this station.

"The union appreciates that its position is contrary to the restrictions of the Lea Bill. However, as president of my union, I am, upon the advice of able and experienced legal counsel and the statements of learned lawyers in both houses of Congress, proceeding on the firm and sincere belief that the Lea Bill is in violation of the fundamental law of the land, the Constitution of the United States.

"The Lea Bill was conceived in malice and anger resulting from one of the most expensive and bitter anti-labor propaganda campaigns in the history of our country. Never before has there been so un-American an attempt to throw the full force of our National Government in support of a single, favored industry and to the prejudice and immeasurable harm of the workmen and women in that industry.

"We cannot conceive how and by what reasoning the Constitution of the United States can be said to support this law. Under this law, this Chicago station can overwork its employees; it can unfairly deny employment to three deserving musicians; it can amass thousands upon thousands of dollars of profits, most of which are the result of music, yet spend a mere pittance on music.

"No reasonable person can justify such a law. Under this self-same law, workers who quit work in an attempt to obtain fair working conditions and to secure what the unions deems vital to its survival and growth are denounced as criminals and subjected to long imprisonment and a heavy fine.

States Right to Strike

"We sincerely believe that the right to a peaceful strike and to peaceful picketing is among the sacred freedoms eternally protected by our Constitution. We sincerely believe that the guardians of the Constitution, the Supreme Court of the United States, will not yield to the malicious pressure of a manufactured campaign of lies and vilification.

"My union, and I as its president, are fully and irrevocably committed to the protection and preservation of the rights of our thousands of members who are so brutally and unjustly jeopardized by this law, as well as the rights of all organized American workers whose unions are directly assaulted by the philosophy of this monstrous legislation.

"My union and I are, therefore, committed to the absolute policy of utilizing all its energies and resources to resist this vicious law, unless and until we are told by the Supreme Court of the United States that the Bill of Rights and the abolition of slavery do not apply to American musicians, and that I do not believe the United States Supreme Court will ever do."

AFM OPPOSES CASE BILL; CONGRESS DEBATES EMERGENCY LABOR BILL

The International Executive Board of the AFM, holding its convention this week in St. Petersburg, Florida, has wired President Truman expressing opposition to the Case Labor Bill, which is now awaiting Presidential action, having passed the House 250 to 106 on Wednesday (29) and the Senate the preceding Saturday (25).

AFM opposition, apparently is primarily directed at the "welfare fund" provision, which may jeopardize the arrangement now existing between the AFM and record manufacturers. Under the contracts with the recording companies, which do not expire until December 1947, the Union receives a royalty, based on the selling price of records, ranging from one-quarter cent for each 35-cent record sold. The fund, reported to total $1,000,000 now and expected by the AFM eventually to reach $2,500,000.
per year, is administered exclusively by the Union under present contractual arrangements.

The Case Bill makes welfare funds illegal unless "employees and employers are equally represented" in their administration, and unless they are established for specified welfare purposes.

Other provisions of the Case Bill, as passed by the Congress, would:

1. Require parties to a labor dispute to abstain from strikes and lockouts for 60 days if the 5-man Federal Mediation Board, to be set up in the Department of Labor, proffers its services in the dispute.
2. Authorize fact-finding by a presidential commission in public utility disputes.
3. Require a 30-day cooling-off period before strikes or lockouts can be engaged in industries affecting interstate commerce; as to public utilities, the period may be extended to 95 days.
4. Amend the National Labor Relations Act to exclude supervisory employees from protection of the Act, to deprive employees striking during the cooling-off periods of their rights under that Act, and to make employers who lock out employees during such periods liable to unfair labor practice findings.
5. Permit unions to be sued in Federal courts for breach of contract.
7. Amend the anti-racketeering act to outlaw interference with interstate commerce by "robbery" or "extortion" as those terms are re-defined. (This is the Hobbs Bill.)

On Saturday (25) the House passed the emergency legislation recommended by the President. In his speech to the joint session the same day, by a vote of 306 to 13. The Senate, on Wednesday (29), voted 70 to 13 to eliminate the draft provision.

The emergency bill, approved by the House, provides that the Government may seize an essential industry when a strike or lockout occurs, and that if the interruption of operations continues, the President may declare a national emergency. The President is authorized to establish fair wages and conditions of employment, if necessary, to be effective during the period of Government operation. After an emergency proclamation, continuation of the interruption is unlawful, and the employer, labor unions, and anyone participating in the stoppage are obligated to take affirmative steps to terminate the interruption.

Violation of the bill is a crime, punishable by $5000 fine or 1 year in prison, or both. The Attorney General is authorized to apply for injunctive relief in the Federal Courts. Failure to return to work deprives employees of their employment status, as well as of rights under the Wagner Act. The President may also provide for the induction into the Army of anyone who has failed or refused to return to work within 24 hours of the effective date of his proclamation.

Any net profits earned during Government operation, after allowance of just compensation to the owners, are to go to the U. S. Treasury.

REFUSAL TO BARGAIN CHARGES AGAINST WFHR WITHDRAWN

Charges that WFHR, Wisconsin Rapids, Wisconsin, had refused to bargain collectively with Local 715, IBEW, were withdrawn by the attorney for the Government at the opening of the hearing Tuesday (21) on the NLRB complaint.

During the hearing, which ended Wednesday (22), W. F. Huffman, owner of Station WFHR, and George T. Frechette, station manager, denied the remaining charges of unfair labor practices. The NLRB complaint, as amended, alleged that the station demoted Garth Bowker from chief engineer to operator because of his union activity, and discouraged employees' union activity by statements and conversations. The day before the hearing, Mr. Huffman issued a statement vigorously denying the commission of any unfair labor practices. He and Frechette testified that Bowker was demoted because he did not have the qualifications needed on the job.

Initial decision on the merits of the dispute will be made by R. N. Denham, the NLRB Trial Examiner who presided at the hearing. If any exceptions are filed to his findings, the case then goes to the NLRB in Washington for review.

SUPREME COURT RULES AGAINST VETERAN SUPERSENiority

In a six to one decision, the Supreme Court on Monday (27) ruled that veterans do not have superseniority rights to their pre-war jobs. The Court held that veterans cannot displace non-veterans with greater seniority—thereby reversing one of the main contentions of Selective Service and agreeing with the position taken by organized labor.

The decision came on a suit by a Brooklyn welder who contended that under the Selective Service Act he was entitled to regular work for one year on his old job with the Sullivan Drydock and Repair Corp.—even though holding him on the job would require laying off a non-veteran with greater seniority. A Brooklyn Federal Court ruled in favor of the welder, but the decision was reversed by the Circuit Court which held that, while Congress intended that a veteran was to be assured of his job for a year, the place to which he was restored was to be subject to the same conditions as those affecting his pre-war job. The CIO Marine & Shipbuilding Workers' Union argued that the unlimited right to one year's re-employment regardless of seniority or greater skill of other workers who did not go into the armed forces would cause conflict with union bargaining contracts, many of which provided for job seniority, and would "upset the whole fabric of industrial relations."

Justice Douglas, for the majority, said that the veteran in returning to his old job steps back on "the seniority escalator" at "the precise point he would have occupied had he kept his position continuously during the war." The provisions of the Selective Service Act, said the Court, "guarantee the veteran against loss of position or loss of seniority by reasons of his absence. He acquires not only the same seniority he had; his service in the armed forces is counted as service in the plant so that he does not lose ground by reason of his absence. But we would distort the language of these provisions if we read it as granting the veteran an increase in seniority over what he would have had if he had never entered the armed service."

Justice Black dissented on the ground that the case should be sent back to the Circuit Court with directions to dismiss the suit because the union was not a proper party to appeal the case in the first instance.

Broadcast Advertising

NRDGA RADIO SURVEY

A survey of radio advertising by retailers in 1945-46, made by the National Retail Dry Good Association, will be ready for release to the retailing and broadcasting industry within a few weeks.

(Continued on next page)
Results of the survey were analyzed at a conference in New York May 29 by representatives of the Sales Promotion Division of NRDGA and the Broadcast Advertising Department of NAB. The survey report is now being readied for publication.

The survey shows that radio advertising, although generally successful for those retailers who have used it consistently, has hardly been given a proper chance to demonstrate its effectiveness. The report states:

"It is evident from this study that somewhere somebody is failing to give radio the proper push insofar as retail advertising is concerned. Whether this be the fault of the seller of the time or the purchaser is not clear from this investigation. Quite possibly it is the fault of both. However, the fact stands that the success story for the medium looks to be fairly good but the advancement of its use appears limited."

As soon as available, a copy of the complete report will be sent to all NAB member stations.

SALES MANAGERS COMMITTEE TO MEET

The Sales Managers Executive Committee meets for a three-day session on June 5th at the Hotel Statler, Washington, D. C. Committee chairman is James V. McConnell, manager, NBC Spot Sales.

The agenda includes a report on the progress of setting up a standard rate card format, by Arthur Hull Hayes, WABC, New York, subcommittee chairman. Walter Johnson, WTIC, Hartford, chairman of the subcommittee working on the NAB-AAAA Standard Contract Form, will report on this project.

Stanton P. Kettler, WMMN, Fairmont, subcommittee chairman, will report on the progress on the proposed Advertising Agency Recognition Bureau. John M. Outler, Jr., WSB, Atlanta, will head a discussion on Sales Practices. Cecil K. Beaver, WOAI, San Antonio, subcommittee chairman, and Lee Hart, assistant director of broadcast advertising, will review the Joske Report.

Kenneth H. Baker, NAB research director, will discuss current research projects related to sales, and Hugh M. Higgins and J. Allen Brown, assistant directors of broadcast advertising, will review sales promotion, sales aids, and sales activities among small market stations. A proposed cooperative organization to promote high advertising standards will be covered in a talk by A. D. Willard, Jr., NAB executive vice-president.

Frank E. Pellegrin, director of broadcast advertising, having just returned from a conference with executives of the National Retail Dry Goods Association in New York, will report on the NRDGA Retail Radio Advertising Survey, and on the series of 17 NAB district meetings recently concluded.

The Sales Managers Executive Committee includes: Chairman, James V. McConnell, NBC, New York; C. K. Beaver, WOAI, San Antonio, Tex.; Lincoln Dellar, KXOA, Sacramento, Cal.; Arthur Hull Hayes, CBS, New York; Stanton P. Kettler, WMMN, Fairmont, W. Va.; Beverly Middleton, WSYR, Syracuse, N. Y.; John M. Outler, Jr., WSB, Atlanta, Ga.; and Odin S. Ramsland, KDAL, Duluth, Minn.

NAB Board Liaison members are: Paul W. Morency, WTIC, Hartford, Conn.; Martin B. Campbell, WFAGA, Dallas, Tex.; and William B. Ryan, KFI, Los Angeles, Cal.

NEW PROMOTION FOLDER ON BANANAS

"It Shouldn't Happen to a Banana" is the title of the new promotion piece in the series Results from Radio, prepared by NAB's broadcast advertising department.

The folder cites some of the facts and shows how results were obtained by United Fruit Company in promotion of the "Chiquita Banana" radio campaign.

The folder also includes the words and music of the singing commercial.

RESEARCH DEPARTMENT

BMB REPORTS 95% URBAN, 87% VILLAGE AND 76% FARM FAMILIES OWN RADIOS

Among U. S. urban families 95.2 per cent own radios compared with 87.4 per cent of rural non-farm (village) families and 76.2 per cent of rural farm families, Broadcast Measurement Bureau announces today.

The BMB figures show that the 34 million radio homes in the United States are distributed as follows: 22,597,000 are urban, 6,586,000 rural non-farm, and 4,815,000 farm homes.

Comparisons between the figures for 1940 and 1946 show that, during the 5-year interval, total urban families increased 15% over the 1940 Census figures, while the number of radio families increased 19% during the same period. In the case of the rural-nonfarm families, there was an increase of 5% while the increase in radio families was 17%. A more spectacular comparison arises in the case of the rural-farm families which decreased by 11% during the 5-year interval, while at the same time, the growth in radio families was 13% over the 1940 figures.

Massachusetts and New York are tied in density of urban radio families at 98.2 per cent. Connecticut leads in density of village radio ownership with 87.1 per cent, while New Jersey tops all states in the farm classification with 93.8 per cent of radio ownership.

Although the BMB urban, village and farm figures for the U. S. as a whole differ slightly from those of the Census Bureau, they fall well within the limits of statistical reliability published by the Census Bureau. The Census Bureau reports a two-thirds probability that a complete census would reveal that anywhere between 22,000,000 and 22,841,000 U. S. urban families own radios. The BMB figure of 22,597,000 falls well within these extremes and differs from the published Census Bureau figure by only eight-tenths of one percent. The differences in rural non-farm and rural farm figures are similarly slight.

These differences may be explained by the fact that BMB sought, within the limits of statistical reliability, to maintain the same rank order of urban, village and rural farm radio ownership that was disclosed by the 1940 Census.

NAB to Publish Data

The BMB tables, with state and area breakdowns, are being published by NAB as an insert page for the Radio Market Data Handbook. The new figures, to be printed and mailed this week, should be substituted for the present page nine of the handbook. Non-member stations and organizations may obtain these figures by writing to the NAB Research Department.

BAKER ADDRESSES SAVANNAH RADIO COUNCIL OF CIVIC LEADERS

Kenneth H. Baker, NAB director of research, spoke on Friday (24) before a group of civic leaders in Savannah, (Continued on next page)
organizations.

Speaking at the invitation of Dwight Bruce, manager of WTOC, Dr. Baker stressed the importance of civic club program producers acquainting themselves fully with their radio audience by using every research means at their disposal. He suggested that there is no substitute in this respect for actually contacting individuals by "door-bell pushing" or some equivalent method.

Dr. Baker pointed out that the failure of many public interest productions in the past has been directly traceable to the fact that the program producers have not known the character of the audience to which they were talking or the audience which they would like to reach with their particular message.

The civic leaders were also urged to take advantage of the "know-how" which has been developed by commercial broadcasters. In this connection, Mr. Bruce pointed out that his station was developing a radio work-shop in which members would participate to learn the techniques of radio production.

The group which the NAB research director addressed meets bi-monthly and functions as smaller committees in the interim. It is composed of the presidents of all the various civic groups, business men's organizations, women's clubs, libraries, school boards, PTA, and other similar organizations.

**AMENDMENT OF FM RULES AND ENGINEERING STANDARDS PROPOSED**

The FCC announced proposed amendments to FM Rules and Standards on Tuesday (28) which provide for two classes of FM stations instead of three as at present. The new designations are Class A, formerly Community, and Class B, which includes the former Metropolitan and Rural classes.

The Commission stated that oral argument will be held only if protests are filed on or before June 15, 1946. In the absence of protests, the proposed rules will be promulgated. The changes, according to the Commission, will simplify the allocation and assignment of FM facilities.

The proposed rule for Class A stations would provide a coverage equivalent to a minimum of 0.1 KW and a maximum of 1.0 KW effective radiated power with 250 feet antenna height. The present rule on Community class stations limits them to 250 watts of effective radiated power with the same antenna height.

The minimum mileage separation on this class of station would remain the same, 50 miles on the same channel and 35 miles on adjacent channels.

The proposed rules divide the United States into two areas as at present. However, this rule would be modified to include other regions to reflect current requirements.

The Commission stated that the tentative allocation plan for Metropolitan and Rural FM stations as announced in December, 1945, would be followed in the assignment of Class B stations. No allocation plan is being proposed for Class A stations at this time.

At present ten channels, from 106.1 to 107.9 mc., are not available for Community stations in Area I. The proposed rules would provide for 2 Class A channels in both Area I and Area II. No channels would be specifically reserved for facsimile.

However, it is proposed that facsimile transmission would be authorized on any channel in both Class A or Class B and in both areas.

Text of the FCC proposed rules follows:

### 3.202 Areas of the United States

For the purpose of allocation the United States is divided into two areas. The first area—Area I—includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; northeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg. The second area—Area II—comprehends the remainder of the United States not included in Area I.

### 3.203 Class A Stations

(a) A Class A station is a station which operates on a Class A channel and is designed to render service primarily to a community or to a city or town other than the principal city of an area, and the surrounding rural area. The transmitter power and antenna height of a Class A station shall normally be capable of coverage equivalent to a minimum of 0.1 KW and a maximum of 1.0 KW effective radiated power at 250 feet antenna height, as determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations. Class A stations will not be authorized with more than 1 KW effective radiated power. Standard power ratings of transmitters used for Class A stations shall not be less than 250 watts nor more than 1,000 watts. A normal minimum separation for Class A stations of 50 miles will be provided on the same channel and 55 miles on adjacent channels.

(b) Twenty channels beginning with 104.1 mc. and ending with 107.9 mc. (channels 281 through 300) are designated as Class A channels. All of these channels are available for assignment in cities which are not the central city or cities of a metropolitan district. Ten of these channels are also available for assignment in central cities of metropolitan districts which have fewer than six Class B stations.

(c) The main studio of a Class A station shall be located in the city served and the transmitter shall be located as near the center of the city as practicable.

### 3.204 Class B Stations

(a) A Class B station is a station which operates on a Class B channel and is designed to render service primarily to a metropolitan district or principal city and the surrounding rural area or area removed from large centers of population. The service area of a Class B station will not be protected beyond the 1,000 uv/m contour; however, Class B assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service. Standard power ratings of transmitters used for Class B stations shall normally be 1,000 watts or greater. In the following subsections, antenna height above average terrain and effective radiated power are to be determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations.

(1) In Area I, Class B stations will be licensed to operate with a service area equivalent to a minimum of

---

1 In some of the territory contiguous to area I, the demand for frequencies requires that applications be given careful study and consideration to insure an equitable distribution of facilities throughout the region. The region includes the states of Pennsylvania and New York (except the northeastern corner not included in area I: Virginia, West Virginia, North Carolina, South Carolina, Ohio, and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan. Other regions may be included as required.

2 For the purpose of determining equivalent coverage, the 3000 uv/m contour should be used.

(Continued on next page)
3.205 Station Location

(a) Each FM broadcast station shall be considered located in the state and city where the main studio is located.

(b) The transmitter of each FM broadcast station shall be so located that satisfactory service is delivered to the city where the main studio is located, in accordance with the Standards of Good Engineering Practice Concerning FM Broadcast Stations; Provided, however, upon special showing of need, authorization may be granted to locate the transmitter so that adequate service is not rendered to this city, but in no event shall this city be beyond the 50 uv/m contour.

3.206 Main Studio

The term “main studio” means the studio from which the majority of local programs originate and/or from which a majority of station announcements are made of programs originating at remote points.

Proposed Engineering Practice Changes

The following changes are proposed for the Standards of Good Engineering Practice Concerning FM Broadcast Stations:

2. Engineering Standards of Allocation.

A. Sections 3.202 to 3.206, inclusive, of the Rules and Regulations describe the basis for allocation of FM Broadcast Stations, including the division of the United States into Areas I and II. Where reference is made in the Rules to antenna heights of Class A stations, Section 2 E (1) of these Standards should be consulted; for Class B stations, Section 2 E (2) should be consulted.

B. In determining the predicted and measured field intensity contours of FM broadcast stations the following shall govern:

(1) Class A stations will normally not be required to determine their contours.

(2) Class B stations shall determine the extent of their 1,000 uv/m and 50 uv/m contours.

The above contours shall be determined in accord-

ance with the methods prescribed in these Standards.

C. Although some service is provided by tropospheric waves, the service area is considered to be that served by the ground wave. The extent of the service is determined by the point at which the ground wave is no longer of sufficient intensity to provide satisfactory broadcast service. The field intensity considered necessary for service is as follows:

<table>
<thead>
<tr>
<th>Area</th>
<th>Median Field Intensity</th>
</tr>
</thead>
<tbody>
<tr>
<td>City business or factory areas</td>
<td>1,000 uv/m</td>
</tr>
<tr>
<td>Rural areas</td>
<td>50 uv/m</td>
</tr>
</tbody>
</table>

A median field intensity of 3,000 to 5,000 uv/m should be placed over the principal city to be served, and a median field intensity of 1,000 uv/m should be placed over the business district of cities of 10,000 or greater within the metropolitan district served. The location of the main studio of a Class A station is specified in Section 3.203 of the Rules. A field intensity of 5,000 uv/m should be provided over the main studio of a Class B station except as otherwise provided in Section 3.204 of the Rules.

These figures are based upon the usual noise levels encountered in the several areas and upon the absence of interference from other FM stations.

D. A basis for allocation of satellite stations has not yet been determined. For the present, applications will be considered on their individual merits.

E. The service area is predicted as follows:

(1) Class A stations

A map, topographic where obtainable, shall be submitted for the area within 15 miles of the proposed antenna site. On this map shall be indicated the antenna location and a circle of 10 miles radius with the antenna location as center. Representative points shall be picked on this circle 15 degrees apart and the elevation of these points determined. The average elevation of these points will be considered the average elevation of the circle. The difference between the elevation of the center of the radiating system and the average elevation of this circle shall be considered the height of the antenna over the terrain 10 miles from the transmitter. In cases where the applicant believes this method to be grossly in error due to peculiarities of the terrain, this method shall be used for determining the antenna height but a showing may be made, if desired, determining the height by other means and describing the method used. Calculations of the service contours of Class A stations are not required.

(2) Class B Stations

(No changes in present Section 2 E (2).)

FCC GRANTS 19 FM PERMITS

The FCC announced on Friday (31) that it had granted final construction permits to 19 applicants for FM facilities.

The stations had been issued conditional grants and engineering approvals previously.

The CP’s issued Friday include grants for 1 Rural, 6 Community and 12 Metropolitan class stations.

List of new licensees will be found under “FCC Actions.”
Small Market Stations

UNION CONTRACTS AND VETERAN TRAINEE

Station management, during the Small Market Stations' session at several NAB district meetings, raised the question as to whether veterans receiving on-the-job training must join unions in stations where a union has jurisdiction. Ivar H. Peterson, assistant director, NAB Employee-Employer Relations Department, provides the following general explanation:

"Whether a local union contract forces a veteran trainee to join the union" depends upon the terms of the contract. The question can't be answered unless we know the provisions of the contract and the proposed conditions under which the GI trainee will be employed. In the absence of a concrete situation, let us assume a hypothetical state of facts.

"Suppose Station XYZ has a contract with union ABC covering various terms and conditions of employment of the station's technicians and engineers, now or hereafter employed during the term of the contract. The contract provides for a closed shop—that is, it specifies that only members of union ABC may be employed as technicians and engineers. It also provides that in filling vacancies or increasing the staff of technicians, the employer shall hire union members in good standing. The contract also has a clause defining the work or 'trade jurisdiction.' This states that only union members in good standing may perform work 'in connection with the installation (except new construction work), operation, maintenance and repair of radio broadcast, television, facsimile and audio equipment and apparatus by means of which electricity is applied in the transmission or transference, production or reproduction of voice, sound, or vision with or without etheral aid, including the cutting of records and transcriptions.' The contract fixes a minimum wage for technicians of $50 per five day, eight hour a day, eight hour a day week. Nowhere in the agreement is there a definition of the terms 'technician' or 'engineer,' nor is provision made for employment of apprentices, trainees, or students. Many contracts containing these exact clauses are in force today.

"Let us further suppose that Station XYZ desires to employ GI Joe, an Army veteran who received some training in electronics while in the service, shows promise of developing into a first class technician, and is willing to learn the business at a beginning salary of $30 per week. He's not a member of union ABC. Can he be employed? If he is, does he have to join the union in order to perform any of the work described in the contract as within the union's 'trade jurisdiction'?

"Two facts are obvious: the station has agreed that only members in good standing of union ABC may do any technical radio broadcasting work; GI Joe isn't a member—and what's more, probably can't meet the union's requirements for admission until he has gained the experience offered by working for the station. We seem to be faced with a dilemma: GI Joe can't become a member until he has technical experience in broadcasting, and he can't get the technical experience unless he's a member. But common sense and good will on the part of all concerned should solve the problem.

"The manager of Station XYZ would be well advised to discuss his plans with the officials of union ABC, get their views, and attempt to work out a solution with them. Both management and the union, and obviously GI Joe, have legitimate interests in developing competent and qualified technicians and, specifically, in making it possible for GI Joe to learn the trade. The union representative will probably want to know whether the station is seeking to cut working standards, undermine the union's otherwise impaired conditions they regard as beneficial to them and members of the union. It should not be difficult to demonstrate to reasonable men the good faith of the station is starting a veteran-training program. Maybe the local union, or its international, has worked out a program on this very subject, or is willing to join with the employer in a cooperative effort. In such a spirit, details will be solved readily.

"Probably, in the hypothetical situation under discussion, an arrangement can be worked out whereby GI Joe will be employed on the terms proposed, with the understanding that after a stipulated period of training or when he gets his operator's license, he will be classified as a technician and—if the contract is still in effect—will apply for membership in the union. In the meantime, the union will waive the application of the terms of the contract to him and agree to act on his membership application in accordance with its rules. The employer will, no doubt, be asked to give assurance that the training procedure is not going to be used as a device to evade the contract.

"The precise arrangement in handling the day-to-day details of a veteran-training program is not spelled out by the customary collective bargaining contract, and manifestly will vary from station to station. Certainly it would appear unusual for a contract to provide, and unreasonable for a union to demand, that a fully qualified union technician must be hired or assigned to devote his whole work time to showing GI Joe the ropes.

"In negotiating contracts with unions, stations having in mind instituting a veteran-training program would be well advised to cover this subject adequately in their contract. The Employee-Employer Relations Department will endeavor to supply requested information relating to apprentices and trainees."

BROWN ADDRESSES INDIANA BROADCASTERS

The Indiana Association of Broadcasters, meeting in Indianapolis today (3) will hear a report on the activities of the NAB Small Market Stations Division. J. Allen Brown, director of the division, will address the group.

John Carl Jeffery, WKMO, will preside at the meeting.

FCC

FCC PROPOSED DECISION DENIES KQW TRANSFER

The FCC on Friday (31) announced a proposed decision which would deny the application for transfer of KQW, San Jose, Calif., from the Pacific Agricultural Foundation, Ltd., to the Columbia Broadcasting System. Commissioners Wakefield and Jett dissented.

The Commission based its decision upon three reasons advanced by CBS supporting the application: (1) A network should own stations especially in the important centers of population, to assure outlets for the distribution of its programs in those areas; (2) the improved operation and usefulness of the station as an originating point which would result from the network's ownership of the station; and (3) increased economic stability accruing to the network as a result of its ownership of stations—the income from station operation as such providing a financial cushion against possible losses from network operation, as such.

Referring to the first point, the Commission stated that CBS owns seven AM stations, six of which operate with 50 KW power. "In addition," the Commission went on.

(Continued on next page)
"it (CBS) has a minority or indirect interest in two other AM broadcast stations. No other nation-wide network owns more than five stations, yet the other networks have had no difficulty in operating effectively."

Concerning the second point, the Commission said, "While undoubtedly the ownership of stations in key areas is convenient from a network's point of view, the fact is that CBS already has one outlet on the west coast—KNX in Los Angeles—and owns more stations in other major cities than does any other nation-wide network. Moreover, CBS has been operating its nation-wide network since it started operation without an outlet in San Francisco and the evidence in this case clearly shows that CBS has been more than able to maintain its competitive position vis-a-vis the other networks."

On the point of economic stability of the network, the Commission quoted figures showing the network's profits, dividends, etc., and said that the "figures amply demonstrate that the ownership of CBS of an additional AM station is not necessary in order to ensure the economic stability of the network."

In concluding its majority findings the FCC said, "For the foregoing reasons, the Commission is of the opinion that the transfer of KQW to Columbia Broadcasting System would not be in the public interest and that, accordingly, the application should be denied."

Dissenting Opinion

Commissioner Jett in his dissent said that he did not "agree with the conclusions reached in the majority opinion in this case. It is my belief that the record before us clearly shows that the transfer of KQW at San Jose, California, to the Columbia Broadcasting System is definitely in the public interest, and accordingly the application should be granted."

In his dissenting opinion, Commissioner Wakefield said "I am unable to agree with the majority of the Commission that the transfer of control of KQW to the Columbia Broadcasting System would create in Columbia such concentration of control of broadcasting facilities that such transfer should not be permitted."

PETITION FOR APPROVAL WJW-ABC AGREEMENT DENIED BY FCC

In a letter to WJW made public on Friday (31), the FCC announced that it had denied a petition made by the station for approval of an agreement between the station and ABC, which would have provided for options to extend affiliation.

Text of the FCC letter to WJW is as follows:

Under the terms of that agreement, you are given certain options to extend the term of your current affiliation agreement with that network for three successive periods of two years each. Each option is contingent upon the exercise of the preceding option, which rests in your absolute discretion. The agreement provides further that either party may terminate the basic affiliation agreement at any time during the extension periods provided for in the second and third options upon 12-months' written notice to the other party.

The effect of the agreement is to confer upon you the right to extend your affiliation beyond its original expiration date for a minimum of two and a maximum of six years. On the other hand, the earliest date at which the network may, as of right, terminate the agreement is three years from its original expiration date. Thus, by not exercising the options, you may limit the term of your network affiliation to the original two-year term, while the network may at its option be bound for a minimum of five years. Such an agreement, as you recognize in your petition, is clearly barred by a literal interpretation of the provisions in section 3.103 of the Commission's regulations which provides: 'No license shall be granted to a standard broadcast station, having any contract, arrangement, or understanding, expressed or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years. Provided, That a contract, arrangement, or understanding for a period up to 2 years may be entered into within 6 months prior to the commencement of such period."

"You urge that your agreement is in complete conformity with the purpose and spirit of the rule as understood by you, namely, ... to prevent the exercise of independent judgment by station licenses in the choice, selection and scheduling of the programs. No mention is made, however, of the basic consideration which underlies all of the chain broadcasting regulations; the Commission's concern for the improved service which the public might otherwise be expected to derive from competition in the network field. You fail to recognize, also, that conceivably it may be in the public interest not to permit networks to restrict their ability to compete with other networks in the selection of affiliated stations. Options such as those proposed may well prevent a network from improving its competitive position with relation to other networks when new and better facilities may be licensed in the service areas of its existing affiliates. As the Commission stated in its Report on Chain Broadcasting (p. 61)—'

'The long-term contracts of CBS and NBC were intended to, and do, prevent any real competition in the network-station market. The public is thus deprived not only of the advantages that might flow from the establishment and development of new networks, but it also loses the benefits of competition between existing networks for the better outlets.'

"Agreements of the type you propose are in effect restraints upon competition among the networks and appear equally to be not in the public interest. Accordingly, your petition has been denied."

SPECIAL TEMPORARY AUTHORIZATION REQUESTS SUBJECT TO TIME FACTOR

Broadcasters were urged by the FCC on Friday (24) to allow sufficient time in making requests for temporary authorizations to permit notification of a grant in time for advantage of the application to be taken.

The commission stated that it had received numerous requests for such authorization on the day a program was scheduled or the day previous to such a program. It pointed out that often it was impossible to notify a licensee of action because of late filing of the request.

The FCC explained that its rules provide that such a request will not be considered unless "It is received by the commission at least 10 days previous to the date of proposed operation. Provided, however, that any such request received within less than 10 days may be accepted upon due showing of sufficient reasons for the delay in submitting such request."

FCC ASSISTANT GENERAL COUNSEL RESIGNS

Nathan David, Assistant General Counsel of the FCC on military leave, has resigned to enter private practice in Washington, it was announced on Tuesday (28).

After joining the commission in 1939, Mr. David became secretary to former FCC Chairman James Lawrence Fly the following year. In 1942 he was appointed chief of the War Problems and Enforcement Division.
BULOVA AND WOKO CASES COMPARED

The FCC recently denied an application for the transfer of a standard broadcast station in New York on the grounds that the proposed licensee "showed only the vaguest acquaintance with the present operations" of the station and were equally vague as to their plans for its future operation" and that "the transferes revealed an extreme lack of candor in testifying under oath as to their numerous difficulties with various governmental bodies." (In re Application of Bulova and Henshel, Transferors, Docket No. 6598, Mar. 5, 1946.)

This case is interesting in the light of the decision of the U. S. Court of Appeals in the WOKO Case (current NAB Reports, p. 58). It was there held that the Commission acted arbitrarily and capriciously in refusing to renew a corporate license because the corporation's general manager had made repeated misstatements as to its beneficial ownership of 24% of the capital stock. The Supreme Court agreed to review this case on April 22, 1946.

In the Bulova Case, supra, the Commission did not refer to the WOKO Case, but took the view that its continuing interest in station operation required it to grant licenses "only to those persons whose statements are trustworthy." In addition the Commission found that the prospective licensees' "numerous and extended" violations of federal and state regulatory laws, as distinguished from "isolated and inadvertent violations" of such laws, showed a lack of a sense of public responsibility in private business dealings which must be given considerable weight in determining the degree of public responsibility which would be brought to bear in broadcast operations.

PUBLIC INTEREST PROGRAMMING

RETAILERS CONDUCT NATIONWIDE FOOD CONSERVATION CAMPAIGN THIS WEEK

Beginning this week (June 3), retail merchants throughout the country are conducting an educational advertising and promotion campaign for famine relief. The drive was organized at the request of the President's Famine Emergency Committee, of which Herbert Hoover is honorary chairman, Chester Davis, chairman, and Judge Justin Miller, a member. A National Retail Committee has been formed, with Charles B. Dulcan, Sr., vice-president of The Hecht Company, Washington, D. C., as honorary chairman, and local chairmen in ninety key cities. In addition, the American Retail Federation and the National Retail Dry Goods Association have made available their services and the cooperation of their member stores.

The campaign will be aimed directly at the American housewife, the individual primarily responsible for the final purchase and control of foodstuffs for home consumption. It will explain the reasons for the current crisis, describe the methods of solving it, and appeal to her for cooperation in the conservation and sharing of wheat products, fats, oils, and other foods, and the elimination of waste.

The appeal will be concentrated in a "Pledge of the American Housewife," which the women will be asked to sign and turn in to famine booths located in the stores. A goal of 30,000,000 signed pledges has been set for the drive.

The motivating force behind the retailing famine program is the realization that the individual American woman is willing and eager to respond wholeheartedly to any emergency, and her effort, multiplied 50,000,000 times, can be a deciding factor in the solution of the famine problem. However, she must be given a complete picture of the need, and her relation to it, and her awareness of the acute situation must be keyed to a high pitch.

The retailers are especially well qualified to perform this function because of their day-in, day-out, continuous relations with the housewife—through personal contact by store employees, and by virtue of their multitude of promotional facilities—radio, newspapers, etc.

Station managers are therefore urged to cooperate with the retailers in their drive, and to bring to their attention the various ways in which radio can participate actively. City chairmen and other key merchants throughout the country have already been advised by the National Retail Committee to plan the most advantageous utilization of sponsored spot announcements and other radio time with station managers.

Managers should also alert women's program directors and commentators to the campaign. These programs, with their large housewife listening audience, can do much to carry the message of the drive and the pledge directly to the desired target.

WLW SENDS FAMINE OBSERVERS TO EUROPE

A housewife, a farmer and a storekeeper, accompanied by Roy Battles, WLW's Farm Program Director, boarded a plane in Washington on Wednesday (29) to start the first leg of their trip to Europe to observe first hand the critical food shortage.

The group plans to make stops in Germany, Poland, Austria, Greece, Italy and France, the most severely affected countries, as well as quick stopovers in London, their temporary base in Europe.

WLW coverage of the trip includes short wave broadcasts and cable stories from the group abroad. On their return, members of the observation party will participate in a series of broadcasts, in which they will describe their reactions to conditions prevailing in the famine areas.

It is expected the round trip will be completed in six weeks.

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Radio Allocation Plans during the week of June 10-16, by The Advertising Council and the Media Programming Division of the OWMR. A brief résumé of each Fact Sheet is given below:

Emergency Food Collection

The Emergency Food Collection offers an opportunity for Americans to make a direct and personal contribution to help prevent starvation abroad. 500 million men, women and children throughout war-torn Europe and Asia are hungry, an appalling number of them facing starvation. In their long tradition of generosity toward those in need, the American people have shown their willingness to share their good fortune. They have shown it in their readiness to limit their consumption of urgently needed relief foods, by voluntarily "saving and sharing" wheat products, fats and oils so that more can be shipped overseas. Americans are being asked to simply contribute (Continued on next page)
either tinned food or cash to buy and transport food—preferably cash. The food realized from the Emergency Food Collection, conducted on behalf of United Nations Relief and Rehabilitation Administration (UNRRA) will be used to supplement the minimum subsistence diets of those facing starvation abroad. The main goal of the Collection is to collect money with which to buy and transport food; the secondary aim is to obtain gifts of foods packed in tins or cans. Money contributions are accepted because they eliminate the expenses of collection, packaging, and shipping, and make possible the purchase of more food by buying in quantity lots at lower prices. Cash or checks should be given to the local Emergency Food Collection Committee or to Emergency Food Collection, New York City. If unable to contribute money, listeners should search their pantries and kitchens for tinned food to contribute . . . locations of food collection depots can be learned from local newspapers or radio stations. (Fact Sheet No. 25-A)

**Buy U. S. Savings Bonds**

The Treasury's first effort since the Victory Loan to promote the sale of Bonds through means other than the Pay-Roll Savings Plan is scheduled to run from D-Day, June 6, through Independence Day, July 4. It is hoped that this campaign will create a long-term incentive for the buying and holding of U. S. Savings Bonds. Thirty billion dollars in Bonds bought during the war are still owned by the people. An additional $22 billion—over and above—what can be absorbed by taxes, insurance, normal savings and the purchase of consumers' goods and services that can be made available this year—will be held by the American people in 1946. This money, a total of $52 billion, is figuratively a powder keg which if employed in present spending would skyrocket prices and create a long-term inflation aspects of the campaign. (Fact Sheet No. 11-B)

The Veterans’ Assets

Radio is asked to help educate the general public, as well as employers, on the assets of the veteran as a citizen and an employee. Messages selling the assets of veterans will be believeable, of course, only if they show specially in what ways veterans are better employers and better citizens than they were before entering service. These specific points can be grouped under three headings: 1. Service Jobs and Civilian Jobs: One-half of all service jobs are directly related to civilian occupations, and all service jobs are related to civilian occupations in some way. 2. Extension Education: It is not generally realized that many servicemen, while stationed away from home, improved their own educational status through—(a) The United States Armed Forces Institute; (b) Navy Educational Services Program. 3. Indoctrination: Military service teaches a man or woman many things, among them respect for discipline and punctuality, the strict adherence to the rules of discipline and procedure in turn make a person a better leader, and these qualities are transmitted to his attitude toward civilian life. The military teaches a man self-sufficiency. These, and other qualities, are ingrained in men and women during their time in service and make them better workers, more ingenious, and more thorough than they ever were before. The skills, education, and experience which our servicemen and women acquired in the armed forces—the knowledge which proved deadly to the enemy in war—can be an invaluable asset to this nation in peace. (Fact Sheet No. 23)

**Federal Communications Commission Docket**

**HEARINGS**

The following hearings are scheduled to be heard before the Commission in Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 3. They are subject to change.

**Monday, June 3**

*To Be Held in Room 305, Board of Education, 228 North La Salle St., Chicago, Illinois, for FM Radio Facilities in the Chicago Area*

FCC ACTIONS

AM APPLICATIONS GRANTED

NEW—N. Joe Rahall, et al., d/b as Allentown Broadcasting Co., Allentown, Pa.—Granted CP for a new station to operate on 1530 kc., 1 KW, daytime only. (B2-P-4196; Docket 475)
NEW—Mattoon Broadcasting Co., Mattoon, Ill.—Granted construction permit for a new station to operate on 1170 kc., 250 watts, daytime only. (B4-P-4643)
NEW—Midwestern Broadcasting Co., Alpena, Mich.—Granted construction permit for a new station to operate on 1530 kc., 250 watts, unlimited time. (B2-P-4723)
NEW—Hollywood Broadcasting Co., Hollywood, Fla.—Granted construction permit for a new station to operate on 910 kc., 1 KW, daytime. (B3-P-4636)

FM FINAL CP’S GRANTED

The following stations heretofore given conditional grants and engineering approvals, were granted regular construction permits:

Georgia-Ala. Broadcasting Corp., Columbus, Ga.—C. P. for Metropolitan station; Channel (No. 242) 963 mc.; 9.4 KW; antenna: 492 ft.
Minnesota Broadcasting Corp., Minneapolis, Minn.—C. P. for Rural station; Channel (No. 246), 971 mc.; 192 KW; antenna: 491 ft.
The Daily Report, Ontario, Calif.—Construction permit for Community station; 1043 mc. (Channel 282); 250 watts; antenna: 194 feet.

Contra Costa Broadcasting Co., Richmond, Calif.—Construction permit for Community station; 1017 mc. (Channel 284); 0.14 KW; antenna: 54 feet.
Lee Brothers Broadcasting Co., San Bernardino, Calif.—Construction permit for Metropolitan station; 1013 mc. (Channel 277); 0.47 KW; antenna: 2,250 feet.
Robert K. and S. C. Hancock, copartners d/b as Santa Maria Daily Times, Santa Maria, Calif.—Construction permit for Community station; 1013 mc. (Channel 282); 250 watts; antenna: 2,250 feet.
Augusta Broadcasting Co., Augusta, Ga.—Construction permit for Metropolitan station 94.5 mc. (Channel 233); 30 KW; antenna: 94 feet.
J. W. Woodruff, et al., d/b as Columbus Broadcasting Co., Columbus, Ga.—Construction permit for Metropolitan station; 96.7 mc. (Channel 244); 12 KW; antenna: 510 feet.
Paul F. McRoy, et al., d/b as Southern Illinois Broadcasting Partnership, Carbondale, Ill.—Construction permit for Metropolitan station; 100.5 mc. (Channel 263); 3.4 KW; antenna: 345 feet.
Champaign News Gazette, Inc., Champaign, III.—Construction permit for Community station.
North Shore Broadcasting Co., Evanston, Ill.—Construction permit for Community station; 104.3 mc. (Channel 282); 250 watts; antenna: 225 feet.
Quincy Newspapers, Inc., Quincy, Ill.—Construction permit for Rural station; 97.7 mc. (Channel 249); 32 KW; antenna: 743 feet.
The Radio Station KFII Co., Wichita, Kansas—Construction permit for Metropolitan station 96.5 mc. (Channel 243); 185 KW; antenna: 411 feet.
The Hampden-Hampshire Corp., Holyoke, Mass.—Construction permit for Metropolitan station; 95.5 mc. (Channel 288); 9.4 KW; antenna: 1,940 feet.
North Shore Broadcasting Co., Salem, Mass.—Construction permit for Community station; 105.5 mc. (Channel 288); 250 watts; antenna: 260 feet.
James Broadcasting Co., Inc., Jamestown, N. Y.—Construction permit for Metropolitan station; 101.5 mc. (Channel 268); 9.5 KW; antenna: 750 feet.
The Messenger Publishing Co., Athens, Ohio—Construction permit for Metropolitan station; 102.9 mc. (Channel 275); 105 KW; antenna: 550 feet.
Pacific Radio Advertising Service, Portland, Oregon—Construction permit for Metropolitan station; 95.7 mc. (Channel 239); 3.2 KW; antenna: 911 feet.
Susquehanna Broadcasting Co., York, Pa.—Construction permit for Metropolitan station; 94.9 mc. (Channel 235); 20 KW; antenna: 500 feet.
Intermountain Broadcasting Co., Salt Lake City, Utah—Construction permit for Metropolitan station; 98.5 mc. (Channel 253); 3.2 KW; antenna: 14 feet.
Times Publishing Co. of Wichita Falls, Texas—Construction permit for Metropolitan station; 97.7 mc. (Channel 219); 20 KW; antenna: 500 feet.

ENGINEERING APPROVAL OF FM CG

The following applicant was granted approval of basic engineering plans: (Note: power given is effective radiated power; antenna height given is height above average terrain.)

Penellas Broadcasting Co., St. Petersburg, Fla.—Metropolitan; 92.1 mc. (Channel 221); 30 KW; antenna: 337 feet.

DESIGNATED FOR HEARING

Pilgrim Broadcasting Corp., Manchester, N. H.: Nashua Broadcasting Corp., Nashua, N. H.—Designated for consolidated hearing the application of Pilgrim Broad-

(Continued on next page)
The following licenses were granted renewals for the period ending November 1, 1948:

- KYA, San Francisco; WHKY, Hickory, N. C.; WTAQ, Green Bay, Wis.; WFBM and auxiliary, Indianapolis.
- WLV—Muscle Shoals Broadcasting Corp., Muscle Shoals, Ala.—Granted renewal of license for the period ending February 1, 1948.
- WINS—Hearst Radio, Inc., New York City—Granted renewal of license for the period ending May 1, 1948 (Comr. Durr voting for hearing).
- WKR—Oscar C. Hirsch, Cairo, Ill.—Granted renewal of license for the period ending August 1, 1948.

Licenses for the following experimental television stations were further extended upon a temporary basis only, pending determination upon applications for renewal, for the period ending August 1, 1946:

- W2XVT, Allen B. DuMont Labs., Inc.; W1OXAD, W10XAE, and W10XAF, Philco Products, Inc.

Licenses for the following experimental television stations were further extended upon a temporary basis only, pending determination upon applications for renewal of licenses, for the period ending August 1, 1946:

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon applications for renewal of licenses, for the period ending August 1, 1946:

NEW—J. E. Rodman, Area of Central, Calif., (P. O. 295 Union Ave.)—Modification of construction permit for a new relay broadcast station to be operated on 1520, 2058, 2150 and 2790 kc., power of 50 watts and A3 emission.

APPLICATIONS TENDERED FOR FILING

WBLK—Charleston Broadcasting Co., Clarksburg, W. Va.—Consent to assignment of license to New Publishing Co. (1400 kc.)

KVOP—W. J. Harpole and J. C. Rothwell, a partnership d/b as Radio Station KVOP, Plainview, Texas—Acquisition of control of licensee corporation by W. J. Harpole through transfer of stock owned by J. C. Rothwell. (1100 kc.)

KOLQ—Reno Broadcasting Co., Reno, Nev.—Modification of construction permit to change directional antenna from night to day and night use and install new transmitter. (920 kc.)

NEW—A. J. Fletcher, Charlotte, N. C.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Baird Bishop and Ed Bishop, d/b as Dalrad Associates, Dalhart, Texas—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts and unlimited hours of operation.

NEW—Intermountain Broadcasting Co., Inc., Alamogordo, N. Mex.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—James R. Doss, Jr., Decatur, Ala.—Construction permit for a new standard broadcast station to be operated at 1065 kc., power of 250 watts and daytime hours of operation.

NEW—J. E. Massey and L. C. McCull, d/b as Palatka Broadcasting Co., Palatka, Fla.—Construction permit for a new standard broadcast station to be operated on 800 kc., power of 250 watts and daytime hours of operation.

NEW—Enterprise Publishing Co., Thomas H. Frier and W. R. Frier, partners, Douglas, Ga.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

WPAB—Portorican American Broadcasting Co., Inc., Ponce, Puerto Rico—Construction permit to change power from 1 KW to 5 KW and install new transmitter. (1370 kc.)

NEW—Veterans Broadcasting Service, Inc., Baltimore, Md.—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts and unlimited hours of operation. Contingent on grant of WCRM for 680 kc.

WNBZ—Upstate Broadcasting Corp., Saramac Lake, N. Y.—Construction permit to increase power from 100 to 250 watts, frequency from 1320 to 1450 kc., and hours of operation from daytime to unlimited and install new transmitter.

NEW—Midland Broadcasting Co., Midland, Mich.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Democrat Printing Co., Durant, Okla.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Tarboro Broadcasting Co., Inc., Tarboro, N. C.—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 250 watts and daytime hours of operation.

WMFR—Whpt.—James E. Lambeth, James E. Lambeth, Jr., Helen M. Lambeth, Ralph M. Lambeth, Frank S. Lambeth and Molly H. Lambeth, d/b as Radio Station WMFR, High Point, N. C.—Consent to assignment of license of Radio Station WMFR and Relay Station WHPT to James E. Lambeth, James E. Lambeth, Jr., Helen M. Lambeth, Frank S. Lambeth and Molly H. Lambeth, d/b as Radio Station WMFR. (1350 kc.)

WGBG—Greensboro Broadcasting Co., Inc., Greensboro, N. C.—Consent to transfer of control of Licensee Corp. from James E. Lambeth, Helen M. Lambeth and Frank S. Lambeth to Ralph M. Lambeth. (980 kc.)

NEW—The Macomb Broadcasting Co., Macomb, III.—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 250 watts and daytime hours of operation.

NEW—Northwestern Theological Seminary and Bible Training School, Minneapolis, Minn.—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 1 KW and daytime hours of operation.

Federal Trade Commission

ACTIONS

COMPLAINTS

F. W. Fitch Manufacturing Co.—The Commission has issued a complaint charging F. W. Fitch Manufacturing Co. and F. W. Fitch Co., Des Moines, Iowa, with disseminating false advertisements concerning the action and results to be obtained from the use of Fitch's Dandruff Remover Shampoo. F. W. Fitch Co. is the distributor of the preparation, which is advertised extensively in newspapers, periodicals and on the radio. The complaint charges that despite the claim made in the respondents' radio slogan, "Don't despair, use your head, save your hair, use Fitch Shampoo," the preparation will not save hair. (5439)

CEASE AND DESIST ORDERS

Simon Ackerman Manufacturers & Tailors, Inc., 200 Fifth Avenue, New York, distributor of men's suits, overcoats, overcoats and other clothing, have been ordered to discontinue misrepresentations concerning its business status and the prices and values of its merchandise. The order is also directed against the respondent corporation's officers and directors, Simon Ackerman, May Ackerman, Myron Ackerman and Raymond Ackerman. (5109)

STIPULATIONS

Butter-Krust Baking Co.—John A. Apple and Benjamin F. Bastian, copartners trading as Butter-Krust Baking Co., Sunbury, Pa., stipulated with the Federal Trade Commission that they will cease and desist from disseminating false advertisements concerning a trophy awarded them in connection with a brand of bread they sell. The copartners advertised that their Toastmaster Bread had been judged "America's Finest Bread" and awarded the Harry M. Freer Trophy for superior flavor and other qualities. According (Continued on next page)
to the stipulation, these representations and similar ones are misleading insofar as they connote that the Freer Trophy was guarded in a nationwide contest in which bakers generally participated, whereas, of the approximately 20,000 bakers in the United States only about 44 competed for the trophy. (1157)

Siph-O Products Corp., 60 India Street, Boston, and its officers, George V. Gavaza and Cecil V. Gavaza, entered into a stipulation with the Commission to cease using the word "filter," or other term of like connotation, as a designation for or as descriptive of their device which they represented to be a Plastic Filter and which they advertised as capable of purifying drinking water. (4158)

Everglo Vitamin Co.—The Commission has approved a stipulation in which Henry H. Sobol, trading as Everglo Vitamin Co., 1776 Broadway, New York, agrees to cease representing that the product it sells under the name of Everglo Calcium Pantothenate restores the original color or lustre to the hair or prevents the hair from becoming gray. Calcium pantothenate is the principal ingredient in the preparation. (03310)

CASE CLOSED

The Federal Trade Commission closed its case against Guaranteed Products Corp., formerly of Wellington, Ohio, because the corporation has been dissolved.

Everglo Vitamin Co.—The Commission has approved a stipulation in which Henry H. Sobol, trading as Everglo Vitamin Co., 1776 Broadway, New York, agrees to cease representing that the product it sells under the name of Everglo Calcium Pantothenate restores the original color or lustre to the hair or prevents the hair from becoming gray. Calcium pantothenate is the principal ingredient in the preparation. (03310)

JUNE 3, 1946—447
NETWORK STRIKE THREATENED BY PETRILLO

If Lea Act Held Constitutional, AFM Head Says
Musicians Will Not Work for Nets

A steady barrage of anti-industry comment emanated this week from the annual convention of the American Federation of Musicians at St. Petersburg, Fla.

Threats of reprisals against existing and looming labor laws were so far-reaching that the state of Florida is investigating to see if its anti-sedition laws were violated.

In a move that has been editorially labeled as “coercion of the courts,” James C. Petrillo, union president, proclaimed that his musicians would refuse to work for the networks at the expiration of their present contracts if the Supreme Court holds the Lea Bill to be constitutional.

At the same time he said that his men would cease making recordings if President Truman signs the Case Bill. “If that happens,” the AFM president said, “I would send out a little letter saying AFM men would not be allowed to take part in making transcriptions.”

In Washington on Thursday (6) President Truman denied reports that he had made up his mind to veto the Case Bill. The President said that he was still studying the measure.

The Petrillo plans for a work cessation at networks by his musicians are based on coincidental expiration dates of all contracts with broadcasters in New York, Chicago, and Los Angeles. Said the AFM chief: “If the Supreme Court rules the Lea Bill constitutional, the small stations won’t get any music because these three stations will agree to play locally only.” This statement was taken to mean that he would permit the musicians in the three radio centers to play for local broadcasts but not for network originations. The New York, Los Angeles and Chicago contracts all expire February 1, 1947.

Petrillo Reelected

The policies which the AFM has been pursuing were approved by the convention, and Petrillo was renamed president of the organization by acclamation. The question of whether the union should retain a public relations representative was referred to the executive board.

NAB REITERATES MUSIC POLICY

The National Association of Broadcasters regrets that Mr. Petrillo found it expedient or necessary to resort to personalities and to terms of conflict at the American Federation of Musicians’ convention in St. Petersburg.

The ultimate objective of the radio industry and the AFM must be to provide the best possible music for the American public. Neither the broadcasters nor the Federation can escape this responsibility. Only by a reasonable approach can we hope to solve our mutual problems and discharge our obligation to the American people.

Through the initiative of its President, Justin Miller, and long before the passage of the Lea Bill or the introduction of the legislation concerning labor now before the Congress and the President, the NAB sought to establish new machinery and methods for amicably settling the long-standing differences between broadcasters and the AFM.

At the last meeting with Mr. Petrillo in April, Judge Miller and an organizing committee of representative broadcasters made the concrete suggestion that permanent and fully representative Advisory Committees be promptly appointed by the AFM and the radio industry; that these committees meet quickly and as often or as long as necessary, and that they attempt to resolve the existing differences and recommend such solutions as might be mutually agreed upon to their respective organizations for adoption.

Following this, on May 24, Judge Miller addressed a letter to Mr. Petrillo in which he said: “As you know, I have repeatedly requested that a joint committee, representing the AFM and the radio broadcasting industry, be set up for the express purpose of discussing our differences and providing a basis for peaceful settlement; by recommending to our respective groups the adoption of such solutions as may be mutually agreed upon. I have met with you on three occasions for that purpose. When our last meeting adjourned I supposed that we were making good progress toward setting up such a joint committee and have (Continued on next page)
Ted Heffron Nominated Executive Assistant

Edward J. (Ted) Heffron has been named executive assistant to the president and vice president of the National Association of Broadcasters, it was announced Friday (7) by A. D. Willard, Jr., executive vice president. In this position, he will handle NAB public relations duties.

Mr. Heffron was until recently Executive Secretary of the National Council of Catholic Men, having been in charge of public relations of that organization for the past fourteen years. Under his guidance the “Catholic Hour” (NBC) became one of the most widely heard network religious broadcasts. He largely planned and engineered the “Hour of Faith” (ABC), another NCCM network program.

He has also had close ties with Protestant and Jewish groups, especially with the National Conference of Christians and Jews—not only in radio, but in other fields. He was appointed by an inter-faith committee to draft the recommendations on Religious Broadcasting which were adopted at the Ohio State Institute for Education by Radio in 1943.

The new NAB executive assistant has long worked closely and cooperatively with the radio industry, having testified several times at public hearings concerning radio before congressional committees and the FCC. In his position with the NCCM, he publicly and aggressively supported the original NAB Code.

Mr. Heffron was born in East Dubuque, Illinois on April 3, 1905. Having already been admitted to the bar in the District of Columbia in 1930, he received his LL.B. from Georgetown University in 1931. In 1940 he received an honorary LL.D. from Loras College, Dubuque, Iowa, where he had previously earned his B.A. (magna cum laude). Mr. Heffron is married and has three children.

Editors' Note

A POLICY ON RELIGIOUS BROADCASTS

by

Michael R. Hanna

Every broadcast station manager, who operates in the public interest, is anxious for and pleased with the cooperation of the community served by his station. Suggestions, criticisms, and active participation in the development of the station's broadcasting policy, are welcomed by the good station manager from civic and social groups in the area.

Given the proper point of view on the part of community organizations and the broadcaster, the effectiveness of community service will be considerably enhanced. There is cause for alarm, however, when organized community groups—be they political, religious or social, straining at the bit to take advantage of a misconceived notion that the Federal Communications Commission has, through its recent public service analysis, opened the door for demands on station time regardless of station policy. Start appearing before congressional investigation committees in an effort to wrest the control of station operation and programming from the broadcaster.

A case in point is the present confusion developing in the matter of religious broadcasting. Dr. Harvey H. Springer, the Evangelist, brings before the unAmerican activities committee of Congress the accusation that "Religion is being kept off the air" and "I think it is something for Congress to look into."

If there is a problem in broadcasting, so far as religious programs are concerned, the solution, it would seem, becomes simple when we analyze the basic responsibilities of radio in this field. If one of the functions of radio is to serve the public interest, it becomes obvious that religious inspiration is an inseparable part of broadcasting in the public interest. It would be difficult to find a broadcaster in the United States who has not recognized the need for religious programs in the program structure of his station.

On the other hand, one might easily inquire whether broadcasters in sufficient number have an adequate understanding of the proper functions of the religious programs. Do we schedule religious broadcasts for income alone? Do we schedule them with a view to giving every religious doctrine adequate representation on the air, or do we schedule religious broadcasts for the religious inspiration they provide regardless of sect?

He is a short-sighted broadcaster who sells time to all comers, for he has lost sight of service. By so doing, he has laid the groundwork for confusion. He has removed from his office the right to control his program structure, to keep it in balance. When he has sold time to one church, he has made possible legitimate complaints by all and sundry to whom he might desire to refuse time. One might easily conceive of scores of religious groups—legitimate and otherwise—who, because they exercise the right to worship as they please, can embrace any doctrine and use the most amazing techniques with which to promote it. Under a policy either of limited or unlimited sale of time to religious groups, the best interests of the listener are easily neglected. He is besieged by programs ranging from the conservative and worthwhile type to those in which a more or less inspired fanatic will rant and

(Continued on next page)
rave and scream for dollars. The end result is a lop-sided program structure, which drives away listeners and detracts from the effectiveness of other programs broadcast in the public interest. An intelligent look at the above situation reveals nothing but bad taste and a mockery of the concept of spiritual leadership by radio.

Now let us assume that we are not going to sell time to any religious group. Let us assume that we decide that the only fair thing to do is to grant equal opportunity for all religious groups desiring to promulgate their several religious doctrines through radio. Here, again, we find a situation, while not quite so bad as the one discussed above, is yet fraught with danger and a threat to proper program balance and, of necessity, generally weak in program content. Here, as in the first situation, we open the door to 30 or 50 or 75 different religious groups, depending upon the community which the broadcast station serves. Assuming the broadcaster desires to be fair to all groups, the next time we see him he will be riding on the horns of a dilemma, hell-bent for one of the biggest messes of his broadcasting career.

We must take stock of our true function in the field of religious broadcasting. If we have any duty to perform in this area it is to provide inspiration, the kind of religious inspiration which will stimulate in our listeners the love of God and His teaching. How is this to be accomplished? Certainly not by the sale of time to an organized group of money seekers clothed in religious garb. Certainly not by an unorganized, hit-or-miss policy of “Give them all time to do as they please and we as broadcasters will have discharged our obligation.” If, then, we can agree that our function is not to promote the doctrine of the Catholic or the Protestant, or Jew or the Holy Roller, or the Fundamentalist, but rather to provide spiritual inspiration, founded on a broad concept which would embrace all of the forces for good in religious teaching, then the solution of our problem is in sight. It becomes an easy matter now to set aside an amount of time which will be in keeping with proper program balance, and to use this time as a force for effective religious teaching. It would be proper, then, to call together representatives of all religious groups and to discuss with them the religious needs of the community and to enlist their aid in the provision of those needs. The Presbyterian, then, comes to the microphone not as a Presbyterian, but as a student of religion, as a man who understands the religious needs of our listeners, equipped to discuss religious problems and to give spiritual advice. On the air he is a minister of God, not of a special doctrine. On the air he urges people to go to church—not to his church—but to any church of the listener’s choosing. On the air he “sells” not his doctrine but all the good that is religion.

This is not an easy job for the broadcaster to do. It requires a degree of unshakable sincerity and courage, but certainly not any more sincerity and courage than it took to sell War Bonds on sustaining programs. We give time to the Red Cross, to the Government, to our Community Chest, to our schools and to alleviate the suffering of all peoples. Is it so hard to give it in the interest of God’s teaching?

While some broadcasters might find the change a difficult one to effect, it must be granted that the benefits will justify the effort. We remove the arguments of the Doctors Springers and all others who have either started or have planned to start their trek to Washington with the aura of letter writers, members of the Un-American Activities Committee, or to the Federal Communications Commission or to anyone else who would listen. In this respect, if in no other, radio would be delivered back to the broadcaster. This is a form of housecleaning within the industry, for which industry leaders in the past few months have been pleading.

The plan calls for the cancellation of a lot of “easy money” contracts. Yet if the station carrying hour upon hour of commercial religious programs would stop to consider the killing effect of such a kind of program on the general program structure and the negative effect upon the average listener, it would soon find that more effort devoted to the selling of the hitherto untapped commercial accounts, that station would soon find itself considerably ahead of the game, not only in the commercial sense but in the aesthetic sense as well.

Regardless of your own religious beliefs, your blood should boil on hearing what the writer heard in his own office some time back. The Evangelistic pastor of a local well-known church insisted that an exception be made in his case so far as taking his turn with the other religious leaders in the community was concerned. When asked why an exception should be made, he replied that among the participants on the Sunday morning religious program was the Rabbi of the local synagogue. This pastor could not participate in this program because, as he put it, he “could not enjoy Christian fellowship with a Jew.” This incident should bring out the full force of our argument. We must decide, whether through the sale or the gift of time, we are to become propagandists for one group against another. The minister who cannot enjoy Christian fellowship with a Jew, or the Catholic who cannot participate on the same program with a Protestant does not come to us with clean hands. He is an opportunist, spreading not the doctrine of God but the doctrine of intolerance. During his allotted broadcast time he breaks down the effectiveness of our other programs designed to promote tolerance and understanding and a responsible world citizenship.

The placement of religious broadcasts in the category of free public interest programs is no great sacrifice for the return of our self-respect and listener appreciation and good will.

The dollar loss might well be eliminated by a little activity on the part of our sales departments among an abundance of legitimate but untapped commercial accounts.

---

**COTTONE NAMED FCC GENERAL COUNSEL**

Benedict P. Cottone, who has been acting general counsel to the FCC, was named general counsel on Friday (7). Mr. Cottone had served as acting general counsel since his predecessor, Rosel H. Hyde, was elevated to the Commission. Previously he had served as assistant general counsel.

Ralph J. Renton was promoted from the technical operation section, field section, where he was assistant chief, to act as United States member on the North American Regional Broadcast Engineering Committee.

**WILLARD EGOLF OPENS LAW OFFICE IN WASHINGTON**

Willard D. Egolf, until recently special counsel of the National Association of Broadcasters, has opened an office at 805 Union Trust Building, Washington, D. C., for the practice of law before the Federal Communications Commission, other federal agencies and the United States courts.

Egolf will also devote attention to private interests as President of Broadcast Management, Inc., which this (Continued on next page)
week filed an application for a 250 watt standard broad-
cast station in Bethesda-Chevy Chase, well known suburb
of Washington.

Egolf joined NAB in February of 1943 and served suc-
cessively as assistant to the president, director of public
relations and special counsel. He is admitted to practice
before the Supreme Court of Oklahoma, the Supreme
Court of the United States, the United States Court of
Appeals for the District of Columbia and the Federal
Communications Commission.

JUDGE MILLER NAMED TO BOARD OF BRAND
FOUNDATION

NAB President Justin Miller was named Monday (3)
to represent the radio broadcasting industry on the board
directors of the Brand Names Research Foundation.

A non-profit organization, the Foundation was estab-
lished in 1943 as a clearing house to provide information
on the contributions of brand-name products to American
economy.

Broadcast Advertising

SALES MANAGERS EXECUTIVE COMMITTEE
CONCLUDES MEETING IN WASHINGTON

The NAB Sales Managers Executive Committee con-
cluded a three-day meeting today after a thorough discus-
sion of the commercial phases of the broadcasting industry.

A. D. Willard, Jr., NAB executive vice president, ad-
dressed the committee at Thursday's luncheon meeting.
He spoke on the relation of the FCC program report to
radio advertising.

Mr. Willard pointed out to the Sales Managers that
there had been growing for some years in certain areas
of the public mind and in certain administrative groups
within the government, a sharp and sometimes vicious
criticism of all advertising. He said that "these people
seem to have forgotten that advertising revenues maintain
and support a free radio and a free press. Either this sup-
port must be maintained or funds from government, pres-
sure groups and parties, must be substituted for it. De-
pendence upon such handouts would mean a servile press
and a servile radio." Advertising revenues, said Willard,
are guarantors of the freedom of expression.

In a report on advertising agency recognition, the fact
was brought out that members attending the recent series
of seventeen NAB district meetings favored the establish-
ment of an Advertising Agency Recognition Bureau for
the radio industry. Of 220 stations voting, 184 favored
the Bureau, 23 were opposed, and 8 did not answer.

A tentative plan was suggested to establish a "copy
acceptance department" at each radio station to improve
the commercial content of programs. A concrete plan
is to be submitted for consideration by the industry at the
forthcoming convention in October.

Because the term "spot broadcasting" has been confus-
ing, a definition of the term was adopted, and an industry-
wide contest is planned, to obtain more suitable terminol-
ogy. The definition adopted for the term is: "Spot
broadcasting is radio advertising of any type on stations
individually selected. Regardless of the number of sta-
tions used, each broadcasting schedule is separately ar-
ranged, giving the advertiser free choice of markets and
of stations in each market, free choice of programs or
announcements, either live or transcribed."

Complete satisfaction of the committee was expressed
for the work accomplished in standardizing rate card for-
mat. Additional efforts will be put forth to bring about
further improvements.

Plans were made by the committee for sales manager's
participation at the NAB convention. Separate sessions
are planned for a discussion on improving radio advertis-
ing methods, and a "Retail Radio Advertising Clinic," in
which members of the Joske Advisory Committees will
participate.

The committee voted to request advertising agencies and
transcription companies to standardize transcription labels
to show music copyright information as well as running
time.

The NAB research department reported that a pilot
study is being conducted to ascertain the advisability of
reviving the Broadcast Advertising Record in some form.

The committee authorized the creation of a standing
subcommittee on sales promotion. Hugh Higgins, NAB
assistant director of broadcast advertising, was named as
secretary of the subcommittee.

A discussion of FM was held immediately prior to the
meeting's adjournment. Robert T. Bartley, director of
NAB's FM Department, told the committee members that
forty commercial FM stations are now in operation and
applications are pending or have been granted recently on
several hundred other FM outlets.

Attending the meetings were: James V. McConnell,
Chairman, NBC Spot Sales; John Blair, President, John
Blair Co.; Henry I. Christal, Edward Petry Co.; Odin S.
Ramsland, KDAL; Walter Johnson, WTIC; Lincoln Dellar,
KXOA; Arthur Hull Hayes, WABC; Cecil K. Beaver,
WOAI; John M. Outler, Jr., WSB; Stanton P. Kettler,
WMNN; Beverly Middleton, WSYR; Lewis H. Avery;
C. E. Arney, Jr., Frank E. Pellegrin, J. Allen Brown, Hugh
Higgins and Lee Hart.

FM Department

FCC PROPOSES WITHHOLD ONE IN EVERY FIVE FM
CHANNELS FOR ONE YEAR

The assignment of every fifth FM channel which has
been indicated as available for a given area would be with-
held for a period of one year, according to a proposed
order adopted by the Commission on Thursday (6). Oral
argument on this proposal will be held before the FCC on
July 12th. Persons desiring to appear must file their re-
quests with the Commission by July 9.

In its order announcing the proposed rule, the commis-
ion recalled that on August 24, 1945, it had adopted a
report announcing that it did not propose to withhold any
FM channels from assignment, but stated that its experi-
ence in the meantime indicated that the purpose of the
Communications Act of 1934 "may be better served by a
reservation of metropolitan FM channels under certain
conditions."

Under the proposed policy, no reservation of channels
would be made if a maximum of four channels has been
indicated for a particular area by the Commission. How-
ever, if at least five but no more than nine channels were
indicated for an area, one channel would be withheld for
the period of one year from the date of the adoption of
this policy. Two channels would be withheld if 10-14 chan-
nels were listed; three, if 15-19 channels were listed; and
four, if 20 were listed.

The object of this policy, said the FCC, is to permit an
equitable distribution of FM frequencies, pursuant to Section 307(b) of the Communications Act. If a policy of reserving every fifth channel were adopted, each area could have a maximum of four stations assigned to it at this time if four channels were indicated for it in the release of December 19, 1945; however, provision is made for the future consideration of an applicant for an FM station in an outlying city which has not applied at this time, if at least five channels are indicated for the area.

The Commission summarized: "The policy thus permits the establishment of FM service in every area and yet prevents an unequal distribution of FM channels among the various communities."

FCC MAKES EIGHT FM GRANTS IN WASHINGTON

With eleven applications filed for the nine available FM channels in Washington, D. C., the FCC on Friday (7) announced its proposed decision to grant CP's to eight of the applicants.

In view of the fact that a ninth channel will remain available for assignment in the Washington area, the commission said in its proposed decision that it does not intend at this time to deny the three applications until they have had further opportunity to argue their cases.

The proposed decision will permit grants to the following applicants: Commercial Radio Equipment Co., Cowles Broadcasting Co., NBC, Metropolitan Broadcasting Co., Potomac Broadcasting Cooperative, Evening Star Broadcasting Co., WINX and Theodore Granik.

Commissioners Jett and Denny, although concurring in the decision, voted that the application of WWDC, one of the remaining three applicants, should be granted. The two other applicants who have further opportunity for arguing their cases are the Mid-Coastal Broadcasting Co. and the Chesapeake Broadcasting Co.

Legal Department

FCC PROPOSES TO RELAX RECORDING IDENTIFICATION RULE

A proposed change in its rules which would eliminate opening and closing transcription identification on various mechanically reproduced radio programs was announced Monday (3) by the FCC.

The tentative change has not been made effective as yet, since the commission will accept requests for oral presentation of the proposal until June 24.

The new rule would apply to all recorded and transcribed programs where the time element is not of special importance. It provides, however, that broadcasters not give the impression that a program is presenting live talent if the broadcast is recorded.

In specifying the types of programs which would continue to require transcription identification, the commission included broadcasts of speeches, news events, news commentators, forums, panel discussions, special events and other reproduced programs where time is of special significance. Identification of such programs which run one minute or less would be required only at the beginning.

The commission stipulated that requests for oral argument be accompanied by a brief.

NAB Studies Matter

At its last session the NAB Board of Directors appointed a committee to study the whole question of regulations concerning the identification of recordings. It is expected that this committee will meet within the next few days to examine the proposed rule and submit recommendations to the board. If the board should decide to make any additional recommendations to the commission, a brief will be filed by NAB with the commission prior to June 24.

The NAB committee is composed of Paul W. Moroney, WTIC, chairman; G. Richard Shafto, WIS; and John E. Fetzer, WKZO.

Text of the proposed rule follows:

"Section 3.407 Mechanical records.—(a) No recorded program consisting of a speech, news event, network commentator, forum, panel discussion, special event, or any other recorded program in which the element of time is of special significance and a presentation of which would create, whether intentionally or otherwise, the impression or belief on the part of the radio audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made at the beginning and conclusion of the broadcast. If it is a recorded program, however, any recorded program of one minute duration or less need only be announced at the beginning. The identifying announcement shall accurately describe the type of mechanical record used.

(b) Any other program consisting of a mechanical record or series of mechanical records need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that the program being so broadcast consists of live talent."

STATION RIGHTS AND RESPONSIBILITIES RE POLITICAL SCRIPTS REVIEWED

With a political summer getting under way across the nation the NAB Legal Department decided that stations might have a particular interest at this time in reviewing their rights and responsibilities concerning the clearance of political scripts. Views of the NAB Legal Staff are as follows:

Section 315 of the Communications Act of 1934 provides that licensees "shall have no power of censorship over the material broadcast" by a legally qualified candidate for any public office.

It would seem that this prohibition was not intended to prevent broadcasters from deleting material from political scripts which, under the applicable state laws, would make them liable for slander or libel. Certainly, broadcasters may properly delete obscene and profane matter from political scripts, for Section 326 of the Communications Act of 1934 specifically forbids the broadcast of such matter.

While there is no such specific prohibition with respect to defamatory language, it is not reasonable to suppose that Congress intended to force station licensees to choose between violating the laws of defamation and violating the Communications Act.

The only case on the question is Sorenson v. Wood, 123 Neb. 348, 234 N.W. 82, decided by the Supreme Court of Nebraska in 1932. The court took the position that a station licensee could not escape liability for defamation because he was forbidden to censor political broadcasts. The court was of the opinion that it was not the intention of Congress to sanction defamation by radio and that the censorship referred to by Congress was concerned only with "words as to their political and partisan trend." The Supreme Court of the United States affirmed this case, 290 U.S. 599, without opinion, on the ground that no federal question was involved.

(Continued on next page)
Since the question of what is defamatory material is one of fact under the pertinent state laws, it will in many cases be difficult or impossible for anyone to make a categorical determination that a given political broadcast is defamatory in whole or part. However, if deletions are made in good faith and based on the opinion of an attorney rendered in the light of the pertinent state laws and all of the facts, it is reasonable to assume that neither the FCC nor the Courts would consider that the Communications Act had been violated.

Small Market Stations

INTEREST HIGH IN COMMERCIAL SHOWS FOR 11:00 P.M. PERIODS

Station and sales managers are showing keen interest in the plans for selling the 11:00 P.M. until midnight periods. NAB Small Market Stations Division is currently pointing out effective commercial ideas being programmed by a representative cross section of stations. Examples of the type programs being scheduled at this hour and the type of sponsors interested in utilizing the late time periods are reaching NAB headquarters. (See NAB Reports, Page 405). Large stations as well as the small outlets have been invited to relate their commercial experiences. This information will be made available to all small market stations. Some of the high powered stations are finding the topic of particular interest.

Suggestions for types of programs and sponsors may be found in the experiences of the following stations:

"It's the Berries" on WGL

On Saturday night, for one solid hour, 11:00 P.M. until 12:00 midnight, WGL, the NBC affiliate, Fort Wayne, Indiana features a recorded show called "It's the Berries." It is sponsored by the Tom Berry Music Store, largest store of its kind in that area. The program features all the popular recorded tunes of the day, with the platters being furnished by the sponsor. It is operated similar to an all-request program and has a personality in WGL announcer, Paul Price. "It's the Berries" has been on the air continuously since July 1945. The program boasts of a large, loyal audience and sells platters and music to the delight of the sponsor.

"Arthur Murray Dance Time" on WGL

Norman C. Widenhofer, Sales Promotion Manager for WGL, reports that the Sales Department has landed a handsome contract from Arthur Murray Studios in Fort Wayne. On Saturday night from midnight until 2:00 A.M., two hours of the popular music of the day are featured. The selections are made up from requests by listeners. The local manager of the Arthur Murray Dance Studios injects dancing instructions during the session. It is a natural for its sponsor and has proven highly successful during the three months it has been on the air.

WGL Sells Dining Spot

Monday through Friday, 11:00 until 11:15 P.M., WGL features a remote pick-up that is sponsored by the English Terrace, one of Fort Wayne's leading dining places. The program consists principally of entertainment provided by the night spot's entertainers. The program has been on the air for some five months as a live remote broadcast. Previous to the present series, the English Terrace sponsored transcribed music in this period.

WTOP's Late-Hour Sponsored Shows

The period from 11:00 P.M. until midnight on WTOP, CBS, Washington, currently has three sponsors. The CBS News, 11:00 until 11:15 P.M., Monday through Saturday, is locally sponsored by Hahn Shoe Stores. On Sunday nights this news period is sponsored by Becker Leather Goods Company (luggage store).

The WTOP period from 11:15 until 11:45 P.M., Monday through Saturday features Eddie Gallaher, local personality. The program consists of recorded dance tunes and the latest sports news. The sponsor is National Brewing Company for National Premium Beer. This period on the Washington station is sustaining on Sunday nights. 11:45 P.M. until 12:00 midnight is available for spot announcements.

Maurice B. Mitchell, WTOP Sales Manager, reports that both the CBS co-op news program and the platter show have been sponsored for many years, and that CBS Listener Diary Studies indicate an excellent audience for this hour.

"Eleventh Hour News" on KFI

Monday through Friday, 11:00 P.M. until 11:15 P.M., KFI, NBC affiliate, Los Angeles, features "Eleventh Hour News" sponsored by Pep Boys, auto accessories chain store. This program was instrumental in increasing sales in the usual slack period the first part of the week. The sponsor, according to George Whitney, KFI Commercial Manager, gives the program generous credit for doing a good sales job.

11:15 until 11:25 P.M. was occupied by a news commentator for a year and a half under sponsorship of a jewelry store. Currently a musical show, sponsored by a used car dealer fills this period.

KFI features "Post Parade," five-minute transcription, sponsored by Saturday Evening Post since February 1944 in the 11:25 until 11:30 P.M. slot.

KFI reports that the rate from 11:00 P.M. until 12:00 midnight is one-third of the base fee. Spot announcements during this hour remain practically sold out.

"Uncle Seymour's Bedtime Bedlam" on WMBD

"Uncle Seymour's Bedtime Bedlam," up until recently heard over WMBD, CBS affiliate in Peoria, Ill., 11:05 til 11:30 p.m., nightly, was sponsored by Empire Jewelers. This comedy program featured a master of ceremonies who did everything from reciting poetry to telling jokes and kidding the sponsor.

Joe Raber, WMBD Commercial Manager, reports that they have had very good luck in selling a late sports review, 10:45 til 11:00 p.m.; and the 11:00 til 11:05 p.m. news; and periodical half hour programs during the late hour on the schedule.

KDKA Sells "The Sports Parade"

"The Sports Parade," under sponsorship of Willoughby Machine & Tool Company, started June 3rd on KDKA, Pittsburgh, in the 11:15 til 11:25 p.m. period. Program is heard on a Monday thru Saturday schedule.

WRC Late Period Success Record

The period from 11:00 until 11:30 p.m., Monday thru Friday, on WRC, NBC station, Washington, D.C., has been sold out consistently for the past three years, according to Mahlon A. Glasscock, Sales Manager.

The Monday thru Saturday schedule has ESSO News 11:00 til 11:05 p.m. for Standard Oil. 11:05 til 11:15 is a

(Continued on next page)
recorded spot period. Richard Harkness, 11:15 til 11:30 is sponsored by Senate Beer & Ale. WRC schedules public interest programs 11:30 til 12:00 midnight nightly.

The WRC sales executive reports that experience has shown that the 11:00 p.m. to midnight period is not difficult to sell if a schedule of three times a week, or better, can be provided. Spot announcements are naturally easier to sell than programs in that period, but programs are very popular in the late period in Washington. Local advertisers seem to value the 11:00 til midnight period more than national spot advertisers in the capital city.

GOLDMAN NAMED 2ND DISTRICT CHAIRMAN

Simon Goldman, General Manager WJTN, Jamestown, N. Y., has been named chairman, small market stations committee, District #2. A. E. Spokes resigned from WJTN and the chairmanship to accept the management of a new outlet, WJOY, Burlington, Vt.

Mr. Goldman's appointment was announced by Michael R. Hanna, WCHU, district director.

NEW MANAGEMENT STUDY SERIES PREVIEWED

The Indiana Broadcasters Association, meeting in Indianapolis last week, was given a preview of results from the first in a series of NAB Management Studies. In an address before the group, J. Allen Brown, head of the NAB Small Market Stations division, discussed the information contained in the survey.

A typical, yet unidentified, small station operation was revealed to the broadcasters. Sales practices, programming methods, local, regional and national total sales, and the overall problems of station management were shown. It was pointed out that a brochure on the first study will soon be released to the industry. This on-the-spot study of representative stations is being made by Arthur Stringer, NAB director of promotion.

Religious broadcasting, network co-op commercial shows, salesmen's compensation, the 11:00 til 12:00 p.m. sponsor, group selling, personnel training, per inquiry and free time offers, and syndicated transcribed programs were among the topics covered in the talk by the NAB executive. A lengthy discussion period followed the talk.

The speech before the Indiana Broadcasters was made at the request of the state association. John Carl Jeffrey, WKMO, Kokomo, is president.

Employee-Employer Relations

NLRB CLARIFIES DECISION IN CBS TELEVISION CASE

In a supplemental decision issued Friday (7), the NLRB disposed of the remaining issues in the CBS "white-collar" election case, following a hearing before the Board in Washington on Tuesday (4). (See current NAB Reports, p. 404.)

The Board established the directors and assistant directors of the Television Department as a separate bargaining unit, because of the "degree of specialization in technique, skill and professional showmanship" required of them. They will vote for IATSE, the RDG, or neither.

Six miscellaneous television studio employees will vote to determine whether they are to be included in the overall city-wide unit for which an election was ordered May 24, or be designated as a separate group for bargaining purposes. In this regard the contention of IATSE prevailed, as all the other unions and CBS had contended that these employees should be merged — without a preliminary vote among them — into the city-wide group. The six so-called miscellaneous are: Assistant casting director, floor manager, visualizer, animator (photo-librarian), film cutter, and wardrobe mistress.

The Board gave no reason for rejecting the contention of CBS that this group was not sufficiently different from other service and white-collar employees placed in the large unit; it merely stated it "believed" these workers "might properly either be included in the city-wide unit . . . or be set apart as a separate unit for collective bargaining purposes." The ballot for this group will list IATSE, IBEW, CIO, and none.

At the oral hearing before the Board, CBS was represented by Henry Howard and Howard Hausman. The elections are scheduled to be held next Monday (14).

Listener Activity

GOVERNOR TO GREET 1ST DISTRICT WOMEN

Governor Charles M. Dale of New Hampshire will deliver the welcoming address when the Second Annual Conference of women directors of the 1st NAB District meets at Portsmouth, N. H., this weekend (15).

Business meetings are scheduled for both Saturday and Sunday (15-16) with Nell Daugherty, 1st District Chairman, acting as presiding officer at the conference.

The chief executive of Massachusetts, Governor Maurice J. Tobin, will also speak at the conference, and Miss Daisy Basham, AWD member from New Zealand, is scheduled to talk to the members.

Northeastern Council at Schenectady

The Northeastern Radio Council met in Schenectady on Friday and Saturday (7-8) with Kolin Hager, former WGY executive, presiding.

The annual meeting of the council had as its theme, "One World Through Radio." Friday night's meeting was highlighted by a broadcast of "The FBI In Action" and a talk by a representative from the FBI. Students from high schools in the area conducted a panel discussion on juvenile delinquency.

Presiding at the Saturday session was Kenneth G. Bartlett, director of the Syracuse School of Adult Education.

DAR BACKS FREEDOM OF RADIO

The Daughters of the American Revolution in their recent 55th Conference at Atlantic City voted approval of the American system of free radio.

The organization passed a resolution to urge legislation that will guarantee the industry's freedom from censorship.

Text of the resolution follows:

"Whereas, Radio broadcasting is the most universal and rapid means of mass communication available to the people of the United States, and

"Whereas, It is essential to the free and intelligent exercise of citizenship in a republic that radio broadcasting shall remain free from government censorship or control of programs, and shall be conducted in accordance with the traditional American institutions of free speech and free enterprise; therefore be it

(Continued on next page)
"Resolved:—That the National Society, Daughters of the American Revolution, in fifty-fifth Continental Congress assembled, affirming its belief that freedom of radio ranks in importance with freedom of speech and of the press, and its opposition to all efforts which would lead in the direction of government censorship, dictation or control of radio programs; and that the Society urge the Congress of the United States to enact such legislation as is required to give effect to this affirmation."

**Engineering**

**NARBA ENGINEERING COMMITTEE ORGANIZES**

The North American Broadcasting Engineering Committee concluded its first week's sessions on Friday (7) setting up organization work including the unanimous adoption of rules of practice, procedure and measurement. The rules adopted by the committee are subject to the approval of the respective governments.

Virgil R. Simpson, assistant to the chief engineer of the FCC, is acting as temporary member of the committee, representing the United States pending the selection of a permanent member.

At the request of Cuba, and seconded by Canada, the member of the committee from the United States was appointed permanent chairman of the committee, which will maintain offices in Washington.

The committee was organized in compliance with Article XII of the Interim Agreement concluded at the Second North American Regional Broadcasting Conference in Washington in February.

**ALLOCATION PLAN FOR 920-960 BANDS**

The FCC announced Monday (3) a tentative plan for allocations on the 920-940 and 940-960 Mc bands in response to inquiries from potential users and manufacturers of FM studio-to-transmitter link equipment.

The commission requested that comments from those who expect to utilize these frequencies be submitted in writing by Saturday (15).

In order that certain frequencies be made available immediately, the commission formulated the following tentative service-allocation plan:

1. Assignments to FM studio-to-transmitter links may be made in the upper portion of the 920-940 Megacycle band in the event that future requirements indicate that insufficent space is available in the band of frequencies 940-952 Megacycles.

2. Assignments to Experimental Broadcasting Service in the 920-940 Megacycle band may be made progressively upward from 920 Megacycles.

3. The band of frequencies 952-960 Megacycles is to be used for fixed circuits such as police facsimile, control circuits, etc., with assignments progressing downward from 960 Megacycles.

4. The band of frequencies 940-952 Megacycles is to be used for FM studio-to-transmitter links with assignments progressing upward from 940 Megacycles.

5. Assignments in the frequency bands 920-940 and 940-960 Megacycles are to be on multiples of 100 Kilocycles in order that a flexible channeling system may be provided. (The bandwidths required by the different services concerned can be accommodated through the assignment of an appropriate number of adjacent channels to each station.)

6. A frequency tolerance of .01% and a bandwidth of 500 Kilocycles are advocated for FM studio-to-transmitter links.

The Commission pointed out that the proposal outlined above does not preclude the use of additional bands if it is shown that a need exists for broader facilities.

The FCC contemplates that authorization for FM studio-to-transmitter equipment will require the showing of a definite need for the use of a radio circuit instead of a wire circuit.

In requesting comments, the commission stressed that information was especially desired on the following points:

(a) Distances to be covered and power considered necessary.
(b) Practical transmission bandwidth, frequency tolerance, and receiver selectivity data for each type of emission and communication service contemplated.
(c) Whether frequency space allowed above is considered adequate.
(d) Directive characteristics of antennas proposed for each type of service and the maximum degree of directivity believed practical.

**Public Interest Programming**

**AD COUNCIL NETWORK CAMPAIGNS**

The following public interest campaigns have been given top priority on Network and National Spot Radio Allocation Plans during the week of June 17-23, by the Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

**Emergency Food Collection**

In their long tradition of generosity toward those in need, the American people have shown their willingness to share their good fortune. They have shown it in their readiness to limit their consumption of urgently needed relief foods, by voluntarily "saving and sharing" wheat products, fats and oils so that more can be shipped overseas. But most Americans want to do more. They ask only to be told what to do. Here is an opportunity for everyone to make a direct and personal contribution to help prevent starvation. Americans are being asked to simply contribute either tinned food or cash to buy and transport food—preferably cash. 500 million men, women and children throughout war-torn Europe and Asia are hungry, an appalling number of them facing starvation. The food realized from the Emergency Food Collection, conducted on behalf of United Nations Relief and Rehabilitation (UNRRA) will be used to supplement the minimum subsistence diets of those facing starvation abroad. In all cases it will alleviate hunger; in many cases it will spell the difference between life and death. The main goal of the Collection is to collect money with which to buy and transport food; the secondary aim is to obtain gifts of foods packed in tin cans. Money contributions are preferred because they eliminate the expenses of collection, packaging and shipping, and make possible the purchase of more food by buying in quantity lots at lower prices. Cash or checks should be given to the local Emergency Food Collection Committees, or mailed to Emergency Food Collection, New York City. If unable to contribute money, listeners should search their pantries and kitchens for tinned food to contribute . . . locations of food collection depots can be learned from local newspapers or radio stations. (Fact Sheet No. 28-A)

**Building Our New Army**

Congress has authorized a peacetime American Army larger and better trained than ever before in history. But the Army's present recruiting drive for over one million men by July 1st, 1946, may fail unless public attitudes can be changed and changed quickly. The Army itself is

(Continued on next page)
conducted a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent backdrop campaign, for which its own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and their friends. Very bluntly, the objective of this campaign is to change the old attitude of Americans toward their Army. By explaining the purpose and the character of the new Regular Army being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, your program can help the Army's recruiting drive achieve the goal it seeks. The new Regular Army of today is a compact, carefully chosen group of skilled technicians.

Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of that peace for which thousands of other young Americans have already died. Point out that they are guardians of peace—Congress has authorized our new large and expertly trained Army in order to enforce the peace and fulfill our obligations as a member of the United Nations Organization. Point out that the new Regular Army soldier is a skilled technician—he works with advanced techniques and equipment in at least one of many specialized fields, and his competence equals and often exceeds the skill demanded in some of the best paid civilian trades. (Fact Sheet No. 2-B)

**Housing—"Boom and Bust?"**

America's critical housing shortage constitutes one of the most potentially explosive inflationary situations of the recovery period. A bold and vigorous program has been developed to whip that shortage. But even under that program the urgent demand for homes will far exceed the number that can be built for months to come. And in addition to the urgent demand by returning veterans and others, there are millions of Americans who would like to buy or remodel if they can. Under these conditions the threat of inflation in housing and building materials is more menacing than in any other section of the economy. Within limits people in urgent need of shelter are tempted to pay almost any price for it. It would be presumptuous for anyone to urge a man not to buy or build when he has the money and his family is without a place to live. However, it is in the interest of the Nation as well as the home-seeker that he be told of the dangers involved in buying or building at inflated prices. During the period when the demand for housing is abnormally high and production is low, there are two alternatives open to us—to start a "boom-bust" cycle by frantically bidding up the prices of the limited housing supply, or to put the brakes on housing inflation by postponing buying or building if we do not urgently need a new house and by seeking expert advice on the do's and don'ts. Explain that during period when the shortage is most acute there is serious danger of a housing inflation that would affect our whole economy. Suggest that families not urgently in need of a home consider waiting until later to buy or build, meanwhile saving and planning for time when more homes can be built and better values may be available. Strongly urge everyone who finds it necessary to buy or build today to secure expert advice and sound appraisals before doing so. (Fact Sheet No. 7-B)

### Federal Communications Commission Docket

**HEARINGS**

The following hearings are scheduled to be heard before the Commission in Washington, D.C., unless otherwise indicated, during the week beginning Monday, June 10. They are subject to change.

### AM APPLICATIONS GRANTED

Glens Falls Publicity Corp., Glens Falls, N.Y.—Granted application for construction permit for new standard broadcast station to operate on 1230 kilocycles, 100 watts, unlimited time. (B1-P-1417; Docket 6853)

### ENGINEERING APPROVAL OF FM CONDITIONAL GRANTS

Following is a list of applications for which approval of basic engineering plans were granted by the Commission.

(Continued on next page)
The Final FM CP's Granted

Pinellas Broadcasting Co., St. Petersburg, Fla.—CP for Metropolitan station; 92.1 mc. (Channel 221); 30 kW; antenna 437 feet.

Truth Publishing Co., Inc., Elkhart, Ind.—CP for Metropolitan station; 106.1 mc. (No. 270); 21.6 kW; 422 feet.

A. Frank Katzentine, Miami Beach, Fla.—CP for Rural station; 96.7 mc. (No. 241); 306 kW; antenna 730 feet.

WIOJ, Broadcasting Corp., Chattanooga, Tenn.—CP for Rural station; 95.3 mc. (No. 247); 37 kW; antenna 1,321 feet.

Northside Broadcasting Co., Louisville, Ky.—CP for Metropolitan station; 100.3 mc. (No. 252); 20.8 kW; antenna 355 feet.

Spartanburg Advertising Co., Spartanburg, S.C.—CP for Rural station; 92.1 mc. (No. 221); 21 kW; 2125 feet.

The Pulitzer Publ. Co., St. Louis, Mo.—CP for Metropolitan station; 93.3 mc. (No. 227); 36 kW; 329 feet.

The Patriot Co., Harrisburg, Pa.—CP for Metropolitan station; 96.9 mc. (No. 245); 5.5 kW; 700 feet.

The Gable Broadcasting Co., Altoona, Pa.—CP for Metropolitan station; 100.7 mc. (No. 264); 3.9 KW; 900 feet.

The Monocacy Broadcasting Co., Frederick, Md.—CP for Metropolitan station; 98.1 mc. (No. 251); 2 KW; 1,150 feet.

The Brookway Co., Watertown, N.Y.—CP for Metropolitan station; 100.9 mc. (No. 237); 6.7 KW; 530 feet.

Mitchell G. Meyers, Ruben E. Aronheim and Milton H. Meyers, Flinchburg, Mass.—CP for Metropolitan station; 99.9 mc. (No. 260); 6.7 KW; 530 feet.

Eln City Broadcasting Corp., New Haven, Conn.—CP for Metropolitan station; 102.9 mc. (No. 275); 20 kW; 490 feet.

Rome Broadcasting Corp., Rome, Ga.—CP for Metropolitan station; 100.9 mc. (No. 251); 1.4 KW; 910 feet.

Central New York Broadcasting Corp., Syracuse, N.Y.—CP for Metropolitan station; 93.5 mc. (No. 228); 7 KW; 740 feet.

DESIGNATED FOR HEARING

Milburn H. Stuckwish, Charles F. Bruce and F. M. Lindsay, Jr., Centralia, Ill.—Designated for hearing application for construction permit for new station to operate on 1400 kc., 250 watts, unlimited time (B1-P-4732); further ordered that Champaign News Gazette (WDWS), Evansville on the Air, Inc. (WEOA), and Oscar C. Hirsch, tr/ta Hirsch Battery & Radio Co. (KFVS) be made parties to the proceeding.

Sky Wave Broadcasting Corp., Columbus, Ohio—Designated for hearing application for construction permit for new station to operate on 1490 kc., 250 watts, unlimited time, to be heard in consolidated proceeding with applications of WOOP, Inc., Dayton, Ohio; KSAL, Salina, Kans., and Northwestern Ohio Broadcasting Corp., Lima, Ohio; and ordered that the bills of particulars issued in connection with these applications be amended to include the application of Sky Wave Broadcasting Corp. (B2-P-4324).

B. Loring Schmidt, Salem, Oregon; John B. Fitzgibbon, Roy Jarman, and Temple V. Ehansen, Oregon City, Oregon—Designated for consolidated hearing applications of B. Loring Schmidt for new station at Salem, Oregon, and of John B. Fitzgibbon, Roy Jarman and Temple V. Ehansen for new station at Oregon City, Oregon, each applicant seeking 1490 kc., 250 watts, unlimited time. (B5-P-1479; B5-P-4432)

DOCKET CASE DECISIONS

The Commission announces final Decision (B-233) granting the application of John H. Steger, Jr., for license to continue the operation of Station WBAX, Wilkes-Barre, Pa. At the same time, the applications of Northeastern Pennsylvania Broadcasters, Inc., Central Broadcasting Co., Key Broadcasters, Inc., and Baron Broadcasting Company, the four competing applicants for stations in Wilkes-Barre, were denied. (Dockets 6169; 6170; 6723; 6750)

The Commission announces final Decision (B-236) granting the application of Thomas N. Beach for a new standard broadcast station at Birmingham, Alabama, to operate on 1490 kc., 250 watts, unlimited time (Docket 6681). At the same time, the applications of Ernest E. Forbes, tr/ta Magic City Broadcasting Company, and Ramon C. Patterson and Louise Patterson Pursley, d/b as Patterson Broadcasting Service, each seeking the same facilities, were denied (Dockets 6069 and 6080).

The Commission announces final Decision (B-242) granting the application of A. C. Neff for a new station at Savannah, Georgia, to operate on 1400 kc., 250 watts, unlimited time. (B2-P-4432)

The Commission announces its proposed Decision (B-240) looking towards the grant of the application of WHB Broadcasting Corp. for a change in operating facilities from 880 kc., 1 KW, daytime, to 710 kc., 5 KW, unlimited time, using directional antenna both day and night (Docket No. 6022). This action (Continued on next page)
will be conditioned, however, upon the applicant's applying, within 30 days from date of adoption of this decision, for specific approval of a directional antenna array which (a) will enable WHB to serve generally the areas and populations now proposed and at the same time protect Station KIRO and all other existing stations from objectionable interference as defined in the Commission's Standards of Good Engineering Practice, and (b) will have been approved as to system and site by the Civil Aeronautics Administration.

At the same time the Commission proposed to deny without prejudice the application of the Minnesota Broadcasting Corporation for a change in operating facilities of Station WTCN, Minneapolis, Minn., from 1290 kc., 1 kW night, 5 KW-LS, unlimited time, to 1410 kc., 1 kW, unlimited time, directional antenna at night (Docket No. 5859). The proposed denial to WTCN is, however, without prejudice to its right at any time prior to twenty days from date of final adoption of the proposed decision to file a verified petition to set aside the denial and reopen the record for the introduction of evidence showing, in the event of a grant of the WTCN application (a) the populations which would lose primary nighttime service from WTCN operating on its present facilities; (b) that despite this loss, adequate broadcast service would be rendered to the Minneapolis-St. Paul area; (c) that the populations which would lose primary daytime service from WHB, operating under its grant herein; (d) that these losses in the primary nighttime service area of WTCN and in the primary daytime service area of WHB would be compensated for by the populations which would gain new primary daytime service from WTCN. Such petition should be on notice to WHB which shall have the right, without further order, to intervene in the reopened proceeding.

The Commission today announced a proposed decision (B-246) proposing to grant the application of C. M. Zinn and C. Leslie Goldfay, d/b/a Martinsburg Broadcasting Co. (Docket 6709), for a new station at Martinsburg, W. Va., to operate on 1330 kc., 250 watts power, unlimited time. The proposed grant is subject to CAA approval of the transmitter site and the waiver of Rules 3.55(a) and 3.69.

At the same time the Commission proposed to deny the application of Richard Field Lewis, Jr., and Grant Pollock, a partnership d/b/a Berkeley Broadcasting Co. (Docket 6707), to Martinsburg, W. Va., requesting the same facilities.

The Commission also announced a proposed decision (B-247), proposing to grant the application of Old Dominion Broadcasting Corp. (Docket 6936), for a new station in Lynchburg, V. A., to operate on the frequency 1390 kc., with power of 1 kw, unlimited time or using a directional antenna, subject to the condition that the Old Dominion Box Company shall divest of its interest in the Lynchburg Broadcasting Corp. (WLVA), and that this applicant shall take the necessary steps to adjust its antenna array in the direction of Youngstown, Ohio, if ordered to do so.

A grant was also proposed to the application of William M. Rivers, licensee of station WCSC, Charleston, S. C. (Docket 6939), for a construction permit to increase power from 1 kw day, 500 watts night, to 5 kw, using a directional antenna at night only, operating on frequency 1390 kc., unlimited time.

At the same time it proposed a denial of the application of the Piedmont Broadcasting Corp., licensee of station WBTM, Danville, Va., for a construction permit to change the operating assignment of that station from 1400 to 1390 kc., and increase power from 250 watts to 1 kw unlimited time. (Docket 6938)

A proposed decision (B-248) was also announced proposing to grant the application of Illinois Valley Broadcasting Company for a new station in Peoria, Ill., to operate on 1290 kc., with 5 kw unlimited time, using a directional antenna, on condition that the applicant file the appropriate application for the use of 5 kw power. (Docket 6710)

Denials were proposed of construction applications of Greater Peoria Radio Broadcasters, Inc. (Docket 6706), and Central Ill. Radio Corp. (Docket 6920), each requesting new stations at Peoria to operate on 1290 kc. (Greater Peoria with power of 5 kw day, 1 kw night, DA, unlimited time, and Central Ill. Radio Corp. with power of 5 kw, DA, unlimited time).

The Commission today announced a decision and order granting a joint petition of the Wabash Valley Broadcasting Corp, Terre Haute, Ind., and West Central Broadcasting Co., Peoria, Ill., requesting leave to amend application of the former to specify the frequency 1490 kc., instead of 1390 kc. as originally requested, with 1 kw power, unlimited time. The amendment was accepted and application of Wabash Valley Broadcasting Corp., as amended (B-4-P-1436; Docket 7108), was also granted, and the hearing heretofore scheduled to be held on June 17 in this proceeding is cancelled.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending August 1, 1947:

- WATW, Ashland, Wis.; WSTP, Salisbury, N. C.
- KBWB, Hutchinson, Kans.; KVAK, Atchison, Kans.
- WQAM, main and auxiliary, Miami, Fla.; WMT, Cedar Rapids, Iowa; WTAR and auxiliary, Norfolk, Va.
- WQAM, main and auxiliary, Miami, Fla.; WMT, Cedar Rapids, Iowa; WTAR and auxiliary, Norfolk, Va.
- WMGA—Frank R. Pidgeon, Sr., Moultrie, Ga.—Granted renewal of license for period ending August 1, 1947. (B3-R-763)

 Granted renewal of following station licenses for period ending August 1, 1947:

- WJNO, West Palm Beach; WKNO, Winona, Minn.; WHBY, Green Bay, Wis.; KCMC, Texarkana; KVEC, San Luis Obispo, Calif.
- KGBX, Springfield, Mo.; KOI, Seattle; KGCU, Mandan, N. Dak.; WJAS, Pittsburgh, Pa.; KXYZ, Houston.
- WJNO, West Palm Beach; WKNO, Winona, Minn.; WHBY, Green Bay, Wis.; KCMC, Texarkana; KVEC, San Luis Obispo, Calif.

 Renewals for the following stations were granted for the period ending January 1, 1949:

- WJNO, West Palm Beach; WHAS, Louisville, Ky.; WABO, Atlantic City, N. J.; KBON, Omaha, Neb.; KBUR, Burlington, Iowa.
- WJNO, West Palm Beach; WKNO, Winona, Minn.; WHBY, Green Bay, Wis.; KCMC, Texarkana; KVEC, San Luis Obispo, Calif.

 Renewals for the following stations were granted for the period ending May 1, 1949:

- WCAX, Burlington, Vt.; KSFO, San Francisco; KCOY, Phoenix; WIBB, Topeka; KGRT, Portland, Ore.; KWWO, Springfield, Mo.; WFIL, main auxiliary, Philadelphia; WWNC, Asheville, N. C.
- WTOK—Savannah Broadcasting Co., Savannah, Ga.—Granted renewal of license for period ending November 1, 1948. (B3-R-763)

 Granted renewal of following station licenses for period ending February 1, 1949:

- KPHT, Phoenix, Ariz.; KOOS, Coos Bay, Oregon; KMLB, Monroe, La.; and WLOF, Orlando, Fla.
- KPHT, Phoenix, Ariz.; KOOS, Coos Bay, Oregon; KMLB, Monroe, La.; and WLOF, Orlando, Fla.
- WMGA—Frank R. Pidgeon, Sr., Moultrie, Ga.—Granted renewal of license for period ending August 1, 1947. (B3-R-763)

 Granted renewal of following station licenses for period ending May 1, 1949:

- WQAM, main and auxiliary, Miami, Fla.; WMT, Cedar Rapids, Iowa; WTAR and auxiliary, Norfolk, Va.
- WJMC—WMJL, Inc., Rice Lake, Wis.—Granted renewal of license for period ending August 1, 1946. (B5-R-1000)
- KLUF—The KLUF Broadcasting Co., Inc., Galveston, Texas.—Granted renewal of license for period ending August 1, 1947. (B3-R-405)
- WMGA—Frank R. Pidgeon, Sr., Moultrie, Ga.—Granted renewal of license for period ending August 1, 1947. (B3-R-1063)
- WLAV—Leonard A. Vershuis, Grand Rapids, Mich.—Granted renewal of license for period ending February 1, 1947. (B2-R-1088)
- WJMC—WMJL, Inc., Rice Lake, Wis.—Granted renewal of license for period ending August 1, 1946. (B5-R-1000)

(Continued on next page)

JUNE 10, 1946 — 459
Granted renewal of following station licenses for period ending February 1, 1948: WUGC, Albany, Ga.; KRBM, Bozeman, Mont.; WMFJ, Dayton, Ohio; WPIC, Prescott, Ariz.

Granted renewal of following station licenses for period ending August 1, 1948: KNOW, Austin, Texas; KYCA, Prescott, Ariz.

**MISCELLANEOUS ACTIONS**

WOKO—WOKO, Inc., Albany, N. Y.—Ordered that the special temporary authorization for the continued operation of station WOKO be extended for a period of 60 days from June 1.

WGL—Farworth Television and Radio Corp., Fort Wayne, Ind.—Granted CP to move transmitter from 925 So. Harrison St. to 201 West Jefferson St., Fort Wayne. (B4-P-1450)

WTPS—Times Picayune Pub. Co., New Orleans, La.—Granted extension and modification of special temporary authorization to operate an RCA 250 watt FM transmitter on Channel #233, 94.5 mc. with Western Electric Cloverleaf antenna on a 140 foot supporting structure, at the Howard Memorial Library, for the period May 30 to Aug. 27.

W2XCT—Columbia Broadcasting System, Inc., New York, N. Y.—Granted extension of special temporary authority to operate a Composite transmitter on 700 mc. with 650 watts peak power, special modulation, in order to make ultra high frequency propagation tests in conjunction with the Technical Information Sec. of the Engineering Dept. of the FCC, for a period beginning June 8 and ending no later than Sept. 5, 1946.

WEGB—Reading Broadcasting Co., Area of Reading, Pa.—Granted modification of license for relay broadcast equipment now licensed to Berks Broadcasting Co.; frequencies: 31.22, 33.62, 37.62, 33.26 mc.; 2 watts; to operate as a relay station, portable-mobile with station WRAW. (B2-MRE-129)

W3XO—WXIX Broadcasting Co., Washington, D. C.—Granted extension of special temp. authority to broadcast regular programs from 7 to 11 P. M. daily including Sunday, only for the period May 29 to August 26.

WINS—Hearst Radio, Inc. (assignor), New York, N. Y.; The Crosley Corp. (assignee), Cincinnati, Ohio—Adopted order granting joint petition to reopen the record heretofore made on application for voluntary assignment of license and construction permit, and scheduled further hearing and oral argument thereon for June 19, 1946, before the Commission en banc. (B-237; Docket 6755)

WDSM—James J. Conroy, et al. (transferees); Ridson, Inc. (transferee); WDSM, Inc. (licensee), Superior, Wis.—Granted consent to the transfer of control of WDSM, Inc. from James J. Conroy, Roland C. Buck, George W. Welles, Jr., Victoria B. Conroy and Joseph H. Weisberg to Ridson, Inc., for a consideration of $150,000 (plus amount of cash and notes and accounts receivable at closing date; plus tax refunds hereafter received, and less amount of taxes accrued at closing date). (B4-TC-174)

WBOC—Peninsula Broadcasting Co., Salisbury, Md.—Denied petition for review filed by WBOC (intervenor in the matter of Fairfield Broadcasting Corp. and the Norfolk Broadcasting Corp. for new stations at Norfolk, Va.), without prejudice to the right of petitioner to file certain measurements with the Commission on or before June 23, 1946; affirmed action of Motion Commissioner on May 31 in denying petitioner's request for a continuance of further hearing on the Norfolk applications.

**ACTIONS ON MOTIONS**

Beaver County Broadcasting Corp., Beaver Falls, Pa.—Granted motion to dismiss without prejudice its application for CP. (B2-P-432)

Mario Acosta, Mayaguez, Puerto Rico—Granted petition for leave to amend his application for CP (B-P-432), so as to specify the frequency 1400 instead of 1340 kc.; change paragraphs so as to reflect revised engineering data, etc. The amendment was accepted and application removed from the hearing docket.

Jose Bechara, Jr., Mayaguez, P. R.—The Commission, on its own motion, removed from the hearing docket application for new station. (B-P-3947; Docket 7450)

Key Broadcasting Corp., Baltimore, Md.—Granted motion to amend application for new station (B1-P-7135) so as to specify frequency 750 instead of 1650 kc., etc. The amendment was accepted and application removed from the docket. (Docket 7551)

Tri-Suburban Broadcasting Corp., Silver Spring, Md.—The Commission on its own motion removed application for new station (B1-P-1541), from the hearing docket. (No. 7550)

Providence Journal Co., Providence, R. I.—Granted petition for leave to amend its application for a new FM station (B1-PH-339) to insist on additional engineering information as requested by the Commission, and the amendment was accepted.

American Broadcasting Co., Inc., Chicago, Ill.—Granted petition for leave to amend application for new FM station (B1-PH-221) so as to specify a new transmitter site, revised engineering data, etc., and the amendment was accepted.

Evansville on the Air, Inc., Indianapolis, Ind.—Granted petition to dismiss without prejudice its application for a new FM station. (B4-PH-1397)

Commonwealth Broadcasting Corp., Danville, Ky.—Granted motion for leave to amend its application for a new station (B2-P-4090) so as to show deletion of Betty Z. Russell as a director; show deletion of a proxy given to Betty Z. Russell by Jas. D. Russell as contained in Exhibit 4 of application; and to change Par. 8 of application to show change in list of directors, and the amendment was accepted.

Eastern Idaho Broadcasting & Television Co., Idaho Falls, Idaho—Granted motion for leave to amend its application for CP (B5-P-4323) so as to show issuance of additional stock to the original stockholders and payment of additional funds into the corporate treasury, and the amendment was accepted.

Television Productions, Inc., San Francisco, Cal.—Granted petition to dismiss without prejudice its application for a new television station (B5-PCT-151; Docket 7283)

NEW—Hawthorne Candy Co.—The Commission has ordered Louis Gartner, trading as Hawthorne Candy Co., 1661 West Division Street, Chicago, to cease and desist from selling or otherwise disposing of candy or other merchandise by means of a game of chance, gift enterprise or lottery scheme. (3287)

STIPULATIONS

Edwards Manufacturing Co.—Stella Natenberg and Evelyn Matz, copartners trading as Edwards Manufacturing Co., 2215 South Michigan Avenue, Chicago, and Arnold P. Natenberg, manager of the business, stipulated with the Commission that in the sale of leader material for fishing tackle they will discontinue representing that its tensile strength is greater than it actually is. The product is sold under the name of Edwards Fishing Leaders. (4159)

E. Fucini & Co.—(Supplemental)—E. Fucini & Co., Inc., 524 West Broadway, New York, stipulated with the Commission that it will stop disseminating advertisements which fail to reveal that the laxative it sells under the name of Ferret Vittone should not be used when abdominal pain, nausea, or other symptoms of appendicitis are present; provided, however, that the advertisements need contain only the statement “Caution; Use Only As Directed,” if the directions for use on the label, in the labeling, or in both label and labeling, contain a warning to the same effect. (02721)

A previous stipulation entered into by E. Fucini & Co., Inc., remains in effect. In it the company agreed to cease making certain misrepresentations concerning the therapeutic properties of Ferret Vittone and another medicinal preparation. (03511)

CASE CLOSED

Sprague Military Institute—Because the respondents have discontinued operation of a business devoted to the sale of a wartime commodity, the Commission has closed without prejudice its case against Harold R. Lister and Margaret Lister, who traded as Sprague Military Institute at 307 North Michigan Avenue, Chicago.

The complaint in the proceeding had charged the respondents with misrepresentation in the sale of a correspondence course in military procedure.

All of the Commissioners participated in the decision. (5304)
Government Files Charges Against Petrillo

AFM Chief Summoned into Federal Court for Alleged Violation of Lea Act

The federal government has accepted James C. Petrillo's challenge of the Lea Act's constitutionality. Attorney General Tom C. Clark announced Thursday (13) that a criminal information had been filed in Chicago against Mr. Petrillo, president of the AFM, charging him with "coercive practices affecting radio broadcasting."

The charges resulted from a strike called May 28 at WAAF, Chicago because the station had not acceded to a union demand that the number of music librarians employed be increased from three to six. At that time Mr. Petrillo announced that his action constituted a challenge of the Lea Act's constitutionality. (Current Reports, p. 425)

The AFL's musicians union president surrendered Friday (14) in the United States District Court in Chicago, where the criminal information had been filed, in answer to a federal summons and posted bond of $1000.

The Chicago action was taken by U. S. District Attorney J. Albert Woll, son of Matthew Woll, vice president of the American Federation of Labor and president of the AFL's photo-engravers union.

Plea Withheld

Mr. Petrillo was allowed to withhold his plea to the charge, by agreement with the court and the United States District Attorney. Reason for withholding the plea was explained by AFM counsel, Joseph Padway, who told Judge Walter J. LaBuy that he had several motions which he would like to file in writing.

The court ruled that the AFM could have until July 15 to file the motions and until August 5 to file briefs supporting the motions. (Continued on page 468)

COLLIER'S SAYS "RADIO HAD BETTER FIGHT"

In its June 15th issue Collier's carries an editorial, entitled "Radio Had Better Fight," which discusses control of radio programs by the FCC. This is the second editorial concerning radio program control to appear in Collier's, the first having been published in the April 27th edition. (Current NAB Reports, p. 330)

With permission of the Crowell-Collier Publishing Company, the June 15th editorial is reprinted as follows:

As observed in this space a few issues ago, the Federal Communications Commission is again up to its old game of trying to regulate the contents and character of radio programs, while piously disclaiming any such intention. It is threatening to grant, renew, deny or revoke radio station licenses henceforth on the basis of what it terms the "public service" rendered by each station.

It is now a pleasure to observe that Justin Miller, president of the National Association of Broadcasters, is claiming, loudly and in public, radio's right to regulate its own programs without interference from any source except the tastes of the radio public.

Miller cites the Constitution's guaranty of freedom of speech, and notes that Congress, in writing the Communications Act under which the FCC has its being, took extreme care to tell the FCC to keep hands off radio programs. One of Congress' orders reads as follows:

No regulation or condition shall be promulgated or fixed by the commission which shall interfere with the right of free speech by means of radio communication.

How anything could be more specific than that, we don't know. Yet the FCC

INSIDE THIS ISSUE

NAB has requested that the FCC postpone for sixty days its deadline for filing briefs concerning the proposed new recording identification rule. Extra time would permit study by the Board of Directors at its August meeting. (p. 468)

The renomination of Commissioner Paul A. Walker to the FCC was favorably reported out of the Senate Interstate Commerce Committee. (p. 472)

NAB Small Market Stations division reports considerable interest in efforts to increase sales by stations of network cooperative programs. (p. 470)

News Clinics have been scheduled for Oregon and Washington during June. (p. 471)

The Department of Commerce reports soaring retail sales in those sections where surveys have been completed. (p. 468)

Collective bargaining elections among CBS white collar workers were held Friday. (p. 472)

NAB is seeking expressions of opinion from the membership concerning a promotion exhibit and contest for the annual convention. (p. 469)
Government Files Charges Against Petrillo
(Continued from page 467)

The government’s briefs in reply must be filed by September 9. Oral argument on the AFM’s motions is expected to be held about September 19.

In his Washington announcement Thursday, Attorney General Clark stated:

"The information filed by U. S. Attorney J. Albert Woll sets forth that the Drovers Journal Publishing Company, Inc., operating Radio Station WAAF, Chicago, employed a sufficient number of persons to perform the actual work needed in the operation of the station; that Petrillo attempted to coerce and compel the employment of three additional musicians whose services were not necessary in the operation of the broadcasting station.

"The coercion was attempted by Petrillo ordering the stoppage of work by members of his union employed at the broadcasting station and directing the picketing of WAAF’s place of business.”

Collier’s says “Radio Had Better Fight”
(Continued from page 467)

for years has been riding jack-booted over this Congressional prohibition. Up to now, the radio industry has been submitting to this bureaucratic tyranny, fearing license revocations or refusals.

Miller wants a finish fight, at long last. He urges that some station defy the FCC on a matter of program content; that the FCC be equally forthright and step on this test station; and that the fight be carried from there on up to the Supreme Court for a showdown.

The sooner the better. This country, for some reason, has long been infested with people ambitious to whistle down freedom of speech and press despite the Constitution’s guaranty of these freedoms. The press has consistently fought all such persons—and the press continues free, and subject by and large to the censorship of its readers only.

Radio had better fight, beginning now; and the press’ experience indicates that radio can win.

---

Legal Department

NAB REQUESTS FCC POSTPONE RECORDING RULE HEARING FOR SIXTY DAYS

In order that the NAB Board of Directors might study the matter, a sixty-day postponement of the date set by the FCC for filing briefs and request for oral argument concerning the proposed new recording identification rule was requested by the NAB Thursday (13) in a letter to the Commission.

The final date for filing briefs set by the Commission in its order announcing the proposed changes was June 24. The new order as announced by the FCC would make identification of recordings and transcriptions unnecessary unless they contained material of special time value. (Current Reports, p. 453)

Following a meeting in Washington Wednesday and Thursday (12 and 13) of a special Board of Directors sub-committee, which had been appointed at the Board’s May session to study the whole question of recording identification regulations, NAB advised the Commission: “The subject matter of this rule is of such importance and interest that it is our desire to have full Board consideration on it.”

Noting that the Board would meet for three days beginning August 6, the letter continued, “We believe that it would be of value to the Commission to have before it the considered opinion of the Board on this subject.”

Sub-committee members present for this week’s meeting were G. Richard Shafto, WIS, and Paul W. Morency, WTIC. The third member, John E. Fetzer, WKZO, was unable to attend. NAB headquarters staff representatives at the sessions were A. D. Willard, Jr., Robert T. Bartley, Milton Kibler, and Bryce Rea.

---

RESEARCH DEPARTMENT

RETAIL SALES OUTLOOK BRIGHT

The United States Department of Commerce Field Service reports that “retail trade in New England (Maine, Vermont, New Hampshire, Massachusetts, Connecticut, and Rhode Island) in the first quarter of 1946 showed a gain of approximately 20% over 1945.” This was determined from a spot survey of a small but representative sample of the various types of retail outlets in this region. Inquiries were also made as to prospects for the second quarter with respect to sales, stocks, and orders. Personal interviews were held with department stores, variety, men’s apparel, women’s apparel, shoe, drug, food, hardware, liquor, furniture, and jewelry stores, filling stations, eating places, both chains and independent.

“Retail trade in the New York region is currently running at a record breaking pace. Increased production, continued high-level employment, high

(Continued on next page)
wages, plus an apparent insatiable demand for merchandise stimulated by the return of our service-men and the continuing rise in the birth rate has resulted in a tidal wave of business reminiscent of the boom period following the last war. The magnitude of the present buying wave, however, is greater and bids fair to last longer than any retail boom that this region has experienced."

In the Central Mississippi Valley region, (principally Missouri, Arkansas, parts of Illinois, Indiana, Kentucky, Tennessee, and Mississippi) "the first quarter sales of retail lines reporting to the Federal Reserve Bank were at the highest levels ever recorded. As compared to the first quarter of 1945, department store sales were up 16%, men's clothing stores 15%, women's apparel stores 4%, shoe stores 6%, and furniture stores 54%. Department store sales for the first half of April continued to rise and indications are that sales at most other stores are equaling or exceeding first quarter records. The buying boom, steadily gaining momentum, depends, at the present time, on the availability of consumer goods. The inventory position is improving somewhat in most lines, although it is uneven and spotty. Sales stock ratios are considerably out of balance in most lines. Somewhere, somehow, retailers continue to receive merchandise to keep sales booming in practically all departments."

In the Philadelphia Tri-State region, "dollar sales of retailers are steadily rising in spite of wide spread merchandise shortages. This increase in sales is the combined result of a greater number of retail transactions, higher prices, and a continuation of the consumers wartime practice of trading-up."

Retail trade in the West Central region (Wyoming, Colorado, Nebraska, Kansas, parts of Missouri, Oklahoma, and New Mexico) is "expected in the second quarter to increase approximately 13% over the first three months of this year, and 34% over the second quarter of 1945. Total sales in this region during 1946 are expected to exceed sales of 1945 by about 35%."

**PROGRAM LOGS OF 100 STATIONS BEING STUDIED**

Attempting to find answers to many questions relating to the radio industry, the NAB Research Department is currently initiating a pilot study which will consist chiefly of the examination of program logs of a 100-station sample of the industry.

The study is designed to provide new information which will be incorporated into a proposed revival of the "Broadcast Advertising Record," which is planned for reissue as the "Broadcast Record."

It is hoped that the study will reveal the types of sponsors who are now using radio, as well as the types of commodities advertised. An attempt will be made to analyze the content of programs or to classify programs as to type.

If this survey is successful in developing certain methods, it may serve as a pilot study to a more elaborate review of what goes out over the industry's transmitters. However, such a study could not supplant the type of survey which examines listener preferences, experience having proven that these are two quite different phenomena.

As a basis for comparison, the individual broadcaster may use the present study to determine whether features of his operation might be improved or corrected in the light of current practice.

**PLAN NEW MANUFACTURING CENSUS**

The Bureau of the Census is completing preparation of forms and schedules to be used in a proposed Census of Manufacturers, the first since 1939.

The new study, announced last December, is planned for early in 1947 and will cover the year 1946. Through the proposed census, advertisers will get their first accurate statement of the situation regarding post-war availability of manufactures.

Radio set production, including FM and television, will be included in the census, as well as the production of certain transmitter equipment.

The census, still in the planning stage, is awaiting approval of fund appropriations necessary for its execution.
Broadcast Advertising

JOSKE REPORT IN PREPARATION

Frank E. Pellegrin, director of broadcast advertising, and Lee Hart, assistant director, go to San Antonio June 17 for an extended conference with officials of Joske’s of Texas and to gather additional data for “Radio for Retailers,” a report on the study of radio advertising by Joske’s. Material now written will also be cleared for publication. The department hopes to have the initial release ready for July distribution.

Vernon Fryburger, assistant professor of marketing at Oxford University, Miami, O., reported June 3 at Joske’s with the title of special assistant to the vice president in charge of sales promotion, to conduct additional radio research on behalf of NAB. Information thus developed will be published as it becomes available. At Oxford University, Mr. Fryburger was associated with Dr. C. H. Sandage, author of “Radio Advertising for Retailers” (Harvard University Press, 1945).

STANDARD PROGRAM SCHEDULE PRINTED ON BETTER QUALITY PAPER

The NAB Standard Program Schedule form is now being supplied stations on a better quality of Sub-24 White Surface Bond for which the price will be $5.35 per thousand, instead of $4.72.

(For Story on Rise of Retail Sales, See “Research Department”)

Small Market Stations

LOCAL SPONSORSHIP OF NBC PRODUCED CO-OP SHOWS PROVES VALUABLE TO CLIENTS AND AFFILIATES

Interest in the NAB Small Market Stations Division study on the sale of network co-op programs continues to soar among network and station executives. The importance of this type of network programming is borne out in the fact that 65% of National Broadcasting Company’s co-op program sales are in the small markets over local or small regional outlets. “This form of network service,” according to Burton M. Adams, NBC Coordinator of co-op programs, “to our affiliated stations has reached a matured stage in the broadcasting art and many success stories have been attributed to the programs.”

The May edition of “NBC Transmitter” features pictures of the co-operative program stars on the front cover. Herewith are excerpts from an article in the same issue:

“Less than three short years ago, NBC, in an effort to serve its stations and broaden the listening scope of its world-wide news coverage, inaugurated its first cooperative programs. Since then, the cooperative program division has become just about the fastest-growing baby in radio.

“Now there are nine ‘network-quality’ programs available to stations for local sponsorship, plus two others for the West Coast only. In this group are most of NBC’s leading news personalities on programs which would be impossible to build locally. This fact, plus the cooperation of the stations’ sales departments, has resulted in a sales record nothing short of mercurial. The following facts give some idea of what has been accomplished along these lines:

“Morgan Beatty is sold by 38 of the 67 stations carrying him, ‘News of the World’ by 28 out of 82 stations, ‘World News Roundup’ by 42 out of 72, Richard Harkness by 30 out of 90, Sunday ‘World News Roundup’ by 13 out of 98, H. V. Kaltenborn by 13 out of 56, ‘Maggi’s Private Wire’ by 8 out of 35, ‘Veterans’ Advisor’ by 7 out of 85 and Robert St. John by 7 out of 35. These are the figures as The Transmitter goes to press, but it probably will be higher by the time this issue reaches readers.

“There are nine programs altogether, which have been carefully built to provide overall balance in news programming, under the supervision of both C. L. Menser, vice-president in charge of Programs, and William F. Brooks, director of news and international relations.

“Burton M. Adams of the stations relations department acts as coordinator of cooperative programs in presenting these offerings to NBC’s affiliated and managed-and-owned stations for local sale.

“Three of these shows, the morning ‘World News Roundup,’ the evening ‘News of the World’ and the Sunday ‘World News Roundup’ offer world-wide news pickups. They feature James Stevenson, John W. Vandercook and John MacVane, respectively, in New York, and the network’s entire international news gathering organization.

“Every effort will be made by NBC to aid stations in the sale of cooperatives.”

BENTON & BOWLES AGENCY VIEWS GROUP SELLING

The NAB study of group selling among small market stations has revealed to date the methods used by THE TOBACCO NETWORK (North Carolina), MID-SOUTH NETWORK (Mississippi), THE ARIZONA NETWORK and the TALL CORN NETWORK OF IOWA. (Current Reports pp. 251, 278, 358). Additional groups of small stations are to be included in the series. This study, according to J. Allen Brown, assistant director of broadcast advertising, is developing effective methods for selling national and regional advertising over small outlets. When several stations are formed into a regional network, a larger market results and, therefore, it is easier to attract the national and regional advertisers.

Leading advertising agencies are being consulted by the small market stations division relative to their views and experiences with these station groups. Benton & Bowles, Inc. have reported that they have not had much experience with them as yet, but see many advantages not only to the stations but also to the advertisers and agencies, when small stations band

(Continued on next page)
together. These advantages, George Kern, executive time buyer, points out, would include: (1) The opportunity for testing programs regionally before expanding to a national effort under normal network conditions; (2) Group rates which would result in lower costs to the advertiser; (3) The need for only one contract to cover several stations; (4) In the case of recorded shows, there is a savings in cost of records and shipping; (5) Cooperative selling and promotion would result in savings for the stations.

11:30 P. M. UNTIL 1:00 A. M. SOLD ON WOL, WASHINGTON, D. C.

The larger metropolitan stations have been invited by NAB Small Market Stations Division to submit ideas and sales experiences with the late periods on the schedule. This information is being compiled for possible use by small, as well as large stations.

WOL, Cowles Station, Washington, D. C., has recently sold the 12:00 midnight until 1:00 A.M., in addition to the regularly sponsored 11:30 until 12:00 P.M. period.

“Sweet Music,” 11:30 until 12:00, Monday through Friday, is sponsored by a jewelry firm. The program consists of currently popular and semi-classical recorded music. A pleasant, smooth-voiced announcer acts as emcee. William D. Murdock, WOL Sales Manager, states the commercials are definitely low pressure and lean toward institutional selling rather than plug copy. “The objective is to create a mood of easy listening throughout the program via the personality on the show.” “Sweet Music” is promoted over the air and in newspapers. Sponsor feels that the program is doing an admirable job, and customer comments have been most favorable.

“When Day Is Done” is the vehicle broadcast over The Mutual Affiliate 12:00 midnight until 1:00 A.M., Monday through Friday. The sponsor is a local clothing store. Show is conducted by a sports personality, and features music and sports.

HOW BOLD A FACE DO YOU LIKE?

Had you noticed that the size of type used for REPORTS this week is slightly larger than usual?

This is the size which has been used previously—eight point.

The nine point is being used this week as a test run. We hope to learn whether or not it increases noticeably the ease with which you read REPORTS.

The larger type face will increase slightly the cost of printing and add probably forty pages per year to your file volume.

We would like to use the type size that pleases most of our readers. If it makes no difference, we would like very much to know that also.

Would you please check your preference on the enclosed self-addressed post card?

Tom Olsen, licensee of KGY, Olympia, and president, Washington Broadcasters Association, is general chairman of the Washington clinic.

Arthur Stringer, NAB director of special services, will attend both clinics.

INS PETITION ANSWERED BY FCC

In answering the petition of the International News Service, the FCC, on Monday (10), assured INS that no provisions of the commission's program report are derogatory to the news service.

When it petitioned for clarification of the definition of the term wire program on April 18, INS felt that a newscast based on complete news wire reports, as differentiated from a processed radio wire, was entitled to a live classification rather than a wire classification. (Current REPORTS, p. 316)

The commission told INS that “the only reason for the establishment of the proposed program categories was to provide a convenient method for statistical and analytical purposes.”

RADIO SET OUTPUT CLIMBS

At the convention of the Radio Manufacturers Association in Chicago, Ray C. Cosgrove, president, announced Tuesday (11) that about 4.5 million sets, most of them smaller units, had been produced since V-J day and it was expected that some 7.5 million more would be manufactured in the last six months of 1946.

Mr. Cosgrove stated that radio set manufacturers were now producing about 1 million sets per month, almost the level of 1941 production. (Current REPORTS, p. 425)

Production figures for total output in 1941 show (Continued on next page)
that the industry manufactured 13 million radio sets that year.

Little optimism was expressed by Mr. Cosgrove for mass production of larger sets because of wood shortages.

**UNIFORM TIME NEXT YEAR REQUESTED BY IDAHO GROUP**

That bugaboo of radio broadcasting, local option daylight saving time, threatened recently to turn the program structure of KSEI, Pocatello, Idaho, topsy-turvy for the second time within a few weeks. The retail merchants committee of the Pocatello Chamber of Commerce called a meeting late in May to decide whether that city should adopt daylight saving time for the summer.

Henry H. Fletcher, KSEI general manager, who had only a month earlier rearranged his schedule to conform with the NBC shift to DST operation, appeared before the committee and pointed out the confusion which would result for the station and its listeners, advertisers, agencies and network.

Instead of adopting DST for this summer, the retail merchants committee passed a resolution directed to Idaho congressmen urging them to work toward congressional action in establishing daylight saving time for the entire nation next year.

(Ed. Note: NAB continues to urge uniform time.)

**FM Department**

**FM GRANTS TO 15 APPLICANTS**

Engineering approval and final CP's were granted to thirteen FM applicants, and two other FM applicants were given conditional grants by the FCC on Thursday (13).

The conditional grants, subject to examination of engineering details, will enable the applicants to proceed immediately with preliminary plans for obtaining equipment, programming and other details necessary in organizational work on their proposed outlets.

Twelve of the grants are for metropolitan stations, while one is community and two are rural services. Additional data on these approvals will be found under FCC Actions, in this issue of Reports.

**FCC**

**COMMERCE COMMITTEE REPORTS FAVORABLY ON WALKER RENOMINATION**

The renomination of Commissioner Paul A. Walker for a seven year term on the FCC was reported out favorably from the Senate Interstate Commerce Committee by a unanimous voice vote Friday (14).

President Truman's renomination of Mr. Walker, senior member of the FCC in point of service, was sent to the Senate on May 13. Under normal Senate procedure final action by the Senate can not take place for twenty-four hours after committee approval.

**FCC WILL STUDY ABC STOCK PLANS**

Included on the FCC calendar last week was the scheduling of a hearing on the proposed ABC stock sale and purchase of stations, fifteen license renewals, granting of 10 CP's for standard stations, approval of a television outlet for Washington, D. C., denial of an FM license to the State Broadcasting Company and additional applicants for standard stations.

The commission ordered a full hearing on the ABC proposal to sell a million shares of stock to the public and the network's plan to purchase the broadcasting facilities of the King-Trendle organization in Detroit. The FCC said that the investigation into both matters would start on July 9.

In granting the fifteen license renewals to standard broadcast stations, the commission's authorizations cover expiration dates ranging from August 1, 1947, to May 1, 1949.

Of the ten new outlets approved by the FCC, four will operate full time and six are licensed for daytime only operation.

The commission announced proposed decisions on two other applications for CP's. In one case, five applicants requested conflicting facilities in upstate New York. Four asked for facilities in Utica, while the fifth applied for the same frequency in nearby Rome. Approval is proposed for the application of the Copper City Broadcasting Corporation in Rome.

The second proposed decision would approve the application of the Escambia Broadcasting Company for a new outlet in Pensacola, Fla., and deny the application of Gulfport Broadcasting, Inc., for facilities in the same city.

The Alan B. DuMont Laboratories were granted a CP for a 5 KW television outlet in Washington. It is reported that construction will start next Wednesday (26) and must be completed within six months in accordance with the provisions of the CP.

In denying the application of the State Broadcasting Corporation for an FM station in Hartford, Conn., the FCC cited its policy of limiting control of facilities. The commission in making its decision, pointed out that the applicant was owned by the Yankee Network, which is licensee for FM stations in Paxton, Mass., and Mt. Washington, N. H.

Applications for approximately thirty new standard broadcast stations were received by the FCC for facilities in various sections of the country.

**Employee-Employer Relations**

**CBS TELEVISION ELECTIONS INCONCLUSIVE**

In a last minute move on Friday (14), while the elections among CBS white collar employees in New York were in progress, William Collins, New York Regional Director for the A. F. of L., sought and

(Continued on next page)
obtained a ruling from the NLRB in Washington impounding the ballots of the Television directors and Assistant directors. (See Current Reports, p. 455.)

Collins' telegram to the Board gave as the reason for the request the desire of the American Federation of Labor to resolve the jurisdictional dispute between the Radio Directors Guild and IATSE, both A. F. of L. affiliates. The Board ordered the directors' ballots impounded and gave all parties until June 24 to file their views.

In the 3-union election among the miscellaneous television studio employees, all 9 ballots cast were challenged. The 9 employees involved also voted under challenge in the election among the large white-collar group.

Results of the voting in the overall group, also inconclusive, were as follows: UOPWA(CIO) 327, IBEW 103, JATSE 9, none 208, challenged 23.

Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Radio Allocation Plans during the week of June 24-30, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Fighting Inflation

The threat of serious inflation and the possibility of a spiralling boom followed by disastrous depression are greater today than at any time during the war. With steadily mounting production promising to get us safely "over the hump" we can win the fight against inflation if we resist inflationary pressures until the supply of goods catches up with the demand. Although various groups are advocating different solutions to the problems of production and price stabilization, no one can deny the need to keep inflationary tendencies from getting out of hand. Regardless of what measures are adopted by the Government, the behavior of individual Americans during the next few months can have a tremendous effect on the economic future of the nation for years to come. Current demand for goods is the greatest in history—while the supply of goods, though constantly increasing, has not yet succeeded in catching up. Within a year or less, production in most fields should begin to come in balance with demand. Then the main danger of runaway inflation will be at an end. But until that point is reached, there is the possibility that if prices get out of hand they may rise faster than during the war itself. Remember that that is what happened after World War I and that the 1920-21 depression, while not the longest, was the sharpest in the nation's history. Our behavior now will decide whether we shall enter into a period of vast production and prosperity, or be caught in a post-war boom and depression as in 1920-21. Every American can help keep prices under control by: (a) Spending prudently—make sure we buy only what we need of goods that are still scarce; (b) Saving—through savings bonds, insurance, and other savings; (c) Observing all existing price and rent regulations. (Fact Sheet No. 3-A)

Homes for Veterans

"America faces a critical housing shortage and its veterans are the worst sufferers. No one wants to make a separate group of veterans, and most veterans want to be regarded not as a special group, but as a part of the entire community. Nevertheless, in simple justice, veterans deserve all possible assistance in finding living accommodations. They feel the pinch of the shortage more acutely because they interrupted their lives to go into the Armed Services. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. An estimated 1,300,000 single veterans will get married by December 31, 1946. It appears that more than 2 million veterans' families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans' housing situation. But the only real answer to the housing shortage is an extended period of volume construction. Government and industry are cooperating to stimulate construction and to provide that veterans are to have first chance at it. For example, the Government is giving priorities on scarce building materials to builders who will put up homes which will be available for sale or rent at reasonable prices and will be offered first to veterans. Until construction gets rolling, by all means the most important source of housing for veterans consists of vacancies which become available in the existing housing supply. Urge listeners to help ease the housing situation by "staying put" if they possibly can so that a maximum number of veterans can find living places in the existing housing supply; by sharing their homes with veterans' families if they can possibly do so and listing vacancies and houses for sale at the veterans' housing referral center, if one exists in their community, so that veterans can get first chance at them. (Fact Sheet No. 4-B)

Fight Famine by Sharing

"Millions are in grave danger of starvation." These are the words of former President Herbert Hoover from his report to the nation of his 35,000 mile tour though the famine stricken areas of the world. The report goes on to say: "I have seen with my own eyes the grimmest spectre of famine in all the history of the world . . . Hunger hangs over the homes of more than 800 million people—over one-third of the people of the earth." If 300 million of these people should receive no more relief, and if we assume that their own remaining resources could be evenly distributed (which they could not), they would be reduced to a calory level that would mean slow death. Says Mr. Hoover, "We can save these people from the worst if we will." But we are still faced with the fact that 3,600,000 tons of cereals are required if hunger is to be appeased and mass starvation prevented in many of the hungry ridden parts of the world. No one can predict for certain how long famine conditions will prevail. So until the famine emergency is over, the job of Americans is to be content to eat less wheat products, fats and oils. As a rough guide, each American family should be eating one-third less wheat products and one-fourth less fats and oils than they eat in usual times. If everyone will follow this pattern, the supplies will be fairly distributed and everyone will have all he

(Continued on next page)
needs, if not all he wants. The nutritional value of our diets need not suffer, for we may substitute such things as fresh vegetables, potatoes, fish, eggs, poultry, etc. There will be all we need, if not all we want, if we share with our fellow Americans, our wheat products and fats and oils. We can do this by: . . . Being content to eat one-third less wheat and rice products than usual; one-fourth less fats and oils than usual . . . Buying no more than our fair share, even when it is available . . . Eating more of the plentiful foods instead . . . Eliminating all food waste and turning in all used fats . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-C)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission in Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 17. They are subject to change.

Monday, June 17

KGB—Don Lee Broadcasting System, San Diego, Calif.—Renewal of license. 1300 kc., 1 KW, unlimited.

KDB—Don Lee Broadcasting System, Santa Barbara, Calif.—Renewal of license. 1400 kc., 250 watts, unlimited.

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Renewal of license.

FCC ACTIONS

DOCKET CASE DECISIONS

The Federal Communications Commission announces its Proposed Decision (B-249), looking toward a grant of the application of Ruth Braden, et al., d/b/a Escambia Broadcasting Co., for a new standard broadcast station at Pensacola, Florida, to operate on 1450 kc., 250 watts, unlimited time. (Docket 6849)

The Commission also offers its Proposed Decision (B-249), looking toward a grant of the application of Gulfport Broadcasting Company, seeking the same facilities at Utica, New York. The grant would be subject to Civil Aeronautics Administration approval of the antenna system and transmitter site and waiver of Section 3.55(b) of the Commission's Rules.

At the same time, the Commission proposed to deny the application of Ruth Braden, et al., d/b/a Escambia Broadcasting Co., for a new station at Utica, New York, to operate on 1450 kc., 250 watts, unlimited time. (Docket 6849)

NEW—Dorothy S. Thackrey, Los Angeles, Calif.—For television facilities.

NEW—American Broadcasting Co., Inc., acting collectively (Bl-TC-493). The following stations received Engineering Approval and engineering conditions. (B3-P-4784)

Elberton Broadcasting Co., Elberton, Ga.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (B3-P-577)

Charles A. Henderson, et al., d/b/a Muscarine Broadcasting Co., Ltd., Muscatine, Iowa—Granted construction permit for a new station to operate on 860 kc., 250 watts, daytime only. (B4-P-4755)

1550 Kilocycles

WBBW—Associated Broadcasters, Inc., Indianapolis, Ind.—Voluntary assignment of construction permit to Evansville On The Air, Inc.

1590 Kilocycles

NEW—Olaj Broadcasting Co., Ventura, Calif.—Construction permit for a new standard broadcast station to be operated on 1590 kc., power 1 KW and unlimited hours of operation. Amended to show changes in officers, directors and stockholders and make changes in antenna.

1600 Kilocycles

NEW—Gail D. Griner and Alden M. Cooper, a partnership, d/b as The Adrian Broadcasting Co., Adrian, Mich. (P. O. 2982 Treat St.)—Construction permit for a new standard broadcast station to be operated on 1600 kc., power 250 watts and unlimited hours of operation.

Peach Bowl Broadcasters, a partnership composed of Beverly B. Ballard, Dewey Allread, Jr., Clyde L. Goodnight, Raymond F. Linn and Chester V. Ullom, Yuba City, Calif.—Construction permit for a new standard broadcast station to be operated on 1600 kc., power 250 watts and unlimited hours of operation. Amended to change frequency from 1400 kc. to 1600 kc., power from 250 to 500 watts, make changes in antenna, type of transmitter, studio location and to show additional partners Raymond F. Linn and Chester V. Ullom.

FM APPLICATIONS ACCEPTED FOR FILING

NEW—Andrew G. Haley and Tom Olsen, General Partners, Martin Summerfield and William J. Donahue, Limited Partners, d/b as Rose Bowl Broadcasters, Ltd., Pasadena, Calif. (P. O. Suite 311, 553 East Colorado St.)—Construction permit for new FM (Community) broadcast station to be operated on frequency to be assigned by FCC.

NEW—R. G. LeTourneau, Longview, Texas—Construction permit for new FM broadcast station to be operated on Channel #274, 102.7 mc. or as assigned by FCC, coverage of 5,600 square miles. Amended to specify type of transmitter as Metropolitan.

NEW—Maryville-Yuba City Broadcasters, Inc., Maryville, Calif. (P. O. 519 E. St.)—Construction permit for new FM (Metropolitan possibly Rural) broadcast station to be operated on Channel #222, 92.3 mc. or Channel #241, 92.7 mc., coverage 9,020 square miles.

WABW—Associated Broadcasters, Inc., Indianapolis, Ind.—Voluntary assignment of license to Evansville On The Air, Inc.

NEW—Indiana Broadcasting Corp., Indianapolis, Ind.—Construction permit for new high frequency FM (Metropolitan) broadcast station to be operated on ±50.0 mc., coverage of 10,190 square miles. Amended to change coverage from 10,190 to 13,655 square miles; population from 927,355 to 1,100,451 and make changes in antenna system.

NEW—Allen T. Simmons, Akron, Ohio—Construction permit for new high frequency FM (Metropolitan) broadcast station to be operated on 45.1 mc., coverage 10,800 square miles. Amended to change type of transmitter.

NEW—Oklahoma Press Publishing Co., Muskogee, Okla. (P. O. 214-216 Wall St.)—Construction permit for new FM (Metropolitan) broadcast station to be operated on frequency to be determined by Chief Engineer of FCC, coverage to be determined.

NEW—Voice of Alabama, Inc, Birmingham, Ala.—Construction permit for new high frequency FM (Metropolitan) broadcast station to operate on ±36.0 mc, coverage 13,307 square miles. Amended to change studio location, transmitter site and to make changes in antenna system.

NEW—Nunn Broadcasting Corp., Mobile, Ala. (P. O. 600 St. Louis St.)—Construction permit for new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage to be determined. Amended to change studio location, transmitter site and to make changes in antenna system.

TELEVISION APPLICATIONS ACCEPTED FOR FILING

NEW—American Broadcasting Co., Inc, New York, N. Y.—Construction permit for new commercial television broadcast station to be operated on Channel #6, 82-88 mc, EBST: 540, and unlimited hours of operation. Amended to specify visual and aural transmitter, change frequency from Channel #6, 82-88 mc, to Channel #7, 174-182 mc. change transmitter site and make changes in antenna system.

NEW—News Syndicate Company, Inc., New York, N. Y.—Construction permit for new commercial television broadcast station to be operated on Channel #11, 204-210 mc., ESR: to be determined and unlimited hours of operation. Amended to change frequency from Channel #11, 204-210 mc, to such as may be assigned by FCC, specify types of transmitters and antenna system.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

KSYL—Marvin Glazer and Sylvan Fox, Co-partners d/b as Fox Broadcasting Co., Alexandria, La.—Modification of construction permit (B3-P-4473, which authorized a new standard broadcast station) to change type of transmitter, approval of antenna and transmitter location and change studio location.

NEW—Watchtower Bible & Tract Society, Inc., Brooklyn, N. Y. (P. O. 124 Columbia Heights)—Construction permit for new non-commercial educational broadcast station to be operated on ±29.0 mc., power 10 KW, and unlimited hours of operation. Amended to change class of station to Rural; specify frequency as Channel # 273, 102.5 mc., coverage of 27,600 square miles; population of 2,161,912; type of transmitter, transmitter location and changes in antenna system.

APPLICATIONS TENDERED FOR FILING

NEW—R. I. Broadcasting Co., Providence, R. I.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power 250 watts and daytime hours of operation.

NEW—Joseph M. Ripley, Leesburg, Fla.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts, and unlimited hours of operation. (Contingent upon release of these facilities by Station WLOF)

NEW—Northeast Oklahoma Broadcasting Co., Miami, Okla. —Construction permit for a new standard broadcast station to be operated on frequency to be assigned by FCC, coverage of 7,461 square miles.

NEW—Voice of Alabama, Inc, Birmingham, Ala.—Construction permit for new high frequency FM (Metropolitan) broadcast station to operate on ±36.0 mc, coverage 13,307 square miles. Amended to change studio location, transmitter site and to make changes in antenna system.

NEW—Nunn Broadcasting Corp., Mobile, Ala. (P. O. 600 St. Louis St.)—Construction permit for new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage to be determined. Amended to change studio location, transmitter site and to make changes in antenna system.

NEW—News Syndicate Company, Inc., New York, N. Y.—Construction permit for new commercial television broadcast station to be operated on Channel #11, 204-210 mc., ESR: to be determined and unlimited hours of operation. Amended to change frequency from Channel #11, 204-210 mc, to such as may be assigned by FCC, specify types of transmitters and antenna system.

NEW—Watchtower Bible & Tract Society, Inc., Brooklyn, N. Y. (P. O. 124 Columbia Heights)—Construction permit for new non-commercial educational broadcast station to be operated on ±29.0 mc., power 10 KW, and unlimited hours of operation. Amended to change class of station to Rural; specify frequency as Channel # 273, 102.5 mc., coverage of 27,600 square miles; population of 2,161,912; type of transmitter, transmitter location and changes in antenna system.

APPLICATIONS TENDERED FOR FILING

NEW—R. I. Broadcasting Co., Providence, R. I.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power 250 watts and daytime hours of operation.

NEW—Joseph M. Ripley, Leesburg, Fla.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts, and unlimited hours of operation. (Contingent upon release of these facilities by Station WLOF)

NEW—Northeast Oklahoma Broadcasting Co., Miami, Okla. —Construction permit for a new standard broadcast station to be operated on ±98.0 mc, power 10 KW, and unlimited hours of operation. Amended to change class of station to Rural; specify frequency as Channel # 273, 102.5 mc., coverage of 27,600 square miles; population of 2,161,912; type of transmitter, transmitter location and changes in antenna system.

NEW—Voice of Alabama, Inc, Birmingham, Ala.—Construction permit for new high frequency FM (Metropolitan) broadcast station to operate on ±36.0 mc, coverage 13,307 square miles. Amended to change studio location, transmitter site and to make changes in antenna system.

NEW—Nunn Broadcasting Corp., Mobile, Ala. (P. O. 600 St. Louis St.)—Construction permit for new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage to be determined. Amended to change studio location, transmitter site and to make changes in antenna system.

NEW—News Syndicate Company, Inc., New York, N. Y.—Construction permit for new commercial television broadcast station to be operated on Channel #11, 204-210 mc., ESR: to be determined and unlimited hours of operation. Amended to change frequency from Channel #11, 204-210 mc, to such as may be assigned by FCC, specify types of transmitters and antenna system.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

KSYL—Marvin Glazer and Sylvan Fox, Co-partners d/b as Fox Broadcasting Co., Alexandria, La.—Modification of construction permit (B3-P-4473, which authorized a new standard broadcast station) to change type of transmitter, approval of antenna and transmitter location and change studio location.

NEW—Watchtower Bible & Tract Society, Inc., Brooklyn, N. Y. (P. O. 124 Columbia Heights)—Construction permit for new non-commercial educational broadcast station to be operated on ±29.0 mc., power 10 KW, and unlimited hours of operation. Amended to change class of station to Rural; specify frequency as Channel # 273, 102.5 mc., coverage of 27,600 square miles; population of 2,161,912; type of transmitter, transmitter location and changes in antenna system.

APPLICATIONS TENDERED FOR FILING

NEW—R. I. Broadcasting Co., Providence, R. I.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power 250 watts and daytime hours of operation.

NEW—Joseph M. Ripley, Leesburg, Fla.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts, and unlimited hours of operation. (Contingent upon release of these facilities by Station WLOF)

NEW—Northeast Oklahoma Broadcasting Co., Miami, Okla. —Construction permit for a new standard broadcast station to be operated on frequency to be assigned by FCC, coverage of 7,461 square miles.
NEW—Tri-County Radio Corp., Shelby, Mont.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts, and unlimited hours of operation.

NEW—Keith Capper, d/b/a The Aleutian Broadcaster, Anchorage, Territory of Alaska—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Moraine Broadcasters, Inc., Dayton, Ohio—Construction permit for a new standard broadcast station to be operated on 1110 kc., power 1 KW, daytime hours of operation.

NEW—Loys Marsdon Hawley, Bennettsville, S. C.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Four States Broadcasting Corp., Texarkana, Ark.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power 250 watts and unlimited hours of operation.

NEW—Effingham Broadcasting Co., Effingham, Ill.—Construction permit for a new standard broadcast station to be operated on 1090 kc., power 250 watts and daytime hours of operation.

NEW—Pikes Peak Broadcasting Co., a co-partnership consisting of Joseph H. Rohrer and Edythe G. Sweeney, Colorado Springs, Colo.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power 250 watts, and unlimited hours of operation.

NEW—Boulder City Broadcasting Co., (a Nevada corporation), Las Vegas, Nev.—Construction permit for a new standard broadcast station to be operated on 970 kc., power 1 KW and unlimited hours of operation.

WTHT—The Hartford Times, Inc., Hartford, Conn.—Construction permit to change frequency from 1230 to 910 kc., power from 250 watts to 5 KW, install new transmitter and change transmitter location and install directional antenna for day and night use.

NEW—Brookhaven Broadcasting Co., a partnership composed of Tullius Brady and Dalton B. Brady, Brookhaven, Miss.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power 250 watts, and unlimited hours of operation.

KHWA—Amphlett Printing Co., San Mateo, Calif.—Construction permit to change power from 250 watts to 1 KW, install directional antenna for night use and new transmitter. (1550 kc.)

Telecolor Corp., West Springfield, Mass.—Construction permit for new standard broadcast station to be operated on 1490 kc., 250 watts and unlimited hours of operation.

McEvoy Broadcasting Co., In or near Roswell, N. Mex.—Construction permit for new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

WMBH—Joplin Broadcasting Co., Joplin, Mo.—Construction permit to change frequency from 1450 to 1310 kc., power from 250 watts to 1 KW night, 5 KW day, install directional antenna for night use, new transmitter and change transmitter location.

Federal Trade Commission
Actions

COMPLAINT

Victory Vitamin Co.—Frederick Herrscher, trading as Victory Vitamin Co., 411 South Wells Street, Chicago, is charged in a complaint issued by the Commission with disseminating false advertisements concerning the therapeutic and nutritional properties of vitamin preparations.

CEASE AND DESIST ORDERS

Razoroll Company.—Food Display Machine Corp., 620 North Michigan Avenue, Chicago, and its president, Adam H. Kulikowski, have been ordered by the Commission to cease and desist from representing that the safety razor blade sharpener they sell under the name of Razoroll enables the user to obtain over 700 shaves from one blade, or any number in excess of that which can be regularly obtained through the normal use of the average blade. The respondent corporation trades as Razoroll Company. (5308)

The Camera Man—An order to cease and desist from misrepresenting the quality, price and terms of sale of cameras has been issued by the Commission against Henry J. Handelsman, Jr., Birdye Handelsman and William Handelsman, trading as The Camera Man, and Henry J. Handelsman, Jr., Inc., all of 139 North Clark Street, Chicago. Henry J. Handelsman, Jr., Inc., is an advertising agency that prepared and placed advertisements for cameras sold by the individual respondents. (5386)

STIPULATIONS

Vitamin Corporation of America, Newark, N. J., entered into a stipulation with the Commission to discontinue representing that its vitamin preparation known as Kulpentum restores the natural color of hair, improves the skin, increases the strength or elasticity of the nails, decreases freckling or increases resistance to sunburn. (63312)
NAB FM EXECUTIVE COMMITTEE TO MEET IN N. Y.

The NAB FM Executive Committee will convene in New York City Tuesday (25) to discuss current FM problems. The meeting, to be held at the Ambassador Hotel, was called by Chairman Walter Damm of WTMJ, Milwaukee.

In addition to Mr. Damm, committee members planning to attend are Wayne Coy, W3XO, Washington; Gordon Gray, WMIT, Winston-Salem; Paul W. Morency, WTIC-FM, Hartford; John Shepard III, WMTW, Boston; and Frank N. Stanton, CBS. Leslie C. Johnson, WHBF, Rock Island, Ill., has advised that he will be unable to attend.

The NAB staff will be represented by A. D. Willard, Jr., executive vice president, and Robert T. Bartley, director of the FM Department.

NEW PROGRAM COMMITTEE MEETS NEXT WEEK IN CHICAGO

The recently created Program Executive Committee will hold its initial session next Monday and Tuesday (1 and 2) at the Drake Hotel in Chicago.

Agenda for the meeting includes a discussion of the objectives of the new NAB Program Department, including both immediate and long-range activities, and relations with the FCC program policy. Suggestions regarding the selection of an Administrative Director for the department and coordination of the new department with research, sales, and public relations departments of NAB will also be discussed.

Committee members are Edgar L. Bill, WMBD, Peoria; Phillips Carlin, MBS, New York; Arthur B. Church, KMB, Kansas City; Stanley Hubbard, KSTP, St. Paul; Merle S. Jones, WOL, Washington; I. R. Lounsberry, WGR, Buffalo; Clarence L. Menner, NBC, New York; Herb Plamebeck, WHO, Des Moines; H. W. Shavick, WMC, Memphis; Glenn Snyder, WLS, Chicago; (Continued on page l+8h)

AWD PLEDGES FAMINE AID IN WHITE HOUSE CEREMONY

Monday (24) at the White House in Washington, the Association of Women Directors will present to former President Herbert Hoover, honorary chairman of President Truman's Famine Emergency Committee, a group of telegrams from women broadcasters throughout the country pledging their full support to the food conservation program.

The presentation will be made by Alma Kitchell, WJZ, New York, president of AWD. Accompanying Miss Kitchell will be two AWD vice-presidents, Mildred Bailey, WCOP, Boston, and Dorothy Lewis, NAB coordinator of listener activity, who will introduce the AWD president.

The ceremony will take place immediately preceding a special meeting of the Famine Emergency Committee Monday afternoon.

PRESIDENT MILLER ADDRESSES WEST COAST GROUPS

A highlight of NAB President Justin Miller's current visit to the west coast will be a meeting of the 17th District which he will address today (24) in Portland, Oregon. The special one-day session has been called by District Director Harry R. Spence.

Tuesday (25) Judge Miller will speak before a convention of the Pacific Advertising Association in Spokane. His subject will be "New Threats to Advertising."

During the past week the NAB President has met with and addressed several civic and business groups in California. Tuesday (18) he spoke before a combined luncheon meeting of the Los Angeles Ad Club and the Los Angeles Chamber of Commerce at the Biltmore Hotel on the subject "International Freedom of Speech—a Dilemma."

The preceding evening (Continued on next page)
Judge Miller was honor guest at a reception given by the Los Angeles Chamber of Commerce, attended by about 200 civic, business, and radio leaders.

Wednesday (19) Judge Miller discussed the FCC program report at a dinner given by the Southern California Broadcasters Association. Fifty-two persons attended, representing 22 stations and four networks, with five representatives present from Arizona. Bob Reynolds, president of SCBA said it was “the most enthusiastic meeting ever held in the history of the organization.”

The same day President Miller and NAB were hosts to Eric Johnston, Byron Price, and the Board of Directors of the Motion Picture Association of America at a luncheon in Hollywood. Judge Miller spoke on the common problems facing the two industries and Eric Johnston responded.

NEW PROGRAM COMMITTEE MEETS NEXT WEEK IN CHICAGO
(Continued from page 483)

A chairman will be elected at the opening session, at which President Justin Miller will preside.

This new committee includes members from the former Program Directors, Agricultural Directors, Radio News, Music-Use, and Standards of Practice Committees, which have been absorbed by this overall program group. (See current Reports p. 367)

HEFFRON NOW AT NAB AS EXECUTIVE ASSISTANT

Ted Heffron assumed his duties as executive assistant to the president and executive vice president of NAB Monday (17). (Current Reports, p. 450)

The former executive secretary of the National Council of Catholic Men is supervising public relations for the association. In his position at the NCCM Mr. Heffron handled the public relations of that organization for fourteen years, his activities including guidance of the “Catholic Hour” and the “Hour of Faith,” two widely known network programs.

CAB TO DISCONTINUE PROGRAM RATINGS

Announcement has been made by the Board of Governors of the Cooperative Analysis of Broadcasting that it will withdraw from the program-rating business as of July 31st. This action closes another chapter in the story of the conflicts between the program-rating agencies. The CAB now becomes, essentially, a research and standard-setting body jointly sponsored by the advertising agencies and the networks.

This resignation by CAB leaves the A. C. Nielsen Company and C. E. Hooper, Inc. active in the determination of program ratings on a national scale. Both of these organizations are attempting to improve their methods by developing techniques which will supplement their present services. The Nielsen method, for instance, while producing a sample representative of all radio homes and giving total audiences, nevertheless is slow and not capable at present of the regional breakdowns sometimes desired. The Hooper method, on the other hand, while producing speedy ratings which permit comparisons between network programs, do not give anything but the average per-minute audience in telephone-owning urban families. These and other methodological considerations are receiving careful attention from both agencies and it is expected that improvements will be reported from time to time.

C. E. Hooper, Inc. revealed that an agreement has been concluded with CAB whereby exclusive CAB subscribers will be supplied with Network Hooperatings until May 31, 1947 or the expiration of their present contract with CAB, whichever is sooner.

With CAB definitely out of the picture, the NAB Research Committee will proceed with its evaluation of the two remaining agencies in accordance with requests it has received from NAB members, the Small Markets Committee and the Sales Managers Executive Committee.

RESEARCH AND THE SALES ROAD AHEAD

Somewhere within these pages, if only for the record, there should occur about now a statement regarding the future prospects of radio advertising. It can be argued that the Research section is the appropriate place because research is to play such an important role in the future of radio advertising—all advertising, for that matter.

The color of the future is beginning to show itself through the misty, rosy haze in which advertisers are now floating. The present crop of cancellations is only incidental and no one worries much about it except as it digs into this quarter’s income. But the future of two or three or four years from now is the future that should concern us now. That future should be painted in harsh, contrasting colors. It will have sharp edges. Competition will again rear its ugly head.

Today, the heat is on the producers. Distributors can sit back and, with almost no effort, quickly dispose
of every item the harassed producer finally succeeds in completing. It’s lovely at the country club these warm days; the station’s sold out and, what th’ heck, we won’t be able to renew some of the contracts anyhow—because of that sustaining-commercial ratio they’re all excited about down in Washington.

But take another peek at that future. Look real hard. What do you see? Thousands more radio stations? What are those blurred letters? FM? What does that mean? Is the Government watching (some say regulating) a little more closely? Are manufacturers going to be forced to a closer margin? Is there going to be as much spendable income? What’s that going to do to advertising appropriations? If advertisers have less to spend, who will get the axe? Will radio be able to show that it can do the job of distribution?

That’s where research enters the picture—real, genuine research, that is. Not the kind of research done by the Promotion Department. They can’t afford to waste time on the gloomy parts of the picture (the parts, by the way, that need the most attention). Not the research done by the Sales Department. They can’t afford to be too critical of themselves. But some one, reporting directly to top management or owner should be doing the job now that every one will wish had been done when the test comes.

Here’s what must be done—and soon.

1. Make a complete and detailed description of your audience.
2. Find out what they need and what they like in the matter of radio fare.
3. Assemble some evidence to show where and how you have succeeded and/or failed either in selling or serving the public.
4. Assemble the facts of your market so that you can be a jump ahead with your predictions.
5. Try out some new ideas in programming and get an estimate of their effectiveness so that you have something in the bank when you really need new ideas. But make sure that your tests are based on something more than intuition.

Because it won’t be long before the production boys will be screaming at us to get rid of the things they are making. Inventories and warehouses will begin to fill up. It has already started in some commodities. Then we’ll see whether you are an order-taker or a salesman.

FIGURES ON RADIO PRODUCTION ANNOUNCED
BY CENSUS BUREAU

The Census Bureau in its “Facts for Industry” reported Thursday (20) that 916,701 radio sets were manufactured in March, 1946. This is about 90 percent of the average monthly production of these models. 94,531 battery-operated and 102,823 automobile radios were produced in March, both representing about half of the monthly average for the models in 1941.

ICE CREAM ASSOCIATION STRESSES THE IMPORTANCE OF SALES AND PROMOTION NOW!

“Telling the Ice Cream Story,” a work book of practical “know how” for organizing a complete public relations program by ice cream manufacturers in their communities has been released to all members of the International Association of Ice Cream Manufacturers. This brochure devotes four pages to suggested radio commercial copy. It includes a wealth of information for use in creating additional commercials on ice cream.

The extent to which manufacturers are turning their attention to sales and promotion once again is found in the message which accompanies the ice cream promotion piece. Robert C. Hibben, executive secretary, International Association of Ice Cream Manufacturers, states:

“I consider this work book one of the most important pieces of literature developed at this Association headquarters since America went to war. It is important because our industry has been in the position of facing demands far in excess of supply, and because of which fact many of us may have forgotten the importance of doing a complete selling job. Selling our industry—and selling our product.

“This book forms the basis of a program which will help you build solidly for the years ahead. It tells you what, how, when and where to advertise. It tells you how to get publicity; how to win favor with your customers and suppliers. It tells you how to make the best use of those factors which help keep your products in front of the consumers, in their homes and at the point-of-sale.

“It is important that you put this material to work for you NOW despite the fact that demand still exceeds supply, because: (1) The same demand that exists for your products, exists for practically every commodity... soft drinks, foods, clothing, housing, etc. (2) Ability to supply the demand will improve on all fronts at practically the same rate of speed. (3) Soon there will be the greatest concerted drive for the consumer’s dollar that this country has ever seen. Every type of product and service will bid for business, and competition will be terrific.

“We can’t afford to be smug about our future position just because now we can sell more than we produce. Our future business progress will depend largely on WHAT WE DO NOW—WHAT WE AS AN INDUSTRY—WHAT YOU AS A MANUFACTURER—WHAT YOUR CUSTOMERS, THE RETAILERS DO—RIGHT NOW.”

(Continued on next page)
TRANSPORTATION ADVERTISING MAY REACH 20 MILLION DOLLARS IN 1946

The National Association of Transportation Advertising has estimated that transportation advertising, which in 1945 reached a volume of $18,000,000, approximately doubling its 1940 billing, may total $20,000,000 worth of business this year, if conditions permit.

GOVERNOR TO ENTERTAIN RADIO MEN ATTENDING WASHINGTON NEWS CLINIC.

Broadcasters attending the Radio News Clinic in Olympia, Washington, June 27, will be guests of Governor Mon-Wallgren at a reception in the governor's mansion at the end of the day's session. Place of meeting has also been changed—to the Senate conference room in the Capitol building, from Olympian Hotel.

Changes were made by General Clinic Chairman Tom Olsen, KGY, and Harry R. Spence, KKRO, director, 17th NAB district.

The Oregon Radio News Clinic will be held at the Benson Hotel, Portland, June 25.

Small Market Stations

SUCCESSFUL EARLY MORNING SHOWS TO BE STUDIED

NAB Small Market Stations division has undertaken a study of a cross section of the nation's outstanding early morning shows. Data and information are being compiled on this type of commercial programming in such markets as New York, Chicago, St. Louis, Los Angeles and others.

By determining the basic composition of the early morning shows which have stood up under long years of programming in the more competitive markets, the NAB hopes to be able to make available to the industry examples and formulas for producing profitable and listenable early morning programs. The study is expected to point out some of the do's and don'ts learned "the hard way" by veteran conductors of these programs.

CO-OP PROGRAM USED AS A PUBLIC RELATIONS TOOL

The National Worsted Mill, Jamestown, New York, turned to radio through WJTN some two years ago when the war was at its height. This modern yarn producing mill, employing 650 people, found that securing and holding workers was a very important function. Experience proved that through their local radio station they could increase the war effort by boosting the morale of their workers. Many workers were attracted, plant prestige was increased, and considerable assistance was given to the sale of war bonds, and all other campaigns in behalf of the nation's war effort.

National Worsted Mill selected the ABC co-op, "Martin Agronsky," broadcast over WJTN, 8:00 til 8:15 A.M., Monday thru Saturday. In addition the plant purchased a series of 20 spot announcements weekly. The three commercials on the program were devoted to (1) encouraging people to work at the mill, (2) promoting local campaigns in the public interest, (3) and assisting a national effort in the public interest.

Simon Goldman, station manager, reports that the owners and management of the plant have been very enthusiastic about the results of the Agronsky program. Not only has it helped to increase the number employed in the mill, but it has become a fine public relations vehicle. The workers and the citizenry as a whole have a greater respect and appreciation of the importance of the plant to the community. The station and its program continue to build good impressions for a firm that does not sell a local product (other than intelligent public relations which produces handsome dividends).

FOOD STORE SPONSORS CO-OP PROGRAMS ON KFXM

Sage's Complete Market, San Bernardino, Cal., supermarket, has sponsored two MBS commentators locally over KFXM daily since last November. The sponsor is reported to be well pleased with his campaign. The promotional tie-ins, according to Maury A. Vroman, KFXM Manager, have included blown-up photographs of the commentators displayed through the market. Newspaper ads and courtesy radio plugs are also used.

Many of the network co-op programs are sold to regional advertisers for groups of stations on the coast, reports the KFXM management.

"CONGRESS ON THE AIR" AVAILABLE

"CONGRESS ON THE AIR," a public interest program and syndicated transcription of Kasper-Gordon, Inc. is available for local sponsorship to all stations. Senators and representatives of the United States Congress preview each week vital legislative problems. The discussions are non-partisan and conducted in an informal chatty manner. No participant speaks for more than two minutes consecutively.

Women Directors

AWD HOLDS SECOND NEW ENGLAND MEETING

The Second Annual Conference of women broadcasters of the first NAB-AWD district was attended by eighty-seven women representing broadcasters of the six New England states last week end (15-16) at Portsmouth, N. H.

(Continued on next page)
AMENDED FM RULES ADOPTED WITH TWO CHANGES

Adoption of an order amending certain of its rules and standards concerning FM broadcasting was announced Friday, (21) by the FCC. The changes adopted are essentially identical to those which were proposed in the Commission's notice of May 28, 1946. (See Current Reports, p. 429)

The rules as adopted differ from those proposed only with respect to Class B stations in Area II. The new rules more clearly describe the Commission's policy of authorizing a maximum of power and antenna height wherever it is believed that the demand for facilities will permit.

The second change concerns the definition in the engineering standards of antenna height above average terrain for Class A and Class B stations.

Following is the text of the two new changes:

Section 3.204(a) (2) is amended to read as follows:

In area II, class B stations will be licensed to operate with a service area equivalent to a minimum of 2 kw effective radiated power and antenna height of 300 feet above average terrain and a normal maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.

The use of greater power and antenna height will be encouraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height and area will be determined on the merits of each application, with particular attention being given to rural areas which would not otherwise receive service.

In addition Section 1M of the Commission's Standards of Good Engineering Practice Concerning FM Broadcast Stations is amended to read as follows:

M. Antenna height above average terrain.—(1) For Class A stations the term “antenna height above average terrain” means the height of the radiation center of the antenna above the terrain 10 miles from the antenna.

(2) For Class B stations the term “antenna height above average terrain” means the height of the radiation center of the antenna above the terrain 2 to 10 miles from the antenna. (In general a different antenna height will be determined for each direction from the antenna. The average of these various heights is considered as the antenna height above average terrain for Class B stations.)

IT IS FURTHER ORDERED, That any outstanding FM construction permit or license which has heretofore been issued by the Commission for a community station shall be classified as a Class A station, and that all other FM construction permits and licenses which have been issued shall be classified as Class B stations.

FM Department

AMENDED FM RULES ADOPTED WITH TWO CHANGES

For the purpose of determining equivalent coverage, the 1000 uv/m contour should be used.

In the determination of appropriate coverage, consideration should be given to population distribution, terrain, service from other FM stations, trade area and other economic factors. Among the recognized trade area authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc. (Consumer Trading areas), Rand McNally Map Co. (Trading Areas) and Hagstrom Map Co. (Four Color Retail Trading Area Map).

Engineering

FCC PLANS NEW AIR POLICING SYSTEM

The details of a broad plan for policing the enormously expanded radio spectrum was announced by the FCC on Friday (21). The plan becomes effective next Monday (1).

To handle the expected increase in radio traffic, the commission's plan provides for a merger of the Radio Intelligence Division (RID) with the Field Division. The new unit will be known as the Field Engineering and Monitoring Division.

The Commission's plans are based on the spread of the usable spectrum from a pre-war limit of 300,000 kc to 30,000,000 kc, and it's estimate that the radio highways would carry the following increases in the next few years:

Standard broadcast stations, from 1000 to 1400.
FM stations, from 50 to 3000.
Television stations from six to 200 or 300.
Radio-equipped planes from 3000 to 50,000.
Aviation ground stations from 700 to 2500.
Two-way service for autos, taxicabs, etc., from one city to 200 cities.
Radio-equipped railroads, from one to 150.
Fire department radio from no cities to 5000.
Citizens walkie-talkie, from none to 200,000.
Amateur operators, from 60,000 to 100,000.

(Continued on next page)
The Field Engineering and Monitoring Division will be the foundation of the FCC's activities for all radio services. It will act as the eyes and ears of the FCC throughout the nation. Under the supervision of its head, George S. Turner, it will have these major functions:

1. Monitoring the radio spectrum in locating sources of interference to authorized radio services and identifying all forms of radio transmission.
2. Detecting and locating illegal radio stations.
3. Inspecting all classes of licensed radio stations.
4. Conducting radio operator examinations and issuing licenses to those found qualified.
5. Measuring frequency and making technical analysis of the emission of radio stations.
6. Rendering emergency direction finding service to aircraft upon request.
7. Making field strength surveys of radio stations, conducting special engineering projects in connection with frequency allocations and related problems, and conducting propagation recording projects.

Under the new plan, the nation will be divided into nine regions, with a manager in charge of each. Monitoring stations will include 10 primary stations and 13 secondary stations.

Following are the new regions, with headquarters:
- North Atlantic, New York City; South Atlantic, Atlanta; Gulf States, Houston; South Pacific, San Francisco; North Pacific, Seattle; Central States, Chicago; Great Lakes, Detroit; Hawaiian, Honolulu; Alaskan, Anchorage.

PRESENT OPERATORS LICENSE-USE RULE EXTENDED

The FCC Thursday (20), adopted an Order, 77-F, extending until further order of the Commission, but in no event beyond December 31, 1946, the suspension of the requirements of Sections 12.27 and 13.28 of the Commission's Rules Governing Amateur Radio Service and Commercial Radio Operators, respectively, insofar as those sections require a showing of service or use as a condition precedent to the renewal of an amateur or commercial operator license.

Underlying this further suspension of the service or use requirement of the above-mentioned Rules is the belief of the Commission that many persons who until recently were or who still are serving in the United States armed forces or in other war activities would be unable, through no fault of their own, to show compliance with that requirement if it were restored as of July 1, 1946.

The Commission emphasized, however, that it is expected that there will be no further suspension of this requirement after December 31, 1946. Therefore, it is essential that all amateur and commercial radio operators who will file renewal applications after December 31, 1946 be prepared at that time to show compliance with the service or use requirement of the Commission's Rules.

The new Order 77-F does not refer to the renewal of amateur station licenses for the reason that the Commission's Rules Governing Amateur Radio Service, which were adopted on April 1, 1946, contain no requirement that an applicant show service or use in connection with an application for the renewal of an amateur station license.

FCC EXTENDS LICENSE RENEWAL DEADLINE FOR VETERANS

The FCC Thursday (20) adopted Order No. 128-A, effective July 1, 1946, the purpose of which is to extend until December 31, 1946 the provisions of its Order No. 128, adopted August 28, 1945. (See 1945 Reports, p. 380)

Order 128 provides that the Commission may act upon an application filed or mailed not later than June 30, 1946 for the renewal of a commercial radio operator license (other than Temporary Emergency Radiotelegraph Second Class Operator License) which was valid on December 7, 1941 and has since expired by its own terms without having been cancelled or suspended, notwithstanding the provisions of Section 13.11 of the Commission's Rules Governing Commercial Radio Operators (which requires an application for renewal to be filed within the last year of the license term), provided that the application is accompanied by a statement showing that: (1) the applicant is serving in the armed forces of the United States or has been honorably discharged therefrom since December 7, 1941; or (2) the applicant is serving in the United States Maritime Service or has voluntarily left that Service since December 7, 1941; or (3) the applicant is or has been employed outside the continental United States and has been unable to file timely application for renewal of license because of such employment outside the continental United States. Under Order 128-A, the provisions of Order 128 are made applicable to any application which is otherwise within the scope of Order 128 and is filed or mailed not later than December 31, 1946.

Experience under Order 128 has shown, the Commission stated, that many persons, especially those who have been employed outside the continental limits of the United States, have permitted their commercial operator licenses to expire in the erroneous belief that their licenses would be renewable under the provisions of Order 128. Therefore, all holders of commercial operator licenses (other than Temporary Emergency Radiotelegraph Second Class Operator Licenses) are urged to file their applications for renewal before the expiration of the license term.

Employee-Employer Relations

WFHR UNFAIR LABOR PRACTICE CHARGES DISMISSED

In a report made public Friday (21), Radio Station WFHR, Wisconsin Rapids, Wisconsin, was cleared of all charges of unfair labor practices by NLRB Trial Examiner R. N. Denham, following a two-day hearing in May (Current Reports, p. 427).

(Continued on next page)
UNIONS LOSE KHTH AND KWKh ELECTIONS

NLRB elections recently held for announcers and technicians at Radio Station KHTH (Houston, Texas), and for announcer-control operators at Radio Station KWKh (Shreveport, La.), resulted in the employees in each case rejecting representation by the unions.

At KHTH, announcers voted 4 to 3 against AFRA, and technicians turned down IBEW Local 716 by a vote of 5 to 4.

IBEW Local 194 lost the KWKh election 2 to 1, in balloting held on June 3.

FCC

DELAY GRANTED ON RECORDING RULE HEARING

A sixty day postponement was granted by the commission, it was announced Friday (21), in response to NAB's request for an extension of time for filing briefs on the proposed change in the FCC's recording identification rules. (Current Reports, p. 468)

The new date fixed by the commission for filing briefs is August 26, 1946.

The action will permit additional time for all interested parties, in addition to NAB, to study the proposed changes, and file briefs and requests for oral argument.

WALKER TAKES OATH FOR NEW TERM

Commissioner Paul A. Walker took his oath of office for a seven-year period on Thursday (20) after the Senate, without protest, on Saturday (15) approved his re-nomination to the FCC by President Truman.

In a ceremony at the commission's offices in Washington, Commissioner Walker was sworn in by his friend of long standing, Bennett Champ Clark, Associate Justice of the United States Court of Appeals.

His new term will commence on July 1.

FOURTEEN APPLICATIONS PLACED IN PENDING FILES

The FCC, on Friday (21) issued further information on its procedure regarding disposition of applications which might be affected by the results of the Clear Channel hearings and announced that 14 applications were placed in the pending files.

The commission's notice follows:

The Federal Communications Commission in its Public Notice, dated February 5, 1946, stated that with respect to applications proposing operation daytime only or limited time on the frequencies listed under Section 3.25(a) of its Rules, the Commission has been concerned with the possibility that a grant of a large number of such applications would further complicate the problems that are involved in the Clear Channel Hearing, but that when no conflict with the resolution of the general problems that are in issue in the Clear Channel Hearing can be foreseen, additional daytime assignments on United States 1-A clear channels may be made before conclusion of that hearing.

Further consideration of the problems involved in making Class II station assignments on 1-A frequencies has resulted in a decision to adopt the following procedure: (1) The Commission will withhold action on all applications involving use of 1-A frequencies, daytime or limited time, where the proposed station is more than 750 miles from the dominant 1-A station using a non-directional antenna on the frequency requested or is outside the 0.5 mv/m 50% skywave contour of the dominant class 1-A station using a directional antenna on the frequency requested. (2) The Commission will consider on their individual merits applications involving use of 1-A channels, daytime or limited time, where the proposed station is 750 miles or less from the dominant 1-A station using a non-directional antenna on the frequency requested or is within the 0.5 mv/m 50% skywave contour of the dominant class 1-A station using a directional antenna on the frequency requested. Applications in this category will not at this time be granted limited time, but will be considered and may be conditionally granted for daytime operation only.

Applications filed with the Commission which come within the first category above will be placed in the Commission's pending file and held without further action until conclusion of the proceedings in the Clear Channel Hearing, Docket No. 6741. After the conclusion of the Clear Channel Hearing, suitable notice will be afforded all interested persons and a period will be provided in which to file competing applications.

Applications in direct conflict with Section 3.25 or 3.22 of the Commission's Rules with respect to time of operation, power limitation or frequencies will, as set forth in the Commission's Public Notice of February 5, 1946, be dismissed without prejudice.

Pursuant to the policy stated above, the Commission on June 13, 1946, placed the following applications in the pending files until after the conclusion of the Clear Channel Hearing (Docket No. 6741):

Okla. Agricultural and Mechanical College, Stillwater, Okla., 760 kc 10 kw, Day; WLBG, Inc., Columbia, S. C., 820 kc 250 w, D; Tom S. Whitehead, Brenham, Texas, 890 kc, 250 w, D; Howdy Film Producers, Tulsa, Okla., 1100 kc, 5 kw, Day; Southwest Iowa Broadcasting Co., Creston, Iowa, 750 kc, 1 kw, D; Arthur H. Groghan, Santa Monica, Cal., 750 kc, 1 kw, L-WSB; Donnelly C. Reeves, Hancock, Cal., 870 kc, 250 w, D; Radio Broadcasting Associates, Houston, Texas, 1180 kc, 250 w, D; Scenic City Broadcasting Co., Middleton, R. I., 1200

(Continued on next page)
HOME CANNING WEEK SET JULY 15-22

Announcing that the Department of Agriculture would set July 15 through 22 as Home Canning Weeks, Paul C. Stark, Director of the National Garden Program, USDA, has wired NAB President Justin Miller expressing his appreciation for the cooperation given with the National Garden Program and home food preservation activities and requesting support of the radio industry in the promotion of home canning.

Said Mr. Stark, "The vigorous cooperation of your members is needed to assure the success of this week." He called attention to this description of Home Canning Week by the Department of Agriculture:

"This week will focus attention on the necessity for home canning and preservation of food supplies for the coming winter months at a time when food supplies are badly needed throughout the world. It will serve as the beginning of intensive food preservation efforts throughout the summer and fall months. . . . Actively cooperating in this program will be various consumer and trade groups, the President's Famine Emergency Committee, the National Garden Institute, the National Red Cross, and various other interested public and private groups. . . ."

"Commenting on the need for every type of home food preservation by American homemakers, Secretary Anderson said, 'The war years are behind. In front of us is the task of retooling peace. . . . That is why I am appealing to the women of America for a repeat performance of their food preservation record. This week from July 15 to 22 has been designated as Home Food Preservation Week to emphasize the importance of home canning and preservation of food this year. This week, of course, is only the inauguration of the real program ahead. For after this week of spade-work and education comes the constant performance through autumn that should result in making this year the greatest season of home food preservation in history.'"

NEW VA SERIES OF 13 ET SHOWS

A series of 13 transcribed quarter hour top network programs, in which veteran administration information is substituted for regular commercials, will soon be available to all stations, according to Joseph L. Brechner, director, VA radio service.

Audition of 12 of the 13 programs was held, Monday (17), in Washington. The 13th program, Fred Waring, was to be cut last week.

VA regional officers will solicit cooperation from stations in their respective areas in a week or so. Programs to be offered are:

- Great Moments in Music
- Highways in Melody
- Hildegarde
- Hit Parade
- Danny Kaye
- Kay Kyser
- Saturday Night Serenade
- Frank Sinatra
- Kate Smith
- Stairway to the Stars
- Supper Club
- Waltz Time
- Fred Waring

Charles E. Dillon, assistant director, VA radio service, prepared the format of the programs and supervised overall arrangements.

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Radio Allocation Plans during the week of July 1-7, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Fight Famine by Sharing

"Millions are in grave danger of starvation." These are the words of former President Herbert Hoover from his report to the nation of his 35,000-mile tour through the famine stricken areas of the world. The report goes on to say: "I have seen with my own eyes the grimmest spectre of famine in all the history of the world . . . Hunger hangs over the homes of more than 800 million people . . . over one-third of the people of the earth." If 300 million of these people should receive no more relief, and if we assume that their own remaining resources could be evenly distributed (which they could not), they would be reduced to a calorie level that would mean slow death. Says Mr. Hoover, "We can save these people from the worst if we will." But we are still faced with the fact that 3,600,000 tons of cereals are required if hunger is to be appeased and mass starvation prevented in many of the hunger-ridden parts of the world. No one can predict for certain how long famine conditions will prevail. So until the famine emergency is over, the job of Americans is to be content to eat less wheat products, fats and oils.

As a rough guide, each American family should be eating one-third less wheat products and one-fourth less fats and oils than they eat in usual times. If everyone will (Continued on next page)
follow this pattern the supplies will be fairly distributed and everyone will have all he needs, if not all he wants. The nutritional value of our diets need not suffer, for we may substitute such things as fresh vegetables, potatoes, fish, eggs, poultry, etc. There will be all we need, if not all we want, if we share with our fellow Americans, with our wheat products and fats and oils. We can do this by: . . . Being content to eat one-third less wheat and rice products than usual; one-fourth less fats and oils than usual . . . Buying no more than our fair share, even when it is available . . . Eating more of the plentiful foods instead . . . Eliminating all food waste and turning in all used fats . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-C)

Buy U. S. Savings Bonds—"Back Your Future"

Surplus cash invested in U. S. Savings Bonds, instead of being used to bid up the price of still-scarce foods, helps to combat inflation. Regular, substantial purchases of U. S. Savings Bonds create a reserve of buying power that will be essential to our economy when consumers goods are again in adequate supply. The rate of interest, sound investment value and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. A stepped-up campaign based on the slogan "Back Your Future," and directed at the continued buying and holding of United States Savings Bonds is now in progress—from D-Day, June 6, through Independence Day, July 4. This will be the first effort since the Victory Loan to promote the sale of Bonds through means other than the Pay-Roll Savings Plan. It is hoped that this campaign will broaden the market to include those investors to whom the Pay-Roll Savings Plan is not available and at the same time create a long-term incentive for the buying and holding of U. S. Savings Bonds. Now is the logical time for everyone to step-up his savings for the future—not for next year or the year after, but for five, ten, fifteen years from now. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like retirement incomes, education for the children, new homes, the most enjoyable use of leisure time. As an investment U. S. Savings Bonds are safe, profitable and convenient to purchase—at all banks and post-offices and through the Pay Roll Savings Plan. "Back Your Future" today by . . . buying and holding as many U. S. Savings Bonds as possible. . . . stepping up your Pay Roll Savings as much as you can. (Fact Sheet 11-B)

Safety on the Highway

The National Safety Council is working hard to make the public aware of the mass murder taking place on U. S. highways. But the National Safety Council can't do the whole job, if our cooperation is urgently needed by every man, woman and child in the nation accident-conscious. Last year traffic accidents killed 28,500, injured 921,500 more according to the National Safety Council. That's more than a million traffic casualties a year. And the cost in dollars was $1,450,000,000 . . . almost one and a half billion dollars. In the four months after gas rationing ended, traffic deaths jumped 37%. This is proved by figures of the National Safety Council. Unless something is done about it, accidents will multiply alarmingly in coming months. Gas Rationing has ended. The average car is 8 years old. The 35 mile an hour wartime speed limit is lifted. New cars are coming on the market. Inexperienced drivers are taking the wheel. Point out to your listeners as specifically as time will allow the little, thoughtless chances he may be taking today . . . this week, . . . driving so fast at night he can't stop within his headlight vision . . . driving when he's had a few drinks . . . neglecting repairs on his car . . . ignoring signals at railroad crossings. Persuade him that never again can he afford to take a chance with injury or death. (Fact Sheet No. 13)

Further Hearings

JUNE 24, 1948

Federal Communications Commission Docket

Hearings

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 24. They are subject to change.

Monday, June 24

To Be Held in Room 110, Federal Building, Cleveland, Ohio

NEW—Chester E. Daly, Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—Samuel R. Sague, Cleveland Heights, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—The Cuyahoga Broadcasting Co., Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—Western Reserve Broadcasting Co., Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—Forest City Broadcasting Co., Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.

OTHER PARTICIPANTS
WJBY—Detroit, Michigan (Intervenor)
WAML—New Laurel Radio Station, Inc., 535½ Central Ave., Laurel, Miss.—C. P. 1560 kc., 1 KW

OTHER PARTICIPANTS
The Times Picayune Publishing Co. (Intervenor)

NEW—Lake Broadcasting Co., Inc., 6th and Broadway, Gary, Ind.—C. P. 1560 kc., 500 watts night, 1 KW day, unlimited.

WCRS—Milford Radio Station, Inc., 550 kc., unlimited.

NEW—Bay State Beacons, Inc., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.
NEW—Mitchell G. Meyers et al., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.
NEW—Plymouth County Broadcasting Corp., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.
NEW—Old Colony Broadcasting Co., Inc., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.

OTHER PARTICIPANTS
KVGB, Inc. (Intervenor)

To Be Held in the Council Chamber, City Hall, at Brockton, Mass.

FCC ACTIONS

AM APPLICATIONS GRANTED
NEW—Southern Ill. Broadcasting, Partnership (Paul F. McRoy, John H. Searing, Ann E. Searing), Carbondale, Ill.—Granted CP for a new station to operate on 1030 kc., 1 KW, daytime. (B4-P-4935)
NEW—Midwestern Broadcasting Co., Petoskey, Mich.—Granted construction permit for new station to operate on 1340 kc., 250 watts, unlimited time; engineering conditions. (B2-P-4274)
NEW—Mid-State Broadcasting Co., Peoria, Ill.—Granted construction permit for new station to operate on 1050 kc., 1 KW, daytime (B4-P-3811; Docket 7184). The Commission denied the petition filed by Mid-State Broadcasting Co. requesting the Commission to tender a grant to Southern Illinois Broadcasting Partnership, Carbondale, Ill. on the frequency 1030 kc., 1 KW daytime only, in lieu of 1020 kc. as requested.
NEW—G. W. Covington, Jr., Gadsden, Ala.—Granted CP for a new station to operate on 570 kc., 1 KW, daytime. (B3-P-4000)
NEW—General Newspapers, Inc., Gadsden, Ala.—Granted CP for a new station to operate on 1100 kc., 250 watts, unlimited time. (B3-P-4624)

(Continued on next page)
NEW—E. L. Roberts, Gadsden, Ala.—Granted CP for a new station to operate on 1350 kc, 1 KW, unlimited time; DA day and night. (B3-P-5506)

NEW—The Travaider Publishing Co., Inc, Arkansas City, Kansas—Granted CP for a new station to operate on 1280 kc, 1 KW, daytime only. (B4-P-4737)

NEW—C. L. Pursley and Louise Patterson Pursley, d/b as Pursley Broadcasting Service, Mobile, Ala.—Granted CP for a new station to operate on 810 kc, 1 KW, daytime only. (B3-P-5745; Docket 6880)

NEW—Central Florida Broadcasting Co., Orlando, Fla.—Granted CP for a new station to operate on 740 kc, 1 KW, DA, unlimited time. (B3-P-3947)

NEW—The Electronics Corp. of Puerto Rico, Mayaguez, P. R.—Granted CP for a new station to operate on 98.9 me. (Channel No. 255); 152 KW; antenna 928 feet. (B4-PH-185)

NEW—Lee Broadcasting, Inc., Quincy, Ill.—Class B; 98.1 me. (Channel No. 251); 33 KW; antenna 639 feet. (B4-PH-185)

NEW—WKY Radiophone Co., Oklahoma City, Okla.—Class B; 98.9 me. (Channel No. 255); 152 KW; antenna 928 feet. (B3-PH-171)

NEW—The Traveler Publishing Co., Inc., Arkansas City, Kans.—Granted CP for a new station to operate on 1350 kc, 250 watts, unlimited time; power 100 watts peak, video; 100 watts aural; effective antenna height above average terrain: 500 feet. (B3-PCT-172)

FM FINAL CP'S GRANTED

Johnston Broadcasting Co., Birmingham, Ala.—Class B; 93.5 mc. (Channel No. 228); 40 KW; antenna 750 feet. (B3-PH-518)

Lee Broadcasting, Inc., Quincy, Ill.—Class B; 98.1 mc. (Channel No. 251); 33 KW; antenna 639 feet. (B4-PH-185)

WKY Radiophone Co., Oklahoma City, Okla.—Class B; 98.9 mc. (Channel No. 255); 152 KW; antenna 928 feet. (B3-PH-171)

Putnam Broadcasting Corp., Summerville, Pa.—Class B; 99.3 mc. (Channel No. 257); 3.4 KW; antenna 871 feet. (B2-PH-585)

TELEVISION APPLICATION GRANTED

NEW—Carter Publications, Inc., Fort Worth, Texas—Granted construction permit for new commercial television broadcast station to operate on Channel No. 5, 76-82 mc.; effective peak power radiated: 30.4 KW (visual and aural); effective antenna height above average terrain: 500 feet. (B3-PCT-172)

MISCELLANEOUS APPLICATIONS GRANTED

NEW—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted CP for a new experimental television broadcast station to operate on frequencies that may be assigned by the Chief Engineer from time to time; power 100 watts peak, video; 100 watts aural; omission A0, A3, A5 and special for FM and television. (B4-PV-109)

NEW—Cowles Broadcasting Co., Washington, D. C.—Granted CP for new developmental broadcast station to operate on frequencies that may be assigned by the Chief Engineer from time to time; 1 KW, special emission for facsimile. (B1-PEX-91)

DESIGNATED FOR HEARING

Interstate Radio, Inc., Moscow, Idaho; KRLC—H. E. Studtbecker, d/b as Station KRLC, Lewiston, Idaho—Designated for hearing application for new station to operate on 1340 kc, 250 watts, unlimited time; to be heard with application of H. E. Studtbecker to change assignment of Station KRLC from 1100 kc, 250 watts, unlimited, to 1350 kc, 1 KW, install directional antenna for nighttime, new transmitter and change transmitter location.

 Ft. Wayne Broadcasting Co., Inc., Ft. Wayne, Ind.—Designated for hearing application for new FM station, to be heard in consolidated proceeding with applications of Midwest FM Network et al. (Dockets 7053, 7054 and 7055); orders heretofore issued in these dockets to be amended to include the Ft. Wayne Broadcasting Co., Inc., application. (B4-PH-1004)

MISCELLANEOUS ACTIONS

The Commission on June 13, upon consideration of petitions to dismiss without prejudice applications of Westinghouse Radio Stations, Inc. (B2-PCT-73; Docket 7236), Seaboard Radio Broadcasting Corp. (B2-PCT-7289), and Pennsylvania Broadcasting Co. (B2-PCT-7297, Docket 7272), for television stations in Philadelphia, Pa., dismissed said applications without prejudice. At the same time, the Commission removed the applications of The Philadelphia Inquirer, a Division of Triangle Publications, Inc. (B2-PCT-73, Docket 7270), Philadelphia Daily News, Inc. (B2-PCT-119, Docket 7273), and William Penn Broadcasting Co. (B2-PCT-150, Docket 7274), from hearing docket, and cancelled hearing scheduled for June 17, 1946.

WJJD—WJJD, Inc., Chicago, Ill.—Granted modification of CP which authorized increase in power, etc., to install a new transmitter (RCA BTTA 50-F). (B4-MP-1915)

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Granted modification of CP which authorized increase in power, etc., to change type of transmitter. (B4-MP-1920)

KBV—Century Broadcasting Co., Corpus Christi, Texas—Granted special service authorization to operate on 1030 kc, 50 KW, non-directional antenna, daytime hours, for a period of six months.

Joseph M. Viana, Woonsocket, R. I.—Granted petition to dismiss without prejudice application for construction permit (B1-P-1984; Docket 7463). Associated Electronic Enterprises, Woonsocket, R. I.—On Commission's own motion, removed from hearing docket application for construction permit. (B1-P-111; Docket 6857)

WHNO—Henderson Radio Corp., Henderson, N. C.—Granted modification of construction permit for change in type of transmitter. (B3-MP-1947)

WAYN—Wayne M. Nelson, Rockingham, N. C.—Granted modification of construction permit for approval of antenna and approval of transmitter location. (B3-MP-1984)

KERO—J. E. Rodman, Bakersfield, Calif.—Granted modification of construction permit to change type of transmitter and make changes in ground system. (B3-MP-1932)

WMHC—The Elm City Broadcasting Corp., New Haven, Conn.—Granted CP to install a new transmitter. (B1-P-1984)

(Continued on next page)

JUNE 24, 1946—493
WHP-FM—WHP, Inc., Harrisburg, Pa.—Granted special temporary authority to operate a composite 250 watt FM transmitter with a single unit antenna on the Harrisburg Hotel, Harrisburg, Pa., on Channel #247, 97.3 mc., using special emission for FM, in order to make a regular program service immediately available in the Harrisburg area for the period June 17 and ending no later than Sept 14.

W3XUJ—Radio Corp. of America, Princeton, N. J.—Granted extension of special temporary authority to operate on old television channels 17 and 18 (282-291 mc.) with power of 5 KW (peak) in emission and special emission for FM, for the period June 20 to July 19, 1946, in order to conduct tests on television equipment.

Capitol Broadcasting Co., Inc., Raleigh, N. C.—Granted special temporary authority to operate a REL 518A-DL 1 KW transmitter on 95.3 mc. with REL for a period of 90 days from date of grant.

WWSR—William G. Ricker (deceased), (transferor); Ernest C. Perkins, Individually and as executor of the Estate of William G. Ricker, deceased (transferee) ; The Scranton Times (Co-Partnership), Elizabeth R. Lynett and Edw. J. Lynett, Jr. (Assignee), Scranton, Pa.—Granted involuntary assignment of license of station WWSR from The Scranton Times (Co-Partnership), Wm. R. Lynett, et al., (Assignor); The Scranton Times (Co-Partnership), Elizabeth R. Lynett and Edw. J. Lynett, Jr., to the Scranton Times (Co-Partnership), Elizabeth R. Lynett and Edward J. Lynett, Jr. No monetary consideration involved. (B2-AL-531)

WDEV—Lloyd E. Squier and William G. Ricker, d/b as Radio Station WDEV (assignor); Lloyd E. Squier, surviving partner of Radio Station WDEV and Ernest C. Perkins, executor of the Estate of William G. Ricker (deceased) (assignee), Waterbury, Conn.—Granted consent to acquisition of control of Vermont Radio Corp., Inc., licensee of Station WWSR, by involuntary transfer of shares of stock to Ernest C. Perkins, executor of the Estate of William G. Ricker (deceased); no monetary consideration. (B1-T-689)

WDEY—Lloyd E. Squier and William G. Ricker, d/b as Radio Station WDEY (assignor); Lloyd E. Squier, surviving partner of Radio Station WDEY and Ernest C. Perkins, executor of the Estate of William G. Ricker (deceased) (assignee), Waterbury, Conn.—Granted involuntary assignment of license of station WDEY from Lloyd E. Squier and William G. Ricker, d/b as Radio Station WDEY, to Lloyd E. Squier, surviving partner of Lloyd E. Squier and William G. Ricker, d/b as Radio Station WDEY, and Ernest G. Perkins, executor of the Estate of William G. Ricker, deceased. (B1-AL-532)

WIL—Missouri Broadcasting Co., St. Louis, Mo.—Adopted an order granting petition of WIL for reconsideration and hearing directed against the action of the Commission April 10, 1946, granting without hearing the application of Ulmo Broadcasting Corp., for a new station in Quincy, Ill. The action of April 10 was set aside and the application (B4-P-4460) of Ulmo Broadcasting Corp. to operate on 1320 kc., 250 watts, unlimited time, was designated for hearing and WIL made a party intervenor.

KTHS—Radio Broadcasting, Inc., West Memphis, Ark.—Denied petition of KTHS to enlarge issue No. 3 in the proceeding upon its application (B3-P-3814) to include determination of the service proposed by petition to the areas and populations which may be deprived of service from KTHS if its application to increase power and move station should be granted; ordered that the application of Radio Broadcasting, Inc., for a new station at Hot Springs, Ark. (B3-P-3915) to operate on 558 kc., 5 KW day, 1 KW night, be consolidated for hearing commencing June 25 with applications of KTHS (B3-P-3814, Docket 7086), W. Wright Esch, Daytona Beach, Fla. (Docket 7355) and Hot Springs Broadcasting Co., Hot Springs, Ark. (B3-P-1601)

Hot Springs Broadcasting Co., Hot Springs, Ark.—Upon consideration of a petition of Hot Springs Broadcasting Co. requesting that its application (B3-P-1601) be consolidated for hearing with applications of KTHS, et al., the Commission ordered that said application of Hot Springs Broadcasting Co. to operate on 1090 kc., with 50 KW power, daytime only, be designated for hearing in consolidation with applications of KTHS (Docket 7086); Radio Broadcasting, Inc. (Docket 3015) and W. Wright Esch. (Docket 7355)

McKeesport Radio Co., McKeesport, Pa.—Denied petition for review of the action of the presiding officer of the motions docket (Comr. Durr) on May 31, 1946, in denying petitioners request for leave to amend its application for CP (B2-P-4077), so as to request unlimited time instead of daytime only, and 5 KW instead of 1 KW, etc., and said action of the presiding officer be reversed.

WPIK—Potomac Broadcasting Corp., Alexandria, Va.—Granted CP to increase power from 250 watts to 1 KW, operating daytime on 730 kc., install a new transmitter and install new antenna coupling equipment and new remote reading antenna ammeter. (B2-P-4688)

National Association of Broadcasters—Granted request for extension of time for filing briefs and requests for oral argument in the matter of (Docket 7611), in re amendment to Sec. 3.407 of the Commission's Rules governing the announcement of Mechanical Records, and postponed the time to August 26, 1946.

American Broadcasting Co., Inc.—Granted application for a further extension of its permit under Sec. 325(b) of the Communications Act to use its studios and equipment located at 30 Rockefeller Plaza, New York City, and other studios throughout the U. S., where network programs may originate, for the production of programs for transmission to Canadian radio stations of the Canadian Broadcasting Corp. network.

Greater Huntington Radio Corp., Huntington, W. Va.—Granted petition insofar as it requests leave to amend application (B2-P-3823; Docket 6842), so as to specify frequency of 1590 kc., with 7 KW power, unlimited time, instead of 1150 kc., 250 watts, unlimited time, etc. The amendment was accepted and application removed from the hearing docket.

WAKR—Summit Radio Corp., Akron, Ohio.—Denied joint petition filed by WAKR, KVGB, Great Bend, Kans., Cummerock Broadcasting Co., Hot Springs, Ark., Texas, and Texas Broadcasters, Houston, Texas, to grant their applications without hearing, and ordered that the hearing on application of WAKR to revise its nighttime DA with which it is now operating on 1590 kc., scheduled for June 24, proceed as scheduled, and that an informal conference be held with the other three parties to discuss issues involved in their applications.

KOMA—KOMA, Inc., Oklahoma City, Okla.—The Commission on its own motion, ordered that the special temporary authorization for the continued operation of station KOMA be extended until September 1, 1946.

The Commission adopted an order in re applications of WBXK Broadcasting Co., et al. (Dockets 6053 et al.) for FM stations in the New York-New Jersey area, ordering that Sections 1.73 and 1.441 of the Commission's Rules of Practice and Procedure be waived for the purpose only of permitting amendments relating solely to additional data requested by the Commission in connection with the applications, to be filed directly with the presiding officer of the examiner hearing the applications and such amendments be authorized to accept for filing all such amendments which comply with Section 1.74 of the Commission's Rules, and where no objection thereto is made by any party; that in the event of objection by any party to such amendment, said presiding officer be directed to refer said amendment to the Commission for action by the motions Commissioner.

C.

License for the following Developmental Broadcast stations were further extended upon a temporary basis only, pending determination upon applications for renewals, for the period ending September 1, 1946:

New York Sun Broadcasting Co., Inc., New York, N. Y.—Granted petition to dismiss without prejudice application for FM station construction permit. (Docket 7223: B1-PH-618)

Dual Engineering Corp., Chicago, Ill.—Granted petition to dismiss without prejudice application for FM construction permit. (Docket 7223: B1-PH-618)

LCB, Inc., Lorain, Ohio—Granted petition for leave to amend application (B1-P-4636: Docket 7496) so as to make minor changes re stockholders; accepted amendment filed with petition.

Globe-Democrat Publishing Co., St. Louis, Mo.—Granted petition for leave to amend application for FM construction permit (B1-PH-110; Docket 7539), so as to supply current engineering data; accepted amendment filed with application.

Pawtucket Broadcast Co., Pawtucket, R. I.—Granted petition for leave to amend application for FM construction permit (B1-PH-266) so as to add additional engineering report designed to correct minor arithmetical defects in engineering report previously filed; accepted amendment filed with petition.

Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—Granted petition for leave to amend application (B1-P-4528: Docket 7431) so as to extend frequency 710 kc. daytime only, instead of 1340 kc., unlimited time, and make other changes; accepted amendment filed with petition; removed application from hearing docketch.

North Jersey Radio, Inc., Newark, N. J.—Granted petition for leave to amend application for FM station (B1-PH-358: Docket 7230) so as to show substitution of Edward W. Scarber, Jr., for Edward A. Poote as President and a director of corporation; make other changes; accepted amendment filed with petition. Granted same, for application for construction permit for standard station. (B1-P-4306: Docket 7570)

Raytheon Manufacturing Co., New York, N. Y.—Granted petition to dismiss without prejudice application for television construction permit. (B1-PH-85) (Continued on next page)

JUNE 24, 1946 — 495
Skyland Broadcasting Corp., Dayton, Ohio—Granted petition to reopen record in the hearing upon applications of Skyland Broadcasting Corp., Dayton, Ohio (Docket 7345); Ohio-Michigan Broadcasting Corp., Toledo, Ohio (Docket 7346); and WTOL, Toledo, Ohio (Docket 7355), for the purpose of receiving into the record a stipulation regarding the technical and legal qualifications of certain of petitioner's minority stockholders.

The Yankee Network, Inc., Providence, R. I.—Granted petition for leave to amend application for FM construction permit (B1-PH-582; Docket 7027), so as to supply additional engineering information and make changes to reflect the additional data; accepted amendment filed with petition.

Evangelical Lutheran Synod of Missouri, Ohio and Other States, Clayton, Mo.—Granted petition for leave to amend application for FM construction permit (B4-PH-402; Docket 7624), so as to specify 30 KW instead of 3 KW, and make other changes; accepted amendment filed with petition.

Summit Radio Corp., Akron, Ohio—Granted petition for leave to amend application for construction permit (B2-P-3834; Docket 7214) so as to specify 5 KW power, unlimited time, with directional antenna night, instead of 1 KW, unlimited time, and make other changes; accepted amendment filed with petition.

Caprock Broadcasting Co., Lubbock, Texas—Granted petition for leave to amend application for construction permit (B3-P-4090; Docket 6810), so as to specify a modified directional antenna design at such time as it may file a proper amendment and the necessary accompanying engineering report.

WBNX Broadcasting Co., Inc., New York, N. Y.—Granted petition to amend application for leave to amend application for television construction permit (B4-P-3611; Docket 6510), so as to show current information regarding officers and directors of corporation; revised engineering data, and to set a date for further hearing; accepted amendment filed with petition.

E. E. Murray, et al., d/b as Tennessee Broadcasters, Nashville, Tenn.—Granted petition for leave to amend application for construction permit (B3-P-4438; Docket 7585) so as to show the deletion of Howard Barrett and Bruce B. Meader as officers, directors and stockholders of corporation, and to make other changes; accepted amendment filed with petition.

Chester E. Daly, Cleveland, Ohio—Granted petition for leave to amend application for construction permit (B2-P-3964; Docket 7175) so as to change the status of applicant from an individual to a corporation; accepted amendment filed with petition.

WISX—Heard Radio, Inc., Milwaukee, Wis.—Dismissed petition for leave to intervene in consolidated hearing in Dockets 6824, 7356, 7357, 7400.

Scheduled hearing for July 18, 1946, upon applications of KITN, Inc. (Docket 7385; B3-P-6535), and W. Albert Lee (Docket 7559; B3-P-4682), Houston, Texas, to be heard in consolidated hearing.

On Commission's own motion, continued hearing from July 1 to July 8, in re applications for FM stations in New York City area.

On Commission's own motion, continued further consolidated hearing from June 18 to August 5, 1946, in re Missionary Society of St. Paul the Apostle (Docket 7316), and WNEX (Dockets 7317 and 7318), New York, N. Y.

On Commission's own motion, continued hearing in re WAKR (Docket 7214), Akron, Ohio, from June 17 to June 24, 1946.

On Commission's own motion, continued hearing in re applications of Don Lee Broadcasting System (Dockets 7398, 7399, 7615 and 7616) to October 7, 1946.

**FCC APPLICATIONS**

**AM APPLICATIONS ACCEPTED FOR FILING**

**590 Kilocycles**

**KTRC—Claudia T. Johnson, Austin, Texas—License to cover construction permit (B3-P-3885) which authorized increase in power, installation of new transmitter and directional antenna for night use and move of transmitter.**

**KTTC—Claudia T. Johnson, Austin, Texas—Authority to determine operating power by direct measurement of antenna power.**

**NEW—Liberty Broadcasting Corp., Rochester, N. Y. (P. O. Box 1082, Munsey Bldg., Washington, D. C.)—Construction permit for a new standard broadcast station to be operated on 590 kc., power 5 KW, directional antenna day and night use and unlimited hours of operation.**

(Continued on next page)
NEW—WGBG—Greensboro Broadcasting Co., Greensboro, N. C.—Construction permit to change frequency from 1230 to 590 kc., power 250 watts to 1KW, install new transmitter and directional antenna for night use, and change transmitter location.

620 Kilocycles

NEW—Stanley S. Beaulaire & W. Keith Topping, d/d as Hanford Publishing Co., Hanford, Calif. (P. O. 225 West 7th St.)—Construction permit for a new standard broadcast station to be operated on 620 kc., power 1 KW, directional antenna for night use and unlimited hours of operation.

640 Kilocycles

NEW—Liberty Broadcasting Corp., Rochester, N. Y.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power 5 KW, directional antenna for day and night use and unlimited hours of operation. Amended: to change frequency from 590 kc. to 610 kc., and change hours of operation from unlimited to limited time.

650 Kilocycles

NEW—Bay Broadcasting Co., Goose Creek, Texas (P. O. Box 622)—Construction permit for a new standard broadcast station to be operated on 650 kc., power 250 watts and daytime hours of operation.

690 Kilocycles

NEW—Appalachian Broadcasting Corp., Bristol, Va.—Construction permit for a new standard broadcast station to be operated on 1140 kc., power 250 watts and unlimited hours of operation. Amended: to change frequency from 1400 to 690 kc., power from 250 watts to 1 KW, hours of operation from unlimited time to daytime only and change type of transmitter.

710 Kilocycles

NEW—Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power 250 watts and unlimited hours of operation. Amended: to change frequency from 1340 to 710 kc., change hours of operation from unlimited to daytime and make changes in vertical antenna.

740 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, Puerto Rico—Construction permit to change frequency from 620 to 740 kc., power from 5 KW to 10 KW, make changes in transmitting equipment, and install directional antenna for day and night use.

960 Kilocycles

NEW—Radio Phoenix, Inc., Phoenix, Ariz. (P. O. 128 North First Ave.)—Construction permit for a new standard broadcast station to be operated on 960 kc., power 5 KW, directional antenna for night use, and unlimited hours of operation.

980 Kilocycles

WGBG—Greensboro Broadcasting Co., Greensboro, N. C.—Acquisition of control of licensee corporation by Ralph M. Lambeth through transfer of 150 shares of common stock (60%) from James E. Lambeth, Helen M. Lambeth and Frank S. Lambeth.

1040 Kilocycles

NEW—LCB, Inc., Lorain, Ohio—Construction permit for a new standard broadcast station to be operated on 1040 kc., power 1 KW, and daytime only hours of operation. Amended: re stockholders and to change type of transmitter.

1050 Kilocycles

NEW—Rainier Broadcasting Co., Inc., Seattle, Wash. (P. O. 961 Stuart Bldg.)—Construction permit for a new standard broadcast station to be operated on 1050 kc., power 50 KW, directional antenna day and night use and unlimited hours of operation.

1150 Kilocycles

NEW—WOOP, Inc., Dayton, Ohio—Construction permit for a new standard broadcast station to be operated on 1150 kc., power 5 KW day and night and unlimited hours of operation. Amended to change power from 5 KW day and night to 1 KW, 5 KW day and make changes in directional antenna.

1230 Kilocycles

WPUS—Howard R. Imboden, tr/as Southwest Broadcasting Co., Pula, Va.—License to cover construction permit (B2-P-3346 as modified) which authorized a new standard broadcast station. (1230 kc.)

WPUS—Howard R. Imboden, tr/as Southwest Broadcasting Co., Pula, Va.—Authority to determine operating power by direct measurement of antenna power. (1230 kc.)

WPUS—Howard R. Imboden, tr/as Southwest Broadcasting Co., Pula, Va.—Modification of construction permit (B2-P-3346, which authorized a new standard broadcast station) to change studio location. (1230 kc.)

WOLS—Florence Broadcasting Co., Inc., Florence, S. C.—Authority to make changes in automatic frequency control unit. (1230 kc.)

NEW—Pueblo Radio Co., Inc., Pueblo, Colo.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts and unlimited hours of operation. Amended re stockholders.

KXLQ—Capitol Broadcasting Co., Lewiston, Mont.—Modification of construction permit (B5-P-4475, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter location.

WJOH—O. E. Richardson, Fred L. Adair and Robert C. Adair, d/b/a Radio Station WJOH, Hammond, Ind.—Voluntary assignment of license to South Shore Broadcasting Corporation.

KRES—Missouri Valley Broadcasting Corp., St. Joseph, Mo.—License to cover construction permit (B4-P-1402) which authorized a new standard broadcast station, and to specify studio location as 113 South 7th Street, St. Joseph, Mo.

KRES—Missouri Valley Broadcasting Corp., St. Joseph, Mo.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

WBIR—Radio Station WBIR, Inc., Knoxville, Tenn.—Construction permit to install new vertical antenna and ground system and change transmitter location.

KICA—Hugh DeWitt Landis, Covis, N. M.—Authority to make changes in automatic frequency control unit.

WIBU—Wm. C. Forrest, Puyallup, Wash.—License to cover construction permit (B2-P-3676) which authorized installation of new antenna and changes in ground system.

WIBU—Wm. C. Forrest, Payette, Wis.—Authority to determine operating power by direct measurement of antenna power.

(Continued on next page)
1270 Kilocycles

KIOX—Bay City Broadcasting Co., a partnership consisting of J. A. Clements, T. C. Dodd and John George Long, Bay City, Texas.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power 250 watts and unlimited hours of operation. Amended: to show correct type of transmitter.

NEW—Ingham S. Roberts, Joe N. Weatherby, B. P. Bludworth, J. Edward Johnson, a Partnership, d/b as Westex Broadcasting Co., San Angelo, Texas.—Modification of construction permit for a new standard broadcast station to be operated on 1340 kc., power 250 watts and unlimited hours of operation. Amended: to show additional partners, Travis E. Baker and Armistead D. Rust.

1340 Kilocycles

WJPR—Thomas Henry Golding, Sr., Thomas Henry Golding, Jr., Enmet Holmes McMurry, Jr., and Frank Wilson Baldwin, a partnership, d/b as Radio Services Co., Greenville, Miss.—Construction permit to install a new transmitter.

NEW—Citizens Broadcasting Co., Abilene, Texas.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power 250 watts and unlimited hours of operation. Amended: re stockholders.

NEW—Ingham S. Roberts, Joe N. Weatherby, B. P. Bludworth, J. Edward Johnson, a Partnership, d/b as Westex Broadcasting Co., San Angelo, Texas.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power 250 watts and unlimited hours of operation. Amended: to show additional partners, Travis E. Baker and Armistead D. Rust.

1430 Kilocycles

NEW—North Jersey Radio, Inc., Newark, N. J.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power 5 KW, directional antenna for night use and unlimited hours of operation. Amended: to re officers and directors.

1450 Kilocycles

NEW—Edward J. Jansen, Jessica L. Longston, C. V. Zaser and L. Berenice Brownlow, d/b as Columbia Basin Broadcasters, Moses Lake, Wash. (P. O. Temp. c/o Edward J. Jansen, 1702 N. Prospect, Tacoma, Wash.)—Construction permit for a new standard broadcast station to be operated on 1550 kc., power 250 watts and unlimited hours of operation. Amended: to show correct type of transmitter.

WLR—Lowell F. Arterburn, Jr., as Athens Broadcasting Co., Athens, Tenn.—License to cover construction permit (13-P-3929, which authorized a new standard broadcast station) to change frequency from 1110 to 1230 kc., power 250 watts and unlimited hours of operation. Amended: to show correct type of transmitter.

KQEA—Rio Grande Broadcasting Co., Inc., Albuquerque, N. M.—Modification of construction permit (B3-P-4573, which authorized a new standard broadcast station) to change frequency from 1200 to 1470 kc., power 250 watts and unlimited hours of operation. Amended: to show correct type of transmitter.

WSAR—The Fall River Broadcasting Co., Inc., Fall River, Mass.—Construction permit to change frequency from 1480 to 1470 kc., power from 1 to 5 KW, install new transmitter and directional antenna for night use and change transmitter location from South Somerset, Mass., to Portsmouth, R. I. Amended: to change requested frequency from 1470 to 1480 kc., make changes in directional antenna for day and night use and change transmitter location from Portsmouth, R. I., to Somerset Township, Mass.

1560 Kilocycles

KWCO—Washita Valley Broadcasting Corp., Chickasha, Okla.—Modification of construction permit (13-P-4573, which authorized a new standard broadcast station) for approval of antenna and approval of new transmitter location.

1590 Kilocycles

KVGK—KVGB, Inc., Great Bend, Kan.—Construction permit to change frequency from 1430 to 1590 kc., to increase power from 250 watts to 1 KW, and install new transmitter. Amended: to increase power from 1 to 5 KW, change type of transmitter, install new directional antenna for night use, and change transmitter location.

WAKR—Summit Radio Corp., Akron, Ohio.—Construction permit to make changes in directional antenna for night use and make changes in ground system. (1590 kc.) Amended: to show correct type of transmitter.

FM APPLICATIONS ACCEPTED FOR FILING

The Outlet Co., Providence, R. I.—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage of 7,200 square miles. Amended: to show correct type of transmitter.

Fort Wayne Broadcasting, Inc., Fort Wayne, Ind. (P. O. 525 Lincoln Tower Building)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #35S, 95.5 mc., with coverage of 13,700 square miles.

Variety Broadcasting Co., Inc., Dallas, Texas (P. O. 2401 South Boulevard)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage of 10,600 square miles.

Review Publishing Co., Alliance, Ohio—Modification of construction permit (B2-P-475 which authorized a FM Metropolitan broadcast station), to change class of station to Community, and specify a frequency of 101.5 mc., Channel #263; type of transmitter, studio and station location and changes in antenna system.

Evangelical Lutheran Synod of Missouri, Ohio, and Other States, Clayton, Mo.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage 9,600 square miles. Amended to change type of transmitter, (Continued on next page)
coverage from 9,600 to 14,000 square miles, population from 1,703,827 to 1,553,200; and makes changes in antenna system.

Pawtucket Broadcasting Co., Pawtucket, R. I.—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage of 8,500 square miles. Amended to make minor corrections in engineer report.

North Jersey Radio, Inc., Newark, N. J.—Construction permit for a new high frequency FM broadcast station to be operated on +98 mc., coverage 8,150 square miles. Amended to change officers and directors.

Brooklyn Broadcasting Service, Inc., Brooklyn, N. Y. (P. O. Box 1340 East 23rd St.),—Construction permit for new FM (Community) broadcast station to be operated on frequency to be assigned by FCC.

TELEVISION APPLICATIONS ACCEPTED FOR FILING

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

W6XLA—Television Productions, Inc., Los Angeles, Calif.—License to cover construction permit (15-PVB-102) which authorized change in frequency, transmitter and emission. (180-508 mc.)

W6XLY—Television Productions, Inc., Los Angeles, Calif.—License to cover construction permit (15-PVB-101) which authorized a change in transmitter site and emission. (75-92 mc.)

WGK—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Acquisition of control of licensee corporation through purchase of 125 shares of common stock (56%) by R. M. Venable from E. R. Custer and Floyd E. Price.

KUTI—Frank C. Carman, David G. Smith, Jack L. Powers and Grant R. Wrathall, d/b as Utah Broadcasting and Television Co., Area of Salt Lake City, Utah.—License to cover construction permit (15-PRE-432) which authorized a new relay broadcast station.

KSLR—Frank C. Carman, David G. Smith, Jack L. Powers and Grant R. Wrathall, d/b as Utah Broadcasting and Television Co., Area of Salt Lake City, Utah.—License to cover construction permit (15-PBY-305) which authorized a new relay broadcast station.

WLST — Loyola University, New Orleans, La.—License to cover construction permit (15-PBY-333) which authorized a new relay broadcast station.

APPLICATIONS TENDERED FOR FILING

NEW—Richard E. Adams, Janie H. Shoemaker and Albert A. Anderson, d/b as Suburban Broadcasting Co., Framingham, Mass.—Construction permit for a new standard broadcast station to be operated on 1130 kc., power 1 kW and daytime hours of operation.

NEW—Triangle Broadcasting Associates, Inc., Hackensack, N. J.—Construction permit for a new standard broadcast station to be operated on 1130 kc., power 250 watts and unlimited hours of operation.

NEW—Fayetteville Broadcasters, Inc., Fayetteville, N. C.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power 250 watts, and unlimited hours of operation.

NEW—Elias I. Godofsky, Hempstead, N. Y.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power 100 watts and daytime hours of operation.

NEW—Eugene E. Stone, Florence, S. C.—Construction permit to change power from 100 watts to 250 watts and daytime hours of operation.

NEW—Friends of Hale and Brady Mupleps, a partnership, d/b as “McMa Agency.” (1400 kc.)

WMLT—George T. Morris, tr/as Dublin Broadcasting Co., Dublin, Ga.—Consent to assignment of license of standard station WMLT and conditional FM grant to Dublin Broadcasting Co. (1310 kc.)

NEW—Dean Covington, J. W. Tromerhauser, and Edward Nixon McKay, a partnership, d/b as Coosa Valley Radio Co., In or near Rome, Ga.—Construction permit for a new standard broadcast station to be operated on 710 kc., power 1 kW, daytime hours of operation.

NEW—Ray E. Yaggi, L. B. Horton, L. B. Horton, Jr., and Virginia Ede Carswell, d/b as The Concho Valley Broadcasting Co., San Angelo, Texas—Construction permit for a new standard broadcast station to be operated on 1300 kc., power of 250 watts and unlimited hours of operation.

NEW—Iwawins Broadcasting Co., Rawlins, Wyo.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts and unlimited hours of operation.

NEW—Lewis C. Tierney, Helen S. Tierney and Albert S. Koonen, Jr., d/b as Westminster Broadcasting Co., Princeton, W. Va.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power 250 watts and unlimited hours of operation.

WTAL—Capital City Broadcasting Corp., Tallahassee, Fla.—Construction permit to change frequency from 1340 to 1270 kc., power from 250 watts to 5 KW, install directional antenna for night use, new transmitter and change transmitter location.

NEW—Elden Ridge and Hadley Hayes, d/b as Carolina-Northwest Broadcasting Co., North Wilkesboro, N. C.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power 250 watts and unlimited hours of operation.

NEW—Eugene E. Stone, Florence, S. C.—Construction permit for a new standard broadcast station to be operated on 1320 kc., power 250 watts and unlimited hours of operation.

NEW—Alfred Achilles Coreangis, Mineral Wells, Texas—Construction permit for a new standard broadcast station to be operated on 1130 kc., power 250 watts and daytime hours of operation.

NEW—Mohave Valley Broadcasting Co., a partnership of William T. Brown, Burton C. Boatright and Robert E. Reno, Barstow, Calif.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts and unlimited hours of operation.

(Continued on next page)
NEW—Bruno Shaw, New York, N. Y.—Construction permit for a new standard broadcast station to be operated on 620 kc., power not specified and unlimited hours of operation.

KSAC—Kansas State College of Agriculture and Applied Science, Manhattan, Kans.—Construction permit to change power from 500 watts-1 KW-LS to 500 watts-5 KW-LS, install new transmitter and change transmitter location. (580 kc.)

NEW—Intermountain Broadcasting Co., Inc., Albuquerque, N. Mex.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power 250 watts and unlimited hours of operation.

NEW—Theodore Granik, Washington, D. C.—Construction permit for a new standard broadcast station to be operated on 890 kc., power 5 KW, and daytime hours of operation.

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Construction permit to change frequency from 1340 to 790 kc., power from 250 watts to 5 KW, install transmitter, change transmitter location, install directional antenna for night use.

Federal Trade Commission
Actions

COMPLAINTS

Excellex Co.—The Commission has issued a complaint charging Arthur E. Weisberg, trading as Excellex Co., 1100 Vincent Avenue, North, Minneapolis, with disseminating false advertisements in connection with the sale of a medicinal preparation designated XLX Vita-Grey Tablets, which he advertises under the slogan “Banish Gray Hair the Vitamin Way.” (5445)

Jacques Kreisler Manufacturing Corp., manufacturer of jewelry at North Bergen, N. J., and its officers, Jacques Kreisler and Tobias Stern, are charged in a Commission complaint with violation of the Robinson-Patman Anti-discrimination Act by selling jewelry to some purchasers at prices lower than those they allow other purchasers competitively engaged with the favored customers. (5446)

Lusterman, Seldis Co.—Isidore Lusterman and Edward E. Seldis, trading as Lusterman, Seldis Co., 5 West 35th Street, New York, engaged in the sale and distribution of umbrellas, are charged in a Commission complaint with deceiving purchasers as to the true fiber content of their products. (5443)

CEASE AND DESIST ORDER

Union Fishermen’s Co-Operative Packing Co.—An order directed against violation of the brokerage section of the Robinson-Patman Act in connection with the interstate sale of sea food products has been issued by the Commission against Union Fishermen’s Co-Operative Packing Co., Astoria, Oreg. (5420)

STIPULATIONS

Tawnlee Hats, Inc., and Herman E. Nelson and Nathan Rappeport, 150 Golden Street, Jersey City, stipulated with the Federal Trade Commission that in connection with the sale of women’s hats they will stop representing in any manner that hats made in whole or in part from old, used or secondhand materials are new or are made of new materials. (4160)

Triana Hats, Inc., 1049 Sixth Avenue, New York, and Herbert Schorr and Hannah Schorr, who manage the corporation’s business, entered into a stipulation with the Commission to cease and desist from representing in any manner that women’s hats made in whole or in part from old, used or secondhand materials are new or are made of new materials. The individual respondents also are co-partners who trade as Jolie Hat Co. and as Herbert Schorr. (4161)

FTC COMPLAINT DISMISSED

The Commission has dismissed without prejudice a complaint charging Leo H. Heller, Michael Heller and Harry Hindleman, trading as Associated Tailors and Associated Denver Tailors, Denver, Colorado, with misrepresentation in the sale of men’s clothing.

All of the Commissioners participated in the decision.

FTC CASES CLOSED

The Commission has closed without prejudice the case growing out of its complaint against Mrs. Kate Henderson and Mrs. Nora G. Neal, trading as John C. Johnson Co., and Dr. Thomas V. Neal. They had been charged with misrepresentation in the sale of ironware cooking utensils.

The case was closed because the respondents have discontinued the business in which they were engaged at Birmingham, Ala., and there is no evidence that they intend to resume it.

All of the Commissioners participated in the decision.

The Commission has issued an order also closing without prejudice the case growing out of its complaint charging W. S. Roberts, trading as Health Brands, with misrepresentation of medicinal products and cosmetics.

Closing of the case was ordered because the respondent has discontinued the business he formerly engaged in at 455 West 45th Street, New York, and there is no likelihood he will resume it.

All of the Commissioners participated in the decision.
**FM COMMITTEE FEELS CHANNEL WITHHOLDING WOULD RETARD RAPID DEVELOPMENT**

Expressing the view that reservation of channels would retard the development of FM broadcasting, the FM Executive Committee last week addressed a resolution to the Board of Directors recommending that NAB oppose the withholding by the FCC of any channels already allocated and again suggest to the commission that sufficient channels be made available to accommodate all qualified applicants.

The committee met in New York City Tuesday and Wednesday (25 and 26) and discussed the recently proposed order of the FCC which would withhold for a period of one year every fifth FM channel previously indicated as available to a given locality.

The resolution, which the committee urged the board to ratify requests that NAB counsel appear at oral argument on the proposed rule which is to be held before the commission July 12th.

The resolution reads as follows:

"Resolved that:

"NAB Counsel be authorized and directed to file a brief and appear at oral argument in FCC Document No. 6768. [Proposed Reservation Rule]

"The Committee recommends that he reiterate the position of NAB that provision should be made for sufficient channels to accommodate all qualified applicants,

"and that he oppose the withholding of any channels from those already allocated,

"and that he urge the Commission to indicate at this time a specified portion of the spectrum for future allocation to FM broadcasting for the further development of this service.

"The Committee disagrees with the Commission that the objectives of Section 307(b) can best be served by a new temporary procedure announced by the FCC.

"James L. Middlebrooks is the new NAB director of engineering. He comes from Field Enterprises, Inc., and reports at NAB today. (p. 504)

"Suit has been filed by Mester Brothers asking that FCC decision denying their purchase of controlling stock in WOV, N. Y., be set aside. (p. 503)

"Agency preference for purchasing time on small market stations by groups is further documented this week by the Small Markets Division. (p. 504)

"Pledge of full support of AWD in the famine emergency drive was received by former President Herbert Hoover at the White House last week. (p. 508)

"Secretary Wallace is quoted as saying "we may be facing control of the press and radio." (p. 502)

**INFORMATION MEDIA MUST NOT BE DIVIDED AND THUS CONQUERED, JUDGE MILLER TELLS PAA**

Speaking at the annual convention of the Pacific Advertising Association at Spokane last Tuesday (25), President Justin Miller related international postwar problems, particularly restrictions upon freedom of communication, to certain current difficulties within the United States, including efforts to curb the freedom of radio.

After discussing the Russian psychology which leads to acceptance of the "Iron Curtain" principle and the natural American antipathy to restrictions upon the movement of ideas, Judge Miller pointed out, "The paradox is that we should be championing complete freedom of communication in the rest of the world, while there is a concerted and widespread movement under way to put communications under government control in our own country."

With specific reference to the control of radio broadcasting, he said, "The Federal Communications Commission has already moved in for that purpose."

Concerning the FCC report on programming, Judge Miller acknowledged, "There is much to be done by broadcasters and by advertisers to improve the character and content of programs. That is the American way. Perhaps we need the goad of criticism to get us into action. But it is one thing to admit error and seek improvement. It is quite another to lie down and let government walk over us and over the rights of our people."

The NAB president drew particular attention to the efforts of certain people to "divide us and by so doing to conquer." These critics, he said, would establish differences between information media to make the freedom of speech and freedom of press provisions of the Constitution inapplicable to radio broadcasting.

"Of course, it is different," he said, "if that is all we need to destroy free communication. But so is...

(Continued on next page)
the present printing plant vastly different from the little print shop of early America where type was set by hand, the newspaper was printed on a hand press and delivery was made by a man on foot or on horseback.

"The difference between radio broadcasting of the human voice and projecting it from a speaker's platform is one merely of degree; a mechanical difference which has progressed from the megaphone, to the telephone, to the amplifier and finally to the radio. It is vastly more effective and vastly more important in human affairs."

Judge Miller saw a diminishing difference even in the mechanical aspects of the press and radio. "The difference between the press and the radio may be reduced to a minimum in some of these days when the process of facsimile is developed to the point where a newspaper may actually be printed in each home by a gadget attached to your radio. If in the meantime the champions of a free press have conceded that there is a difference, and a difference which justifies government control, then where will freedom of the press be?"

"Nature Abhors a Vacuum"

Concluding his address Judge Miller cautioned, "If those who do not believe in communism or other forms of totalitarianism are not constantly alert to protect the form of government which has been given to us, and which guarantees freedom of religion, freedom of speech, freedom of the press, freedom of assembly and the other rights named in our Constitution, then just as surely as we are meeting in this room, the folks who do not believe as we do will move in. Nature abhors a vacuum. The squatter loves an unoccupied piece of property. The political opportunist takes over where the sleepy citizen nods."

On the preceding day Judge Miller spoke to a special session of the 17th NAB District at Portland, Oregon.

FM COMMITTEE FEELS CHANNEL WITHHOLDING WOULD RETARD RAPID DEVELOPMENT

(Continued from page 501)

for FM use and the Committee is strongly of the opinion that reservation of channels at this time will obstruct the speedy development of FM broadcasting and therefore recommends that the Commission at this time designate such additional channels either as a result of a commission hearing or by its own action.

"Such action by the Commission would assure equitable distribution of service to the listening public as to territory covered and would provide facilities for both present and future applicants and would contribute to the sound development of FM broadcasting."

ADVISORY COUNCIL FOR MOVIE ON RADIO

Six west coast broadcasters were invited last week by the NAB Board of Directors to serve as an advisory committee to an independent producer who is planning a motion picture based on the history of the broadcasting industry.

Radio executives asked to serve on the committee are William B. Ryan, KFI, Los Angeles, chairman; Donald W. Thornburgh, CBS, Los Angeles; Lewis Allen Weiss, KHJ, Los Angeles; Sidney N. Strotz, NBC, Hollywood; Don Searle, ABC, Hollywood; and Calvin J. Smith, KFAC, Los Angeles.

The radio representatives will serve as an advisory group to Jerrold T. Brandt, independent movie producer, in the enterprise. Working title for the production is "Magic in the Air."

WALLACE MENTIONS CONTROL OF RADIO

Secretary of Commerce made an impromptu speech Thursday (27) at the School of Political Action Techniques being held in Washington and, according to the Washington Evening Star, told the group it is "conceivable that we may be facing control of the press and radio."

The Star added: Asked later to expand his remarks about a controlled press, Mr. Wallace said only: "It won't be under a Democratic administration."

LEGAL DEPARTMENT

COMMISSION ANNOUNCES TEMPORARY PROCEDURE PERMITTING WAIVER OF HEARINGS

To expedite disposition of applications, the FCC announced Monday (24) a procedure to permit applicants to waive hearings, and to request the commission to base its decisions on information contained in applications and other material filed by applicants.

The new procedure, adopted temporarily by the FCC, is as follows:

In the case of any applications which are designated in the future for hearing, or of any applications which have already been designated for hearing but no hearing has yet been held, the parties may request the Commission to waive a hearing and to grant or deny the applications upon the basis of the information contained in the applications and

(Continued on next page)
other papers on file with the Commission pertaining to the applicants or applications. Any party desiring to waive a hearing in accordance with this procedure should execute and file with the Commission a waiver on the form reprinted below and serve copies on all other parties or a joint waiver may be signed by all the parties. Upon the receipt of waivers from all the parties to a proceeding, the Commission will decide whether the case is an appropriate one for determination without a hearing. If it is determined by the Commission that notherwithstanding the waiver, a hearing is necessary, the case will be continued on the hearing docket. If the Commission concludes that the case can appropriately be decided without a hearing, the case will be removed from the hearing docket.

In all cases which are removed from the hearing docket in accordance with this procedure, the Commission will be free to proceed to decide the case upon the basis of the information contained in the applications and in any other papers on file with the Commission which pertain to the applicants or applications in question, including any protests filed at any time prior to final decision. The Commission reserves the right to call upon any party to furnish any additional information which the Commission deems necessary to a proper decision. Such information shall be served upon opposing parties [by the applicant called on]. This procedure does not in any way change the Commission's practice with respect to protests. Any party, or any member of the public, may still file with the Commission any information concerning an applicant which bears upon his qualifications to operate a station in the public interest. Where such protest raises a question of substance which might affect the granting of the application a hearing will generally be required. If the protest is not of any substance the Commission may proceed to act upon the application without hearing.

In all cases where the Commission issues a final decision pursuant to this procedure without holding a hearing a brief memorandum opinion will be issued by the Commission stating its reasons for its grant or denial of the individual applications. This decision shall have the same effect as a final decision under the Commission's Rules and Regulations. Petitions for rehearing may be filed with respect to such decision; that such decision shall have the same force and effect as though made after a hearing; and that any petition for rehearing filed with respect to such decision will be granted only upon a showing that the Commission has made an erroneous determination on a relevant and material issue of fact or law or that relevant and material evidence has been newly discovered which could not have been discovered at an earlier date with the exercise of due diligence.

The Commission does not construe this procedure as involving any waiver by the parties of the right to appeal to the Courts from any adverse final decision of the Commission.

WAIVER OF HEARING

NAME OF APPLICANT ..................................................

CALL LETTERS ..........................................................

DOCKET NO. ............................................................

The undersigned hereby waives its (their) right to a hearing in the above-entitled docket case and in all other docket cases which have been consolidated for hearing with such case and requests the Commission to decide said case or cases upon the basis of the information contained in the applications and

in any other papers on file with the Commission pertaining to the applicants or applications in question. It is expressly understood that the Commission may render a final decision based upon such information or such additional information as the Commission may request from any party at any time before such decision; that such decision shall have the same force and effect as though made after a hearing; and that any petition for rehearing filed with respect to such decision will be granted only upon a showing that the Commission has made an erroneous determination on a relevant and material issue of fact or law or that relevant and material evidence has been newly discovered which could not have been discovered at an earlier date with the exercise of due diligence.

COPYRIGHT CONFERENCE PROPOSES NEW AGREEMENT

Mailed with this issue of REPORTS is an Information Bulletin giving the text of a proposed new agreement which resulted from the meeting of the Inter-American Conference on Copyright in Washington June 1 to 22. A summary of several points covered in the conference is included in the Information Bulletin.

MESTER BROTHERS BRING SUIT TO SET ASIDE WOV TRANSFER DECISION

Suit has been started in the United States District Court in Brooklyn, N. Y., by Murray and Meyer Mester to set aside the FCC ruling of March 5, which denied their proposed purchase of Station WOV. The FCC decision said that the transfer of control would not serve the public interest. (Current REPORTS, p. 179)

The civil action charges that the FCC is exercising power beyond its authority in denying the transfer.

The brothers, partners in the Balbo Oil Company of New York, charge that the FCC's decision deprives

(Continued on next page)
them of liberty and property without due process of law and abridges their freedom of speech.

The Mesters say that the FCC has no power to deny the sale on the ground that the prospective purchasers had been involved in litigation with other government departments through their holdings in the Balbo Oil Company.

**Engineering**

**JAMES MIDDLEBROOKS NAMED NAB ENGINEERING DIRECTOR**

The appointment of James L. Middlebrooks to be director of engineering for NAB was announced Friday (28) by A. D. Willard, Jr., executive vice president. He reports to the NAB in Washington today (1).

Mr. Middlebrooks comes to NAB from Field Enterprises, Inc., Chicago, where he was engineering director. Prior to his association with Field Enterprises, he served for three years in the United States Navy, holding the rank of Commander upon his relief from active duty.

For a number of years before entering the naval service, the new NAB Director of Engineering was in charge of construction for the General Engineering Department of the Columbia Broadcasting System.

A graduate in electrical engineering from Alabama Polytechnic Institute, Auburn, Ala., Mr. Middlebrooks is a native of Birmingham, Alabama. He began his career by building the University of Alabama's radio station WAPI in Birmingham.

Mr. Middlebrooks' duties in the past have carried him into all of the 48 states and into most foreign countries. He has been a close student of both domestic and international radio broadcasting for many years.

**Small Market Stations**

**HENRI, HURST & MCDONALD APPRAISES GROUP SELLING**

The grouping of small stations into regional networks is looked on favorably by national advertising agencies. At the request of NAB Small Market Stations Division, William E. Jones, radio director, Henri, Hurst & McDonald, Inc., reports his views and experiences with grouped stations. The agency has been using small regional groups with considerable success; preference for the small stations was, states Mr. Jones, “because we felt that their penetration of the market was greater, and that individually each station was doing an excellent job in its own community.

“In our opinion these are the vital factors which a station must have in mind to successfully solicit national business on a regional basis: (1) Predomi-

(Continued on next page)

WRC AND KXOK SHOWCASE THEIR EARLY MORNING PROGRAMS FOR NAB STUDY

Sound formats and profitable ideas are resulting from the NAB study of the early morning show (see REPORTS, page 486). Programs with many years of success on large stations in the competitive, metropolitan markets are viewed with keen interest by station management throughout the nation.

The three hour, early morning program of WRC, NBC station, Washington, D. C., has been a favorite with Washington listeners for nearly twelve years. The show is heard 6:00 until 9:00 a.m. on a Monday through Saturday basis.

“There are three principle reasons,” states Mahlon A. Glascock, WRC Sales Manager, “why we think it has achieved listener leadership.

“First, we have always striven to have as conductor of the program a personality of ability and appeal. During the twelve years of WRC’s own program we have had only two personalities conducting the program. Bill Herson, the present conductor, is now in his fifth year. This slow turnover of outstanding personalities is very important.

“The second reason . . . the format of the program. We try to give well spaced news periods, lots of music, a minimum of chatter and consistent limitation of the number of commercials in any given period.

“The third reason . . . the station’s dominance in daytime and night time programs. We are sure that WRC’s popularity induces many listeners to get the WRC listening habit for other programs. Thus many listeners to our night time programs will leave their radio set on WRC when they retire. The next morning when they turn on the radio they are already tuned to our morning program.

“There are many other reasons too why the program continues to be high on the list of favorites in Washington. The program personality is very active in community affairs. He goes outside of the station into hundreds of varied groups during the course of the year. Being an important money maker for the station, the program and personality are promoted strongly and continually.

Hymns Head: Early Morning Programming on KXOK

"Temple of the Air" featuring hymns and religious music, running on an uninterrupted format from 5:30 until 6:00 A.M., constitutes the opening segment of the early morning programming of KXOK, ABC affiliate, St. Louis, Missouri.

The mood and tempo are transformed into a bright and lively atmosphere with popular recorded melodies on "Town and Country" at 6:00 A.M. The well-known KXOK personality, Charley Stookey, station's farm editor, provides sparkling entertainment and services for the large rural population in the station's coverage area with farm features.

"Breakfast Time," a light, fast-moving, program follows the news and continues until 8:15 A.M. National, world and local news make up the news period at this hour. KXOK joins the network at 8:30 A.M.

"WASHINGTON VIEWS AND INTERVIEWS" AVAILABLE FROM ZIV

Washington correspondent Barnet Nover interviews statesmen on national and international affairs for the syndicated transcribed program, "Washington Views and Interviews." This public interest vehicle is produced by Frederick W. Ziv Company.

CANADIAN ASSOCIATION OF BROADCASTERS TO ESTABLISH SMALL MARKET STATIONS DIVISION

Following a recent presentation before the Canadian Association of Broadcasters by Robert (Bob) Mason, WMRN Marion, Ohio, a Small Market Stations Division has been formed by that association.

Mr. Mason, member and former chairman NAB Small Market Stations Division, reveals that approximately 80% of the Canadian stations come under the small market stations classification.

PUBLIC SERVICE PLAQUE AWARDED TO WKMO

A Magazine Digest public service plaque has been awarded to the city of Kokomo, Indiana and Radio Station WKMO. "John Carl Jeffrey, station manager and city officials received the awards at ceremonies during a CBS broadcast in New York. July edition of the magazine carries story on public interest services of the station and the city.

REPORTS READERS VOTE FOR LARGER SIZE TYPE

Response from the type-face ballot distributed with REPORTS two weeks ago shows a definite preference for the larger size type now in use. 79% of those answering favored the larger type. The size made no difference to 20 per cent, and less than one per cent requested a return to eight point.

In view of this expression of opinion the larger type will be continued. Our thanks for returning the ballots. Your comments are always welcomed.
if only the message or program reflects that quality. Here again, intelligent promotion in support of the radio campaign helped pay dividends to the sponsor.

Top-Budget Mystery Show Continues U. S. Steel’s Public Relations Program

While some advertisers under the influence of current business jitters have canceled time and space or pared down budgets, a good many have clung to the basic practice that advertising should be kept in there punching.

It’s true enough that some direct-selling advertising has backfired because strikes and shortages have ham-strung production. Some advertisers have been hurt but their scratches call for no drastic surgery such as cutting off advertising altogether or cutting it down to the point that it is ineffectual.

During the war when there was little to sell and the advertising dollar cost only a few cents, many companies developed public service programs such as those sponsored by the War Advertising Council to build up good-will among customers of the future. The present business situation is somewhat similar and could well be met by similar tactics. Though the cost of maintaining such a program may be higher than during the war years, the penalty for dropping or curtailing advertising now is greater.

United States Steel is a comparatively newcomer among radio sponsors, but it has carried into use of that medium a veteran’s confidence in the future plus the knowledge that advertising, to be effective, must be kept high on the payroll. It has not let current business jitters have impaired the fine work done by its winter program.

The opportunity to trim costs came when U. S. Steel’s Theatre Guild season ended early in June. The company could have filled in the 13-week summer season with a less costly substitute, but it felt that such a retrenchment would have impaired the fine work done by its winter program.

Under the supervision of J. Carlisle MacDonald, assistant to the chairman of the board, U. S. Steel is currently presenting the Hour of Mystery over the American Broadcasting Company’s network (10 P.M. EDTST Sundays). The fact that the initial show brought rave notices in the press is no coincidence. It was planned to be an appealing and distinctive show by men who know that a public relations or advertising program’s success depends on maintaining its quality and continuity.

The Hour of Mystery offers the nation’s 50,000,000 detective fans sixty minutes of thrilling drama starring such lights of the stage as Laurence Olivier and Geraldine Fitzgerald. It is well-rounded summer radio fare featuring top actors and top direction.

Commercial copy follows the format of The Theatre Guild series. An opening message deals with some broad policy or achievement of the corporation such as industrial relations, research, stockholder relations and the reemployment of veterans. A second message is devoted to a subsidiary company to permit better public identification of U. S. Steel and its subsidiaries.

The Hour of Mystery is backed by a promotion campaign to further insure its success.

Regular ads are carried in newspapers in principal cities and all U. S. Steel plant towns to a total of 17,000,000 readers.

500,000 circulars were distributed telling of the new summer program. Half of these went to employees and the rest went to customers.

10,000 posters for local time and station imprint were distributed through the corporation’s 15 district public relations offices to U. S. Steel plants, general offices and local radio outlets.

125,000 postcards announcing the summer series were given to employees and local stations to mail to listeners inviting them to tune in.

Mass Medium Like Radio for Luxury Item?

The advertising success of Stradivari perfume is founded on the precept that a campaign to reach prospective purchasers of expensive perfume must have a quality and flavor equal to the perfume itself.

Such an advertising philosophy is relatively easy to live up to on a small scale, but difficulties present themselves with the use of a mass medium. Mass advertising can very well impart a common and everyday flavor to a rare and magic perfume—or bring about the loss of the personal touch that plays a big part in merchandising costly essences. Obviously, when a person pays $15 or $20 an ounce for perfume, he likes to think of it as something exclusive rather than as an extract that is being marketed like canned soup or beans.

These difficulties would seem to preclude the use of radio, but for four years, Prince Matchabelli, Inc., of New York, a subsidiary of Vick Chemical Co., has been using that mass medium to reach a selected audience. Advertising and promotion of the perfume has been built around an ensemble of priceless Stradivari violins. The program has just completed the winter season on American Broadcasting Co., following a three-year tour over the National Broadcasting Company.

Success of the Stradivari program is attributed to the appeal of the music and of the world-famous violins in the orchestra. Bulging files of letters from pleased listeners plus a steady gain in sales of Stradivari perfume, now the sales leader of the Prince Matchabelli line, seem to prove the theory that lovers of fine music and fine instruments would be lovers of fine perfume.

Commercials Match Program Mood

Particular care is taken that the commercials match the mood of the program. Loud, high-pressure selling could easily destroy the spell woven by the ensemble. Even local cooperative cut-in commercials switch gracefully from Stradivari violins to Stradivari perfume—and so smoothly that few listeners realize the program is doing a selling job while bringing them fine music.

Several loyal listeners have wired the New York office asking for the Stradivari ensemble for local concerts. New York had to send its regrets to most of them because it couldn’t bundle up the ensemble and its priceless instruments and ship them off at a

* * *

(Continued on next page)
moment's notice. Two or three times, counteroffers to send a quartet only were made, but the fans wanted the whole ensemble or nothing at all.

**Playbacks Used**

Department stores have used playbacks of the program to increase sales among shoppers and draw attention to the radio concert programs distributed at perfume counters. Counter cards in the same rose background as the program schedule are employed to call attention to the Sunday program. Both counter card and printed program feature the little Stradivari Cupid and the silhouette of Matchabelli's crown bottle.

Another Prince Matchabelli device that has helped put department store customers in a perfume-buying frame of mind is a small, scented blotter for use as an insert in handkerchief purchases. The blotter is die-cut in the crown bottleshape and is supplied free of charge to department stores handling the perfume line.

The Prince Matchabelli mailing list has passed the point where fan letters can be answered individually although the company at first did that. It still maintains a personal touch by building the programs around the requests of listeners and mailing the schedule regularly to 15,000 fans. The schedule lists selections to be played six weeks in advance, the stations carrying the program and the local times it can be heard. Commercial copy on the printed program follows the format of the radio commercials.

**Local Costs Shared**

Local perfumers and department stores have been quick to identify themselves with the Stradivari program. A good many share costs of local cut-ins on the network show. Others voluntarily include a line in their newspaper ads telling when and over what ABC station the Stradivari program may be heard. Prince Matchabelli publication advertising of Stradivari perfume also is centered around the radio ensemble, a tie-in that has attracted many music lovers to the mid-day Sunday show. Its time is apparently no great factor among listeners, for among the most faithful correspondents are residents of the Pacific Coast who must be at their radios by 9:30 in the morning to hear the program.

The sales organization for Stradivari perfume is attuned to the radio concert series. Demonstrators are keenly aware of the pulling power of the violin concerts. Network outlets have been closely selected on the basis of potential sales. Sales leadership of Stradivari perfume over others of the line is definitely due to the program, for the publication budgets for all members of the family are about the same.

Probably the best indications how much Antonio Stradivari's master instruments have come to be associated with the Prince Matchabelli perfume through this radio program is that many write to the company for an appraisal of their violins, especially if they think they have a real Stradivari. But no genuine Stradivari has yet been discovered among these inquirers.

Prince Matchabelli, founder of the perfume house, died several years ago but Princess Matchabelli, his sister-in-law, has continued as head of the Paris branch. Since Stradivari perfume was launched when communications between the United States and France were cut off, the Princess didn't know that such a perfume existed until GIs came crowding into the Paris house to ask for the Stradivari perfume by name to send to their girl friends back home. That, too, is a fairly substantial testimonial for a nicely executed radio advertising program.

Among the stoutest supporters of the program now are the false prophets who at first were sure such a program would never work for a prestige house, says Lenore Buehler, the company's advertising manager. It has worked, but to keep it working requires the constant vigilance of Prince Matchabelli, Inc., and the agency, Morse International, New York.

**Employee-Employer Relations**

**LABOR MEASURES OUT FOR THIS SESSION; HOBBS BILL BEFORE PRESIDENT**

At the end of last week, Congressional proponents of legislation regulating labor unions and activities abandoned hope of passing any new measures this year.

Three bills pending in Congress were conceded to be "dead": the wage bill raising the minimum from 40 to 65 cents and expanding the coverage of the Wage and Hour Act, the President's emergency strike control bill, and the vetoed Case labor bill (see Current Reports, p. 426).

The minimum wage legislation, passed by the Senate with some amendments and approved by the House Labor Committee recently, was shelved by the House Rules Committee on Wednesday (26). Efforts to revive various sections of the Case bill seem also to have been abandoned. In the meantime, the emergency legislation, having passed both branches of Congress in different form, rests on the Speaker's desk without likelihood of being called up before the current session ends.

While prospects dimmed for any further regulatory legislation, the President had on his desk the Hobbs "anti-racketeering" bill, sent to the White House, as a separate measure on June 21, following the veto of the Case bill, of which it had been a part. It makes guilty of a felony, punishable by $10,000 fine or up to 20 years' imprisonment, anyone who "in any way or degree obstructs, delays, or affects commerce, or the movement of any article or commodity in commerce, by robbery or extortion."

When he vetoed the Case bill, the President said he was "in full accord" with the objectives of the Hobbs bill provision, but felt that the legislation should be clarified so as not to make it illegal for labor "to strike and picket peacefully, and to take other legitimate and peaceful concerted action." The Congress did not modify the bill as suggested, although Senator Hatch, who called it up, asserted it did not interfere.

(Continued on next page)
with peaceful picketing or other legitimate union activity.

The Hobbs bill has been pending in Congress since 1942, following a decision of the Supreme Court holding that the 1934 Anti-Racketeering Act did not apply to the use of violence and threats in forcing employment of union truckers or standby payments. The Court reached this result on the ground that the 1934 law specifically excepted bona fide wage payments and preserved "the legitimate and bona fide activities" of labor unions. Justice Byrnes, who wrote the opinion in that case, commented that Congress was familiar with the "stand-by" device—even if obtained by "force or threats"—and did not intend to affect such activities. The clarifying language suggested by the President but not adopted by Congress, might well have confirmed the Court's interpretation of the 1934 Act.

Organized labor has bitterly opposed passage of the bill, and President William Green of the A. F. of L. has called for its veto. In a telegram to President Truman, Green urged that the bill be vetoed because it "would interfere with the exercise of the legitimate activities" of labor, was "susceptible of broad dangerous interpretations," and would foster "widespread discontent and unrest" and "increase labor strife."

Senator Hatch and Senate Labor Committee Chairman Murray, however, expressed the belief that the bill would be signed by the President.

**CBS ELECTIONS STILL UNDECIDED**

Following a telegraphic order by the NLRB on Tuesday (25), the ballots of the CBS television directors and assistant directors were opened on Thursday, with the result that neither RDG nor IATSE secured a majority. The vote was 6 for RDG, 5 for IATSE, and 2 challenged by IATSE.

Action by NLRB directing counting of the ballots, previously impounded at the request of the A. F. of L., came after the A. F. of L. failed to settle the jurisdictional dispute between RDG and IATSE. No joint proposal for settlement was filed with the Board by the deadline, June 24 (See Current Reports, p. 472).

Investigation of the two challenged in this group, as well as the challenges in the other two elections involving the miscellaneous television studio employees and the overall white-collar group, is expected to be completed about July 8, according to the NLRB Field Examiner assigned to the case.

**FCC**

### SAN FRANCISCO TV HEARINGS CANCELLED

Hearings by the FCC on the applications for television grants in San Francisco were cancelled by the commission Wednesday (26).

Since the Commission allocated six channels for the west coast city and one of the seven original TV applicants, Hearst Publications, Inc., withdrew its application, the need for a consolidated hearing was eliminated.

### RENEWALS TO THIRTY-THREE STATIONS

The FCC announced on Monday (24) that it had erroneously listed thirty-three stations as having been issued temporary-license renewals.

The stations which actually had been granted renewals on a regular basis are listed in this issue of **REPORTS under FCC Actions**.

### TRANSRADIO COMPLAINT DISMISSED BY FCC

The Transradio Press petition to the FCC asking for a revision of the A. T. & T. rate structure was dismissed without prejudice by the commission in its proposed decision published Thursday (27).

Originally filed in December, 1940, Transradio's complaint was consolidated with the commission's investigation of the A. T. & T. service, ordered in October, 1941.

The FCC pointed out that in 1943, substantial reductions were made in rates charged to press users of private line teletypewriter service. The commission stated that the principle of "declining cost per mile" was instituted as an additional reduction in its rate structure by the A. T. & T. on February 1, 1946, and that Transradio has not shown that further decreases are in order at present.

The commission maintained that it will continue its policy of surveillance over the A. T. & T.'s business to assure equitable line service.

**JULY 1, 1946 — 508**
Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 8-14, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Homes for Veterans

In simple justice, veterans deserve all possible assistance in finding living accommodations. They feel the pinch of the shortage more acutely because they interrupted their lives to go into the Armed Services. It is simply a matter of fair play to help them in every way possible to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. An estimated 1,300,000 single veterans will get married by December 31, 1946. Even when generous allowance is made for the fact that some of these married veterans may prefer to live temporarily with relatives or friends, it appears that well over 2 million veterans' families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans' housing situation. Government and industry are cooperating to stimulate construction and to provide that veterans are to have first chance at vacancies in the existing housing supply; by sharing living places in the existing housing supply; by sharing their homes with veterans' families if they can possibly do so and listing vacancies and houses for sale at the veterans' housing referral center, if one exists in their community, so that veterans can get first chance at them. (Fact Sheet No. 45-B)

Fight Famine by Sharing

Former President Herbert Hoover, in his report to the nation of his 35,000 mile tour through the famine stricken areas of the world, said, "I have seen with my own eyes the grimmest spectre of famine in all the history of the world. . . . Hunger hangs over the homes of more than 800 million people—over one-third of the people of the earth." If 300 million of these people should receive no more relief, and if we assume that their own remaining resources could be evenly distributed (which they could not), they would be reduced to a calorie level that would mean slow death. Says Mr. Hoover, "We can save these people from the worst if we will." But we are still faced with the fact that 3,600,000 tons of cereals are required if hunger is to be appeased and mass starvation prevented in many of the hunger-ridden parts of the world. No one can predict for certain how long famine conditions will prevail. So until the famine emergency is over, the job of Americans is to be content to eat one-third less wheat products, fats and oils. As a rough guide, each American family should be eating one-third less wheat products and one-fourth less fats and oils than usual. . . . Buying no more than our fair share, every family is available to receive the plentiful foods instead. . . . Eliminating all food waste and turning in all used fats. . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-C)

Hospitals Need Student Nurses

A study conducted by the American Hospital Association shows that 2 out of 3 hospitals throughout the country are suffering from acute nursing shortages. In 1945, hospitals registered by American Medical Association reported an increase of 220,544 admissions over 1944. A large percentage of these hospitals have been forced to close beds and facilities—in some cases, even whole floors or wings. As a result, literally thousands of patients are doing without adequate nursing care. Forty thousand student nurses must be recruited during the remainder of 1946 to help in alleviating the current situation, and insure adequate nursing care for the nation in the future. The U. S. Cadet Nurse Corps, created during the war to train student nurses for military and essential civilian nursing service, filled schools of nursing throughout the country; many of its graduates are now doing their part in essential nursing fields. But recruitment for the Corps was terminated last fall, and today there is an alarming shortage of student nurses in training in the hospitals of our country. A strong nationwide effort must be made, therefore, to interest young women in nursing as a career; to urge them to enroll at once to fill existing vacancies in schools of nursing, and at the same time provide greatly needed help for our hospitals. Explain that nursing is a wonderful opportunity for young women to prepare for a lifetime profession and for superior homemaking at very low cost, if they are between the ages of 17 and 35, and are high school graduates or college students in good standing. Emphasize that a number of collegiate nursing schools give a Bachelor of Science degree in nursing. Emphasize the fact that, compared with average net earnings in other vocations for women, nursing salaries rate high. Point out that complete information on how to become a student nurse should be obtained at once from either The Administrator or the director of nurses of the hospital nearest the interested applicants home. (Fact Sheet No. 9-C)

Federal Communications Commission Docket

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 1. They are subject to change.

Monday, July 1

Further Hearing

NEW—James A. Nor, Shreveport, La.—C. P. 1550 ke., 250 watts, unlimited.

NEW—Frank H. Ford, Shreveport, La.—C. P. 1550 ke., 250 watts, unlimited.

Further Hearing

Before the Commission in Conference Room B, Adjacent to the Government Auditorium, 13th St. and Constitution Avenue N.W.

In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band.

(Continued on next page)
NEW—Peoria Broadcasting Co., Peoria, Il.—For FM facilities.
To Be Held in Court Room, Third Floor, Peoria County Courthouse.
Friday, July 5
NEW—Times World Corp., Roanoke, Va.—For FM facilities.
NEW—Roanoke Broadcasting Corp., Roanoke, Va.—For FM facilities.
NEW—Piedmont Broadcasting Corp., Danville, Va.—For FM facilities.

To Be Held in Court Room, Third Floor, Peoria County Courthouse, Peoria, Ill.

NEW—Central Illinois Radio Corp., Peoria, Ill.—For FM facilities.
NEW—Illinois Valley Broadcasting Co., Peoria, Ill.—For FM facilities.
NEW—Illinois Broadcasting Co., Peoria, Ill.—For FM facilities.
NEW—Worth Broadcasting Co., Fort Worth, Texas—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time; site subject to approval by CAA of antenna system and transmitter site. (B3-P-4627; Docket 7495)
NEW—Eastern Idaho Broadcasting and Television Co., Pocatello, Idaho—Granted construction permit for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (B5-P-4638)
NEW—Radio & Television Broadcasting Co. of Idaho, Pocatello, Idaho—Granted construction permit for a new station to operate on 1210 kc., 250 watts, unlimited time; subject to CAA approval. (B5-P-4620; Docket 7493)
NEW—Chanticleer Broadcasting Co., New Brunswick, N. J.—Granted construction permit for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (B1-P-4490; Docket 7452)

MISCELLANEOUS APPLICATIONS GRANTED
NEW—Commodore Broadcasting, Inc., Area of Decatur, Springfield, Ill.—Granted CP for a new relay broadcast station to be used with applicant’s standard station WSOY. (B4-PRE-467)
NEW—Commodore Broadcasting, Inc., Decatur, Ill.—Granted CP for a new relay broadcast station to be used with applicants’ standard station WSOY. (B4-PRE-468)
NEW—Nichols & Warner, Inc., Area of Southern Calif.—Granted CP for a new relay broadcast station to be used with applicants’ standard station KFOX. (B5-PRE-466)
NEW—Leonard A. Versluys, Area of Grand Rapids, Mich.—Granted CP for a new relay broadcast station to be used with applicant’s standard station WLAV. (B2-PRE-4316)
NEW—College of the Pacific, Stockton, Cal.—Granted construction permit for a new station; frequency 91.1 mc. (Channel 217); 250 kw, antenna 277 ft.; subject to approval by CAA. (B1-PRE-467)
NEW—Santa Monica School Board, Santa Monica, Cal.—Granted construction permit for a new station; frequency 901 mc. (Channel 217); 0.5 kw, antenna 235 ft.; subject to approval by CAA. (B5-PED-46)

DESIGNATED FOR HEARING
KNOE—James A. Nee, Monroe, La.—Designated for hearing application for modification of construction permit (B5-MP-1839), to change frequency from 1230 to 1390 kc., and increase power from 250 watts to 5 kw, and a power level of 0 kw at night.
Board of Missions and Church Extension of the Methodist Church, New York City—Designated application for a new Class B FM station (B1-PH-1008) for hearing to be consolidated with applications of WBNX Broadcasting Co., Inc., et al. (Docket 6013, 6175, 6177, 6188 and 7217-7234)
WJWB—Charles C. Carlson, New Orleans, La.—Designated for further hearing application for renewal of license. (Docket 6525)
Beatrice Cobb, Morganton, N. C.; Nathan J. Cooper, Morganton, N. C.—Designated for consolidated hearing application of Beatrice Cobb (B3-P-4821) for a new station to operate on 1490 kc., 250 watts, unlimited time, with application of Nathan J. Cooper (B3-P-4789), for the same facilities.
Ralph D. Epperson, Mount Airy, N. C.; John T. Cashin and Doris B. Brown, d/b/as Wilkes Broadcasting Co., No. Wilkesboro, N. C.—Designated for consolidated hearing application of Ralph D. Epperson (B3-P-4755) for a new station to operate on 800 kc., 250 watts, daytime only, with application of Wilkes Broadcasting Co. (B5-P-1486), for a new station to operate on 810 kc., 1 kw, daytime only.

WONS—State Broadcasting Corp., Hartford, Conn.—Consent to assignment of license to The Yankee Network, Inc. (1190 kc.)

WDBC—Delta Broadcasting Co., Escanaba, Mich.—Consent to transfer of control from Gordon H. Brozek, Frank J. Russell, Jr., and Leo G. Brott, to Frank J. Lindenhall, John P. Norton and William J. Duchaine. (1490 kc.)

NEW—W. S. Weatherly, d/b as Calhoun Broadcasting Co., Anniston, Ala.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Supreme Broadcasting System, Inc., New Orleans, La.—Construction permit for a new standard broadcast station to be operated on 990 kc., power of 250 watts, and daytime hours of operation.

WXCA—Richard M. Arnold, Jack O. K. Barfield, James M. Earnest, Albin F. Knight and J. Alfred Miller, d/b as Community Broadcasting Co., a partnership, Asheville, N. C.—Consent to assignment of license to James E. Lambeth, James E. Lambeth, Jr., Helen M. Lambeth, Frank S. Lambeth and Molly H. Lambeth, d/b as Radio Station WMFR.

NEW—Southern Virginia Broadcasting Corp., Crewe, Va.—Construction permit for a new standard broadcast station to be operated on 650 kc., power of 250 watts, and daytime hours of operation.

NEW—Robert R. Thomas, Jr., Oak Hill, W. Va.—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts, and unlimited hours of operation.

NEW—Monahans Broadcasters (a corporation), Monahans, Texas—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

NEW—Paul W. Delehanty, Chester, Pa.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power 250 watts and unlimited hours of operation.

NEW—Quincy Broadcasting Co., Quincy, Ill.—Construction permit for a new standard broadcast station to be operated on 1440 kc., power 1 KW, unlimited hours of operation, directional antenna for day and night use.

NEW—Wolverine State Broadcasting Service, Inc., Detroit, Mich.—Construction permit for a new standard broadcast station to be operated on 650 kc., power 250 watts and daytime hours of operation.

NEW—The Boston Broadcasting Corp., Brookline, Mass.—Construction permit for a new standard broadcast station to be operated on 1600 kc., power 5 KW, unlimited hours of operation and directional antenna for day and night use.

Federal Trade Commission Actions

COMPLAINTS

Export Finders Bureau—Carlisle Rowntree, trading as Export Finders Bureau, 8 Bridge Street, New York, is charged in a complaint issued by the Commission with misrepresenting his ability to supply both foreign and domestic purchasers with a variety of commodities he offers for sale. (5444)

Park & Tilford, 485 Fifth Avenue, New York, is charged in a complaint issued by the Commission with misrepresentation in connection with the sale of a household textile dye known as Tintex. (5447)

CEASE AND DESIST ORDERS

Northwest Studios, Inc., 6013A Phinney Avenue, Seattle, and its officers and directors, Charles H. Van Scoy and Marjorie Van Scoy, have been ordered by the Commission to discontinue misrepresentations concerning the quality, value and terms of sale of colored photographic enlargements and frames. The respondent corporation also trades as Interstate Sales Co. (4951)

Philip Shlansky & Bro.—An order issued by the Commission directs that the copartnership of Philip Shlansky & Bro., 300 Seventh Ave., New York, manufacturer of women's coats and other garments, discontinue representing in any

(Continued on next page)
manner, either through words or pictorial representations, that textile fabric products they sell are made from the peltries, fur or hair of fur-bearing animals. (5274)

STIPULATIONS

El Capitan—The Commission has accepted from Harry J. M. Shock, trading as El Capitan, 6120 Greenwood Street, Chicago, a stipulation to cease and desist from representing that any article of merchandise is “free,” “given free,” or is without cost to the recipient when it is not a gratuity and the prospective recipient is required as a consideration to purchase some other article or articles or render some service in order to obtain the so-called “free” item. (6311)

Parks-Phillips Health Foods Co.—Stanley X. Phillips, trading as Parks-Phillips Health Foods Co., 1542 Knowlton Street, Cincinnati, stipulated with the Commission that in connection with the advertising and sale of medicinal preparations he will cease and desist certain practices. (03314)

COMPLAINTS DISMISSED

Coatcraft, Inc.—An order dismissing the complaint against Coatcraft, Inc., Philadelphia, has been issued by the Commission. The respondent had been charged with violation of the Federal Trade Commission and Wool Products Labeling Acts in connection with the advertising and sale of clothing and other garments. The complaint was dismissed because the corporation has discontinued business and is dissolved. All of the Commissioners participated in the decision. (5175)

James G. Exum—The Commission has dismissed without prejudice a complaint charging James G. Exum, Snow Hill, N. C., with misrepresentation of a preparation advertised as a remedy for mange and other skin diseases of animals. After consideration of the record the Commission concluded that the charges of the complaint had not been sustained by a greater weight of the evidence and that the testimony and other evidence were not sufficient to warrant issuance of an order prohibiting the practices alleged. All of the Commissioners participated in the decision. (5060)

Revision of Engineering Standards Proposed

All Engineers Invited by FCC to Discuss Changes at Informal Conference

As an outgrowth of the Clear Channel Hearings which were resumed before the FCC in Washington Monday (1), the commission announced Wednesday (3) plans for an informal engineering conference in Washington July 15 and 16 to which all communications engineers are invited.

The conference will consider proposed revisions of the Commission's Standards of Good Engineering Practices. These discussions will serve as a preliminary to formal consideration of the proposed changes by the Commission en banc on August 5th.

The Commission announcement stated that some of the more important problems to be discussed are as follows:

1. A new method of calculating resulting interference.
3. The revision of adjacent channel ratios.
4. The revision of the method of determining permissible interference of skywave service.
5. Consideration of variation of noise levels throughout the United States.
6. Consideration of latitude effects on skywave interference and service.

"In order to give scope and direction to the conference," the FCC said, "Exhibit 264 which was introduced in the clear channel hearing will be used as the basis for the discussion." The Commission announced that copies of this exhibit could be obtained from its Information Division.

"It should be pointed (Continued on page 526)

FOUR CHANGES IN PROGRAM REPORT DEFINITIONS MADE BY FCC

Four alterations in definitions established in the FCC report "Public Service Responsibility of Broadcast Licensees" were announced by the commission Tuesday (2). They have been made at the suggestion of interested parties.

The FCC public notice, including revised definitions, reads as follows:

The first change makes it clear that a 14½-minute unsponsored program that is uninterrupted by a spot announcement is a sustaining program. The definition previously related to 15-minute programs. This change was made in recognition of the fact that most 15-minute programs are only 14½ minutes in length.

The second change makes it clear that so-called network cooperative programs are to be recorded as network and not as local. Where a network cooperative program is not locally sponsored then it is to be computed as network sustaining. If there is a local sponsor it is to be counted as network commercial even though the sponsored announcement is read by a local station announcer.

The third change relates to local live programs produced by the stations but which are recorded for later broadcasting. Under the new definitions such programs are to be counted as local live and not as recorded.

The fourth change deals with so-called public service spot announcements. Hereafter this category will be called "non-commercial spot announcements."

Other minor changes have been made but are mainly editorial in nature. (Continued on next page)
The new definitions now read as follows:

A commercial program (C) is any program which is paid for by a sponsor or any program which is interrupted by a spot announcement (as defined below), at intervals of less than 14½ minutes. A network program shall be classified as “commercial” if it is commercially sponsored on the network, even though the particular station is not paid for carrying it—unless all commercial announcements have been deleted from the program by the station. Cooperative programs furnished to its affiliates by a network which are available for local sponsorship are network sustaining programs (S). If no local sponsorship is involved and are network commercial programs (NC) where there is local sponsorship even though the commercial announcement is made by the station’s local announcer.

(It will be noted that any program which is interrupted by a commercial announcement is classified as a commercial program, even though the purchaser of the interrupting announcement has not also purchased the time preceding and following. The result is to classify so-called “participating” programs as commercial. Without such a rule, a 15-minute program may contain 5 or even more minutes of advertising and still be classified as “sustaining.” Under the proposed definition, a program may be classified as “sustaining” although preceded and followed by spot announcements, but if a spot announcement interrupts a program, the program must be classified as “commercial.”)

A sustaining program (S) is any program which is neither paid for by a sponsor nor interrupted by a spot announcement (as defined below).

A network program (N) is any program furnished to the station by a network or another station. Transcribed delayed broadcasts of network programs are classified as “network,” not “recorded.” Cooperative programs furnished to its affiliates by a network which are available for local sponsorship are network sustaining programs (NS) if no local sponsorship is involved and are network commercial programs (NC) where there is local sponsorship even though the commercial announcement is made by the station’s local announcer. Programs are classified as network whether furnished by a nationwide, regional, or special network or by another station.

A recorded program (R) is any program which uses phonograph records, electrical transcriptions, or other means of mechanical reproduction in whole or in part—except where the recording is wholly incidental to the program and is limited to background sounds, sound effects, identifying themes, musical “bridges,” etc. A program part transcribed or recorded and part live is classified as “recorded” unless the recordings are wholly incidental, as above. A transcribed delayed broadcast of a network program, however, is not classified as “recorded” but as “network.” A recorded program which is a local live program produced by the station and recorded for later broadcasting by the station shall be considered a local live program.

A wire program (W) is any program the text of which is distributed to a number of stations by telegraph, teletype, or similar means, and read in whole or in part by a local announcer. Programs distributed by the wire news services are “wire” programs. A news program which is part wire and in part of non-syndicated origin is classified as “wire” if more than half of the program is usually devoted to the reading verbatim, or virtually verbatim, of the syndicated wire text, and otherwise is classified as “live.”

A local live program (L) is any local program which uses live talent exclusively, whether originating in the station’s studios or by remote control. Programs furnished to a station by a network or another station, however, are not classified as “live” but as “network.” A program which uses recordings in whole or in part, except in a wholly incidental manner, should not be classified as “live” but as “recorded.” Wire programs, as defined above, should likewise not be classified as “live.” A recorded program which is a local live program produced by the station and recorded for later broadcasting by the station shall be considered a local live program.

A non-commercial spot announcement (NCSA) is an announcement which is not paid for by a sponsor and which is devoted to a non-profit cause—e.g., war bonds, Red Cross, public health, civic announcements, etc. Promotional, participating announcements, etc. should not be classified as “non-commercial spot announcements” but as “spot announcements.” War Bond, Red Cross, civic and similar announcements for which the station receives remuneration should not be classified as “non-commercial spot announcements” but as “spot announcements.”

A spot announcement (SA) is any announcement which is neither a non-commercial spot announcement (as above defined) nor a station identification announcement (call letters and location). An announcement should be classified as a “spot announcement,” whether or not the station receives remuneration, unless it is devoted to a non-profit cause. Sponsored time signals, sponsored weather announcements, etc., are spot announcements. Unsponsored time signals, weather announcements, etc., are program matter and not classified as announcements. Station identification announcements should not be classified as either non-commercial spot announcements or spot announcements, if limited to call letters, location, and identification of the licensee and network.

ALL ENGINEERS INVITED BY FCC TO DISCUSS CHANGES AT INFORMAL CONFERENCE

(Continued from page 525)
The commission requests that all comments from the industry be submitted to its Engineering Department in writing as far in advance of August 5th as possible, and that these comments be supplemented by specific proposals.

The informal conference in July will be held in Conference Room B, of the Departmental Auditorium Building on Constitution Avenue between 12th and 14th Streets, N.W., Washington, D. C.

NEW PROGRAM COMMITTEE MEETS; SENDS RECOMMENDATIONS TO BOARD

The reconstituted NAB Program Executive Committee held its initial meeting in Chicago last Monday and Tuesday (1 and 2).

"In selecting this committee," said President Justin Miller, who presided, "great care was exercised to choose men whose experience and record justified the hope that they could contribute constructively to our industry program policy. This hope has been fully realized.

"In our deliberations we have had foremost in our minds that the responsibility for programs rests with the individual licensee. We reviewed all phases of programming; news, agricultural, religious, controversial public issues, and particularly the NAB Standards of Practice as they have been amended from time to time—most recently in January 1946. It was the unanimous view of the committee that the Standards of Practice are not a static document but must, as in the past, be subjected to constant review and interpretation.

"I shall submit the detailed recommendations of the Committee to the Board of Directors when it meets on August 5-6-7 and I am confident that the policy promulgated will meet with industry cooperation and public approval."

Those present in addition to President Miller were Edgar L. Bill, WMBD, Peoria, Illinois; H. W. Slavick, WMC, Memphis; Stanley Hubbard, KSTP, St. Paul; Karl Koerper, KMBC, Kansas City; Merle Jones, WOL, Washington; Glenn Snyder, WLS, Chicago; A. Hult, MBS, Chicago; Clarence Menser, NBC, New York; Herb Plambeck, WHO, Des Moines; E. R. Vadeboncoeur, WSYR, Syracuse, and C. E. Arney, Jr., NAB Secretary-Treasurer.

HEARING TO BE HELD ON COMPLAINT OF TEXAS Gubernatorial Candidate

The FCC has designated for hearing next Friday (12) in Dallas the complaint of Homer P. Rainey against four radio stations of the Texas Quality Network—WOAI, San Antonio; WBAP, Fort Worth; WFBA, Dallas; and KPRC, Houston.

Mr. Rainey, formerly president of the University of Texas, is a candidate for the Democratic nomination for the Governorship of Texas.

In his petition to the FCC, Mr. Rainey charges that the four stations of the Texas Quality Network have "failed to exercise their individual responsibility" by entering into a "restrictive agreement" to limit time for political broadcasts to a single half-hour period between June 11, 1946 and July 13, 1946, with time in the remaining period before the primary election on July 27, 1946 to be "prorated in an indefinite manner among the various candidates."

In addition, Mr. Rainey alleged that the four stations more effectively cover the state than any other combination, that three of them publish daily newspapers which are opposed to his candidacy, and that in previous years have "afforded ample opportunity to candidates" for broadcasting.

PETTY ADDRESSES JUNIOR CHAMBER OF COMMERCE CONVENTION

Don Petty, NAB General Counsel, addressed the annual National Convention of the U. S. Junior Chamber of Commerce at Milwaukee June 28th.

Mr. Petty, a former president of the Los Angeles Junior C. of C., pointed out to the assembly that should the media for mass communication be government controlled, the practical effect would be government control of the information which industry could disseminate to the public. He said it would limit the manner in which every business in the United States could present its cause or advertising material to the people.

The NAB Board of Directors convenes at Estes Park, Colo., Aug. 6th for a three day session.

Attention is called to the postponement of the Employee-Employer Relations Committee meeting from July 11 to August 12 and 13.

PETTY ADDRESSES JUNIOR CHAMBER OF COMMERCE CONVENTION

Don Petty, NAB General Counsel, addressed the annual National Convention of the U. S. Junior Chamber of Commerce at Milwaukee June 28th.

Mr. Petty, a former president of the Los Angeles Junior C. of C., pointed out to the assembly that should the media for mass communication be government controlled, the practical effect would be government control of the information which industry could disseminate to the public. He said it would limit the manner in which every business in the United States could present its cause or advertising material to the people.
**News Clinics**

OREGON BROADCASTERS DECIDE THEY CAN DO BETTER NEWS JOB

“The first result of the NAB-Oregon Radio News Clinic was to crystallize opinion for all of us that we can do a better news job than we have been doing . . . and that there is not much time left for treading water.”

That’s how Marshall Pengra, manager, KRNR, Roseburg, and general clinic chairman, summed up the first radio news clinic to be held on the Pacific coast, Portland, June 25.

All arrangements were handled by a committee of Portland broadcasters consisting of Harry Buckendahl, general manager, KOIN; Arthur Kirkham, vice president, same station, and H. Quenton Cox, manager, KGW. Mr. Kirkham is a member of the NAB radio news committee.

Lester Halpin, KOIN news editor, presided over the two clinic sessions.

**Local News—A Must**

Lee Jacobs, general manager, KBKR, Baker, told broadcasters that the broadcasting of local news has been the finest thing his station has ever done. “Never again,” said Mr. Jacobs, “will we be without a fulltime reporter. And when our new station takes the air in September we’ll have a fulltime newsman on the staff. Our big trouble was educating the public to recognize radio as a news facility. This has been done. Don’t get mad when they leave you out. Go and explain carefully that the station wants the news. Get mad when they maliciously leave you out.

“We break any program for a top local story, day or night. If news is slow on a particular day we always have enough to fill. This is done by having the newsman write in advance and file on the hook local features of various length. They’re there when needed. To sum it all up, we broadcast local news because listeners like it, like it better than anything else.”

Gordon Capps, manager, KLBM, La Grande, associated with KBKR, said that he has started a fulltime newsman several months ago.

Of the 4 daily local news shows on KBKR, the 11:30 a.m. and the 5:45 p.m. each have a single sponsor; the 3:00 p.m. and the 9:45 p.m. programs are sold participating—3 sponsors each.

Jack Richards, sales manager, KWLK, Longview, Washington, reported two daily local news programs, at 12:30 and 7:00 p.m. Station employs a fulltime newsman.

**KOIN Adds Reporter**

KOIN, Portland, has had an experienced, fulltime newsman on the street for the past three weeks, it was announced by News Director Lester Halpin. “We are going to have local news on our station while it is news,” he said.

**New Station to Start with Reporter**

Ralph Hanson, manager of KUGN, Eugene, expected to begin operations July 1, and will have a fulltime newsman beginning July 8. He is a graduate of the school of journalism of the University of Oregon. During the war he wrote both newspaper and radio copy while in service.

**Hutton Discusses Farm Service**

At the present time KALE, Portland, is putting its major news effort in its farm service department headed by Burton Hutton. Because the northwest is an agricultural area, Mr. Hutton pointed out, we feel an obligation to give news to farm families and to serve farm families in as many ways as possible. Because the farm family is a complete unit, he said, a station must construct each farm program with something of interest for the entire family.

As examples of special farm services he mentioned the station’s “fire service” and “farm labor” service. A few days previous, he said, there were six broadcasts on one day for emergency farm labor. If people will provide authentic information on fires, common in the northwest, “we will interrupt any program for the announcement so that help may be summoned quickly from far and near.”

**Tell Press Associations How to Improve Service**

When press association representatives asked how they could improve their service to stations the response was instantaneous: “more regional, more state news.” To this was added “more farm, better farm news and more markets.” The newsmen also wanted such news to be moved more promptly.

The quality of farm news delivered by the press associations was severely criticized by experienced farm newsman and others. Doubt was expressed that the bureaus fully recognized the importance of agriculture to the northwest and to northwest station listeners.

**See Danger in Farm Handouts**

Continued discussion brought the admission that for the most part bureaus served clients with processed handouts. Independently prepared stories were necessary, it was said. Unless these are forthcoming, it was pointed out, the press associations become a propaganda agency for the government.

**Discussion Leaders**

Clinic discussion leaders were: Chet Wheeler, general manager, KWIL, Albany; George Turnbull, acting dean of journalism, University of Oregon; Arthur Stringer, NAB; Mr. Hutton and Mr. Halpin.

William B. Smullin, manager, KUIN, Grants Pass, and NAB director of the Northern California district, discussed “Freedom of the Press.”

Among those attending the Oregon clinic were:

L. W. Trommlitz, Manager, KORE, Eugene; Harry H. Buckendahl, General Manager, KOIN, Portland; George Wann, News Reporter, KOIN, Portland; Marshall Pengra, Manager, KRNR, Roseburg, and KFLW, Klamath Falls; Cy Young, Manager, KEX, Portland; Arthur Stringer, Director of Special Service.

(Continued on next page)
WASHINGTON STATE NEWS CLINIC ATTENDED BY FIFTY BROADCASTERS

Fifty broadcasters turned out for the NAB-Washington State Radio News Clinic in Olympia, June 27.

Tom Olsen, licensee of station KGY, Olympia, and president of Washington State Association of Broadcasters, gave two weeks time to arranging the event. How well he succeeded was evident at the close of the afternoon session when there was a rising vote in favor of more radio news clinics.

The morning session was interrupted at 11 o'clock so as to attend Governor Wallgren's radio and press conference. The Governor personally welcomed the broadcasters and reiterated his invitation, previously extended by Mr. Olsen, to attend a reception in the Governor's mansion that afternoon.

At noon Mr. and Mrs. Olsen were hosts at a luncheon "featuring Olympia oysters and other products of the famous northwest."

Goodwin Chase, general manager of KCOW, new station soon to be in operation in Ellensburg, east of the Cascades, started for the clinic by air, but was turned back by weather.

Washington broadcasters, since January 1, 1946, have been engaged in a cooperative news operation so as to serve their local areas with local news which originates in the capitol. As far as known Washington is the only state whose broadcasters maintain a Radio News Bureau, in a state capital, at their own expense. It was indicated at the Clinic that the Bureau is proving its worth to 17 subscribing stations.

The bureau manager accepts assignments for capital stories from 17 broadcast stations. He releases spot news, two news letters and one 1/4-hour transcription each week.

The manager is an experienced radio newsman, Carl Downing. He was news editor of KPQ, Wenatchee, for eight years, before coming to Olympia; and he reports his former station continues to do a first rate news job, maybe better than ever before.

Washington Dean of Local Radio News

Sam Crawford who began gathering and broadcasting local news in October, 1934, over KGY, Olympia, is regarded as dean of local newsmen in the Pacific northwest. After his long experience Mr. Crawford said that his ideas of radio news were and still are that "radio should originate as much news as possible and get it to the listener first. As for treatment of the news, tell it all. Tell it as briefly as you can without leaving out important details. Use a bit of sprightly writing when the nature of the item makes it possible. Do this day after day and year after year and you've got a radio-news-minded town. That's Olympia today."

Likes of Regional News Listeners

Indicative of the liking of regional listeners for news of their own areas were complaints reported by Dick Crombie, of KJR, Seattle. Unless a wise geographical selection of news items is made, listeners are quick to complain that they are being left out.

In deciding the nature of a newscast Mr. Crombie suggested the advisability of considering what other stations may be doing at the particular time as well as the nature of the audience. To illustrate he pointed to one of his news programs which handles but one, two or three items, instead of many—one way to avoid news sameness. Such broadcasts should be more frequent, he contends, because broadcasters have an obligation to make the news crystal clear as well as to give it. And it cannot always be made crystal clear with barebone facts.

Developing a Sports Station

Development of a sports station in a large city was discussed in detail by Ted Bell, KRSC, Seattle. Though KRSC carries league baseball and other sporting events, the big play is given to high school athletics. But in so doing, he said, we popularize all school events and support all school programs.

"We have lost money on many broadcasts," Mr. Bell admitted, "but it pays because we bring in additional listeners. What we have done in the past 6-7 years is to become known throughout our area as a sports station. But our appeal goes deeper than that because of our policy of tying in with all school activities.

Mr. Bell explained that he was not a newsman, admitted little understanding of news and for that reason would welcome the day the regular newsman returns. But Mr. Bell does understand special events and goes all out for special events coverage via wire recorder.

Country Correspondents of KVOS

KVOS, Bellingham, has a fulltime newsman and five country correspondents (stringers) to report the news from remote parts of the area. Manager Frank Adams said that local news was as much a part of his operation as the transmitted.

(Continued on next page)
He has a 15-minute "society" program, six times daily at 11:00 a.m., sponsored by a department store. Special efforts are made to include all the marriages on this show. Correspondents are supplied with special forms which are filled out and returned as soon as licenses are applied for. The copy itself is written by station's bookkeeper. Station's four local news shows are broadcast at 9:00 a.m., 12:00 noon, 7:00 p.m. and 9:00 p.m.

**Bond Discusses Farm News and Service**

Al Bond, farm director, KIRO, Seattle, considers farm news as a "coming enterprise" despite its tremendous growth of the past 10 years. It was his opinion, too, that farm programs must be beamed to the entire family. The service part of a farm program, he said, is important because the farmer receives information about his business. He pointed out that farm broadcasting was different from other programs in one important respect—the broadcaster must be in sympathy (think alike) with the farmer.

Probably the best way to tell the farm story is to bring farmers to the mike. Farmers will act on the information that comes from another farmer with greater speed—even more so than when information comes from the government.

**KELA Owns and Operates Wire System**

Station KELA, licensed to two cities—Centralia and Chehalis, owns and operates a wire system of 12 miles. Located two miles from the border of each city, station lines are strung on Northern Pacific poles between the cities. Cost is 25¢ per pole per year, approximately $75. Each town has approximately 4 miles of wire on station owned poles through the entire business district. Right of way was obtained from property owners without charge. Forty-nine outlets are permanently available; every member of the station staff operates equipment. Station Manager Joe Chytil maintains a fulltime newsman for leg work, writing and broadcasting local news.

Those attending were: Art Stringer, NAB, Washington, D. C.; Joe Chytil, Les Keiter, Dudley Gaylord, KDLA, Centralia-Chehalis; Tom Olson, Theresa Olsen, Sam Crawford, Eve Knutsen, Margie Donnell, Vicki Draham, KGY, Olympia; Carl Downing, Washington State News Bureau, Olympia; Peter Giovine, UP, Olympia; LeRoy M. Hittle, Will Lindley, AP, Olympia; Dick Crambie, Bob Ackerley, Bob Ferris, Charles Herring, KJR, Seattle; Harry Spence, Stan Craft, Fred Goddard, KXRO, Aberdeen; Robert E. Priebe, Ted Bell, KRSC, Seattle; Burke Ormsby, KTBI, Tacoma; Ann Shepard, Verne Sawyer, Ted Knightlinger, KMO, Tacoma.

Jim Murphy, KMO-KIT, Tacoma; Harry Long, KVI, Tacoma; Jim McLaughlin, John Keating, Seattle; Mark Knight, AP, Seattle; Oliver Runchey, KOL, Seattle; Harry Jordan, KEVR, Seattle; Al Bond, Ken Yeend, Ralph Thompson, Loren Stone. KIRO, Seattle; Vern Mack, William Taft, Thelma Taft, Shirley Bartholomew, KIRO, Everett; Jim Wallace, KFH-KVOS, Wenatchee; Ralph Shotwell, Jim Foster, KPQ, Wenatchee; Pete Hick, KIT, Yakima; Dan Crowley, UP, San Francisco; George Dunning, L. L. Lang, Ross McConnell, KOMO, Seattle; Frank Adams, KVOS, Bellingham.

**RADIO-PRESS TIE-UP WORKING**

WHCU's "Radio Edition of the Weekly Press," Sunday afternoon roundup of editorial and news material culled from 70 weekly newspapers in the station's listening area, is accomplishing five things, according to the July issue of the WHCU Program Guide. It is (1) providing a very listenable program of great local interest; (2) stimulating wider interest in community and regional affairs; (3) setting up a clearing house for the interchange of ideas on how to solve problems common to all or several of the communities in the region; (4) cutting down on the weeklies' boiler plate and improving the standards of locally written editorials and news stories; and (5) vastly benefiting radio-press relations.

The program—presently 15 minutes, with an extension to 30 announced as possible—was created by Michael R. Hanna, WHCU Manager and Director of District 2, NAB. The WHCU Program Guide describes it as follows:

"The object of this 15-minute program is to stimulate interest in the democratic process at the 'grass roots'—in the homes, in the small communities, in the neighborhood press; to let one community, however isolated, know what other communities in the next valley, the next county, or across the state border are doing about the same problems they face in their community; to tell one community what the people in the other communities are thinking about the day's issues; to inspire and encourage community thought and community action in any 'hermit' communities by holding up the example of the more alert, the more democratic communities in the area—AS REFLECTED IN THE COMMUNITY PRESS.

"The forepart of each program is given over to such 'action' stories as when Elmira discovered that 50% of its community chest pledges were unpaid, that public patience and funds were depleted by the endless succession of 'public appeals' for outside charity, and citizens formed an 'appeals investigating committee,' sought city-country approval of its passing on the worthiness and limit of subsequent appeals. Or when the Village of East Rochester, which had enjoyed the luxury of a municipal engineer, and neighboring Fairport, which needed such help, got together on a deal to share the engineer's services and expense 50-50. Or at the other extreme—when Horseheads organized a 'baby-sitters service' among its high school girls and established a wage scale—all suggesting solutions for local problems in other communities.

"The idea of such a program was outlined to a group of seven key weekly editors by Station Manager Michael R. Hanna, whose brainchild it was, nearly a month before it was presented on the air. It was offered as a project to arouse community interest in the Democratic process—the American way of life—and to improve the community press as the natural and accepted leader in community thought and activity. It was understood that participating members had to 'produce' to be included in the radio program—that they had to have stories or editorials worthy of attention. And they recognized, even then, that inclusion on the weekly radio program amounted to a

(Continued on next page)
special recognition of their service in the public interest. Some of the participating editors have been quick to perceive the possibilities of the program. Typical comments from their editorial columns:

“The Chemung Valley Reporter, Horseheads, New York: ‘(The Station) has succeeded in giving the non-metropolitan areas back to their people . . . (WHCU) is to be congratulated for its unprecedented attempt at cooperation between two, often highly competitive fields—press and radio. The Weekly Press appreciates this generosity and welcomes the opportunity for cooperation.’

“The Moravia Republican-Register, Moravia, New York: ‘The real value of the (WHCU) program is in the greater attention weekly newspaper editors will give to their leading news stories and editorials because they are likely to be quoted—also in the wider effect weeklies can have on public opinion.’

**Broadcast Advertising**

**PER INQUIRY OFFER**

Member stations have reported to NAB that Byrne Advertising Agency, Chicago has advised them of the availability of business on a per inquiry basis. The agency represents a client in the photo and printing field.

The agency has been advised that NAB has adopted a resolution opposing per inquiry type of radio advertising. A copy of the NAB resolution on this subject adopted at the 1942 convention was sent to the agency.

**Small Market Stations**

**EARLY MORNING PROGRAMMING OF WINS AND KHJ STUDIED**

The NAB Small Market Stations Division study of early morning programs in competitive, metropolitan areas reveals currently the programming of WINS, New York City, and KHJ, Hollywood, Cal.

The independent New York station has two shows on the early morning schedule. “Musical Coffee Pot” is broadcast from 6:00 A.M. till 7:30 A.M. Five minutes of news is included at 7:00 A.M. Willard Schroeder, WINS general manager, reports that this show features two announcers, Art Scanlon and Paul Miner with popular tunes, weather, time, and participating announcements.

A new WINS morning program, emceed by Johnny Gart, is presented from 7:40 till 8:45 A.M. His show is patterned along the lines of the earlier program, but special events and news features are injected via the wire recorder. This service has proved especially effective, Mr. Schroeder reports. With the use of the recorder Gart has presented to the WINS audience interviews with such “names” as Anthony Eden, Babe Ruth, Joe Louis and others. An example of the timely interviews was the appearance of Joe Louis the morning of the big fight. Babe Ruth was interviewed at LaGuardia Field just before he stepped on the plane for Mexico City, where he was guest of the famed Pasqual Brothers of the Mexican League. According to reports, the use of the wire recorder on the Gart show over WINS offers an angle of considerable appeal to audience and advertisers.

KHJ, Don Lee outlet in Hollywood, California has programmed the same show, “Rise and Shine” for the past ten years during the early morning period. The program is sold in one-minute and fifteen-minute participating units. Henry Gerstenkorn, KHJ assistant general sales manager, advises that the program has been responsible for exceptional increase in sales for Western Auto Supply Company, which has 95 outlets in the area. Dixon Ticonderoga Pencils is completing its third year on the program. Many other sponsors have been regular clients from three to six years consecutively. Program is heard from 6:00 A.M. till 8:00 A.M. Light music, time signals, and news constitute the format.

**GROUP SELLING BY THE OKLAHOMA NETWORK**

The success of group selling by the Oklahoma Network is attributed by Robert D. Enoch, network general manager, in large measure to the appointment of an aggressive stations representative organization, Taylor-Howe-Snowden Radio Sales. The member stations, as well as the network, have each appointed the firm individually.

This group emphasizes the value of promotion in the trade press and use of NAB recommended sales policies. Each station provides maximum support locally in campaigns placed with the group.

KTOK in Oklahoma City, is key outlet. Other stations in the group are: KADA, Ada; KBIX, Muskogee; KCRC, Enid; KGFF, Shawnee; KOME, Tulsa, and KVSO, Ardmore, Oklahoma.

Advertisers are permitted to use as few as three stations and still get the network rate. One office handles all advertising business. All stations are affiliated with the American Broadcasting Company.

**FCC**

**GILLINGHAM RESUMES POST WITH FCC AS INFORMATION DIRECTOR**

George O. Gillingham, recently relieved from active army duty as chief of the information branch, Chemical Warfare Service, returned Monday (1) to his position as director of information for the FCC.

Earl Minderman, who had been information chief at the commission for the past three years, will undertake a special assignment under the direction of Acting Chairman Charles R. Denny.

Mr. Gillingham, who went into the army early in 1942, was relieved from military service as a lieutenant.

(Continued on next page)
colonel. He has been awarded the Legion of Merit and the Army Commendation Ribbon.

He had served with the army in World War I, also with CWS.

Mr. Gillingham was with Pathfinder Magazine from 1922 to 1933, and for five of those years was its managing editor. During the next six years, he handled public relations for the Tennessee Valley Authority in Washington. In 1939, he transferred to the FCC.

NEW YORK HEARING ON 19 FM APPLICATIONS TODAY

Nineteen applicants for FM facilities in New York City and northern New Jersey are scheduled to be heard by the FCC in New York City's United States Courthouse Building today.

Complete lists of applications are listed in this issue of REPORTS under FCC Docket.

RESEARCH DEPARTMENT

PETRY STUDY MEASURES LISTENER MEMORY OF SPOT ANNOUNCEMENTS

The results of another interesting study on the effectiveness of radio in producing memory for commercial announcements in radio programs were released last week by Edward Petry, Inc., station representatives. The question which this research and its predecessors have attempted to answer was whether listeners remember the commercial aspects of what comes in over their loud-speakers. It is this feature of a sponsored program for which the advertiser pays and in which he is keenly interested. Present methods of assessing program popularity only, fail to show the sponsor the extent to which his commercial message registers with the listener.

In order to avoid the complications of familiar programs, familiar voices and other non-commercial features, spot announcements were used for the study as "commercials in their purest, most detachable form." This procedure enabled the researchers to detach the commercial announcement from other features of an ordinary broadcast and to test its recognition value alone.

By using a prebroadcast test of the spots to be used in the survey, it was possible to estimate the number of listeners who thought they had heard the test announcements (even before they had been used). This was an important and valuable aspect of the study because, since familiar brand names were used in the test, this prebroadcast determination enabled the researchers to assign a more precise estimate to the net recognition value of the announcement being tested.

The first broadcasts of the test announcements were made on January 1, 1946. One and two months later tests of recognition were administered—to two different groups of families. The "net recognition" value of the announcements persisted relatively unchanged over the two-month period. Recognition was tested by playing back the announcements by means of an electric play-back mechanism in the homes of the families interviewed. Only one member of each family participated.

As a result of this test, the authors state that the "net recognition" value of these announcements varies between 27% and 51% at the end of one month, and their tables show that this effect persists into the second month, ranging from 26% to 61% after the longer period. In general, low in recognition value at the end of one month are also low at the end of two months.

In general, the results of this study tend to confirm the findings of earlier researchers in this field. Aurally perceived material (commercial or otherwise) has a high recognition value when properly presented. The results should be very useful, when checked against copy, should be helpful to the copywriter and can lead the way to creating the "do's" and "don'ts" of the writing of acceptable and retainable copy.

As far as determining the return for his money, this study may leave the sponsor a little disappointed since it takes only the first step in determining the effectiveness of radio advertising. Ability to recognize the content of a previously heard commercial is less than complete assurance that the commodity advertised will be the one next purchased by the listener. It is assumed that the authors of this study would be the first to admit this point. In the second place, inability to recognize the content of a previously heard commercial is no guarantee that the listener will not be predisposed to purchase the commodity advertised when the next opportunity occurs.

What it boils down to is this: We can ask a number of questions of our listeners to determine the effectiveness of our commercial messages. We can ask, "Which of these cigarette advertisements do you remember hearing on the radio?" or we can ask "Which brand of cigarettes do you have in your pocket now?" We can ask, "Which of these flour commercials do you remember hearing or liking or preferring?" or we can ask "Which brand of flour do you have in your pantry now?" When there has been a high correlation established between the answers to these two types of questions, the answer to either one is sufficient. Until then the effectiveness of radio advertising will be measured by the particular question asked.

MIDDLEBROOKS AWARDED LEGION OF MERIT

Secretary of the Navy James Forrestal has informed NAB's new director of engineering, James L. Middlebrooks, that he has just been awarded the Legion of Merit for services performed during his tour of duty with the navy.

The citation awarding the medal points out that "Commander Middlebrooks rendered invaluable service toward the great technical improvement established and maintained in the Naval Communication Service and in other electronic activities through efficient use (Continued on next page)
of new antenna systems, application of modern electronic circuits and application of commercial techniques.

"By his leadership, Commander Middlebrooks contributed materially to the successful prosecution of the war and upheld the highest traditions of the United States Naval Service."

Public Interest Programming

POTATOES TO THE RESCUE
(Story from OWMR)

While much of the country's wheat is being distributed abroad to alleviate famine conditions in Europe and China, and bread and other wheat products are necessarily somewhat short in this country, we are fortunate in having an unusually large supply of potatoes. Potatoes are plentiful and available now practically all over the country.

As part of the Government Famine Emergency Program—which NAB members have been supporting so generously—radio station managers will be called on to cooperate in informing the public of the availability of potatoes and of their excellence as a substitute for bread during the shortage.

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 15-21, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Home Canning

Since a considerable part of our customary American food supply is going overseas for the relief of hunger-ridden million, we are currently experiencing—and will continue to experience—a scarcity of certain foods such as wheat products, fats and oils. Housewives of America are urged to help compensate for this scarcity and insure their families' food supply this coming winter by canning, preserving and storing as much of the so-called "alternate foods" as possible. At a time when food is so vital to the continued peace of the world and the very existence of so many of its people, it is imperative that those of us fortunate enough to have food use it to the maximum advantage—which means home canning this summer. Under the circumstances, waste—either through failure to preserve our surplus garden yield, or doing it improperly—is unpardonable. Housewives, therefore, should be urged to remember that the following points are of top importance: (1) Can, preserve and store as much as possible from Victory Gardens. (2) When markets feature abundant supplies of locally grown, good-quality produce, suitable for home preservation, take advantage of the opportunity to build up food stocks for next winter. (3) Lay in supplies of containers and equipment early to enable manufacturers to gauge demand. (4) Conserve your sugar for canning purposes. Follow the wartime rule of 1 pound of sugar to 4 quarts of finished fruit. (5)

Use only safe, tested methods, backed by scientific research. Take no chances on accidents, spoilage, unnecessary loss of food value. Study methods recommended for different foods; get competent advice. Consider freezing, pickling, brining, drying and storing, as well as canning, for different types of produce. (Fact Sheet No. 24)

Building Our New Army

The Army's present recruiting drive may fail unless public attitudes can be changed and changed quickly. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent background campaign, for which its own resources are inadequate, to build prestige for the Regular Army in the public mind, and particularly in the minds of potential recruits, their families and their friends. Very bluntly, the objective of this campaign is to change the old attitude of Americans toward their Army. By explaining the purpose and the character of the new Regular Army being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, your program can help the Army's recruiting drive achieve the goal it seeks. The new American Army of today is a compact, carefully chosen group of skilled technicians. You must make sure that the young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of that peace for which thousands of young American couples and their friends put their country to war and upheld the highest traditions of the United Nations Organization. Point out that the new Regular Army soldier is a skilled technician—he works with advanced techniques and equipment in at least one of many specialized fields, and his competence equals and often exceeds the skill demanded in some of the best paid civilian trades. Illustrate the kind of work they do as guardians of peace and architects of our country's safety. (Fact Sheet No. 2-B)

Housing—"Boom and Bust?"

America's critical housing shortage constitutes one of the most potentially explosive inflationary situations of the recovery period. A bold and vigorous program has been developed to whip that shortage. But even under that program the urgent demand for homes will far exceed the number that can be built for months to come. And in addition to the urgent demand by returning veterans and others, there are millions of Americans who would like to carry on their old homes or remodel if they could. Under existing conditions the threat of inflation in housing and building materials is more menacing than in any other section of the economy. Within limits people in urgent need of shelter are tempted to pay almost any price for it. It would be presumptuous for anyone to urge a man not to buy or build when he has the money and his family is without a place to live. However, it is in the interest of the Nation as well as the home-seeker that he be told of the dangers involved in buying or building at inflated prices. During the period when the demand for housing is abnormally high and production is low, there are two alternatives open to us—to start a "boom-bust" cycle by frantically bidding up the prices of the limited housing supply, or to put the brakes on housing inflation by postponing buying or building if we do not urgently need a new house and by securing expert advice if we do build or buy. Explain that during the period when the shortage is most acute there is serious danger of a housing inflation that would affect our whole economy. Suggest that families not urgently in need of a home consider waiting until later to buy or build, meanwhile saving and planning for the time when more homes can be built and held for future families. Strongly urge everyone who finds it necessary to buy or build today to secure expert advice and sound appraisals before doing so. (Fact Sheet No. 7-B)
HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 8. They are subject to change.

Monday, July 8

NEW—Lake Broadcasting Company, Inc., 6th & Broadway, Gary, Ind.—C. P. 1560 kc., 500 watts night, 1 KW day, unlimited.

Further Hearing Before the Commission in Room 6121

In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band.

To Be Held in Room 110, U. S. Courthouse Bldg. Foley Square, Center & Pearl Sts., New York, N. Y.

NEW—WBXN Broadcasting Co., Inc., New York City, N. Y.—For FM facilities.

NEW—WMCA, Inc., New York City, N. Y.—For FM facilities.

NEW—Frequency Broadcasting Corp., Brooklyn, N. Y.—For FM facilities.

NEW—Bernard Fein, New York, N. Y.—For FM facilities.

NEW—Unity Broadcasting Corp. of New York, New York, N. Y.—For FM facilities.

NEW—North Jersey Radio, Inc., Newark, N. J.—For FM facilities.

NEW—Atlantic Broadcasting Co., Inc., Newark, N. J.—For FM facilities.

NEW—Board of Missions of Church Ext's. of the Methodist Church, New York City, N. Y.—For FM facilities.

Tuesday, July 9

NEW—Fort Wayne Broadcasting, Inc., Fort Wayne, Ind.—C. P. 1050 kc., 1 KW day, daytime.

NEW—Marion Radio Corp., Marion Ind.—C. P. 1030 kc., 1 KW day, daytime.

Before the Commission En Bane

WXYZ: WOOD—Geo. W. Trendle et al. (Transferors); American Broadcasting Co., Inc. (Transferee).—For transfer of control of King Trendle Broadcasting Corporation.

WENR: WJZ: KGO: KECA: FM-Conditional Grant of PH-578—Edward J. Noble (Transferor); American Broadcasting Co., Inc. (Transferee).—For transfer of control.

Wednesday, July 10

WHLS—Herman Leroy Stevens and Harmon Leroy Stevens, doing business as Port Huron Broadcasting Company, Port Huron, Mich.—Renewal of license.

DOCKET CASE DECISIONS

The Commission announces its final Decision (B-241) granting the application of The Observer Radio Company for a new station at Orangeburg, South Carolina, to operate on 1450 kilocycles, 250 watts, unlimited time. This grant is contingent upon the filing within 30 days of an application specifying a transmitter site and antenna system which will comply with the Commission’s Standards of Good Engineering Practice. The provisions of Sections 3.55(b) and 3.60 of the Commission’s Rules as applied to the grant herein are waived to permit use of a cathode ray oscillograph as a modulation monitor and to permit operation without a frequency monitor (using commercial checks) until frequency monitors type-approved by the Commission are available. (Docket 6753)

At the same time, the Commission denied the applications of Orangeburg Broadcasting Corporation and the Edisto Broadcasting Company seeking the same facilities. (Dockets 6764 and 6801)

The Commission announces adoption of a Proposed Decision (B-250), looking towards the grant of the application of Lake Erie Broadcasting Company for a new station in Sandusky, Ohio, to operate on 1450 kilocycles, 250 watts, unlimited time (Docket 7004), and to deny the mutually exclusive applications filed by The Sandusky Broadcasting Company (Docket 7005), and The Bay Broadcasting Company (Docket 7172) requesting the same facilities.

The Commission announces its final Decision (B-239) granting the application of Northern Radio, Inc., for a new station at Glens Falls, New York, to operate on the frequency 1450 kilocycles, 250 watts, unlimited time. The construction permit is conditioned upon the filing of an application by Great Northern Radio, Inc., for modification of permit specifying the exact transmitter site and antenna system and further conditioned on the installation of an approved modulation monitor when available. (Docket 6852)

At the same time, the Commission made final its denial of the application of Glens Falls Broadcasting Corporation seeking the same facilities. (Docket 6762)

Commissioner Jett voted in favor of a grant to the Glens Falls Broadcasting Corporation.

(Continued on next page)
RELAY APPLICATIONS GRANTED

KRLD Radio Corp., area of Dallas, Texas.—Granted CP for a new relay broadcast station to be used with standard station KRLD: frequencies: 156.75, 158.40, 159.50 and 161.10 mc.; 25 watts; subject to change in frequency assignment without advance notice of hearing. (B3-PRE-161)

MISCELLANEOUS ACTIONS

WJTN—James Broadcasting Co., Inc., Jamestown, N. Y.—Granted CP to install a new transmitter (Gates 250-C). (B1-P-4782)

KXLR—Ark. Airwaves Co., No. Little Rock, Ark.—Granted license to cover CP which authorized a new station to operate on 1300 kc., 500 watts night, 1 KW-LS, unlimited time (B5-L-1957); also authority to determine operating power by direct measurement (B3-Z-1776). Licensee is granted a waiver of Sec. 3.55(b) and 3.60 of the Commission's rules, conditions.

KROP—Broadcasting Corp. of America, Brawley, Calif.—Granted modification of CP which authorized a new station to operate on 1300 kc., 500 watts night, 1 KW-LS, unlimited time (B5-L-1957); also authority to determine operating power by direct measurement (B3-Z-1782). Licensee is granted waiver of Sec. 3.55(b) and 3.60 of the Commission's rules, conditions.

WAGC—Tenn. Valley Broadcasting Co., Chattanooga, Tenn.—Granted CP to install new transmitter (Collins 300-G). (B3-P-4766)

WLAN—Peoples Broadcasting Co., Lancaster, Pa.—Granted modification of CP which authorized a new station, to make changes in vertical antenna and install FM antenna on top, change transmitter location from Beulah Hill Road, 600 feet East of Intersection of Waubank Road, Lancaster, to Gypsy Hill Road near Rocky Spring Road, Lancaster, speed location as 248 North Queen St., Lancaster, and extend commencement and completion dates from 5/7/46 and 11/7/46, respectively, to 60 days after grant and 180 days thereafter. (Action 6/28).

KFVD—Standard Broadcasting Co., Los Angeles, Calif.—Granted modification of CP which authorized a new transmitter and antenna, increase in power and change transmitter location, for extension of completion date to 10/31/46. The authority is granted subject to express condition that permittee shall satisfy legitimate complaints of blanketing within the 250 mv contour, including external cross modulation. (B5-MP-1959)

KFXD—Frank E. Hurt and Son, Boise, Idaho.—Adopted an order granting application for construction permit (Docket 9652) to change frequency, from 1230 to 580 kc., increase power from 250 watts to 1 KW; make changes in transmitting equipment, install DA for day and night use, subject to the condition that appropriate application be filed for modification of antenna to afford greater protection to stations KJL, Fresno, and CKUA, Edmonton, Alberta, and subject to the further condition upon approval by the CAA of the proposed transmitter site.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted construction permit to install a new vertical antenna. (B1-P-4576)

WFTL—Ft. Lauderdale Broadcasting Co., Ft. Lauderdale, Fla.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at So. side of SE 15th Street at Stranahan River, Ft. Lauderdale, and Foot of SE 15th St., Ft. Lauderdale, respectively. Permittee is granted a waiver of Sec. 3.50 of the Rules; conditions.

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted extension of special temporary authority to retransmit the transmissions of High Frequency Broadcast Stations WDRF-FM and WGTI for a period beginning July 5 and ending in no event later than Aug. 3, in order to continue rebroadcasting experiments.

WBAM—Bamberger Broadcasting Service, Inc., New York City.—Granted CP to change frequency to Channel No. 243, 965 mc.; make changes in transmitting equipment; install new antenna; specify coverage as 9,860 sq. mi., class of station: Metropolitan; effective radiated power: 15 KW; antenna height: 800 ft. (Continued on next page)
550 ft.; approved types of frequency and modulation monitors to be used. (B3-PB-733)

WEIT—Loyola University, area of New Orleans—Granted CP to make changes in transmitting equipment of relay station and increase power from 7 to 15 watts. (B3-PRE-464)

WEKY—The Yankee Network, Inc., area of Mt. Washington, N. H.; WEOL—Boston, Mass.—Present licenses for relay stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending Sept. 1, 1946.

WGXS—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted construction permit for reinstatement of construction permit (B5-PVR-88 as mod.), which authorized a new exp. television broadcast station on frequencies to be assigned by Chief Engineer, aural power 200 watts, visual power 400 watts (peak), emission-visual: A5-Aural; Special for FM, and hours of operation in accordance with Sec. 4.4, and to specify frequency as channels #2 (614-60 mc.) and #9 (186-192), and to change transmitter location from 1st Natl. Bank Bldg., 1st So. and Main St., Salt Lake, to 155 So. Main St., Walker Bank Bldg., Salt Lake City. Granted on an experimental basis only; condition. (B5-PYB-168)

WIUN—State of Wisc., State Radio Council, Madison, Wis.—Construction permit for a new non-commercial educational broadcast station, to increase the antenna height by 50 ft. Channel: 91.5 mc. (No. 218); 9.5 KW.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

630 Kilocycles

WJMS—Upper Michigan-Wisconsin Broadcasting Co., Inc., Ironwood, Mich.—Construction permit to change frequency from 1350 to 630 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for day and night use and change transmitter location.

790 Kilocycles

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Construction permit to increase power from 5 KW day and 1 KW night to 5 KW day and night, and make changes in directional antenna for night use. Amended re changes in directional antenna pattern.

820 Kilocycles

NEW—WLJG, Inc., Laurens, S. C.—Construction permit for a new standard broadcast station to be operated on 820 kc., power 250 watts and daytime hours of operation. Amended to change transmitter location and to designate studio.

850 Kilocycles

NEW—Champlain Valley Broadcasting Corp., Albany, N. Y.—Construction permit for a new standard broadcast station to be operated on 850 kc., power 10 KW, directional antenna for day and night operation and unlimited hours of operation. Amended re additional directors and stockholders.

NEW—A. J. Fletcher, Greensboro, N. C.—Construction permit for a new standard broadcast station to be operated on 830 kc., power 1 KW and daytime hours of operation. Amended to change name of applicant from A. J. Fletcher to Capitol Broadcasting Co., Inc.

900 Kilocycles

WKAX—Conrier Broadcasting Service, Inc. Birmingham, Ala.—License to cover construction permit (B3-P-3861, as modified) which authorized a new standard broadcast station.

WKAX—Conrier Broadcasting Service, Inc., Birmingham, Ala.—Authority to determine operating power by direct measurement of antenna power.

920 Kilocycles

KOLO—Reno Broadcasting Co., Reno, Nev.—Modification of construction permit (B5-P-3720, which authorized a new standard broadcast station) to install new transmitter and to change from employing directional antenna night only to directional antenna for day and night use.

940 Kilocycles

NEW—Plains Empire Broadcasting Co., Amarillo, Texas—Construction permit for a new standard broadcast station to be operated on 1320 kc., power 500 watts, 1 KW-LS, directional antenna for night use and unlimited hours of operation. Amended to change frequency from 1230 to 940 kc., power of 500 watts 1 KW-LS to 1 KW day and night, changes in directional antenna for day and night use and change transmitter location.

950 Kilocycles

NEW—Queen City Broadcasting Co., Inc., Boise, Idaho—Construction permit for a new station to be operated on 600 kc., power 1 KW, directional antenna for night use and unlimited hours of operation. Amended to change frequency from 600 to 950 kc., changes in directional antenna for day and night use and change transmitter location.

980 Kilocycles

NEW—Charles Wilbur Lamar, Jr., Morgan City, La. (P. O. 3200 Scenic Highway, Baton Rouge, La.)—Construction permit for a new standard broadcast station to be operated on 980 kc., power of 250 watts and unlimited hours of operation.

1060 Kilocycles

NEW—John H. Schultz, Marshall True, Paul A. Wnorowski, Marvin M. Mollring and John W. Lewis, Jr., d/b/a WBEL Broadcasting Co., Belleville, III.—Construction permit for a new standard broadcast station to be operated on 1060 kc., power 250 watts and daytime hours of operation. Amended to add Joseph H. Yaegel as member of partnership.

1080 Kilocycles

NEW—West Virginia Radio Corp., Pittsburgh, Pa. (P. O. 446 Spruce St., Morgantown, W. Va.)—Construction permit for a new standard broadcast station to be operated on 1080 kc., power of 1 KW and daytime hours of operation.

NEW—Lake Superior Broadcasting Co., Duluth, Minn.—Construction permit for a new standard broadcast station to be operated on 1080 kc., 10 KW for day and night use, DA and unlimited hours of operation. Amended to change power from 10 KW to 5 KW-10 KW-LS, change type of transmitter, changes in directional antenna and change transmitter location.

1150 Kilocycles

NEW—Northwestern Ohio Broadcasting Corp., Lima, Ohio—Construction permit for a new standard broadcast station to be operated on 1150 kc., power 1 KW, direct—

(Continued on next page)
1180 Kilocycles

WLDS—Milton Edge and Edgar J. Korsmeyer, d/b as Edge and Korsmeyer, Jacksonville, Ill.—Construction permit to increase power from 250 watts to 1 KW and install new transmitter.

1230 Kilocycles

NEW—B. J. Barrier, Jr., H. T. Barrier, H. P. Holmes, Yazoo City, Miss. (P. O. 115 East Jefferson)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

KANA—Mosby’s Inc., Anaconda, Mont.—Modification of construction permit (B5-P-4511, which authorized a new standard broadcast station) to change type of transmitter.

NEW—McEvoy Broadcasting Co., In or Nr. Roswell, N. M. (P. O. 110 North Main St., Roswell, N. M.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1290 Kilocycles

WNBF—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Modification of license to change name of licensee to Clark Associates, Inc.

1340 Kilocycles

KVIC—Radio Enterprises, Inc., Victoria, Texas—Transfer of control of licensee corporation from Morris Roberts to J. G. Long through sale of 250 shares of common stock.

1400 Kilocycles

KVOP—W. J. Harpole & J. C. Rothwell, A Partnership, Plainview, Texas—Voluntary assignment of license to W. J. Harpole.

1420 Kilocycles

KUJ—KUJ, Inc., Walla Walla, Wash.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and directional antenna for night use.

1450 Kilocycles

WPBP—Jose M. Sculpveda and Jose M. Rodriguez Quinones, d/b as Paradise Broadcasting Co., Mayaguez, P. R.—Modification of construction permit (B4-P-4168, which authorized a new standard broadcast station) to change transmitter and studio locations.

WHSC—Hartsville Broadcasting Co., Hartsville, S. C.—Modification of construction permit (B3-P-4222, as modified, which authorized a new standard broadcast station) to change transmitter and studio locations and extend commencement and completion dates.

NEW—Palouse Empire Radio, Inc., Moscow, Idaho—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Bay State Beacon, Inc., Brockton, Mass.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power 250 watts and unlimited hours of operation. Amended re change in directors and stockholders.

1490 Kilocycles

WLOE—Douglas L. Craddock, Leakesville, N. C.—Modification of construction permit (B3-P-4405, which authorized a new standard broadcast station) for changes in transmitting equipment, for approval of antenna and approval of transmitter and studio locations.

NEW—Roy C. Kelley, Muskegon, Mich. (P. O. 6 Fountain St., N. E. Grand Rapids, Mich.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

KVWC—Northwestern Broadcasting Co., Vernon, Texas—Modification of construction permit (B3-P-3896, which authorized installation of new vertical antenna with FM antenna mounted on top) to extend completion date.

1510 Kilocycles

WMRP—Methodist Radio Parish, Inc., Flint, Mich.—Modification of construction permit (B2-P-3836, which authorized a new standard broadcast station) for approval of antenna, for approval of transmitter location and change studio location.

NEW—San Diego Broadcasting Co., San Diego, Calif.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power 5 KW DA and unlimited hours of operation. Amended to change power from 5 KW to 1 KW, 5 KW-LS, directional antenna day and night use.

1560 Kilocycles

WQXK—Interstate Broadcasting Co., Inc., New York, N. Y.—Construction permit to make changes in transmitting equipment and increase power from 10 to 50 KW (DA). Amended to change type of transmitter.

1590 Kilocycles

NEW—Caprock Broadcasting Co., Lubbock, Texas—Construction permit for a new standard broadcast station to be operated on 1590 kc., power 1 KW, directional antenna for day and night use and unlimited hours of operation. Amended to make changes in directional antenna and change transmitter location.

1600 Kilocycles

NEW—United Broadcasting Co., Inc., Montgomery, Ala.—Construction permit for a new standard broadcast station to be operated on 1600 kc., power 1 KW, and unlimited hours of operation. Amended to install directional antenna for night use and change transmitter location.

FM APPLICATIONS ACCEPTED FOR FILING

Daily News Publishing Co., Beloit, Wis. (P. O. 413-415-417 Pleasant St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC, coverage of 8070 square miles.

Frequency Broadcasting Corp., Brooklyn, N. Y.—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on 37.7 mc., and coverage of 14,400 square miles. Amended to change coverage from 14,400 to 9,000 square miles, population from 11,900,000 to 12,200,000, frequency from 37.7 mc. to “to be assigned,” change frequency from 37.7 mc. to “to be assigned,” coverage from 8,857.6 to 11,790 square miles, transmitter location from Randallstown, Md., to Baltimore, Md., and make changes in antenna system, changes in corporate structure, officers, directors and stockholders.

Hearst Radio, Inc., Baltimore, Md.—Construction permit for a new high frequency FM (Metropolitan) broadcast station to be operated on 43.9 mc., and coverage of 8,857.6 square miles. Amended to specify population of 2,044,605, change frequency from 43.9 mc. to “to be assigned,” coverage from 8,857.6 to 11,790 square miles, transmitter location from Randallstown, Md., to Baltimore, Md., and make changes in antenna system.

North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Construction permit for new high frequency FM (Metropolitan) broadcast station to be operated on 43.9 mc., and coverage of 33,200 square miles. Amended to specify type of transmitter, population of 1,994,236; change frequency from 43.9 mc. to Channel #21.

(Continued on next page)
W9XEK—Courier-Journal & Louisville Times Co., Louisville, Ky.—Modification of construction permit (B2-P6-26), as modified, which authorized change in frequency, transmitter, emission, antenna and increase power for extension of completion date.

KUSC—University of Southern California, Los Angeles, Calif.—Modification of construction permit (B5-PED-31 as modified, which authorized a new non-commercial educational broadcast station) for extension of completion date to specify frequency as Channel #219, 91.7 mc., to change type of transmitter and make changes in antenna system.

WMOL—Bruff W. Olin, Jr., G. Decker Frenche and Howard P. Eckerman, a partnership d/b/a as Moline Broadcasting Co., Moline, Ill.—Modification of construction permit (B4-P-3678, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter and studio locations.

WMXST—Sherman Metz, Sherman, Texas.—Modification of construction permit (B1-PVR-142, as modified) which authorized a new experimental television broadcast station for extension of completion date.

APPLICATIONS TENDERED FOR FILING

NEW—Balboa Radio Corp., San Diego, Calif.—Construction permit for a new standard broadcast station to be operated on 740 kc, 5 kw, daytime hours of operation and directional antenna for day.

WTAX—TAX, Inc., Springfield, R.I.—Permission to transfer control of stock owned by Jay A. Johnson to Commodore Broadcasting, Inc. (1240 kc.)

Capitol Broadcasting Corp., Indianapolis, Ind.—Construction permit to change frequency from 1310 to 940 kc., power from 1 kw, 5 kw-LS to 5 kw day and night using directional antenna and approval of transmitter location and antenna system.

NEW—Louis F. Leurg and F. F. McNaughton, d/b as The Las Cruces Broadcasting Co., Las Cruces, N. M.—Construction permit for a new standard broadcast station to be operated on 1380 kc., power 250 watts and unlimited hours of operation.

KIDO—Georgia Phillips, d/b as Boise Broadcast Station, Boise, Idaho—Construction permit to change power from 1 kw, 2 kw-LS to 5 kw, install new transmitter and directional antenna for day and night use and change transmitter location. (1380 kc.)

WKIX—Inter-City Advertising Co., Columbus, S. C.—Construction permit to change frequency from 1290 to 1320 kc., power from 250 watts to 1 kw, install new transmitter and directional antenna for night use.

WOPH—Radiophone Broadcasting Station WOPH, Inc., Bristol, Tenn.—Construction permit to change frequency from 1190 to 1290 kc., power from 250 watts to 500 watts, 1 kw-LS, install new transmitter and directional antenna night.

NEW—Del Rio Broadcasting Co., a partnership consisting of James A. Clements, Richard J. Higgins, Thomas O. Mathews and Joe H. Torbett, Del Rio, Texas—Construction permit for a new standard broadcast station to be operated on 1230 kc., power 250 watts and unlimited hours of operation.

NEW—Blue Bonnet Broadcasting Corp., Fort Worth, Texas—Construction permit for a new standard broadcast station to be operated on 700 kc, power 1 kw and daytime hours of operation.

NEW—Weldon Lawson, Seguin, Texas—Construction permit for a new standard broadcast station to be operated on 1300 kc, power 250 watts and unlimited hours of operation. (Continued upon next page)

KHBQ—Hawaiian Broadcasting System, Ltd., Hilo, Hawaii—Construction permit to change frequency from 1290 to 970 kc., power from 250 watts to 10 kw, install new transmitter and change transmitter and studio locations.
WKVM—American Colonial Broadcasting Corp., Arecibo, P. R.—Construction permit to change frequency from 1230 to 1070 kc., power from 250 watts to 10 KW, install new transmitter and change transmitter location and install directional antenna for day and night use. (Contingent upon transfer of control of WKVM.)

NEW—Arlington-Fairfax Broadcasting Co., Arlington, Va.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 1 KW and daytime hours of operation.

NEW—Anderson Broadcasting Co., Inc., Anderson, S. C.—Construction permit for a new standard broadcast station to be operated on 860 kc., power of 1 KW and daytime hours of operation.

NEW—G. Lester Hash, N. Joe Rahall, Fred William Simon, tr. as The Bluefield Broadcasting Co., a partnership, Bluefield, W. Va.—Construction permit for a new standard broadcast station to be operated on 1210 kc., power 250 watts and unlimited hours of operation.

NEW—Johnston Broadcasting Co., a partnership (George Johnston and George Johnston, Jr.), Birmingham, Ala.—Construction permit for a new standard broadcast station to be operated on 850 kc., power 1 KW, 5 KW-LS, unlimited hours of operation and directional antenna for night use.

NEW—Byrne Ross, d/b as Oklahoma City Broadcasting Co., Oklahoma City, Okla.—Construction permit for a new standard broadcast station to be operated on 1140 kc., power 1 KW and daytime hours of operation.

NEW—Miami Broadcasting Co., Miami, Okla.—Construction permit for a new standard broadcast station to be operated on 910 kc., power 1 KW, unlimited hours of operation and directional antenna for night use.

Federal Trade Commission Actions

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Athea Research and Processing Laboratory—Misrepresentation of the properties of and results obtained from a hand lotion designated Athea is alleged by the Commission in a complaint against Haswell T. Bonfield and Theo. Trecker, trading as Athea Research & Processing Laboratory, 342 North Water Street, Milwaukee, and their advertising representative, Bert S. Gittins, 730 North Broadway, Milwaukew. Gittins allegedly aids in the preparation and dissemination of advertisements for Athea. (5450)

Metal Lath Manufacturers Association, 1355 Ontario Street, Cleveland, Ohio, and its ten member manufacturers are charged in a Commission complaint with fixing and maintaining, by cooperative action, identical delivered prices and terms of sale for metal lath used in the building construction industry. (5449)

Rubber Manufacturers Association, Etc.—A complaint alleging conspiracy to fix prices has been issued by the Commission against 37 manufacturers or distributors of rubber heels, rubber soles and accessory products.

Trade associations named as respondents are The Rubber Manufacturers Association, Inc., Heel & Sole Division, 444 Madison Avenue, New York, and George Flint, chairman of the division; Rubber Heel & Sole Manufacturers Association, 551 Fifth Avenue, New York, and R. S. Crawford, general director; and Connecticut Leather & Findings Association, Inc., 242 Bank Street, Waterbury, Conn., and Harry Diamond, secretary. Members of the first two associations are manufacturers and distributors. The last named is an association of Connecticut jobbers and has some associate members who are manufacturers. (5448)

CEASE AND DESIST ORDER

Philip Shlansky & Bro.—An order issued by the Commission directs that the co-partnership of Philip Shlansky & Bro., 500 Seventh Avenue, New York, manufacturer of women's coats and other garments, discontinue representing, in any manner, either through words or pictorial representations, that textile fabric products they sell are made from the peltries, fur or hair of fur-bearing animals. (5274)

STIPULATIONS

The Commission issued no stipulations during the past week.
NAB Opposes FM Reservations At FCC Hearing

Briefs and Testimony Argue That Rule Is Illegal and Would Hamper FM Expansion

NAB, CBS, NBC, Zenith Radio Corp., the National Maritime Union, radio stations and applicants filed briefs with the FCC or presented oral argument on Friday (12) in opposition to the commission's proposal to reserve every fifth FM channel for one year.

In its argument, NAB stated that the rule is illegal and contrary to the public interest and asked that an additional portion of the spectrum be indicated by the commission for the expansion of FM.

NAB pointed out in its brief that the Communications Act provides for the widest possible allocation of broadcasting facilities to qualified applicants to assure maximum effective broadcasting service for the listening public. When frequencies are available, NAB argued, the Act requires the FCC to grant facilities to qualified broadcasters who apply for a license.

The brief stated further that the Act provides that full hearings be afforded to applicants for broadcasting licenses. By proposing to reserve allocated and available frequencies, the brief went on, the FCC would at the same time anticipate issues and decide them without considering the merits of applications.

In oral testimony, NAB's General Counsel, Don Petty, was the first spokesman. In addition to questioning the commission's authority, he stated that the proposed reservation would retard the normal development of FM broadcasting.

Theodore Pierson, attorney for various radio interests, also questioned the legal authority of the commission under the Communications Act to reserve allocated frequencies from assignment.

In requesting that the (Continued on page 542)

Strategy Committee Discusses Inexperienced Broadcasters' Entry Into Radio Field

The Special NAB Strategy Committees authorized by the Board of Directors met in Washington today to consider the many problems incident to the entry into the broadcast business of thousands of new broadcasters, many of them unfamiliar with the problems involved in the business.

The committee, after lengthy discussion, formulated a series of recommendations to be submitted to the Board of Directors at its meeting next month. NAB President Justin Miller, who presided, expressed himself as "well pleased" with the careful and thoughtful consideration which the committee had given to the subject.

(Continued on page 5142)

PR Executive Committee Reviews Policy, Formulates Board Recommendations

The NAB Public Relations Executive Committee met in Washington Friday (12) to formulate recommendations to be presented to the Board of Directors respecting immediate and long-range public relations policy. The platform of public relations prepared by E. M. Kirby, former NAB Public Relations Consultant, was reviewed in detail.

Immediate steps to improve the printed publicity material gotten out by NAB were endorsed. Likewise, activity was planned to encourage and assist independent publishers in featuring articles and publications based upon fact and the constructive part which radio broadcasting performs in American cultural and economic life.

Dorothy Lewis, NAB Coordinator of Listener Activity, reported that the (Continued on next page)
There are more requests than there are frequencies permitting complete service from both independent stations to qualified applicants, much time would be saved in that a number of hearings would then be available. He said that by opening all available frequencies to the public, the development of FM transmission would be accelerated. The reservation rule would result in further retarding the development of FM. NBC attempted to obtain FCC consent to introduce three new networks, one of which would be a 100,000-watt station in New York City. The commission denied the application, directing that the additional space in the spectrum for FM be allocated for the present FM band until the commission could make a proper allocation decision on the reservation rule. The commission denied the application of a station in New York City for the purpose of providing additional space in the spectrum for FM.

The NAB opposed additional space for FM, Mr. Petty said that NAB did not recommend any specific band. He suggested that a decision should be made by the commission.

CBS attempted to obtain consent to introduce their statement which proposed that channels 5 and 6 be reserved for FM. The commission denied the request. The FCC then denied a CBS motion that a decision on the FM reservation rule be withheld until the commission had considered, in a proper allocation hearing, expansion of the present FM band.

After the commission had limited the issue under discussion to withholding channels, NBC argued only that the reservation rule would result in further retarding the development of FM transmission. The network representative pointed out that in some areas there were more requests than there are frequencies available. He stated that by opening all available frequencies to qualified applicants, much time would be saved in that a number of hearings would then be unnecessary.

Arguing for additional channels, NAB suggested in its brief that present FM allocations are insufficient to permit complete service from both independent stations and existing networks. The brief urged that plans be made to assure the widest possible service by providing enough FM channels so that any qualified applicant would have an opportunity to serve his community.

(See Legal Department for complete text on NAB brief.)

STRATEGY COMMITTEE DISCUSSES INEXPERIENCED BROADCASTERS’ ENTRY INTO RADIO FIELD

(Continued from page 541)

Those present in addition to President Miller were Edgar Bill, WMWD, Peoria, Illinois; Frank Stanton, CBS, New York City; Wayne Coy, WINX, Washington, D. C.; Louis G. Caldwell, Washington, D. C.; Paul W. Morency, WTIC, Hartford, Connecticut; Don S. Elias, WWNC, Asheville, North Carolina; Horace Lohnes, Washington, D. C. From the NAB executive staff those present were A. D. Willard, Jr., executive vice president; Don Petty, general counsel; Ted Heffron, assistant to the president, and C. E. Arney, Jr., secretary-treasurer.

Broadcast Advertising

WNHC EXPOSITION FOR BETTER LIVING

A station promotion which started out as a home show and enlarged into an “Exposition of Better Living” resulted in 85 participating sponsors for WNHC, New Haven, Conn.

The station leased the largest auditorium available, the state armory, and sold booths to exhibitors representing a variety of retail and industrial services such as household appliances, airplanes, sailboats, steelcraft cabin cruisers, Talon fasteners, building materials, appliances, furniture, rugs, draperies, upholstering, beverages, and everything that could contribute to better living.

Many exhibitors went to extra expense to install elaborate displays, occupying two and three booths. Each booth was 10 feet square and sold at $125.00 each.

In addition to promoting the exposition over the station, James T. Milne, WNHC general manager, set up a $2,000 budget for local newspaper advertising. However, the local newspaper refused to accept the station’s advertising copy and some of the merchants felt the exposition would fail, but the final results were quite the contrary. Station hypoed its promotion campaign to 15 daily plugs, added programs promoting the event and bought newspaper space in local weekly papers and in dailies in surrounding cities. Car cards and dasher boards on the outside of street cars were used in the all-out promotion which was constantly identified as the “WNHC Exposition of Better Living.”

The exposition lasted six days and attracted 50,000 people. On the final day, a hot Saturday, 20,000 persons turned out despite the weather. Admission was 25¢. Each exhibitor received 200 free tickets for his customers.

Prizes given away included a 1946 Ford two-door sedan, a gas range, combination radio and phonograph console, household furnishings, etc.

(Continued on next page)
WNHC installed a glass-enclosed broadcasting studio mounted on a platform three feet above the armory floor. In addition to presenting many of the station's artists and orchestra, announces with portable mikes interviewed visitors and sponsors. A sound system carried all broadcasts to the throng-packed armory.

The promotion of the station exposition was a medium for displaying broadcasting's influence to the entire area. The business and industrial leaders, as a result, have a higher regard for radio as an advertising medium. A number of additional regular clients are expected to sign with the station as an aftermath of the exposition. The promotion netted WNHC a good profit and a big increase in audience. It is to become an annual event.

**Research Department**

**APRIL SET PRODUCTION 11% HIGHER THAN 1941 AVERAGE, CENSUS BUREAU REPORTS**

On July 5th the Census Bureau released figures for the production of radio sets for April 1946. This is a continuation of the radio section of its "Facts for Industry" (REPORTS, p. 485). During April, 1,135,128 sets were manufactured. This was 11% over the 1941 monthly average and 24% over the March 1946 production. Again, the bulk of the sets was in home radios—788,144 as compared with 636,570 for March 1946. The production of radio-phonograph combinations was 36% over the 1941 monthly production figures, while battery-operated and automobile radios, although gaining over production for the preceding month lagged well behind when compared with the production of these models in 1941.

As in the previous issue of "Facts for Industry," the statement is made that "There was no activity in FM sets or FM converters during April." That this does not indicate complete inactivity in FM, however, is shown by the following figures:

<table>
<thead>
<tr>
<th>Radio-phonograph combinations (AM-FM and Television wired)</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 1946— None</td>
</tr>
<tr>
<td>February 1946— None</td>
</tr>
<tr>
<td>March 1946— None</td>
</tr>
<tr>
<td>April 1946— 990</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Shipment values of &quot;all other&quot; sets (includes AM-FM sets, television sets, recorders and radio chassis) were grouped together to avoid the disclosure of the operations of individual companies.</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 1946—$ 49,512</td>
</tr>
<tr>
<td>February 1946— 31,760</td>
</tr>
<tr>
<td>March 1946— 27,525</td>
</tr>
<tr>
<td>April 1946— 420,860</td>
</tr>
</tbody>
</table>

The Census Bureau believes these figures "represent substantially complete coverage of the industry."

**1946 CENSUS OF MANUFACTURES KILLED BY CONGRESS**

The possibility of a Census of Manufacturers for 1946 disappeared into thin air last week when the House reaffirmed a Senate action in deleting the $17,000,000 from the current Census appropriation necessary to conduct the survey and to make the Census of Business and Manufactures every five years. As things stand now the Census of Business will next be made in 1950.

The action is a severe blow to marketing and research activities because it will be necessary to continue on a basis of estimates rather than a complete and accurate census. Motives behind this denial by Congress have been reported as many and varied. They range all the way from a Congressional attempt to scuttle the program of the Secretary of Commerce to the contention that a Census of Manufactures would be out of date before it was completed due to the extremely fluid condition of business at the moment.

**Small Market Stations**

**MUTUAL'S COOPERATIVE PROGRAM SELLING IS A COOPERATIVE VENTURE**

Fulton Lewis, Jr., Mutual co-op feature, has proved to be a popular vehicle for station sales departments. The commentator is now sponsored on 193 MBS stations.

The effectiveness of a co-op program is shown in the 160% increase in the sale of Mexsana (Plough, Inc.) in two years of advertising over WOR, New York. There are hundreds of other success stories for this and other MBS co-ops on large and small stations across the nation.

B. J. Hauser, Mutual's director of cooperative programs, reveals that the network has plans for increasing its line-up of eleven co-op programs for local sponsorship.

In supplying information for the NAB Small Market Stations Division study of this type of commercial programming, Sally Raynor of the Mutual Cooperative Program Department reports:

"An analysis of the more than 500 cooperative programs (Continued on next page)
How the Stations Sell Co-ops

"That Mutual stations are finding Co-ops a profitable type of operation is borne out by letters received by the Cooperative Program Department. R. B. McAlister, general manager, of KICA, Clovis, New Mexico, explains it this way 'What's behind this success in selling Mutual Co-op programs? In the first place, we made our first concerted effort to sell them. Secondly, we had carried most of the programs sustaining long enough for them to stand on their merits. Finally, we have selected sponsors whose products are sold to the persons who are interested in the broadcasts they sponsor'.

"Jim Ownby, of WMJM, Cordele, Georgia, has this to say, 'The Cooperative Department at Mutual makes it a very simple task for small market stations such as WMJM to bring to the local advertiser a news program, a sports feature or a woman's program at a cost that is in line with local rates. All cooperative programs available to this station have been sold. What we have done in selling these is actually the result of the excellent showmanship built into the cooperative program itself. It stands to reason that an advertiser wants all his money can buy, and a nationally known news commentator for example is a most inviting and very saleable type of program'.

"Doyle Cain of KFXD, Nampa, Idaho, writes, 'We make a special effort here at KFXD to sell co-op programs for several reasons. First, because a co-op usually is a "good clean account." By that we mean the servicing of the account is cut by almost 50%. Most of the cost of the cooperative is absorbed in reducing the work of program and production. Second, we have found sponsors very willing to tie in their local business to the popularity of a nationally known person. We always emphasize the importance and popularity of the co-op talent and the fact that prepared publicity including mats, pictures, promotional announcements and sometimes show cards are available at cost to the local sponsor of a co-op program'.

"From John H. French, general manager of WBHF, Cartersville, Georgia, 'Clients in this section of the country—and I know this is equally true in other sections—are anxious to link their firm names with figures that enjoy national reputations. All I have to do is mention that I have available such personalities as Fulton Lewis, Jr., Frazier Hunt, Cedric Foster, etc. and the client automatically sees his name in equal billing with one of the above mentioned. I can truly say it is the personal appeal of these figures that makes the sale. I would also like to go on record as saying that these Mutual Cooperative Programs are the greatest help to station sales that I have ever encountered. Congratulations to Mutual for supplying its member stations with such help'.

Co-ops for National Spot

"Though, as we said before, the prime function of a co-op is to supply local concerns with outstanding radio personalities, co-ops also represent an ideal medium for the national advertiser who wants (a) to concentrate his selling efforts in selected markets where the potential is greatest; (b) to give additional selling help in certain areas where it is needed; (c) to conduct a test campaign in one, two, three or more selected cities. On a cooperative basis, this advertiser, like the strictly local sponsor, can buy a live network show in any number of individual markets and pay only a pro-rated share of the talent fee. In this way, he is assured of the prestige and major audience of a network program at a fraction of the overall cost. Regional advertisers whose distribution is limited to a few markets have also found this a profitable form of advertising.

"It is interesting to note that, during the past few weeks, Mutual has received heartening word from many affiliated stations which report that the late summer and early fall will bring the largest batch of co-op sales since this type of program first went on the air. Sales plans are now being organized to take full advantage of the increased production of consumer goods and the renewed interest in advertising. At the same time, Mutual is on the lookout for outstanding, audience-building programs to supplement its present line-up of eleven programs available for local sale.'

(Continued on next page)
SPONSORED ELECTION RETURNS ON MID-SOUTH NETWORK

Small regional networks offer an excellent medium for covering state-wide election returns under sponsorship of a single firm. The group selling done by Bob McRaney, general manager, Mid-South Network in Mississippi, illustrates what can be done in the way of sponsored public interest programming. The sponsor, a retail furniture concern, has outlets in several cities.

The network covered news direct from state headquarters and used local pick-ups of the turn of events in each city in which a station was located. The election was adequately covered by the news and special events staff of each station, Associated Press wire service, and through cooperation of newspapers in each of the cities.

The client sponsoring the Mid-South broadcast of the election returns was McClure Furniture Stores. Terrific interest in Mississippi elections resulted in an all time high in audience. The Mid-South Network is composed of WCBI Columbus; WELO, Tupelo; WMOX, Meridian; and WROX, Clarksdale, Mississippi.

---

CONVENTION HOTEL RESERVATIONS

Under the arrangements which have been made with the Chicago Convention Bureau and the Hilton Hotels, operators of the Palmer House and the Stevens, we feel that the hotel requirements of all NAB members, active and associate, who desire to attend the 24th annual convention to be held October 21 to 24, will be taken care of adequately.

NAB is handling exclusively the reservations of rooms in the Palmer House and Stevens. It has nothing whatever to do with other hotels where arrangements must be made direct with the management.

At the Palmer House and Stevens, reservations from the blocks of rooms set aside for NAB will be made only in accordance with a certification from NAB headquarters. Reservation forms, together with pre-registration and certification forms, will be mailed to the membership sometime within the next week or ten days. In order to facilitate processing, only requests for reservations submitted on these standard forms will be certified. Members, therefore, are requested not to write letters to NAB or to the Palmer House or Stevens respecting room reservations but to use the standard form.

At an early date a special bulletin, more fully covering the details of this and other convention preliminary arrangements, will be sent to the membership.

---

General Statement

NAB submits that the public interest will not be served by the reservation of channels as described in said Order of June 6, 1946, for the following reasons:

1. The Federal Communications Commission does not have the legal authority to reserve from assignment channels now allocated for FM broadcasting.

2. The reservation from assignment of channels now allocated for FM broadcasting will increase the already present serious scarcity of FM channels.

NAB submits that the public interest will be served by:

1. The assignment of channels now allocated to FM broadcasting upon the request of qualified applicants therefor.

2. The indication by the Federal Communications Commission of a specific additional portion of the spectrum for future allocation to FM broadcasting.

The Legal Authority of the FCC to Reserve Allocated Channels from Assignment

First. The Federal Communications Commission has no legal authority to withhold an allocated and available frequency from a qualified applicant.

(Continued on next page)
As is clear from the cases construing the Communications Act, the only purpose of regulating radio broadcasting at all was to allocate the then limited number of available frequencies in such a way that as many stations as possible could operate as effectively as possible. "Unlike other modes of expression, radio inherently is not available to all. That is its unique characteristic, and that is why, unlike other modes of expression, it is subject to governmental regulation." NBC v. United States, 319 U. S. 190, 226.

It necessarily follows from this that "the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel." FCC v. Sanders Radio Station, 309 U. S. 470, 475.

We need not discuss, for the purposes here, the full implication of the term "available frequency" as used by the Supreme Court, since the question is the authority of the Commission with respect to frequencies concededly made available by the Commission for the use of frequency modulation broadcasters. It is enough to say, as was held by the United States Court of Appeals in Stahlman v. FCC, 126 F. (2d) 124, 127: "Possessing [the proper qualifications] the applicant's eligibility is unchallengeable, assuming there is an unused frequency free of interference with an established station. That is the rule announced by the Supreme Court in the Sanders case." (Italics supplied).

Second. The Federal Communications Commission has no legal authority to issue a general order reserving allocated channels from assignment.

The Commission's power and duty in the assignment of licenses may not be exercised in this way, for Section 309(a) of the Communications Act of 1934 prohibits the Commission from determining that the public interest, convenience, or necessity will not be served by the grant of an application prior to a full hearing thereon.

Were the Commission to issue a general order withholding designated available channels from any assignment, it would, in effect, be foreclosing the consideration of applications for such channels and, consequently, be determining, without any hearing at all, that their use was not in the public interest. This the Commission has no authority to do, for in order to prevent the criterion of public convenience, interest, or necessity from being "interpreted as setting up a standard so indefinite as to confer an unlimited power," (See FRC v. Nelson Bros., 289 U. S. 266, 285) the Communications Act prescribes the fundamentals of fair play, by requiring that interested parties be afforded an opportunity to be heard and that the Commission's judgments express a reasoned conclusion. FCC v. Pottsville Broadcasting Co., 309 U. S. 134, 143.

Section 307(b) of the Communications Act of 1934 furnishes no answer to the foregoing. That Section requires the Federal Communications Commission, in considering applications for licenses "When and insofar as there is demand for the same," (Italics supplied) to make such distribution of licenses as will provide a fair and efficient distribution of service among the several states and communities.

Viewed in its context, as part of Section 307, and therefore, as defining and limiting the criterion of "public convenience, interest, or necessity" this language can only mean that the Federal Communications Commission may not permit such assignment of channels that one state or community will be served at the expense of another.

Obviously, therefore, unless and until the Commission has before it an application, the granting of which would result in one state or community receiving service at the expense of another, no question of inequitable distribution can arise.

As Section 307(b) itself makes clear, that question may arise only "when and insofar as there is demand" for a specific license to use a specific channel, at which time and not before, the Commission must consider, in making its findings with respect to such demand, "the relative advantages in service which will be enjoyed by the public through the distribution of facilities." FRC v. Nelson Bros., 289 U. S. 266, 285.

The Supreme Court had before it there a General Order of the Commission issued pursuant to its authority with respect to the distribution of facilities. The Court held the order valid only after finding that it was no more than a rule of procedural convenience to require applicants to frame precise proposals and present definite issues, and consequently, that it was not in derogation of the Commission's duty to afford applicants a full hearing.

In view of all this, the Commission can neither exercise its power nor fulfill its duty under Section 307(b) by the issuance of a general order which, at one stroke, anticipates issues and decides them without consideration and judgment on the basis of a full hearing.

II

The Interest of the Public in the Reservation of Channels from Assignment

Assuming that the Federal Communications Commission has the legal authority to reserve from assignment channels allocated for FM broadcasting, such reservation will not serve the public interest.

Section 303(g) of the Communications Act of 1934, among other things, requires the Commission to "encourage the larger and more effective use of radio in the public interest" (Italics supplied). There are those who now contend that the number of channels allocated to FM are not sufficient. We are informed that in some areas applications for channels exceed the available allocated channels. We are further informed that there are not sufficient channels allocated to permit the public to receive service from both independent stations and existing networks. Assuming these facts, even if all presently allocated channels are used, the public interest will not be adequately served.

In view of this it cannot be said that it is in the public interest to create an even greater scarcity of FM channels by withholding any portion of those already allocated. On the contrary, it is evident that any withholding at this time will violate the spirit of Section 303(g) by encouraging the smaller and less effective use of radio in the public interest.

During the past year, the Federal Communications Commission has established a definite allocation pata-

(Continued on next page)
tern for present FM broadcasting, and has recognized the need for reasonable certainty in this regard.

On August 24, 1945, the Federal Communications Commission stated:

"The Commission does not propose to reserve any FM channels from assignment at the present time." On December 15, 1945, the Federal Communications Commission indicated the channels available for assignment to metropolitan FM broadcasting without reserving any channels so allocated.

On April 24, 1946, in the Clear Channel Hearings, the Acting Chairman of the Commission stated:

"... The Commission regards the FM band as finally settled between 88 and 108, and the receiver manufacturers have been so advised, and receiver production and transmitter production has gone forward. I think it is imperative that we keep the public record straight on that, so that the manufacturers will know where they are. I know the Commission regards its decision of 88 to 108 as absolutely the last word, as final. * * * There is constantly a re-examination of allocations in the radio spectrum, but the present allocation of 88 to 108 is final." Official Report of Proceedings, Docket No. 6471, pages 1583, 1584.

The reservation proposal is at best a temporary and ineffective expedient. It is obvious that any change of policy by the Federal Communications Commission at this time which is not designed to anticipate the long range problem of possible future scarcity of FM channels will only serve to confuse all persons interested in the development and use of FM broadcasting and to retard its normal and sound expansion and growth.

III

The Solution to the Problem of Scarcity

From the standpoint of the public interest the solution to the problem of possible scarcity of FM broadcast channels is the immediate indication by the Commission of an additional specific portion of the spectrum for future allocation to FM broadcasting.

It is submitted that the public interest demands that there always be available enough FM channels so that any qualified applicant can enter the field. Therefore, we suggest that the Commission at this time indicate an additional specific portion of the spectrum for FM broadcasting. This does not mean that the Commission must immediately assign channels in such additional portion of the spectrum. Rather, it should be considered as a field for expansion to provide for such applicants as the Federal Communications Commission must have had in mind when it ordered a hearing to determine whether the reservation of a portion of the allocated channels, as discussed under point II above, would serve the public interest.

The indication by the Federal Communications Commission of a portion of the spectrum for future expansion and development of FM broadcasting would further serve the public interest by setting, before the urgent need arises, the general future pattern for FM. Manufacturers of equipment could then design their products to serve the range of the additional portion of the spectrum when and if the same is assigned for use by the Commission. The public would thus be saved large sums of money, and the development of FM would proceed rapidly without the necessity of waiting periods for "change over" of radio receiving sets.

Finally, such a designation would make available sufficient channels so that, as requests for licenses are made, each area of the country could be served by competing FM services.

Conclusion

It is respectfully submitted that the Federal Communications Commission does not have the legal authority to reserve channels now allocated by the Commission for FM broadcasting; and that such reservation would only serve to create greater present scarcity of available FM channels.

NAB restates its position taken on many different occasions in the past, namely, that provision should be made for sufficient channels to accommodate all qualified applicants.

NAB further believes that the objectives of Section 307(b) of the Federal Communications Commission Act of 1934 will not be served by a reservation of presently allocated channels, but, rather, that such objectives will best be served by the Commission indicating at this time a specific portion of the spectrum for future allocation to FM. "Such action by the Commission would assure equitable distribution of service to the listening public as to territory covered and would provide facilities for both present and future applicants and would contribute to the sound development of FM broadcasting."

Respectfully submitted,

DON PETTY, General Counsel
BRYCE REA, Jr.,
Attorneys for National Association of Broadcasters

LEGAL STAFF PROMOTIONS AT FCC

The FCC announced on Friday (12) the appointment of Lester W. Spillane as assistant general counsel

Resolution approved by the Board of Directors of NAB, supra, Note 1.

(Continued on next page)
in charge of safety and special services, and of Walter E. James as assistant to the general counsel. They succeed, respectively, Jeremiah Courtney and Norman E. Jorgensen who resigned to enter private law practice.

Mr. Spillane began his government career in 1928 with the radio division of the Department of Commerce, continuing with the FRC and its successor, the FCC. For 10 years he worked in radio inspection offices in Seattle and Portland. In 1944, he was assigned to the broadcast division in Washington.

Mr. James joined the FCC as assistant to Commissioner C. J. Durr, later became assistant secretary of the commission and held that position until early 1948 when he entered the navy. Returning to the commission in February of this year, he became special assistant to Chairman Paul A. Porter and was continued in that capacity by Acting Chairman Charles R. Denny.

### Public Interest Programming

**AD COUNCIL NETWORK CAMPAIGNS**

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 22-28, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

#### Homes for Veterans

America faces a critical housing shortage and its veterans are the worst sufferers. It is simply a matter of fair play to help them, in every way possible to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. An estimated 1,300,000 single veterans will get married by December 31, 1946. Even when generous allowance is made for the fact that some of those married veterans may prefer to live temporarily with relatives or friends, it appears that more than 2 million veterans' families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans' housing situation. For example, veterans who cannot find suitable accommodations in privately owned housing receive preference in federally owned war housing. But the only real answer to the housing shortage is an extended period of volume construction. Government and industry are cooperating to stimulate construction and to provide that veterans are to have first chance at it. For example, the Government is giving priorities on scarce building materials to builders who will put up homes which will be available for sale or rent at reasonable prices and will be offered first to veterans. Until construction gets rolling, by all means the most important source of housing for veterans consists of vacancies which become available in the existing housing supply. Urge listeners to help ease the housing situation by "staying put" if they possibly can so that a maximum number of veterans can find living places in the existing housing supply; by sharing their homes with veterans' families if they can possibly do so and listing vacancies and houses for sale at the veterans' housing referral center, if one exists in their community, so that veterans can get first chance at them. (Fact Sheet No. 4-B)

#### Fat Salvage

Supplies of fats and oils are still far short of demands and needs due to a decline in domestic production and the war-born loss of foreign imports. Fats and oils are essential to the production of soap, and countless other peacetime consumer items. Only by continuing to salvage used kitchen fats can housewives help... prevent possible shortages of soap... accelerate the production of other peacetime goods everyone wants and needs. About forty-seven per cent of the total allocations of fats and oils for domestic industrial use goes to civilian soaps; five per cent to the manufacture of soaps for industrial purposes; the remaining forty-eight per cent to paints and varnishes, floor coverings, coated fabrics, lubricating oils, textiles and leather, core oils, pharmaceuticals, putty and calking, compounds, etc. The shortage of fats and oils in the face of the great need for them in all phases of peacetime production indicates the urgency of the need for continued fat salvage. Housewives can actually help themselves to get the peacetime products they want and need in greater abundance and sooner by keeping up their good work in salvaging fats. They are asked to:—Save every drop of used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates—Pour immediately into the salvage can those fats—Pour immediately into the salvage can those fats... used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates—Pour immediately into the salvage can those fats... used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates. (Fact Sheet No. 26)
HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 15. They are subject to change.

Monday, July 15

Further Hearing
Before the Commission in Room 6121

In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band

NEW—Independent Broadcasting Co., Des Moines, Iowa—C. P. 940 kc., 250 watts night 5 KW day, unlimited. KUOM—University of Minnesota, Minneapolis, Minn.—C. P. 940 kc., 250 watts night 5 KW day, unlimited, S-KUOM.

NEW—High Point Enterprise, Inc., High Point, N. C.—C. P. 830 kc., 1 KW day, daytime.

Other Participants
WRUF—Gainville, Fla.—(Intervenor).

Oral Argument
Before the Commission En Banc

In the Matter of Rules Relating to Section 214 of the Communications Act of 1934, as amended; Discontinuance, Reduction and Impairment.

Thursday, July 18

KHTN—KHTN, Inc., Houston, Texas—C. P. 610 kc., 5 KW night, 5 KW day, directional antenna for night use, unlimited.
FM ENGINEERING APPROVALS AND CP’S

The following stations received Engineering Approvals and were granted regular Construction Permits:

Miami Broadcasting Co., Miami, Fla.—Class B; 95.5 Me.

Herbert Herff, Memphis, Tenn.—Class B; 92.7 Me. (No. 98.7 Me.):

The Constitution Publishing Co., Atlanta, Ga.—Class B; 93.7 Me. (No. 286) ; 220 watts; antenna 54 feet. (B2-PH-361)

Hutchinson Publishing Co., Hutchinson, Kan.—Class B; 95.3 Me. (No. 237) ; 60 kW; antenna 520 feet. (B4-PH-349)

Oneonta Star Publication Co., Oneonta, N. Y.—Class B; 92.7 Me. (No. 236) ; 40 kW; antenna 500 feet. (B4-PH-3)

St. Louis Post-Dispatch, St. Louis, Mo.—Class B; 93.3 Me. (No. 252) ; 7.0 KW; antenna 740 feet. (B5-PH-666)

Tri-Suburban Broadcasting Corp., Silver Spring, Md.—Class B; 101.5 Me. (No. 254) ; 2.8 KW; antenna 875 feet. (B2-PH-410)

W.B.V., Inc., Utica, N. Y.—Class B; 97.9 Me. (No. 250) ; 6 KW; antenna 700 feet. (B1-PH-213)

Lewiston Broadcasting Co., Lewiston, Pa.—Class B; 102.7 Me. (No. 274) ; 2.25 KW; antenna 150 feet. (B2-PH-516)

Western Broadcasting Co., Tyler, Texas—Class B; 103.9 Me. (No. 260) ; 3.7 KW; antenna 270 feet. (B3-PH-780)

Donald A. Burton, Ro. of Munice, Ind.—Class B; 103.7 Me. (No. 279) ; 6.2 KW; antenna 255 feet. (B2-PH-292)

The Argus-Press Co., Owosso, Mich.—Class A; 103.7 Me. (No. 281) ; 220 watts; antenna 290 feet. (B2-PH-361)

Peninsula Newspapers, Inc., Palo Alto, Calif.—Class A; 99.7 Me. (No. 239) ; 17 kw; antenna 530 feet. (B1-PH-153)

Copper City Broadcasting Corp. Allied States Broadcasting Co., Upper Deerfield Twp. Nr. Bridgeton, N. J.—Class B; 101.5 Me. (No. 263); 134 KW; antenna 1200 feet. (B3-PH-687)

KVOX Broadcasting Co., Fargo, N. Dak.—Class B; 100.1 Me. (No. 261) ; 8.5 KW; antenna 235 feet. (B4-PH-366)

Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Class B; 103.7 Me. (No. 279) ; 9.5 KW; antenna 500 feet. (B1-PH-887)

New Britain Broadcasting Co., New Britain, Conn.—Class B; 95.1 Me. (No. 236) ; 20.0 KW; antenna 500 feet. (B1-PH-823)

The Valley Broadcasting Co., Steubenville, Ohio—Class B; 95.3 Me. (No. 250) ; 1.0 KW; antenna 485 feet. (B2-PH-357)

Tri-Suburban Broadcasting Corp., Silver Spring, Md.—Class A; 101.3 Me. (No. 282) ; 240 watts; antenna 370 feet. (B1-PH-873)

Pensacola Broadcasting Co., Pensacola, Fla.—Class B; 93.9 Me. (No. 251) ; 5.5 KW; antenna 290 feet. (B3-PH-705)

WBH Broadcasting Co., Kansas City, Mo.—Class B; 98.7 Me. (No. 252) ; 20 kw; antenna 510 feet. (B1-PH-294)

Durham Radio Corp., Durham, N. C.—Class B; 99.3 Me. (No. 251) ; 21 KW; antenna 490 feet. (B1-PH-144)

Portland Broadcasting System, Inc., Portland, Me.—Class B; 100.1 Me. (No. 261) ; 3.6 KW; antenna 415 feet. (B1-PH-116)

Flinders Press, Warwick, R. I.—Class A; 101.3 Me. (No. 282) ; 340 watts; antenna 54 feet. (B2-PH-361)

Review Publishing Co., Alliance, Ohio—Class A; 101.7 Me. (No. 281) ; 220 watts; antenna 290 feet. (B1-PH-375)

Buckeye Broadcasting Co., Cincinnati, Ohio—Class B; 97.3 Me. (No. 247) ; 18 KW; antenna 520 feet. (B2-PH-572)

The Sun Co. of San Bernardino, San Bernardino, Calif.—Class B; 103.7 Me. (No. 279) ; 6.4 KW; antenna 2225 feet. (B1-PH-114)

Silver City Crystal Co., Meriden, Conn.—Class B; 93.7 Me. (No. 247); 7.6 KW; antenna 740 feet. (B3-PH-666)

John F. Easlev, Ardmore, Okla.—Class B; 97.1 Me. (No. 246) ; 2.8 KW; antenna 790 feet. (B1-PH-720)

WEBH, Inc., Buffalo, N. Y.—Class B; 92.5 Me. (No. 223) ; 15 KW; antenna 550 feet. (B1-PH-237)

American Republican, Inc., Waterbury, Conn.—Class B; 100.1 Me. (No. 261) ; 10.2 KW; antenna 323 feet. (B1-PH-603)

Eastern States Broadcasting Corp., Upper Deerfield Twp. Nr. Bridgeton, N. J.—Class B; 101.5 Me. (No. 263) ; 134 KW; antenna 583 feet. (B4-PH-197)

Piedmont Broadcasting Corp., Salisbury, N. C.—Class B; 99.5 Me. (No. 260) ; 23.2 KW; antenna 274 feet. (B1-PH-346)

Rock Island Broadcasting Co., Rock Island, Ill.—Class B; 100.7 Me. (No. 264) ; 29 KW; antenna 389 feet. (B4-PH-138)

FM FINAL CP’S GRANTED

The following stations which have heretofore received Engineering Approvals, were granted final CP’s:

(Continued on next page)
ENGINEERING APPROVAL OF FM GC's

The following applicants were granted approval of basic engineering plans: (Note: power given is effective radiated power; antenna height given is height above average terrain):

- Wilton E. Hall, Anderson, S. C.—Class B; 103.5 Me. (No. 278); 29 kw; 432 feet. (B3-PH-432)
- WLWA—The Crosley Corp., Area of Cincinnati—Granted extension of STA to operate an FM transmitter on Channel 251, 98.1 mcs. with 3 kw using temporary antenna on WLW's tower for a period beginning July 13 and ending Aug. 11, 1946, for the purpose of making FM site tests. (B3-MP-1971)
- KALF, Inc., Deland, Fla.—Class A; 99.5 Me. (No. 232); 10 kw; 315 feet. (B3-MP-1924)
- WSVR-FM—Central N. Y. Broadcasting Corp., Onondaga, N. Y.—Granted special temporary authority to operate on 93.5 mc, using 250 watts GE-ET-1A transmitter and temporary antenna 72 feet above ground, for a period of 90 days from date of grant. (B3-MP-1944)
- WCHW—Chambersburg Broadcasting Co., Chambersburg, Pa.—Granted modification of CP which authorized a new station, to change type of transmitter. (B5-MP-1941)
- WHOM—Robert Stephenson, Centralia, Ill.—Granted modification of CP which authorized a new station, for change in type of transmitter, approval of antenna and approval of transmitter and studio locations at Highway #51, 2.9 miles north of City Limits, Centralia, Ill. (B4-MP-1899)
- KSJY—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Granted modification of CP which authorized increase in power, etc., for extension of completion date from 7-3-46 to 8-8-46.

LICENSE RENEWALS

WBBB—Abancum Broadcasting Co., Inc., Burlington, N. C.—Granted renewal of license for the period ending August 1, 1946.

KRLD—KRLD Radio Corp., Dallas, Texas—Granted renewal of license for the period ending May 1, 1948.

MISCELLANEOUS ACTIONS

Radio Station WSOC, Inc., Charlotte, N. C.—Granted in part petition requesting continuance of consolidated hearing upon applications of Radio Station WSOC, Inc., et al (Docket 7322, etc.), and the hearing now scheduled for July 15 was continued to July 24.

WHHT—Harold H. Thoms, Durham, N. C.—Granted modification of CP, which authorized a new station, for approval of antenna and approval of transmitter location at Albion Ave. Extended, Durham, N. C. (B5-MP-1924)

WHSC—Hartsville Broadcasting Co., Hartsville, S. C.—Granted modification of CP which authorized a new station, to change transmitter and studio locations from Swift Creek Highway, Hartsville, and 1321 Carolina Ave., Hartsville, respectively, to: Just east of U. S. Highway No. 15 and 1/2 mile south of city limits of Hartsville, and extend commencement and completion dates from 7-13-46 and 1-13-47 respectively, to 69 days after grant and 180 days thereafter. (B3-MP-1964)

WSYR-FM—Central N. Y. Broadcasting Corp., Onondaga, N. Y.—Granted special temporary authority to operate on 93.5 mc, using 250 watts GE-ET-1A transmitter and temporary antenna 72 feet above ground, for a period of 90 days from date of grant. (B3-MP-1944)
WFKY—Frankfort Broadcasting Co., Frankfort, Ky.—Granted license to cover CP which authorized a new station to operate on 1490 kc., 250 watts, unlimited time (B2-L-1955); also authority to determine operating power by direct measurement. (B3-Z-1778)

WBZ—Westinghouse Radio Stations, Inc., Boston, Mass.—Granted authority to determine operating power by direct measurement. (B1-Z-1785)

WHHM—Herbert Herff, Memphis, Tenn.—Granted modification of CP which authorized a new station, to change name of permittee to Herbert Herff, tras (B3-MP-1943)

WKLX—The Ky Broadcasting Co., Lexington, Ky.—Granted modification of CP which authorized a new station, to change corporate name to The Fayette Broadcasting Co., specify type of transmitter and emission in FP, Television station. The license is granted on an experimental basis only; conditions. (B3-LVB-71)

W6XLA—Television Productions, Inc., Area of Los Angeles—Granted license to cover CP which authorized a change in frequency, transmitter and emission in FP, Television station. Frequency that may be assigned by Chief Engineer from time to time: emission: A3, A5 and special & special for FM. The license is granted on an experimental basis only, conditions. (B3-LVB-70)

Bruno Shaw, New York City—Denied request that the Commission withhold action on applications for the frequency 620 kc., in New York City, and consider his application therewith.

Ira M. Ball, Utica, New York—Denied request that the Commission (1) set aside its proposed decision in the Rome-Utica cases; (2) allow Mr. Ball and his associates sufficient time to prepare and file a competing application; and (3) re-open the record and permit him and his associates to participate in such further hearing.

Metropolitan Broadcasting Service, New York City—Granted petition for leave to amend its application (B1-P-4000; Docket 6701) so as to change paragraph 17 of the application to show that, as amended, the application will in part "request the facilities of Station WAGE, Syracuse, to offer an exhibit showing a new antenna design and new transmitter site; to offer the new antenna design to WAGE; to offer ownership of the new site to WAGE free of cost, and to offer to pay for the removal of WAGE to the new site and for the installation of the new WAGE antenna, all if its application is granted. The amendment filed with the petition covering the matters, was accepted.

Associated Electronic Enterprises, Wormsrook, R. I.—Granted petition for removal and grant of application for new station, and the said application for a new station (B1-P-4111; Docket 6857), was granted, to operate on 1400 kc., 250 watts, unlimited time, subject to condition that applicant, upon application of Lake Shore Broadcasting Co., for a new station in Evanston, Ill., presently designated for consolidated hearing with application of WMIL Broadcasting Co., Milwaukee. (Docket Nos. 7629 and 7232)

Radio Projects, Inc., Newark, N. J.—Granted petition for leave to amend application for FM station so as to show election of two new directors to the corporation, and the amendment was accepted. (Docket 7229)

Booth Radio Stations, Inc., Grand Rapids, Mich.—Granted petition for leave to intervene in the hearing on application of WMIB for CP. (Docket 7610)

A. J. Fletcher, Greensboro, N. C.—Granted petition for leave to remove application for FM station, so as to substitute the Capital Broadcasting Co. for the applicant, and to change paragraphs to show complete information on the new corp., and the amendment was accepted. (Docket 7597)

No. J. D. C. Broadcasting Co., Inc., Paterson, N. J.—Granted petition for leave to amend its application for FM station (Docket 7234), so as to show the current information in re officers, directors and stockholders; to supply revised engineering data, etc., and the amendment was accepted.

West Ala. Broadcasting Co., Tuscaloosa, Ala.—Granted in part petition for extension of time within which to file proposed findings of fact in re Dockets 7178 and 7177, and the time within which the West Ala. Broadcasting Co. may file its proposed findings in Docket 7178, was extended to and including July 28.

Actions on Motions

Eau Claire-Chippewa Broadcasting Co., Eau Claire, Wis.—Granted petition for leave to amend its application (B4-P-4619) so as to specify frequency 1100 with 250 watts, unlimited time, change location of main studios from Eau Claire to Chippewa Falls, etc. The amendment was accepted and application removed from hearing docket. (No. 7557)

Unity Corp., Inc., Springfield, Ohio—Granted motion for leave to amend its application for FM station (B2-PH-516; Docket 7238), by submitting additional engineering data, and the amendment was accepted.

Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Granted petition for leave to intervene in the hearing on application of Lake Shore Broadcasting Co., for a new station in Evanston, Ill., presently designated for consolidated hearing with application of WMIL Broadcasting Co., Milwaukee. (Docket Nos. 7629 and 7232)

(Continued on next page)
News Syndicate Co., Inc., New York, N. Y.—Granted petition for leave to amend its application for an FM station (Docket 6175), so as to show current information concerning costs of construction and monthly operating expenses, and to supply complete engineering information, etc., and the amendment was accepted.

Independent Broadcasting Co., Des Moines, Iowa—Granted petition for leave to amend its application for a new station, to show a new DA pattern and revised engineering information, and the amendment was accepted. (Docket 6734)

Atlantic Broadcasting Co., Inc., New York, N. Y.—Granted petition to dismiss without prejudice application for a new FM station. (B1-PF-130; Docket 7233)

Star Broadcasting Co., Inc., Pueblo, Colo.—Denied joint petitions for approval of construction permit (B2-P-4561) and studio locations. (Docket 7430; 7506 and 7507)

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—The Commission, on its own motion, and at request of counsel for applicants, scheduled the consolidated hearing on application for renewal of license (Docket 6975), now scheduled for July 10 to September 16.

WKYB—Paducah Newspapers, Inc., Paducah, Ky.—Modification of construction permit (B4-P-425) to change transmitter location. Amended: re change in transmitter frequency from 1400 to 860 kc, increase power from 250 watts to 1 KW night, 5 KW day, install new transmitter and directional antenna for night use and change transmitter location. Amended: re change in transmitter location. (Docket 7379)

NEW—Western Montana Associates, Missoula, Montana (P. O. 425 Beverly Avenue).—Construction permit for a new standard broadcast station to be operated on 580 kc, power of 5 KW, directional antenna, night and unlimited hours of operation.

WCIF—Madisonville Broadcasting Co., Inc., Madisonville, Ky.—Modification of construction permit (B1-P-1506) which authorized a new standard broadcast station for approval of antenna and approval of transmitter and studio locations.

NEW—Port City Broadcasting Co. (partnership composed of) Raymond G. Wilson, W. F. Lane, John A. Mingus, Andrew B. Shelton, Howard Barrett & Bruce B. Mendler, Port Arthur, Texas—Construction permit for a new standard broadcast station to be operated on 810 kc, power of 1 KW and daytime hours of operation.

KHDI—Matheson Radio Co., Inc., Boston, Mass.—Construction permit to increase power from 5 to 50 KW, install new transmitter and new directional antenna for day and night use and change transmitter location from Sango to Wayland, Massachusetts.

NEW—Northeast Oklahoma Broadcasting Co., Miami, Okla. (P. O. 218 S Street, S. W.).—Construction permit for (Continued on next page)
a new standard broadcast station to be operated on 900 kc., power of 250 watts and daytime hours of operation.

910 Kilocycles

WABI—Community Broadcasting Service, Bangor, Maine—Modification of construction permit (B1-P-3934, which authorized increase in power, employing directional antenna night and make changes in transmitting equipment) for extension of completion date.

970 Kilocycles

NEW—Boulder City Broadcasting Co. (a Nevada Corporation), Las Vegas, Nevada (P. O. 701 Avenue R, Boulder City, Nevada)—Construction permit for a new standard broadcast station to be operated on 970 kc., power of 1 KW and unlimited hours of operation.

1000 Kilocycles

KOMO—Fisher’s Blend Station, Inc., Seattle, Wash.—Modification of construction permit (B5-P-1281, as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use, and change in transmitter location) for changes in directional antenna for night use.

1010 Kilocycles

NEW—T. R. Wolfe, W. E. Smith, S. L. Myers, Carl C. Aley and R. H. Whitlow (partners), d/b/a Albemarle Broadcasting Company, Albemarle, North Carolina (P. O. Hotel Albemarle Bldg., North Second Street)—Construction permit for a new standard broadcast station to be operated on 1010 kc., power of 1 KW and daytime hours of operation.

1050 Kilocycles

WWGI—Lee Broadcasting Corporation, Sanford, N. C.—Modification of construction permit (B6-P-1540, which authorized a new standard broadcast station) to change type of transmitter, approval of antenna and transmitter location.

1090 Kilocycles

KFVR—Evergreen Broadcasting Corporation, Seattle, Wash.—Modification of construction permit (B5-P-3933, which authorized increase in power, installation of new transmitter and directional antenna for day and night use, and change in transmitter location) for changes in directional antenna.

NEW—Effingham Broadcasting Co., Effingham, Illinois, (P. O. 100½ E. Jefferson St.)—Construction permit for a new standard broadcast station to be operated on 1090 kc., power of 250 watts and daytime hours of operation.

1110 Kilocycles

NEW—Moraine Broadcasters, Inc., Dayton, Ohio (P. O. 111-125 E. 4th St.)—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 1 KW and daytime hours of operation.

1120 Kilocycles

NEW—Broadcast Management, Inc., Bethesda, Maryland (P. O. Union Trust Building, Washington 5, D. C.)—Construction permit for a new standard broadcast station to be operated on 1120 kc., power of 250 watts and daytime hours of operation.

1150 Kilocycles

WCOP—Massachusetts Broadcasting Corporation, Boston, Mass.—License to cover construction permit (B1-P-4068, as modified), which authorized increase in power, make changes in transmitting equipment, install new directional antenna for day and night use and change transmitter location.

WIOC—Massachusetts Broadcasting Corporation, Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

WIKI—Upper Michigan-Wisconsin Broadcasting Company, Inc., Iron Mountain, Mich.—Modification of construction permit (B2-P-4676, which authorized a new standard broadcast station) for approval of antenna and approval of transmitting equipment and studio locations.

NEW—Peter B. Thornell, Florence, South Carolina (222 South Dargan Street) —Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. (Contingent on grant of WOLS)

KFIB—Marshall Electric Company, Marshalltown, Iowa—Authority to determine operating power by direct measurement of antenna power.

KXO—Valradio, Inc., El Centro, Calif.—Modification of construction permit (B5-P-4499, which authorized installation of new transmitter, new vertical antenna and ground system, and change transmitter and studio locations) to move transmitter location and to extend commencement and completion dates.

NEW—Tri-County Radio Corp., Shelby, Montana (P. O. 531 First Avenue South)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Joseph M. Ripley, Leesburg, Florida (P. O. 1706 Landon Avenue, Jacksonville, Fla.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Kola Broadcasting Company (a co-partnership composed of Hugh O. Jones, William E. Jones, James O. Jones, and Mrs. Sarah Stewart Jones), Opelousas, Louisiana (P. O. Box 290)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—G. Stanley Brewer, tr/us Southern Wyoming Broadcasting Co., Rawlins, Wyoming (P. O. 2730 Quincy Street, Ogden, Utah)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1240 Kilocycles

WENK—Union City Broadcasting Co., Inc., Union City, Tenn.—Modification of construction permit (B3-P-1568, which authorized a new standard broadcast station) for approval of antenna and approval of transmitting equipment and studio locations.

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Authority to determine operating power by direct measurement of antenna power.

NEW—Pikes Peak Broadcasting Company, a co-partnership consisting of Joseph H. Rohrer and Edythe G. Sweeney, Colorado Springs, Colorado (P. O. 337 Endura Street, Denver, Colorado)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Miller Associates, Inc., Youngstown, Ohio (P. O. c/o Sumne Miller, 1837 West Central Avenue, Toledo, Ohio)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Des Moines Broadcasting Corporation, Des Moines, Iowa (P. O. 401 Shops Building, 306 West Walnut Street)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 100 watts and unlimited hours of operation.

KCOE—Central Washington Broadcasters, Inc., Ellensburg, Wash.—Modification of construction permit (B1-P-3996, which authorized a new standard broadcast station) to change transmitter, make changes in antenna system and extend completion date. (Continued on next page)
1310 Kilocycles

NEW—Alvin A. Beal and Elmer P. Hauser, d/b as Beal & Hauser Broadcasting Co., Fontana, California (200 South Tokay St.)—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

1320 Kilocycles

WKAN—Kankakee Daily Journal Company, Kankakee, Ill.—Modification of construction permit (B4-P-4013, which authorized a new standard broadcast station) to make changes in vertical antenna and mount FM antenna on top and extend commencement and completion dates.

1340 Kilocycles

NEW—G. Stanley Brewer, tr/as Southern Wyoming Broadcasting Company, Laramie, Wyoming (P. O. 2730 Quincy Street, Ogden, Utah)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

WGNI—General Newspapers, Inc., Wilmington, N. C.—Modification of construction permit (B3-P-4217, which authorized a new standard broadcast station) to change type of transmitter and change transmitter and studio locations and extend commencement and completion dates.

WMFF—Plattsburg Broadcasting Corporation, Plattsburg, N. Y.—License to cover construction permit (B3-P-4461), which authorized installation of new transmitter.

1360 Kilocycles

WWBZ—Community Broadcasting Service, Inc., Vineland, N. J.—Modification of construction permit (B3-P-4480, which authorized a new standard broadcast station) to change type of transmitter and change transmitter and studio locations and extend commence and completion dates.

1400 Kilocycles

NEW—David W. Rattiff, Stamford, Texas (P. O. Box 1502, Abilene, Texas)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

KODI—Big Horn Basin Broadcasting Co., Cody, Wyoming (P. O. 1139 Alger Avenue)—Modification of construction permit (B5-P-4397, which authorized a new standard broadcast station) for approval of antenna, approval of transmitter and studio locations and to change corporate name from Big Horn Basin Broadcasting Company to Absaroka Broadcasting Company.

NEW—Loyd Marson Hawley, Bennettsville, South Carolina (P. O. 814 King Avenue, Florence, South Carolina)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1410 Kilocycles

NEW—Baird Bishop & Ed Bishop d/b as Dalrad Associates, Dalhart, Texas—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts and unlimited hours of operation.

1440 Kilocycles

KMED—Mrs. W. J. Virgin, Medford, Ore.—Voluntary assignment of license to Gibson Broadcasting.

1450 Kilocycles

KVMM—Radio Sales Corporation, Twin Falls, Idaho—Construction permit to install a new transmitter.

NEW—James L. Frank, Colorado Springs, Colo. (P. O. 155 East 46th St., New York, N. Y.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

KAMD—Camber Radio, Inc., Camden, Ark.—License to cover construction permit (B3-P-3401), which authorized a new standard broadcast station.

KAMD—Camber Radio, Inc., Camden, Ark.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

NEW—Springfield Broadcasting Co., (Partnership), Gerson Askinas, Earle G. Hewinson, Christos M. Manissas, Springfield, Mass. (P. O. 1600 Main St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

 WWBII—Walla Walla Broadcasting Co., Walla Walla, Wash.—Modification of construction permit (B5-P-1353, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and approval of transmitter and studio locations.

NEW—Four States Broadcasting Corp., Texarkana, Ark. (P. O. 525 State National Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

KGBB—Jas. G. Ulmer and James G. Ulmer, Jr., d/b as East Texas Broadcasting Co., Tyler, Texas—Authority to determine operating power by direct measurement of antenna power.

NEW—Ogden Broadcasting Co., Inc., Ogden, Utah—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change in stockholders.

NEW—Alva B. Adams, Jr., Pueblo, Colo. (P. O. 102 West Orman Ave.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1560 Kilocycles

WTOI—Unity Corp., Inc., Toledo, Ohio—License to cover construction permit (B2-P-4341, as modified) which authorized a new standard broadcast station.

WTOI—Unity Corp., Inc., Toledo, Ohio—Authority to determine operating power by direct measurement of antenna power.

1600 Kilocycles

NEW—Roy Richards, Robert Tisinger, J. E. Dunham and Thomas Carr, a partnership d/b as Carroll Broadcasting Co., Carrollton, Ga. (Cedar St.)—Construction permit for a new standard broadcast station to be operated on 1600 kc., power of 250 watts and day-time hours of operation.

FM APPLICATIONS ACCEPTED FOR FILING

Perkins Brothers Co., Sioux City, Iowa—Construction permit for a new FM (Rural) broadcast station to be operated on frequency and coverage to be assigned by FCC. Amended to correct studio location.

Radio Asheville, Inc., Asheville, N. C.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on 1600 kc., power of 250 watts and day-time hours of operation.

Continued on next page)
TELEVISION APPLICATIONS ACCEPTED FOR FILING

NEW—Independent Broadcasting Corporation, Knoxville, Tenn.—Construction permit for a new standard broadcast station to be operated on 1120 kc., power of 250 watts and unlimited hours of operation.

NEW—The Eastern Oklahoma Broadcasting Corporation, Muskogee, Okla.—Construction permit for a new standard broadcast station to be operated on 990 kc., power of 1 KW, direction antenna and unlimited hours of operation.

NEW—Mail Broadcasting Co., Reading, Pa.—Construction permit for a new standard broadcast station to be operated on 730 kc., power of 1 KW, and daytime hours of operation.

NEW—Pacific States Radio Co., Corvallis, Ore.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—W.T.C., Corvallis, Ore.—License to cover association of construction permit (B3-PRE-462) which authorized a new relay broadcast station.

APPLICATIONS TENDERED FOR FILING

NEW—J. C. Rothwell, Littlefield, Texas.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 250 watts and unlimited hours of operation.

NEW—Radio South, Inc., Jacksonville, Fla.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

KFI—Los Angeles, Calif.—Construction permit to change frequency from 620 kc. to 660 kc., power of 1 kw., and install directional antenna night use.

NEW—Pacific States Radio, Inc., Corvallis, Ore.—Construction permit for a new standard broadcast station to be operated on 660 kc., power of 250 watts and unlimited hours of operation.

NEW—Grant Street Radio Stations, Inc., Pittsburgh, Pa.—Construction permit for a new standard broadcast station to be operated on 730 kc., power of 1 KW and daytime hours of operation.

WEEU—Berks Broadcasting Co., Reading, Pa.—Consent to transfer of control of licensee Corp. from George J. Feinberg, Joseph M. Nassau and Milton J. Hinlein to Hawley Broadcasting Company, also includes relay station WEGP and conditional grant of FM Metropolitan station. (850 kc.)

KFI—The Reporter Printing Co., Fond du Lac, Wis.—Consent to assignment of license to KFI Broadcasting Company. (1450 kc.)

KOR—Herren Anderson, Tuluare, Calif.—Construction permit to change frequency from 950 to 1270 kc., power of 250 watts to 1 KW, install directional antenna, night and new transmitter.

NEW—Siskiyou Broadcasting Co., Yreka, Calif.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

KIKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Construction permit to change frequency from 1400 to 1380 kc., power from 250 watts to 1 KW, install new transmitter and directional antenna for night use.

NEW—Pacific States Radio Co., Corvallis, Ore.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 1 KW and unlimited hours of operation.

WTMC—Ocala Broadcasting Company, Inc., Ocala, Fla.—Construction permit to change frequency from 1490 to 1380 kc., power from 1380 watts to 1 KW, install directional antenna—night, new transmitter, and change transmitter location. (Contingent upon WPDQ operating on new frequency)

NEW—Independent Broadcasting Corporation, Knoxville, Tenn.—Construction permit for a new standard broadcast station to be operated on 860 kc., power of 1 KW and unlimited hours of operation.

NEW—Robert Ennis Lervance and Sara VanDiver Lervance (Mr. and Mrs. Robert E. Lervance), d/b as Anderson Broadcasters, Anderson, S. C.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 250 watts and daytime hours of operation.

NEW—Cari, Inc., Cleburne, Texas.—Construction permit for a new standard broadcast station to be operated on 1120 kc., power of 250 watts and daytime hours of operation.

NEW—Arthur S. Feldman, Ft. Wayne, Ind.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 500 watts and unlimited hours of operation. (Contingent on grant of change in frequency of station WGL)

NEW—Fresno Broadcasting Company, Fresno, Calif.—Construction permit for a new standard broadcast station to be operated on 620 kc., power of 5 KW, directional antenna and unlimited hours of operation.

NEW—Foundation Company of Washington, Washington, D. C.—Construction permit for a new standard broadcast station to be operated on 580 kc., power of 5 KW, directional antenna and unlimited hours of operation.

WLLR—Lester E. Eitter and H. Raymond Staidem, d/b as Lebanon Broadcasting Company, Lebanon, Pa.—Consent to assignment of construction permit to Lebanon Broadcasting Company (a corporation on 1570 kc.)

NEW—The Eastern Oklahoma Broadcasting Corporation, Muskogee, Okla.—Construction permit for a new standard broadcast station to be operated on 990 kc., power of 1 KW, directional antenna—night and unlimited hours of operation.

WLA—Mobile Shores Broadcasting Corporation, Muscle Shoals, Ala.—Construction permit to change frequency from 1450 to 1460 kc., power from 250 watts to 1 KW, install new transmitter, change transmitter location and install directional antenna night use.
Federal Trade Commission
Actions

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Sunshine Household Products Co., Inc., 145 Pierport Avenue, Salt Lake City, and its officers are charged in a Commission complaint with misrepresenting the properties and effectiveness of a so-called moth-proofing agent they sell under the name of Sunshine Foam. (5451)

Friedman-Klein Sales Co.—Jack Klein and Martin D. Friedman, trading as Friedman-Klein Sales Co. and Western Novelty Co., 217 West 9th St., Kansas City, Mo., are charged in a Federal Trade Commission complaint with selling to jobbers and retailers assortments of merchandise so packed and assembled as to involve the use of a lottery scheme or game of chance when sold or distributed to the purchasing public. (5432)

CEASE AND DESIST ORDERS

Vitamin Guild of America—Gray hair is not known to be the result of vitamin deficiency, the Commission ruled in ordering Oxford Products, Inc., trading as Vitamin Guild of America, 1814 East 40th St., Cleveland, to cease and desist from disseminating false advertisements concerning a vitamin product sold as Calcium Pantothenate Vitamin Tablets and Cal-Pan. (5388)

Curtis-Elliott, Inc.—An order to cease and desist from selling or distributing merchandise by means of lottery methods was issued by the Commission against Curtis-Elliott, Inc., and its president, Leroy H. Huttner, 67 West 44th St., New York. (5231)

STIPULATIONS

Hudson Pulp & Paper Corp.—The Commission has approved a stipulation in which the Hudson Pulp & Paper Corp., 220 East 42nd St., New York, and its officers agree to cease and desist from representing that Hudson paper napkins are appreciably stronger, heavier or more absorbent than competing products. (4163)

The International Vitamin Corp., 22 East 40th St., New York, stipulated with the Commission that, in connection with the advertising of a medicinal preparation known as Ol-Vitum Capsules, it will cease and desist from representing:

1. That the preparation, when used as directed, is effective in the treatment of symptoms of vitamin deficiency such as depression, nervousness, irritability, fatigue or the loss of vigor or stamina.
2. That it is effective in building resistance to colds or infections.
3. That, when used as directed, it has a beneficial effect upon the digestion or elimination. (03315)

Shelmar Hat Co.—The Commission has approved a stipulation in which Hyman Levitt, trading as Shelmar Hat Co., 23 West 38th St., New York, agrees to cease and desist from representing in any manner that women’s hats made in whole or in part from old, used or second-hand materials are new or made of new materials. (4162)

Tindle Milling Co., Inc., of Springfield, Mo., entered into a stipulation with the Commission to cease and desist from representing that a poultry feed sold by the firm will remove worms from poultry.

The product involved was sold under the trade names of Tindle’s Special 18 percent Wormer Egg Mash, Tindle’s Special Egg Mash with Wormer, and Tindle’s Special Wormer Egg Mash. (03316)
FM CHANNEL RESERVATION RULE ADOPTED
BY COMMISSION

Adoption of its proposed order withholding for a period ending June 30, 1947, one out of every five Class B FM channels allocated to various areas was announced Thursday (18) by the FCC. The decision followed oral argument on the subject before the Commission July 12th, in which NAB argued against the proposal. (See current REPORTS, pp. 452, 501, 541)

In announcing adoption of this reservation rule, applying only to Class B channels, the Commission also announced that it will study the advisability of reserving Class A channels as well.

Based upon allocations set forth by the Commission last December 19th, the new order withholds spectrum space for approximately ninety stations. However, the Commission states that, view of the changes which have occurred since December, a new plan incorporating such changes and reflecting the effect of the new reservation policy is being prepared.

Under the reservation plan no reservation of channels will be made if a maximum of four channels is indicated for a particular area in the December 19, 1945, release. However, if at least five but no more than nine channels are indicated for an area, one channel will be withheld for the period ending June 30, 1947. Two channels will be withheld if 10-14 channels are listed; three, if 15-19 are listed; and four, if 20 are listed.

Persons desiring to be considered for the reserved channel or channels in a given area may submit their applications prior to June 30, 1947. Such applications will be assigned a file number, and placed in a pending file for consideration after July 1, 1947. However, they will not be given the status of pending applications for the purpose of giving the applicant any legal or equitable right as an applicant during the interim period.

Applicants for reserved (Continued on page 560)

FREEDOM OF RADIO COMMITTEE STUDIES
COORDINATION WITH PRESS, MOVIE GROUPS

The Freedom of Radio Committee of the NAB on Wednesday (17) began a study of the many phases of the problem of freedom in the gathering and dissemination of news, information and entertainment for both domestic and international radio.

The existence of similar committees, including those of the press and the motion picture industry, and the (Continued on page 560)

MUSIC LICENSING DISCUSSED BY INDUSTRY COMMITTEE

The NAB Music Advisory Committee held its initial meeting in New York Monday (15). NAB President Justin Miller presided.

An all-day discussion of the relations of the industry with music licensing societies took place. Particular attention was given to the relationships of the FM and television stations and to the problem of assisting those coming into the industry in gaining an understanding of the background of music performance licenses. It was agreed that a full presentation of this subject at the forthcoming NAB convention would be most helpful and desirable.

Those present in addition to Judge Miller were Campbell Arnoux, WTAR, Norfolk, Virginia; Ed Yokum, KGHL, Billings, Montana; Robert T. Mason, WMNN, Marion, Ohio; Herbert Hollister, KMMJ, Grand Island, Nebraska; Joseph A. McDonald, ABC, New York; Carl Haverlin, MBS, New York; Edwin Souhami, NEC, New York; Julius Brauner, CBS, New York; J. H. Ryan, Executive Vice-President, Fort Industry Company, Toledo, Ohio, Board Liaison Member Sydney M. Kaye, Vice-President and General Counsel, Broadcast Music, Inc.; Don Petty, NAB General Counsel, and C. E. Arney, Jr., Secretary-Treasurer of NAB.

INSIDE THIS ISSUE

Claiming that the Lea Act violates four constitutional amendments, attorneys for AFM President Petrillo filed a motion in Federal Court last week requesting that the WAAF case be dismissed. (p. 560)

Approval for transfer of WINS from Hearst Radio to the Crosley Corp. was given by the FCC Wednesday. (p. 563)

OWMR invites stations to furnish information concerning their aid in the famine emergency campaign for inclusion in a report to President Truman. (p. 563)

As a result of the informal engineering conference held last week, FCC plans to issue a new draft of its proposed revision of the Standards of Good Engineering Practices. (p. 562)

ABC's proposals to issue additional stock and to purchase the King-Trendle Broadcasting Corporation were both approved by the FCC last week. (p. 563)

Successful programs sponsored by retailers will be outlined in the Joske Report; station cooperation sought in obtaining material. (p. 561)

Southern California newsroom, attending a recent News Clinic, decided to enlist the active support of station management in further improving news coverage. (p. 562)
channels, who file at any time during the interim period, will be given equal consideration regardless of the dates upon which their respective applications were filed.

**Freedom of Radio Committee Studies Coordination with Press, Movie Groups**

(Continued from page 559)

desirability of coordinating all of these activities was discussed.

NAB President Justin Miller, who presided, said, "We are all of the firm belief that the first amendment to the Constitution of the United States guarantees the freedom of radio. We nevertheless realize that there are forces in our midst which would impair, if not destroy, this guarantee. We have formulated for Board consideration a series of recommendations which if approved will, we believe, enable this industry properly to perform its important functions as a medium for the dissemination of news and information. I shall present these to the Board at its meeting two weeks hence."

The members of the Committee present, in addition to Judge Miller, were Eugene Carr, WPAY, Portsmouth, Ohio; Henry P. Johnston, WSGN, Birmingham, Ala.; Frank Stanton, president, CBS; William S. Hedges, vice-president, NBC, representing Niles Trammell, president; NAB General Counsel Don Petty and C. E. Arney, Jr., secretary-treasurer.

The other members of the Committee are Mark Woods, president, ABC; Edgar Kobak, president, MBS; Harold Hough, WBAP, Fort Worth, Tex.; and James W. Woodruff, Jr., WRBL, Columbus, Ga.

**FM Channel Reservation Rule Adopted by Commission**

(Continued from page 559)

Walter J. LaBuy of the Federal District Court in Chicago to dismiss on constitutional grounds the criminal proceeding alleging violation of the Lea Act growing out of the WAAP case (see current REPORTS, p. 467).

The motion, covering only one page, asserted that the information filed by District Attorney Woll did not charge any offense against the United States because the Lea Act was contrary to the First, Fifth, Tenth and Thirteenth Amendments to the U. S. Constitution. In legal language, the Act was assailed as unconstitutional because "it abridges freedom of speech"; violates the due process of law and equal protection of the law clauses of the Fifth Amendment in that it "defines a crime in terms that are excessively vague" and "denies liberty of contract"; "imposes involuntary servitude"; and is an excess of the power delegated Congress by the Constitution.

The language in the Lea Act claimed to be "excessively vague" makes illegal coercive conduct designed to force a broadcaster to employ, or pay money for failing to employ, persons "in excess of the number of employees needed by such licensee to perform actual services."

Briefs by Mr. Petrillo's attorneys are to be filed August 5, and the Government has until September 9 to file reply briefs. At that time the Court will set a date, probably September 19, for oral argument.

**Employee-Employer Relations**

**AFM Contests Lea Act Validity**

In a motion filed by his attorneys last Monday (15), AFM President Petrillo formally requested Judge...
agencies or sponsors should also be considered. Specifically, the committee invites reports on sub-standard copy submitted by agencies or sponsors and rejected by stations, so that industry-wide publicity or other appropriate action may result in raising standards of copy acceptance. Reports are requested on abuses arising out of per-inquiry or direct-sale deals proposed by agencies or sponsors, etc.

Serving with Mr. Outler on the subcommittee are Craig Lawrence of the Cowles stations; Odin Ramsland, KDAL, Duluth; Lincoln Dellar, KXOA, Sacramento; and Henry I. Christal, Edward Petry & Co., Inc.

INFORMATIVE TRANSCRIPTION LABELS REQUESTED

Recommendations for more information on transcription labels have been sent to the NAB engineering department by the Sales Managers Executive Committee, with a request that steps be taken to secure compliance by all transcription manufacturers and producers.

The recommendations ask that labels contain information showing the licensee of music contained in any transcription (ASCAP, BMI, etc.), and that length of the transcriptions be shown in number of seconds of playing time.

JOSKE REPORT TO INCLUDE PROGRAM IDEAS FOR RETAILERS

The Research and the Broadcast Advertising Departments have sent requests to all member stations asking that they submit their best programs for retailers. Descriptions of these programs will be featured in "Radio for Retailers," the report of the Joske Clinic. The report will thus contain a useful compilation of successful program material which should be of value to all broadcasters.

The usefulness of this collection, however, will be in direct proportion to the extent of the replies of those who were solicited for these programs. Since response to this request will entail very little extra effort, we hope that commercial managers and program directors will be quick and willing to respond to this request. Our deadline has to be August 1st because of the printing schedule.

Research Department

[Stations are invited to submit tested program ideas for retailers for inclusion in the Joske Report. For details, see story under Broadcast Advertising.]

264 AM CP'S GRANTED IN 12-MONTH PERIOD

The Research Department has made an analysis of the status of the standard (AM) broadcast stations which should be of interest to the industry. The following table shows the total number of stations and the monthly changes over a 12-month period. During this period from July 1, 1945 through June 30, 1946 there were 264 construction permits issued for new stations. The average for the past 4 months is over 40 stations per month.

The Department will publish this information each month and, at a later date, will include a back-log on FM and television stations.

DISCUSSION CONTINUES ON REVISION OF FCC ENGINEERING STANDARDS

An informal engineering conference was held by the Federal Communications Commission in Washington on July 15th, 16th and 17th to discuss with industry representatives the proposed revisions of the Commission's Standards of Good Engineering Practices, Part 1, for standard broadcast stations.

George Adair, chief engineer of the FCC, acted as chairman of the conference and lead rather lengthy discussions covering all phases of the revisions. Mr. Adair announced plans for a revised draft of the revisions based on the opinions expressed by those attending the conference. This draft will be made available to interested parties on July 29th.

Present at the conference were representatives of a number of broadcasting stations, networks and consulting engineering firms.

Formation of the proposed changes will be undertaken by the Commission, en banc, on August 5th. Interested parties will have an opportunity for filing comments before the August 5th meeting of the Commission.

At an early date the NAB Engineering Department will prepare a digest of the proposed revisions for NAB members.

LEGAL DEPARTMENT

FCC DENIES WJOL LICENSE RENEWAL PENDING STATEMENT ON PROGRAM CONTROL

The FCC released a proposed decision on Tuesday (16) to deny application of the Joliet Broadcasting Co. for renewal of its license to operate Station WJOL, Joliet, Ill.

Ground for the proposed denial was a contract between the present holders of the license and their predecessor, by which the latter was given without charge a three-quarter hour period every day “so long as Station WCLS [now WJOL] is operating,” for the purpose of advertising his own firm or any other with which he did business.

The Commission concluded that this contract was in violation of Sec. 310(b) of the Communications Act, in that it effected transfer of control of a portion of the license without a decision by the Commission that such transfer was in the public interest.

Said the FCC: “The existence of an agreement reserving portions of the broadcast day to one not under a statutory duty to operate the station in the public interest, for an indefinite period of time which may be of long duration extending through successive license terms ... is in derogation of the licensee’s duty to assume complete responsibility for the operation of his station.”

The Commission so held notwithstanding the claim of the licensee that it exercised censorship of the programs broadcast in the time made available by the contract.

The proposed decision stated further: “In the case now before us, the applicant is shown to exercise a full and complete right only with regard to a portion of the station’s program structure, and a second party who has no status before the Commission and who holds no federal authorization to operate radio broadcast facilities, asserts and exercises an equal right with regard to another portion of the station’s program structure.”

The Commission further held that Section 301 of the Communications Act was violated in that a portion of the station’s facilities are used by a person whose qualifications to operate in the public interest have never been determined in a proceeding before the Commission; and that Section 309(b) (1) was violated in that the licensee, by divesting himself of complete control, has permitted the use of his facilities in a manner not authorized in his license.

On the basis of these conclusions the Commission granted a temporary license for three months provided the licensee shows within one month that the contract under discussion has been terminated and that he has regained entire control over the operation and program structure of the station.

NEWS CLINICS

16th DISTRICT NEWSMEN PLAN HIGHER NEWS STANDARDS

Radio newsmen of Southern California stations are working out long range plans designed to raise the standards of radio news. Management is to be invited to cooperate in the planning and the execution of the methods adopted.

George Lewin, KECA-ABC, Pat Bishop, KFI, and Vance Graham, KMPC, make up the three man committee to contact the Southern California Broadcasters Association. The committee is to report back in two weeks to those attending the organization meeting which grew out of the radio news clinic held in KFI’s auditorium studio, Thursday, July 11.

The radio news clinic itself was called by William B. Ryan, director, NAB 16th district, and general manager, KFI, Los Angeles, to take advantage of the presence on the west coast of Arthur Stringer, NAB manager of special services. He has been conducting radio news clinics at the invitation of district directors since November 1945.

In signing off the clinic, Director Ryan expressed approval of the aims for improvement proposed by the newsmen. He said that bringing management into the picture would speed progress. The newsmen asserted that they were in perfect agreement with him.

(Continued on next page)
and the statement made by Art Stringer that “You cannot have a first class news department and first class newscasts without the sympathetic understanding of management. That’s the first step.”

Those attending the news clinic included:

Sheldon Bren, KCMJ, Palm Springs; Ed King, KFMB, San Diego; Ernie Ford, Larry Shields, Frank Crilly, Don Commings, KPXM, San Bernar
dino; Bill Smith, Norman Masterson, Byron Durham, Martin Gaston, KFOX, Long Beach; J. W. McFar
dane, Art Mason, KPMC, Bakersfield; Eddie Albright, KGFJ, Hollywood; E. S. Spencer, L. S. Nicholson, KVOE, Santa Ana; R. E. Sprague, J. C. Swayze, NBC, Los Angeles; George E. Lewin, ABC, Los Angeles.

Gene Williams, KPRO, Riverside; G. G. Renier, Bob Adams, Vance Graham, KMPC, Los Angeles; Joe Roos, Al Gordon, KFWB, Los Angeles; Howard P. Gray, Carl Brewster, KFVD, Los Angeles; Ken Burton, Gill Beaton, KKW, Pasadena; Ned Conn
nor, Doug Douglas, KRKD, Los Angeles; Carl H. Saunders, Dick Schofield, KXLA, Pasadena.

Charles Granville, KFAC, Los Angeles; J. G. Pal
tridge, KGIL, San Fernando; Kerwin Hoover, R. J. Hammargren, Pat Bishop, Ted Meyers, W. B. Ryan, George Whitney, Charles Brown, John Curran, Curt
xis Mason, Dean Moxley, KFI, Los Angeles; Chet Huntley, Jack Beck, KNX, Los Angeles; Amos Baron, KECA, Hollywood; Roger Patrick, Fred Henry, KLAC, Corvallis, Oregon; and Robert Coleson, NAB.

### FCC

**ABC STOCK PLANS AND KING-TRENDLE PURCHASE BOTH APPROVED BY FCC**

The proposed purchase of the King-Trendle Broadcast
ing Corporation by the American Broadcasting Company and the network’s plan to issue approximately one million additional shares of stock were both ap
proved by the FCC Thursday (17).

ABC having declared its desire not to obtain control of King-Trendle’s WOOD, Grand Rapids, the Commiss
ion's approval of this transfer included the provision that “the fixed assets of WOOD and the net profits of that station from this date to the date upon which the Commission may give its consent to the transfer of WOOD to its ultimate purchaser, be held in trust by the American Broadcasting Company, Inc.”

In reference to ABC’s proposal to sell 23.9% of the capital stock of King-Trendle to Liberty Broadcasting, Inc., for $850,000, the Commission specified in its or
der that the AVCO procedures be followed.

### TRANSFER OF WINS APPROVED

The FCC approved on Wednesday (17) the transfer of Station WINS from Hearst Radio, Inc., to the Cros
ley Corp.

The commission originally proposed to deny the transfer, primarily on two grounds: first, the prov
ision in the agreement between the parties giving Hearst Radio a time credit on Station WINS of $400,-
000 to be used over a period of ten years; and second, an insufficiency of showing made by Crosley with re
spect to the service to be provided in the operation of WINS.

Following a joint petition, the FCC reopened the record for further hearing on June 19-20. At the hearing, an amended contract was submitted to the commis
sion, eliminating the reservation of time. Addi
tional testimony was presented regarding the serv
ice proposed by Crosley in the event permission for the transfer should be granted.

**MINDERMAN IN NEW POST AT FCC**

The FCC Monday (15) announced the appointment of Earl Minderman as assistant to Acting Chairman Charles R. Denny. He succeeds Walter E. James, who was promoted to assistant to the general counsel.

Mr. Minderman had served as director of informa

The NAB Board of Directors convenes at Estes Park, Colo., Aug. 6th for a three day session.

**SCOTT PETITION FOR REVOCATION OF THREE STATION LICENSES DENIED BY FCC**

Denying the petition of Robert Harold Scott that the licenses of stations KQW, KPO, and KFRC be revoked for refusing him time to discuss atheism, the FCC on Friday (19) issued the following memorandum opin
ion and order:

On March 27, 1945, Robert Harold Scott, of Palo Alto, California, filed a petition requesting that the Commission revoke the licenses of radio stations KQW, San Jose, California, and KPO and KFRC, both of San Francisco, California. The ground on which the petitioner seeks to have the Commission take this action is that these stations have refused to make any time available to him, by sale or otherwise, for the

(Continued on next page)
broadcasting of talks on the subject of atheism, while
they have permitted the use of their facilities for
direct statements and arguments against atheism as
well as for indirect arguments, such as church services,
prayers, Bible readings, and other kinds of religious
programs. It is petitioner's contention that the ques-
tion of the existence or non-existence of a Divine
Being is, in itself, a controversial issue, and that in
refusing to make time available for arguments in sup-
support of the atheistic point of view, the stations com-
plained of are not presenting all sides of the issue
and, therefore, are not operating in the public interest.

After having secured further information from the
petitioner, the Commission notified the stations of the
petition and invited their comments on the matter.
Don Lee Broadcasting System, licensee of Station
KFRC, expressed its "firm belief that it would not be
in the public interest to lend our facilities to Mr.
Scott for the dissemination and propagation of
atheism." National Broadcasting Company, Inc.,
licensee of KPO, asserted that "it is difficult to imagine
that a controversial public issue exists in the usual
sense of that phrase, on the subject of the existence
of a God merely because of the non-belief of a rela-
tively few." Station KQW, in its reply, stated that it
refused time to petitioner for the "broadcasting of
atheistic talks," and contended that such talks would
not be in the public interest. The answer stated that
the management of KQW did not consider the "pro-
posed atheistic broadcasts" as presenting a "contro-
versial public question" and that, in any event, "if a
public controversial question was tendered, it was not
of sufficient public moment and did not present a
question so uppermost or important in the minds of
the public to justify its broadcast in the public in-
terest with consequent displacement of an existing
program service." The answer alleged further that
"KFRC acted within its legal rights and the Commis-
sion is not by statute authorized to substitute its
judgment for that of the licensee under the circum-
stances here presented."

In his petition, Mr. Scott says: "I do not throw
stones at church windows. I do not mock at people
knelling in prayer. I respect every man's right to
have and to express any religious belief whatsoever.
But I abhor and denounce those who, while asserting
this right, seek, in one way or another, to prevent
others from expressing contrary views."

It therefore appears, both from licensees' responses
to Mr. Scott's requests for access and from his state-
ment of his own position, that the question here pre-
sented does not involve blasphemous attacks upon the
Deity, or abusive or intemperate attacks upon any
religious belief or organization, but only such criti-
cisms as would necessarily be implied in the logical
development of arguments supporting atheism. The
licensees of the stations involved appear to have
treated atheism as a special type of controversy and
to have interpreted their obligation to operate in the
public interest as requiring or permitting them to bar
access to their facilities for the presentation of the
atheistic point of view, not because of the manner in
which the point of view is to be presented, but because
they believe its substance to be distasteful or ob-
jectionable to a large majority of the listening audi-
ence.

As in the case of the petition of the Reverend Sam
Morris for a denial of the application of renewal of
license to Station KRLD, Dallas, Texas (File No.
B3-R-397), the issue here involved is one of broad
scope and it is not restricted to the three stations
which are the subject of Mr. Scott's complaint. We
therefore do not feel that we would be warranted on
the basis of this single complaint in selecting these
three stations as the subject of a hearing looking
toward termination of their licenses, when there is no
urgent ground for selecting them rather than many
other stations. But, lest our dismissal of Mr. Scott's
petition be misconstrued, we feel that we should make
our position entirely clear, as we did in dismissing
the petition of the Reverend Sam Morris.

The First Amendment to our Constitution guar-
antees both religious freedom1 and freedom of speech.
While these guarantees are expressed in terms of
liberty for the person who dictates the points in
which the point of view is to be presented, but because
they believe its substance to be distasteful or ob-
jectionable to a large majority of the listening audi-
ence.

As in the case of the petition of the Reverend Sam
Morris for a denial of the application of renewal of
license to Station KRLD, Dallas, Texas (File No.
B3-R-397), the issue here involved is one of broad
scope and it is not restricted to the three stations
which are the subject of Mr. Scott's complaint. We
therefore do not feel that we would be warranted on
the basis of this single complaint in selecting these
three stations as the subject of a hearing looking
toward termination of their licenses, when there is no
urgent ground for selecting them rather than many
other stations. But, lest our dismissal of Mr. Scott's
petition be misconstrued, we feel that we should make
our position entirely clear, as we did in dismissing
the petition of the Reverend Sam Morris.

The First Amendment to our Constitution guar-
antees both religious freedom1 and freedom of speech.
While these guarantees are expressed in terms of
liberty for the person who dictates the points in
which the point of view is to be presented, but because
they believe its substance to be distasteful or ob-
jectionable to a large majority of the listening audi-
ence.

As in the case of the petition of the Reverend Sam
Morris for a denial of the application of renewal of
license to Station KRLD, Dallas, Texas (File No.
B3-R-397), the issue here involved is one of broad
scope and it is not restricted to the three stations
which are the subject of Mr. Scott's complaint. We
therefore do not feel that we would be warranted on

1 No principle is more firmly embodied in our Constitution than that
of religious freedom. In addition to the First Amendment, Article VI
prohibits any religious test as a qualification to any office or political
trust under the United States. See also, in the interests of freedom of
conscience, permits affirmation rather than oath in the
pledge to support the Constitution required of state and federal officials.
Likewise, Section 1 of Article II permits the substitution of an affirma-
tion for the oath of office required of the President of the United States.

(Continued on next page)
A rule which denies freedom of expression to the professioned atheist or to the believer whose particular belief they may happen to disapprove, and thus of effectively denying the believer the right to express his views. Under such a course, Jefferson, Jackson, Lincoln, and others whose names we revere could, today, be barred from access to the air to express their own particular religious philosophies. The first two were denounced with particular vigor from the pulpits of some of the wealthiest and better established churches, and the label of “atheist” was freely attached to Jefferson by those who had come to feel that their favored positions, which were threatened by his social, economic, and political philosophies, were rewards which the Deity had bestowed upon them because of their special virtues and accomplishments.

Underlying the conception of freedom of speech is not only the recognition of the importance of the free flow of ideas and information to the effective functioning of democratic forms of government and ways of life, but also the belief that every idea, however dangerous—dangerous to the institution or belief to which the immunity is granted as well as to the freedom of the people generally. Sound and vital ideas and institutions become strong and develop with criticism as long as they themselves have full opportunity for expression; it is dangerous that the unsound be permitted to flourish for want of criticism.

Moreover, however strongly we may feel about the sacredness of religious beliefs, we should be mindful of the fact that immunity from criticism cannot be granted to religious belief without, at the same time, granting it to those who use the guise of religion to further their ends of personal profit or power, to promote their own particular political or economic philosophies, or to give vent to their personal frustrations and hatreds. “False prophets” are not phenomena peculiar to Biblical days. Their danger now, as then, lies essentially in the difficulty of recognizing them as such. This difficulty is increased to the extent that their doctrines and motives are shielded from critical examination. We recognize that in passing upon requests for time, a station licensee is constantly confronted with most difficult problems. Since the demands for time may far exceed the amount available for broadcasting, a licensee must inevitably make a selection among those seeking it for the expression of their views. He may not even be able to grant time to all religious groups who might desire the use of his facilities, much less to all who might want to oppose religion.

The fact that a licensee’s duty to make time available for the presentation of opposing views on current controversial issues of public importance may not extend to all possible differences of opinion within the ambit of human contemplation cannot serve as the basis for any rigid policy that time shall be denied for the presentation of views which may have a high degree of unpopularity. The criterion of the public interest in the field of broadcasting clearly precludes a policy of making radio wholly unavailable as a medium for the expression of any view which falls within the scope of the constitutional guarantee of freedom of speech.

Because, as we have stated above, the problem here presented is far broader in scope than the complaint against the particular stations here involved, we feel that the petition should be denied, notwithstanding the views which we have expressed.

IT IS THEREFORE ORDERED, This 19th day of July, 1946, that the petition BE, AND IT IS HEREBY, DENIED.

Public Interest Programming

INFORMATION FROM STATIONS NEEDED BY OWMR FOR PRESIDENTIAL REPORT ON FAMINE

A full report is now being prepared for President Truman on the work of government agencies, private organizations and citizens in support of the Famine Emergency Program.

The radio industry is entitled to full credit in that report for their great contributions of time and talent.

The Media Programming Division of the Office of War Mobilization and Reconversion—who are preparing the report—ask every radio station that has contributed to the Famine Emergency Program above and beyond the routine allocations to report directly to them at once.

Send your report to Mr. Jay M. Socin, Media Programming Division, Office of War Mobilization and Reconversion, Room 706, 734—15th Street, N. W., Washington 25, D. C.

(Continued on next page)
The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 29-August 4, 1946, by The Advertising Council and the Media Programming Division of the OWI.

A brief resume of each Fact Sheet is given below:

**Farm Labor Needed**

America's farmers will have to produce and harvest far more food this season than ever before, even more than during the most critical war years. They can succeed only if they receive urgently needed help. They have planted millions more acres than were planted in 1945. Maximum harvest, essential to our own physical well-being and to the very existence of the American people overseas, depends on two factors—weather and farm labor. This year the number of persons working on farms is 4 per cent greater than last. But this slight gain in the farm labor supply has been materially offset by the post-war shift toward shorter working hours, the loss of all prisoner-of-war labor, and a 15 to 20 per cent reduction in the number of foreign workers that will be imported overseas. The two latter factors represent a loss of 4 per cent greater than last. But this slight gain in the farm labor supply has been materially offset by the post-war shift toward shorter working hours, the loss of all prisoner-of-war labor, and a 15 to 20 per cent reduction in the number of foreign workers that will be imported overseas. This leads the county agricultural agent or the farm labor office in their community. The county agent is usually located in the county seat. In cities where there is no county agent office, information generally is available at farm labor or other public employment offices, including the United States Employment Service Offices. This also applies to those seeking year-round farm work, whether experienced or inexperienced. Those who have the remainder of the summer to devote to farm work should contact the county agricultural agent or the farm labor office in their community. The county agent is usually located at the county seat. In cities where there is no county agent office, information generally is available at farm labor or other public employment offices, including the United States Employment Service Offices. This also applies to those seeking year-round farm work, whether experienced or inexperienced. Those who can devote only part of their time to farm work should stand by for the local call for workers in their towns, cities and counties. This call will be made through newspapers, radio and other communication facilities. Precaution wages and piece-work rates are paid to all who volunteer their services. These rates vary from state to state, and community to community. (Fact Sheet No. 26)

**U. S. Marine Corps Recruiting**

Congress has authorized the U. S. Marine Corps to increase its peacetime strength to 100,000 men. Since the Marine Corps has not accepted inductees since shortly after V-J Day, the men who make up this force necessarily be volunteers with high qualifications and training. The Corps now numbers 140,000 but over half of these are inductees and reservists, many of whom are regularly becoming eligible for discharge. In addition, the enlistment period of 7500 regulars expires with the next three months. The Marine Corps is attempting to fulfill an unwritten obligation to discharge all war-time inductees and reservists—whether or not they are eligible—by Christmas, 1946. This will be impossible, however, unless new enlistments are increased by approximately 40,000 immediately in order to bring the strength of the regular corps up to 100,000 men. Young men between 17 and 30 should be told of the many advantages—travel, education, training, pay—offered by two, three or four year enlistments in the Marine Corps, and also urged to give serious consideration to the Corps as a career. Every Marine is entitled to the benefits offered under the G.I. Bill of Rights. These benefits include low interest loans, schooling at government expense, low rate insurance, seniority on jobs and unemployment insurance. Go to the Marine Corps recruiting office nearest you or write directly to U. S. Marines, Washington 25, D. C., for an attractive booklet describing the advantages of service in the peacetime Marine Corps. (Fact Sheet No. 27)

**Fat Salvage**

Supplies of fats and oils are still far short of demands and needs due to a decline in domestic production and the war-born loss of foreign imports. Fats and oils are essential to the production of soap, and countless other peacetime consumers items. Only by continuing to salvage used kitchen fats can housewives help prevent possible shortages of soap, accelerate the production of other peacetime goods everyone wants and needs. The shortage of fats and oils is due to a decline in domestic production, a reduction in South American imports and the continued inaccessibility of imports from the East Indies and Philippines. About forty-seven per cent of the total allocations of fats and oils for domestic industrial uses goes to civilian soap; five per cent to the manufacture of soaps for industrial purposes; the remaining forty-eight per cent to paints and varnishes, floor coverings, coated fabrics, lubricating oils, textiles and leather, core oils, pharmaceuticals, putty and caulking compounds, etc. The shortage of fats and oils in the face of the great need for them in all phases of peacetime production indicates the urgency of the need for continued fat salvage. Housewives can actually help themselves to get the peacetime products they want and need in greater abundance and sooner by keeping up their good work in salvaging fats. They are asked to: . . . save every drop of used fat by draining pans, skimming soups, and gravies, melting down trimmings of meat left on platters and plates . . . pour immediately into the salvage can those fats which can't be re-used . . . re-use those suitable for cooking, and salvage whatever is left . . . turn in the fat salvage container . . . . . . .

**General**

**CONSTRUCTION CURBS REMAIN EFFECTIVE**

Civilian Production Administrator John D. Small indicated last week that the present tight regulations controlling non-housing construction would probably be continued for another two months.

The CPA chief stated on Tuesday (16) that despite the cut in construction in effect since the CPA order of May 29, the supply of material for home-building has not reached the required peak.

CPA announced that during the week ending July 4, it had denied more than 61 million dollars worth of non-housing construction. This figure represents almost twice the value of projects approved.

**WORLD CALENDAR SUGGESTED IN CONGRESS**

Representative Karl E. Mundt, South Dakota, introduced a bill in the House of Representatives last week which provides for a uniform perpetual calendar.

The calendar plan divides the year into four equal quarters of 91 days each. The first day of the year is set for Sunday, as are the first days of April, July and October, the first months of each quarter. Each of the other eight months have 30 days each. December 31st of each year is proposed as a year-end world holiday.

Rep. Mundt’s comments on the bill in the House pointed out that the radio industry has already broken the year into four equal quarters, since many radio contracts are written for 13 week periods.

Mr. Mundt suggested that if the world calendar is adopted, January 1, 1950 would serve as an ideal start, since that day falls on a Sunday.
HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 22. They are subject to change.

Monday, July 22

Further Hearing

Before Commissioner Hyde in Room 6121

In the matter of Clear Channel Broadcasting in the standard broadcast band.

WCMJ—The Ashland Broadcasting Co., Ashland, Ky.—C. P. 1340 kc., 250 watts, unlimited.

Further Hearing

NEW—Fostoria Broadcasting Co. (Lawrence W. Harry), Fostoria, Ohio—C. P. 1510 kc., 250 watts, daytime.
NEW—The Lorain Journal Co., Lorain, Ohio—C. P. 1140 kc., 250 watts, daytime.

NEW—Janies A. Noe, New Orleans, La.—C. P. 1060 kc., 25 watts night, 50 KW day, unlimited, DA-night and day.
NEW—Deep South Broadcasting Corp., New Orleans, La.—C. P. 1060 kc., 10 KW night, 50 KW day, unlimited, DA-night and day.

Other Participants

KYW—Philadelphia, Pa. (Intervenor)

Tuesday, July 23

NEW—Lake Superior Broadcasting Co., 213 East Superior St., Duluth, Minn.—C. P. 1080 kc., 10 KW day, 5 KW night, unlimited, directional antenna.

Further Hearing

NEW—KMAK, Inc., Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—Samuel R. Sague, Cleveland Heights, Ohio—C. P. 1490 kc., watts, unlimited.
NEW—The Cuyahoga Broadcasting Co., Cleveland, Ohio—C. P. 1490 kc., 250 watts, unlimited.
NEW—Forest City Broadcasting Co., Cleveland, Ohio—C. P. 1450 kc., 250 watts, unlimited.

Other Participants

WJJK—Detroit, Mich. (Intervenor)

Wednesday, July 24

WAML—New Laurel Radio Station, Inc., 535½ Central Ave., Laurel, Miss.—C. P. 1500 kc., 1 KW, unlimited.

Other Participants

The Times Picayune Publishing Co. (Intervenor)
Motion filed for WQXR (Pending)

NEW—Lake Broadcasting Co., Inc., 6th and Broadway, Gary, Ind.—C. P. 1560 kc., 500 watts night, 1 KW day, unlimited.

Other Participants

WQXR (Respondent)

Television Broadcast

Further Hearing

To Be Held Before Commissioner Wakefield in Jury Hearing Room, No. 324 Federal Bldg., Los Angeles, California

NEW—Hughes Tool Co., Los Angeles, Calif.—For television facilities.
NEW—Earle C. Anthony, Inc., Los Angeles, Calif.—For television facilities.
NEW—National Broadcasting Co., Inc., Los Angeles, Calif.—For television facilities.
NEW—American Broadcasting Co., Inc., Los Angeles, Calif.—For television facilities.
NEW—The Times-Mirror Co., Los Angeles, Calif.—For television facilities.
NEW—Television Productions, Inc., Hollywood, Calif.—For television facilities.
NEW—Dorothy S. Thackrey, Los Angeles, Calif.—For television facilities.

WSOC—Radio Station WSOC, Inc., Belmont, N. C.—C. P. 1550 kc., 50 KW.
NEW—Radio Springfield, Inc., Springfield, Ill.—C. P. 1550 kc., 1 KW.
WHYN—Hampden-Hampshire Corp., Holyoke, Mass.—C. P. 1550 kc., 10 KW.
NEW—WCBB, Inc., Decatur, Ill.—C. P. 1550 kc., 250 watts, unlimited.
NEW—Fulton County Broadcasting Corp., Atlanta, Ga.—C. P. 1550 kc., 50 KW, directional antenna, unlimited.
FCC ACTIONS

DOCKET CASE DECISIONS

The Federal Communications Commission announces a proposed Decision (B-254; Docket 6853) looking towards a decision on the denial of renewal of license of station WJOL, Joliet Broadcasting Company, Joliet, Ill., operating on 1340 kc., with 250 watts, unlimited time, without prejudice to further proceedings as follows:
The applicant will be granted a temporary license for a period of three months, provided that within thirty days after this decision becomes final the applicant shall file with the Commission a statement which establishes that it has full control over the operation of the station and the entire program structure thereon; and that no further effect will be given to the agreement of August 9, 1945, wherein Felman reserves to himself the right to certain broadcast hours of the station.

AM APPLICATIONS GRANTED

NEW—David M. Segal and Henry N. Fose, d/b as Texarkan Broadcasting Co., Texarkan, Texas—Granted construction permit for a new station to operate on 1100 kc., 250 watts, unlimited time, without prejudice to further proceedings as follows:

The applicant will be granted a temporary license for a period of three months, provided that within thirty days after this decision becomes final the applicant shall file with the Commission a statement which establishes that it has full control over the operation of the station and the entire program structure thereon; and that no further effect will be given to the agreement of August 9, 1945, wherein Felman reserves to himself the right to certain broadcast hours of the station.

NEW—Central Broadcasting Corp., Flint, Mich.—Granted construction permit for a new station to operate on 1290 kc., 1 KW, unlimited time, subject to conditions that applicant will within 60 days from date of action file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements and standards of good engineering practice. (B4-P-1808)

NEW—Caribbean Broadcasting Corp., Arecafo, P. R.—Granted construction permit for a new station to operate on 1280 kc., 1 KW, unlimited time, subject to condition that applicant will within 60 days from date of action file an application for modification of permit, specifying a transmitter site and antenna system meeting the requirements of the Commission's standards of good engineering practice. (B3-P-1808)

NEW—Raymond V. Eppel and Jas. P. Ryan, d/b as Mitchell Broadcasting Assn., Mitchell, So. Dak.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time, subject to conditions that applicant will within 60 days from date of action file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements and standards of the Commission's standards of good engineering practice. (B4-P-18594)

NEW—Dickinson Radio Assn., Dickinson, N. Dak.—Granted construction permit for a new station to operate on 1290 kc., 250 watts, unlimited time, subject to conditions that applicant will within 60 days of grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements and standards, and subject to CAA approval of transmitter site and antenna system. Waiver of Sec. 3.55(b) and 3.56 required. (B4-P-1711)

NEW—The Philadelphia Inquirer, a Division of Triangle Publications, Inc., Philadelphia, Pa.—Granted CP for a new station; channel #5, 76-82 me.; power: visual 40 KW; aural 37.4 KW; antenna 540 feet; conditions: (1) the Commission's rules are waived with respect to this grant, on condition that approved frequency and modulation monitors will be installed as soon as available. (B4-P-1856; Docket 7479)

NEW—Central Broadcasting Corp., Flint, Mich.—Granted construction permit for a new station to operate on 660 kc., 1 KW day, 500 watts night, unlimited time, DA. (B2-P-4406; Docket 5749) Action taken 6-17.

FEL DREW, E. A. Stephens and William H. Talbot, d/b as Texas Broadcasters, Houston, Texas—Granted construction permit for a new station to operate on 1590 kc., 1 KW, unlimited time, DA-night. (B3-P-3648; Docket 6724)

NEW—Caprock Broadcasting Co., Lubbock, Texas—Granted construction permit for a new station to operate on 1590 kc., 1 KW, unlimited time, on condition that directional antenna system be redesignated so as to afford protection to WAKR to a value comparable to that presently proposed, and further to provide protection to KYGB operating as proposed, and to a station in Houston as proposed by Texas Broadcasters (Docket 6824) to value less than 70% of the existing limitation to these two stations. (B3-P-1600; Docket 6810)

NEW—Annapolis Broadcasting Corp., Annapolis, Md.—Granted construction permit for a new station to operate on 1190 kc., 1 KW, daytime only, subject to condition that applicant will within 60 days of grant file an application for modification of CP, specifying a transmitter site meeting the requirements and standards. (B4-P-1783)

NEW—John W. Davis, Portland, Ore.—Granted construction permit for a new station to operate on 800 kc., 250 watts, daytime only, subject to the condition that applicant will within 60 days from date, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements and standards. (B3-P-18514; Docket 7451)

NEW—W. Walter Tison, etc., Tampa, Fla.—Granted construction permit for a new station to operate on 1110 kc., 1 KW, daytime only, on condition that applicant disposes of his stock in WFLA, Tampa, subject to condition that applicant will within 60 days from date of grant, an application for modification of permit specifying a transmitter site and antenna system meeting the requirements and standards. (B3-P-18514; Docket 7451)

NEW—Egon A. Hofer, David L. Hofer and John M. Banks, co-partners, d/b as Radio Dinuba Co., Dinuba, Calif.—Granted construction permit for a new station to operate on 1130 kc., 250 watts, daytime only, contingent on CAA approval of transmitter site and antenna system. (B5-P-4785)

TELEVISION APPLICATIONS GRANTED

NEW—Scripps-Howard Radio, Inc., Cleveland, Ohio—Granted CP for a new station; channel #5, 76-82 me.; power: visual 40 KW; aural 37.4 KW; antenna 540 feet; conditions: (1) the Commission's rules are waived with respect to this grant, on condition that approved frequency and modulation monitors will be installed as soon as available. (B2-PCT-121; Docket 7259)

NEW—The Chronicle Pub. Co., San Francisco, Cal.—Granted CP for a new television station Channel #11, 198-201 mc.; power 18.24 KW visual; 19.2 kw aural: antenna 228 feet. (B2-PH-259; Docket 7125) Action taken 6-17. (2) waiver of Sec. 3.562 required. Permittee to install frequency monitor of accuracy of .001% or better when available. (B2-PCT-21; Docket 7259)

NEW—The Philadelphia Inquirer, a Division of Triangle Publications, Inc., Philadelphia, Pa.—Granted CP for a new station: channel #5, 76-82 me.; power: visual 18.1 kw; aural: 9.3 aural; antenna: 500 feet; conditions: (1) equipment to meet all performance requirements of Commission's Television Standards. (B2-PCT-73)

FM ENGINEERING APPROVALS AND CP'S

According to an amendment to a previous report issued by FCC, the following stations received Engineering Approvals and/or were granted regular construction permits:

WJR, The Goodwill Station, Inc., Detroit, Mich.—Class B: 94.9 Me. (No. 235); 28 KW; 440 feet. (B2-MPH-88) Action taken 6-17. (3) equipment to meet all performance requirements of Commission's Television Standards. (B2-PCT-73)

Continued on next page
Bay State Broadcasting Co., New Bedford, Mass.—Class B: 96.9 Mc. (No. 245); 200 KW; 500 feet. (B1-PH-901)

Ponkeepsie Newspapers, Inc., Portageville, N. Y.—Class B: 103.7 Mc. (No. 277); 1.7 KW; 1215 feet. (B1-PH-290)

WSMB, Inc., New Orleans, La.—Class B: 95.7 Mc. (No. 299); 15 KW; 531 feet. (B3-PH-855)

WSAV, Inc., Savannah, Ga.—Class B: 98.9 Mc. (No. 255); 11 KW; 240 feet. (B3-PH-600)

Harold O. Bishop, Harrisburg, Pa.—Class A: 101.7 Mc. (No. 284); 167 watts; 18 feet. (B2-PH-877)

NONCOMMERCIAL EDUCATIONAL APPLICATIONS GRANTED

NEW—Grant Union High School and Technical College, North Sacramento, Calif.—Granted CP for a new station; Channel No. 213 90.5 Mc. power 0.8 KW; antenna 470 feet; approved types of frequency and modulation monitors to be used; site subject to CAA approval. (B3-PED-67)

NEW—School District #4, Lane County, Ore., Eugene, Ore.—Granted CP for a new station; Channel No. 211. 90.1 Mc.; power 0.3 KW; antenna 45 feet; approved types of frequency and modulation monitors to be used; site subject to CAA approval. (B5-PED-68)

CORRECTION

The following correction has been issued by the Commission:

Providence Bible Institute, Providence, R. I.—Granted conditional construction permit for new non-commercial educational FM broadcast station; frequencies to be assigned by FCC Chief Engineer; 1.45 KW; antenna 200 feet.

DESIGNATED FOR HEARING

Correction

A correction has been issued by the Commission on an item referring to Diamond State Broadcast Group, Dover, Del. This should have shown it was designated for hearing May 22, 1946, before Commissioner Ray C. Wakefield in the San Francisco area. The hearing is scheduled to be heard August 12. 1946, before Commissioner Ray C. Wakefield.

NEW—School District #1, Lane County, Ore., Eugene, Ore.—Granted CP for a new station; Channel No. 211, 90.1 Mc.; power 0.3 KW; antenna 45 feet; approved types of frequency and modulation monitors to be used; site subject to CAA approval. (B5-PED-68)

Peninsula Newspapers, Inc., Palo Alto, Cal.—Designated for hearing in a consolidated proceeding application for a new station (B3-PH-866) to operate on 830 Mc, 250 watts, daytime only, with application of California-Nevada Broadcasting Co. (B3-PH-864, Docket 7564), requesting the same facilities at Vallejo, and ordered that the Commission’s order of May 2 designating the California-Nevada Broadcasting Co. application for hearing and making KTRB a party to the proceeding, be amended to include the above application of Peninsula Newspapers, Inc.

H. M. Williamson and Roy D. Johnson, d/b as Modesto Broadcasting Co., Modesto, Cal.; Wallace N. Lindskoog, Luther G. Boone, et al., d/b as Turlock Broadcasting Group, Turlock, Cal.—Designated for consolidated hearing the application of Modesto Broadcasting Co. (B5-PH-851, Docket 7678) with application of Turlock Broadcasting Group (B3-PH-873, Docket 7579), both requesting new stations in the cities indicated to operate unlimited time on 1450 Mc, with 100 watts and 250 watts respectively.

Thomas Henry Golding, Sr., et al, d/b as Radio Services Co. of Brookhaven, Miss., Brookhaven, Miss.; Brookhaven Broadcasting Co., Brookhaven, Miss.—Designated for consolidated hearing application of Radio Services Co. of Brookhaven, Miss. (B3-PH-4701), with application of Brookhaven Broadcasting Co. (B3-PH-4974); both applicants request a new station to operate on 1340 Mc, 250 watts, unlimited time.

WBIZ, Inc., Eau Claire, Wis.; The Eau Claire-Chippewa Broadcasting Co., Eau Claire, Wis.—Designated for consolidated hearing application of WBIZ, Inc. (B4-PH-4932) with application of The Eau Claire-Chippewa Broadcasting Co. (B4-PH-4939), both applicants seeking a new station to operate on 1490 Mc, 250 watts, unlimited time.

United Broadcasting Co., Inc., Silver Spring, Md.; Arlington-Fairfax Broadcasting Co., Arlington, Va.—Designated consolidated hearing application of United Broadcasting Co., Inc. (B1-PH-4303, formerly Docket 7428), for a new station in Silver Spring to operate on 1390 Mc, 1 KW, daytime only, with application of Arlington-Fairfax Broadcasting Co. (B2-PH-8969) requesting the same facilities in Arlington.

Eagle Printing Co., Inc., Butler, Pa.—Designated for hearing application (B2-PH-4809) to operate on 1230 Mc, 250 watts, unlimited time. (Docket 7672)

WTHT—The Hartford Times, Inc., Hartford, Conn.—Designated for hearing the application of WTHT (B1-PH-3928) to change frequency from 1220 to 1310 Mc, increase power from 250 watts to 5 KW, install a new transmitter, change transmitter location, and install DA for day and night use (Docket 7673), in a consolidated proceeding with application of Central Conn. Broadcasting Co. (Docket 7557), requesting the same frequency for a new station in New Britain which was designated for hearing May 10; ordered that the order of May 10 designating this application for hearing be amended to include the above application of WTHT.

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.; WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Designated for consolidated hearing the application of WOWO (B4-PH-4019, Docket 7674) for increase in power from 10 to 50 KW on 1190 Mc, installation of a new transmitter, change transmitter location and install a directional antenna, with application of WIRE (B4-PH-4464, Docket 7675) to change frequency from 1430 to 1190 Mc, increase power from 5 to 50 KW, install a new transmitter, change transmitter location, and install a DA for nighttime use, unlimited time.

Wolverine State Broadcasting Service, Inc., Detroit, Mich.—Designated for consolidated hearing application of Wolverine State Broadcasting Service, Inc. (B2-PH-4971, Docket 7676), for a new station to operate on 680 Mc, 250 watts, daytime only, with application of Herman Radner, Dearborn, Mich. (B2-PH-3180; Docket 6220), and amended the order of March 29 designating the Radner application for hearing, to include the above application of Wolverine State Broadcasting Service, Inc.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending May 1, 1949:

WDAF, Kansas City, Mo.; WFRN, Providence; WGAX and Aux., Portland, Me.; WICC, Bridgeport, Conn.; WPRO and Aux., Providence; WRAC and Aux., Memphis, Tenn.; and WJSJ, Winston-Salem.

MISCELLANEOUS ACTIONS

WICY—North Country Broadcasting Co., Malone, N. Y.—Granted modification of CP, which authorized a new transmitter of the same frequency and type of transmitter. (Gates Radio Co. 250-01). (B1-MP-1941)

KICA—Hugh DeWitt Landis, Clovis, N. Mex.—Granted authority to make changes in automatic frequency control units. (B3-F-265)

(Continued on next page)
Radio Station WMIT, Winston-Salem, N. C.—Granted request to operate FM station WMIT from 5:00 p. m. EST until midnight EST, Sundays through Saturdays, for a period ending no later than January 15, 1947, suspending Sec. 3.261 of the Commission’s rules.

WPTZ—Philco Products, Inc. (Assignor), Philco Television Broadcasting Corp., Philadelphia, Pa.—Granted consent to assignment of license of television station WPTZ and relays, from Philco Products, Inc., to Philco Television Broadcasting Corp. (The purpose of the transfer is to segregate the television activity formerly carried by the transferor in a separate corporation under the same ownership and the same general management.) (B2-ALCT-1, B2-ALVB-1 to B1-ALVB-15)

Philco Products, Inc., Philadelphia, Pa.—Granted CP to specify channel for existing television station WPTZ as #3, 60.66 mc.; makes changes in antenna system, and change location of main studio, on condition that Permittee shall install frequency monitors having an accuracy of ±0.001% or better when available; (2) that within 4 months from date of authorization the licensee shall file an application for CP specifying an installation which complies with the Commission’s rules and standards. (B2-PCT-174)

Allen B. DuMont Lab., Inc., New York, N. Y.—Granted CP to specify channel for existing television station WABD as #3, 76-82 mc.; makes changes in antenna system, and change location of main studio, on condition that (1) Permittee shall make changes in antenna system, and change location of main studio, on condition that (1) to permittee shall install frequency monitor having accuracy of ±0.001% when available; (2) that within 4 months from date of authorization the licensee shall file an application for CP specifying an installation which complies with the Commission’s rules and standards. (B1-PCT-168)

KVB—KVB, Inc., Great Bend, Kans.—Granted construction permit to change frequency from 1480 to 1590 kc., increase power from 250 watts to 1 KW, and install new transmitter, upon condition as to interference it may receive if WAKR’s application (B2-P-3834) is granted. (Application of WAKR continued in hearing on interference issue to KVB, Constr. Jett voting to grant same.)

NEW—W. S. Weatherly, tr/ as Calhoun Broadcasting Co., Anniston, Ala. (P. O. 1200 Leighton Ave.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

WTVL—Kennebec Broadcasting Co., Waterville, Me.—Authority to determine operating power by direct measurement of antenna power.

NEW—Telecolor Corp., West Springfield, Mass. (P. O. CR Dyke Ave. & Bramble Sts.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Lewis C. Tierney, Helen S. Tierney & Albert S. Kemper, Jr., d/b as Mercer Broadcasting Co., Princeton, Va. (P. O. Tenn. % Albert S. Kemper, Jr., Bluefield, W. Va.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

KNEI—G. L. Burns, Brady, Texas.—Modification of licence to increase power from 100 watts night and 250 watts day to 250 watts day and night.

WMOA—Marietta Broadcasting Co., Marietta, Ohio.—Modification of construction permit (B2-P-308), which authorized a new standard broadcast station to extend completion date.

KDRS—Thomas Maxie Self, John Eads Douglas and Gordon Theodore Raue, a partnership d/b as Progressive Broadcasting Co., Paragould, Ark.—Modification of construction permit (B2-P-465), which authorized a new standard broadcast station for approval of antenna and approval of transmitter and studio locations.

NEW—Moses Luskin, Burbank, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

FM APPLICATIONS ACCEPTED FOR FILING

Henderson Radio Corp., Henderson, N. C. (P. O. 219 South William St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage of 9,000 square miles.

W. A. Underhill & E. S. Underhill, Jr., d/b as The Evening Leader, Corning, N. Y.—Voluntary assignment of conditional grant for construction permit to Evening Leader, Inc. (Metropolitan FM broadcast station.)

Hughes Productions, A Division of the Hughes Tool Co., Los Angeles, Calif.—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by Commission and coverage of 10,750 square miles. Amended to change name from Hughes Productions, A Division of the Hughes Tool Company to Hughes Tool Company, change in officers and directors, change type of transmitter, transmitter location from San Mateo County to Mt. Tamalpais, Calif., and studio location from San Mateo County to San Francisco, Calif., coverage of 10,750 square miles to “to be determined,” change in antenna system and specify type of station as Rural.

Hughes Productions, A Division of the Hughes Tool Co., Los Angeles, Calif.—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 3,215 square miles. Amended to specify class of station as Rural, change coverage from 3,215 square miles to “to be determined,” change in antenna system and specify type of station as Rural.

Stillwater Publishing Co., Stillwater, Okla.—Construction permit for a new FM (Community) broadcast station to be operated on Channel #281, 101.1 mc. Amended to change transmitter location and specify coverage population of 3,215 square miles and population of 251,747.

Public Radio Corp., Tulsa, Okla. (P. O. 214 Beacon Bldg.)—Construction permit for a new FM broadcast station (Continued on next page)
to be operated on frequency to be determined by chief engineer of FCC and coverage of 3,420 square miles.

Twin City Broadcasting Co., Inc., Lewiston, Me. (P. O. 225 Lisbon St.)—Construction permit for a new FM broadcast station to be operated on Channel #236, 95.1 mc, and coverage of 6,500 square miles.

Statesville Broadcasting Co., Inc., Statesville, N. C. (P. O. 210 South Center St.)—Construction permit for a new FM broadcast station to be operated on Channel #226, 100.3 mc, and coverage of 7,421 square miles.

Coshocton Broadcasting Co., Roscoe, Ohio (P. O. 115 North Sixth St., Coshocton, Ohio)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #227, 93.8 mc, and coverage of 19,694 square miles.

Capital City Broadcasting Corp., Tallahassee, Fla. (P. O. Thomasville Highway at New County Road)—Construction permit for a new FM broadcast station to be operated on Channel #275, 105.3 mc, and coverage of approximately 11,000 square miles.

Hampton Roads Broadcasting Corp., Newport News, Va.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #228, 93.5 mc, or as assigned by FCC and coverage of 16,665 square miles.

O. E. Richardson, Fred L. Adair, Robert O. Admiral, d/b as Radio Station WJOB, Chicago, Ill.—Construction permit for a new FM broadcast station to be operated on frequency to be determined. Amended to change studio location from Chicago, Illinois, to Hammond, Indiana, change frequency from to be determined to Channel #235, 100.9 mc.

Bell Broadcasting Co., Inc., Temple, Texas—Modification of construction permit (13-PR-594, which authorized a new Community FM broadcast station to specify transmitter location, type of transmitter, frequency as Channel #250, 97.9 mc, coverage of 12,550 square miles, population of 17,750,837, change class of station to Metropolitan, Amended to change frequency from 97.9 mc, to “to be assigned by FCC,” type of transmitter, change class of station and make changes in antenna system.

Radio Station WSOE, Inc., Charlotte, N. C. (P. O. 1925 North Tryon St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #264, 100.7 mc, and coverage of 14,000 square miles.

A. J. Fletcher, Greensboro, N. C.—Construction permit for a new FM (Metropolitan or possibly Rural) broadcast station to be operated on Channel #253, 98.5 mc, and coverage to be determined. Amended to change name from A. J. Fletcher to Capitol Broadcasting Company, Inc.

Grosse Pointe Broadcasting Corp., Grosse Pointe, Mich. (P. O. 688 Fisher Road)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #295, 106.9 mc.

WL0U—John Lord Booth, Detroit, Mich.—Voluntary assignment of license to Booth Radio Stations, Inc.

News Syndicate Co., Inc., X.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on 17.9 mc, and coverage of 8,500 square miles. Amended to change frequency from 47.9 mc, to “to be determined,” coverage from 8,500 to 16,000 square miles, population from 11,212,416 to 12,389,975,166, type of transmitter, make changes in antenna system and change in officers and stockholders.

North Jersey Broadcasting Co., Inc., Paterson, N. J.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency as Channel #223, 97.1 mc, or as assigned by FCC and coverage of 6,925 square miles. Amended to specify population of 11,729,561, change frequency from 49.9 mc, to Channel #223, 97.1 mc, coverage from 4,925 to 11,400 square miles, type of transmitter, studio and transmitter location, change name from International Union United Automobile and Agra-cultural Implement Workers of America (UAW-CIO). R. J. Thomas, President, Cleveland, Ohio—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #213, 93.1 mc, and coverage of 17,500 square miles. Amended to change name from International Union United Automobile and Agricultural Implement Workers of America (UAW-CIO), R. J. Thomas, President, to UAW-CIO Broadcasting Corporation of Ohio.

Unity Corp., Inc., Springfield, Ohio—Construction permit for a new FM (Metropolitan) broadcast station to be operated on 100 mc, and coverage of 5,777 square miles. Amended to change coverage from 5,777 to 8,500 square miles and population from 501,805 to 648,000.

N. M. U. Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency as determined by FCC and coverage over 8,500 square miles. Amended to make changes in corporate structure (increase in common stock).

Radio Projects, Inc. Newark, N. J.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be supplied. Amended to change officers and directors.

Colonial Broadcasting Co., Providence, R. I.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined. Amended to change frequency from 7,840 to 10,650 square miles, population from 2,359,000 to 2,373,500 and make changes in antenna system.

North Jersey Radio, Inc. Newark, N. J.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined. Amended to change frequency from 98.0 mc to 99.5 mc, and coverage of 8,150 square miles. Amended to change directors and stockholders.

Board of Missions and Church Extension of the Methodist Church, Inc., New York, N. Y.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency as determined by Chief Engineer of FCC and coverage to be determined. Amended to change name from Board of Missions and Church Extension to Radio Corporation of the Board of Missions and Church Extension of the Methodist Church, Inc.

WMCA, Inc. New York, N. Y.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on 48.3 mc, and coverage of 8,550 square miles. Amended to change officer frequency from 48.5 mc to Channel #223, 97.1 mc, or as assigned by FCC, coverage from 8,550 square miles, population from 10,517,455 to 12,560,106, type of transmitter and make changes in antenna system.

The Journal Co. (The Milwaukee Journal), Wausau, Wise.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency as determined by FCC and coverage to be determined. Amended to change name from Board of Missions and Church Extension of the Methodist Church to Radio Corporation of the Board of Missions and Church Extension of the Methodist Church, Inc.

(Continued on next page)
W9XZC—Joseph F. Novy, Riverside, Ill.—Modification of construction permit (B4-PF-364) which authorized a new Community FM broadcast station to change class of station, specify frequency of ±98.0 mc., power of 1 kW, directional antenna and unlimited hours of operation.

KMG—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Construction permit to specify frequency as Channel #235, 100.1 mc., change type of transmitter and antenna system. Amended to specify population of 1,072,566, change coverage from 7,000 to 6,241 square miles, type of transmitter and make changes in antenna system.

WDWS-FM—The Champaign News-Gazette, Inc., Champaign, III.—Modification of construction permit (B4-PF-283, 101.5 mc., or Channel #288, 105.5 mc., and coverage of approximately 900 square miles.

WAXH—Savannah Broadcasting Co., Area of Savannah, Ga.—License to cover construction permit (B3-PHY-311) which authorized installation of new transmitter.

WSXZC—Joseph F. Novy, Riverside, Ill.—Modification of construction permit (B4-PF-645) which authorized a new developmental broadcast station for change in power from 1 KW to 550 watts.

TELEVISION APPLICATION ACCEPTED FOR FILING

Radio Sales Corp., Seattle, Wash.—Construction permit for a new commercial television broadcast station to be operated on Channel #1, 50-55 mc., ESR of 4100 and power of 1 KW. Amended to change frequency from Channel #1, 50-55 mc., to Channel #5, 76-82 mc., change type of transmitters, make changes in antenna system and change transmitter site from Kink County to Seattle, Washington.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Construction permit to specify frequency as Channel #219, 91.7 mc., change power from 1 KW to 10 KW, type of transmitter and make changes in antenna system.

First Baptist Church, Pontiac, Mich.—Extension of authority to transmit programs from First Baptist Church at Pontiac, Mich., to Radio Stations CKLW, Windsor, Ontario, Canada, for the period beginning August 13, 1946.

Evangelistic Mission, Pontiac, Mich.—Extension of authority to transmit programs from Pontiac, Michigan, to Canadian Stations, CKLW, Windsor, Ontario, Canada.

Stanley G. Boynton, Detroit, Mich.—Extension of authority to transmit programs to CKLW, Windsor, Ontario, Canada, from Highland Park Baptist Church, Highland Park, Mich., each Sunday from 8 to 8:30 P. M., EST, for the period beginning July 10, 1946.

WRBQ—Alamance Broadcasting Co., Inc., Area of Burlington, N. C.—License to cover construction permit (B3-PRE-455) which authorized a new relay broadcast station.

KAJA—KRLD Radio Corp., Dallas, Texas.—License to cover construction permit (B3-PRE-460) which authorized a new relay broadcast station.

W3XEP—Radio Corporation of America, Camden, N. J.—Modification of license to request change in frequencies from Channel #12, 204-210 mc., to Channel #10, 198-204 mc.

WBOE—Cleveland City Board of Education (Charles H. Lake, Sup't.), Cleveland, Ohio—Construction permit to specify frequency as 90.1 mc., change power from 1 KW to 3 KW, change type of transmitter and make changes in antenna system.

APPLICATIONS TENDERED FOR FILING

NEW—Community Service Broadcasting Corporation of Amsterdam, N. Y., in or adjacent to Amsterdam, N. Y.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Radio Anthracite, Inc., Shamokin, Penna.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Woodward Broadcasting Co., Woodward, Okla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—James Cullen Looney, Edinburg, Texas.—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts and unlimited hours of operation.

NEW—Winston-Salem Broadcasting Co., Inc., Winston-Salem, N. C.—Construction permit for a new standard broadcast station to be operated on 710 kc., power of 1 KW and daytime hours of operation.

NEW—Gene Burke Brophy, Flagstaff, Ariz.—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 250 watts and unlimited hours of operation.

NEW—Waterloo Broadcasting Co., Waterloo, Iowa.—Construction permit for a new standard broadcast station to be operated on 730 kc., power of 500 watts and daytime hours of operation.

NEW—Fred Harman, E. I. Ingram, Arthur M. Underwood and R. E. Bruce, d/b as Runnels Broadcasting Co., Ballinger, Texas.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Metropolitan Broadcasting Corp., Belleville, Ill.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Gene Burke Brophy, Glendale, Ariz.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

NEW—Standard Tobacco Co., Inc., Maysville, Ky.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 250 watts and unlimited hours of operation.

NEW—Carthage Broadcasting Co., a partnership composed of Lloyd Clinton McKenney and John Joseph Daly, Carthage, Mo.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Morris Luskum, Burbank, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—A. Dwight Newton and W. H. Wood, co-partners, d/b as San Joaquin Broadcasting Co., Stockton, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 1 KW, directional antenna and unlimited hours of operation. (Resubmitted.)

NEW—Northern Broadcasting Co., Havre, Mont.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

(Continued on next page)
NEW—Luis Ramos Rodriguez, San Juan, Puerto Rico—Construction permit for a new standard broadcast station to be operated on 620 kc., power of 5 KW, directional antenna and unlimited hours of operation.

NEW—Port Frere Broadcast Co., Inc., Wilmington, Del.—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 500 watts and daytime hours of operation.

NEW—Bernard Frant, Louis Glasier, co-partners, d/b as Wyandotte Broadcasting Co., Wyandotte, Mich.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and daytime hours of operation.

NEW—the Messenger Publishing Co., Athens, Ohio—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts, and unlimited hours of operation.

NEW—Walterboro Broadcasting Co., Walterboro, S. C.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Raymond M. Beckner and Melvin B. Williams, d/b as The Royal Gorge Broadcasters, Canon City, Colo.—Construction permit for a new standard broadcast station to be operated on 950 kc., power of 250 watts, and daytime hours of operation.

KJR-KEGR—Burt F. Fisher, Seattle, Wash.—Consent to assignment of license to Totem Broadcasters, Inc., also includes Relay Station KEGR. (950 kc.)

NEW—Hollywood Community Radio Group, Gardena, Calif.—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 1 KW, and daytime hours of operation.

NEW—Piedmont Service Corp., Alexander City, Ala.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 10 KW, install directional antenna night, new transmitter and change transmitter location.

KPHO—Phoenix Broadcasting, Inc., Phoenix, Ariz.—Construction permit to change frequency from 1230 to 1030 kc., power from 250 watts to 10 KW, install directional antenna night, new transmitter and change transmitter location.

WTMC—Savannah Broadcasting Co., Savannah, Ga.—Construction permit to make changes in directional antenna to permit change-over time to be made fifteen minutes earlier or later when the regular change-over time falls within a continuous program. (1030 kc.)

NEW—Western Waves, Inc., Seattle, Wash.—Construction permit for a new standard broadcast station to be operated on 1530 kc., power of 50 KW, directional antenna and unlimited hours of operation.

NEW—The Daily Report, a partnership consisting of Mrs. Jerene Appleby Harnish, Carlton R. Appleby, Mrs. Annie M. Potter and Walter Axley, Ontario, Cal.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 250 watts, and daytime hours of operation.

NEW—Areco Broadcasting Co., Inc., Areco, Puerto Rico—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

NEW—Mahoning Valley Broadcasting, Youngstown, Ohio—Construction permit for a new standard broadcast station to be operated on 1210 kc., power of 250 watts, and unlimited hours of operation.

NEW—Scotland Broadcasting Co., Laurinburg, N. C.—Construction permit for a new standard broadcast station to be operated on 1330 kc., power of 250 watts, and unlimited hours of operation.

NEW—Alonzo Stanford Dudley, Lake Charles, La.—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts, and unlimited hours of operation.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Weber Typewriter Mechanics School—Advertisements and circular letters of the Weber Typewriter Mechanics School, Osborn, Ohio, contain “grossly deceptive, false and misleading” representations concerning a correspondence course in typewriter repairing, according to a complaint issued by the Commission. (5425)

CEASE AND DESIST ORDER

Washington Breeders Association—The Commission ordered Norman Collins and Roy Montgomery, trading as Washington Breeders Association, Alderwood Manor, Wash., to cease and desist from representing that they are R. O. P. poultry breeders or operate a poultry plant under the supervision of an official from the agency supervising United States Record of Performance work. (5196)

STIPULATIONS

No stipulations were issued by the Commission last week.
PROGRESS REPORT ON CONSTRUCTION REQUESTED
BY FCC FROM FM PERMIT HOLDERS

In a notice published Friday afternoon (26), the FCC announced that applicants who hold FM construction permits will be required to file a report of progress on station construction and conditional grantees will be allowed only thirty instead of ninety days in which to provide additional engineering data.

Reprinted below is the text of the public notice followed by the questionnaire which the Commission is sending to present permit holders.

It has come to the attention of the Commission that holders of conditional grants and construction permits for new FM broadcast stations have, in some instances, been dilatory in the planning and construction of their FM stations and in providing an FM broadcast service at an early date. In the interest of full development and utilization of FM broadcasting, the Commission feels that such delays cannot be permitted.

Conditional Grants—In the conversion of conditional FM grants to construction permits it has often been necessary to request additional information from grantees, and in some cases considerable time has elapsed before this information was received by the Commission. When the Commission announced the policy of making conditional FM grants, a period of 90 days was specified within which additional engineering material could be supplied. This length of time is no longer considered necessary, and it is expected that engineering material or other information, when requested, will be supplied within a maximum of 30 days thereafter. In this respect, the Commission wishes to point out that the recent revision of the FM rules provides brackets of antenna height and effective radiated power for Class A and Class B stations; a considerable number of applications may, therefore, be completed without individual request for further information.

ENGINEERING COMMITTEE STUDIES RECORDING STANDARDS

The NAB Engineering Executive Committee met in Washington Monday (22) to discuss current industry problems with James R. Middlebrooks, NAB’s new director of engineering.

The committee considered a proposed study of the existing recording standards promulgated by NAB in 1942 and other engineering matters and formulated recommendations to be submitted to the NAB Board of Directors.

A proposed agenda to provide for full discussion of (Continued on page 582)

SENATOR TOBEY REQUESTS CONGRESSIONAL INVESTIGATION OF FCC PROGRAM CONTROL

Sen. Charles W. Tobey (R), New Hampshire, introduced a resolution in the Senate on Wednesday (24), which, if adopted would direct the Interstate Commerce Committee to investigate the FCC with respect to:

(1) The exercise by the FCC of program control and censorship, particularly as it has or may restrict freedom of speech in radio broadcasting.

(2) The allocation of frequencies, with reference especially to the effect on rural populations of the shifting of the FM band.

(3) The re-allocation of FM frequencies and its effect on the public and the radio industry and its effect on the extent of control of radio by FCC.

The resolution authorizes the ICC or a subcommittee thereof to hold hearings, subpoena witnesses, require the production of documents, take testimony, employ assistants, and make such expenditures as it deems advisable.

The resolution was referred to the committee on Interstate Commerce.

INSIDE THIS ISSUE

Results of the NRDGA survey concerning advertising practices among retailers have just been released. About two-thirds of those responding utilized radio during 1945. (p. 583)

The first in the series of NAB radio management studies was mailed to small market stations over the weekend. Series is designed to depict representative operation among the 500 small market stations. (p. 585)

A new bill providing for assignment of a section of the 50-mc band for FM has been introduced in the House by Rep. Lemke. (p. 587)

An exchange of letters between Judge Miller and M. Lange of the French Radio reveals that 136 American stations have agreed to rebroadcast program from Radiodiffusion Francaise. (p. 584)

Sam Bass Warner, U. S. Registrar of Copyrights, met with radio executives recently to discuss means of broadening the radio industry’s use of government copyright catalogues. (p. 585)

Expansion of FM and television facilities is tabulated for the period ending July 1. (p. 586)
PROGRESS REPORT ON CONSTRUCTION REQUESTED BY FCC FROM FM PERMIT HOLDERS

(Continued from page 581)

Should it appear that undue delay occurs in furnishing necessary information to satisfy the terms of the conditional grant, the Commission will review the grant to determine whether the application should be designated for hearing and the grant cancelled.

Construction Permits—Construction permits are being issued as quickly as possible following receipt of necessary information, and the Commission expects that FM station construction be carried forward expeditiously. In cases where an application is filed in which to extend the completion date specified by an FM construction permit (8 months after issuance) and where it appears that the permittee has not been diligent in proceeding to construct the station as quickly as possible, the Commission will review the application with particularity to determine whether such extension application should be granted or designated for hearing. In acting on requests for extension of time, the Commission will consider the promptness of a permittee’s efforts to secure equipment and other materials and his efforts to provide an FM broadcast service promptly with interim equipment. Even though complete equipment may not be immediately available, the Commission expects permittees to use interim equipment to provide an early FM service and to install remaining equipment as rapidly as it becomes available. Such operation is now being conducted by a number of conditional grantees and permit holders.

In order that the Commission may be kept fully advised in the above matters, information thereon is being requested from FM permittees at the time specified by the permit as the required commencement of construction (2 months after issuance). An inquiry directed to this end is being sent to present permit holders and will be sent with construction permits issued in the future.

Text of Inquiry To Be Sent Permittees

In order that it may be fully advised concerning the progress of construction of your FM broadcast station, the Federal Communications Commission requests that you furnish the information called for below.

Instructions for Replying: (1) Two copies of this form are enclosed. Keep one copy for your files; mail one copy to the Federal Communications Commission, Washington 25, D. C. (2) Fill this form out immediately (within 15 days) after the date specified in your construction permit as the required commencement date for construction. (3) In your answers give the status of your construction as of the date when you are required to commence construction.

1. Has an order been placed for the FM broadcast transmitter specified by your construction permit? Yes ( ) No ( ). If such an order has been placed, give date of purchase order and promised delivery date.

2. Has the transmitter or any unit thereof been delivered? Yes ( ) No ( ). If answer is yes, indicate which units have been received and estimate percentage of installation completed.

3. Has an order been placed for the FM antenna supporting structure? Yes ( ) No ( ). If answer is yes, give date of purchase order and promised delivery date.

4. If the antenna supporting structure has been received, estimate percentage of construction completed.

5. Has an order been placed for the FM antenna described by the construction permit? Yes ( ) No ( ). If answer is yes, give the date of the purchase order and the promised delivery date.

6. Has the FM antenna or any portion thereof been received? Yes ( ) No ( ). If answer is yes, estimate the percentage of installation completed.

7. Must property be purchased or leased for the transmitter locations? Yes ( ) No ( ). If answer is yes, has a title or lease been secured? Yes ( ) No ( ). Date of title or lease.

8. Must property be purchased or leased for the studio location? Yes ( ) No ( ). If so, estimate percentage of construction completed.

9. Has construction begun at either transmitter or studio location? Yes ( ) No ( ). If so, estimate percentage of construction completed.

10. Has an application been submitted to the Civilian Production Administration in your local area for a building permit? Yes ( ) No ( ). If answer is yes, has it been acted upon? Yes ( ) No ( ). If so, what authorization has been granted?

11. What steps, if any, have been taken to commence an FM broadcast service with interim equipment pending the completion of full construction?

12. If interim operation is planned, what are the promised delivery dates for the following equipment for such operation: Transmitter; Antenna; other major items of equipment (name them)?

13. If interim operation has begun, give the commencement date of such operation. If interim operation is planned but has not begun, give the date at which operation is expected to begin.

14. Give the transmitter power, type of antenna and antenna height employed or proposed for interim operation.

15. If interim operation is not planned, give the reasons therefor.

ENGINEERING COMMITTEE STUDIES RECORDING STANDARDS

(Continued from page 581)

engineering matters at the annual NAB convention was also adopted for submission to the board.

The committee expressed to Howard S. Frazier, who has served as Director of Engineering for the past four years, its “grateful appreciation for the in-
NRDGA CONDUCTS SURVEY ON THE USE OF RADIO ADVERTISING

A survey of retailers using radio as an advertising medium in 1945, with 309 retail stores responding, has just been released by the National Retail Dry Goods Association.

Retailers were queried on the value of radio as an advertising medium for department and specialty stores. They were asked to what extent they were using radio, for how long, and how successful they found it.

There were 202 department and 74 specialty stores identified among the 309 responding, in all city sizes, doing annual sales from “up to one million” to “over 10 million dollars.” Stores were located in all geographical areas.

The findings disclosed that retail stores do not appear to put even a fraction of the effort behind radio that they put behind publication advertising.

While NRDGA believes that the survey, generally, depicts a “fair” picture for radio, the data show that retail stores are not giving the medium a real chance. Only two-thirds of the stores responding used radio in 1945. The report shows that radio usage increases as annual sales volume becomes greater, and that the medium appears to be more important the farther you travel from the eastern seaboard.

Various types of programs were employed by the stores, with “music” and “news” used by more than 50% of the respondents. “Household hints” programs and spot announcements were also listed as frequently used. More than two-fifths had only one program, another 25% had two. Among the very large volume stores one-half were found to be using four or more different programs.

The findings disclose a lack of appreciation of radio’s value in the fact that approximately two-fifths of the respondents were using a total of 30 minutes or less per week.

It was found that one-third of the programs have been on the air less than six months, another one-fifth less than a year. Only 25% have been on for two years or longer. NRDGA points out that “It would seem that at least in some instances the programs are not given the opportunity to build an audience.”

Ninety-five per cent used stations affiliated with national networks, and about two-thirds of the stores confined their efforts to one station only.

There was a preference for programs directed to women, with news and spot announcements used to reach everyone.

Approximately 25% of the stores reported having a radio advertising director. In more than half of these stores, the director was the complete staff, and a good many of the directors doubled in brass, serving also as talent.

The report states that almost four-fifths of these stores support their radio programs with newspaper advertising. Because this appeared to be contrary to their general appreciation for the medium, this “support” was construed by NRDGA to mean newspaper “listings.” Half of the stores used window and department displays, as well as direct mail for promotional support.

Three out of five stores receive free radio material from manufacturers; one in five from magazines; one in seven from public relations offices, one out of eight from wholesalers.

According to the study, nine out of ten stores indicated “general store prestige” as one of the results desired from the use of radio; six out of ten indicated “department build-up”; and six out of ten desired “immediate item sales.”

It was shown that about half of the stores had made special tests to evaluate radio during the year. Some three-fifths of these reported “favorable” or “fair results.”

Three out of ten stores reported “highly successful” results from their radio advertising; six out of ten reported “moderately successful.” Only three in one hundred indicated unsuccessful results. News and household programs scored better on the “highly successful” list than did any other types of programs.

The study discloses that the stores do not seem to be according the medium the recognition it deserves on the basis of their opinions regarding results. More than half of them devote only 10% or less of their total advertising budget to radio; a quarter of them 5% or less. Among those claiming “highly successful” results, two out of five allocated 10% or less.

Half of the stores believed radio to be of sufficient importance to warrant a separate budget (only a third of these use “per cent of sales” as a budget basis). About half of the stores anticipate expansion to some extent in their overall advertising but less than 25% expect to boost the percentage devoted to radio.

NRDGA observes, “In conclusion it is evident from (Continued on next page)
the "NRDGA PROMOTION EXCHANGE" which advantages of a radio campaign is to arrange show¬
managers that plans for fall advertising are now being
of the time or the purchaser is not clear from this
investigation. Quite possibly it is the fault of both."
A full report of the study will be released soon in
the "NRDGA PROMOTION EXCHANGE" which NAB will distribute to all member stations.

HOW ABOUT A MOVIE?
This is a good time of year to remind station managers that plans for fall advertising are now being readied.
One way to interest prospective advertisers in the advantages of a radio campaign is to arrange showings of the three sound films which the NAB Department of Broadcast Advertising makes available to members free-of-charge.
Especially written and filmed for presentation to retailers, the pictures are entitled, "Airforce and The Retailers," "America Takes to the Air," and "Why Radio Works." The entire showing runs about one hour.
Station Managers who would like to arrange meet¬
ings for such filmings, can get the movies by address¬
ing this department.

International

FRENCH PROGRAMS TO BE REBROADCAST IN U. S.
BY 136 STATIONS

As one of the results of his recent visit to this country, M. Robert Lange, director of the North American Service of the French Radio, was successful in arranging for rebroadcasts of his programs through the facilities of 136 stations.
The text of a letter from M. Lange to NAB Presi¬
dent Justin Miller, with Judge Miller's reply, is re¬
printed below:

Hon. Justin Miller, President
National Association of Broadcasters
1760 N Street, N.W.
Washington, D. C.

Dear Sir:

I am very late in expressing to you my heartiest
gratitude for the way Mrs. Miller and yourself have
received me in Washington. I also think that I should
give you an account of my mission since your intro¬
ducing me to the American people played a decisive
part in the few results I have been able to secure.
So far, 136 stations located in 37 different States
have accepted to retransmit programs prepared by us
and I am especially happy to say that 16 15,000 watt
stations are among those willing to carry our programs.
I hope to be able to see you in Washington before I
fly back to Paris and I would greatly appreciate a
note from you emphasizing the necessity of increasing
our present setup in this country. I fully realize that
it is only if my administration is convinced of the

efforts we will have to accomplish that we shall be in
a position to answer the offers and demands that were
made to us.
I am very confident that these achievements will
work both ways and that in the near future the French
radio will carry a number of programs giving the right
picture of what is going on in America. I do not have
to tell you once more my admiration for the American
radio and for yourself.

Thanking you again, I am,
Respectfully yours,

Robert Lange
Director of the North American
Service of the French Radio

Honorable Robert Lange,
Director of the North American
Service of the French Radio,
Radiodiffusion Francaise,
14 East 53rd Street,

Dear Mr. Lange:

I was pleased to have your letter and to know of
your success in arranging with so many of our radio
stations for retransmitting your programs. Having
in mind that the United States law provides there shall
be no censorship of radio broadcasting stations and
that radio stations, therefore, are free to choose their
own programs, the fact that 136 stations, located in
37 different States, have undertaken to carry your
retransmitted programs indicates the high degree of
success which you have achieved for your programs.

Of course, as time goes on, it will be necessary for
you to increase your present set-up greatly in order
to extend the usefulness of the service which you pro¬
pose to render. Each of our countries is deeply in
need of accurate information concerning the other.
As time goes on, this need will continue to increase in
importance.

All thinking people, I am sure, will agree that only
when we have been able to secure a reasonable degree
of understanding between our peoples can we hope for
ultimate understanding between governments and ef¬
fective cooperation toward a peaceful world. Surely,
this great medium of communication which you and
I represent must play an increasingly larger part in
achieving that objective.

It is for these reasons and many others—including
your own radiant personality—that I am always happy
to see you and to know of your presence among us. I
hope that you may come often to visit with us and that
your government at home will understand and ap¬
preciate the great contribution which you are making.

Personally, let me assure you that it was a pleasure
to help you while you were here. From all reports I
have had, you may anticipate continued cooperation
from the radio broadcasters of this country. I was
particularly happy, too, that you were able to arrange
for a good trip throughout the rest of our country.
No one can fully understand the American people
until he sees something of the background, geo¬
graphically, industrially and philosophically, which
comes from such a trip which you have just taken.

(Continued on next page)
The field work, being done by Arthur Stringer, NAB weekend. Study No. 1 is a twelve-page account of sections of the nation are to be included in the series. Located in a Southern city of less than 25,000 population, actual operating conditions at a 250-watt MBS affiliate has completed a spot check on a number of small stations, executives of larger stations holding NAB of the Small Market Stations Executive Committee, was undertaken by NAB at the request of the Small Market Stations Executive Committee. This radio management series, which is expected to show a cross-section of good and bad practices prevalent among the 500 small market stations of the nation, was undertaken by NAB at the request of the Small Market Stations Executive Committee.

The reports are copyrighted and confidential. Although the initial mailing went only to small market stations, executives of larger stations holding NAB membership may receive a copy upon request to NAB.

SEARS AND WARD'S USING RADIO

James R. Curtis, KFRO, Longview, Texas, member of the Small Market Stations Executive Committee, has completed a spot check on a number of small stations selling radio time to Sears, Roebuck, and Montgomery Ward stores. Thirteen stations responded to the study. Nine stations reported sales to Sears, Roebuck with spot announcements used on eight stations, and the ninth reported a five-minute program, six days per week on a seasonal basis. One station reported that Sears uses 60 spots weekly; another, ten to fifteen spots per week; and a third, 300 spots a year. The other stations reported sales of four or less announcements per week, with additional spots on special store sales events.

Montgomery Ward was found to be using three stations out of eleven reporting from cities where stores were located. One station was selling 60 spots weekly, another 45 spots weekly, and the third was selling fourteen announcements per week.

(NOTE: W. E. Bennett, National Retail Advertising Manager, Sears, Roebuck & Company, Chicago, queried by the NAB Department of Broadcast Advertising, reported that a recent company survey disclosed that 25% of all Sears stores are using radio. The Sears executive further stated that individual stores purchase all media locally.)

INCREASED USE OF U. S. COPYRIGHT CATALOGUES DISCUSSED AT NEW YORK MEETING

The question of how catalogues of the U. S. Copyright Office could be made more useful to radio stations and networks was discussed at a dinner held by NAB in New York City, Thursday (18). Sam Bass Warner, Register of Copyrights, and a number of radio officials interested in the subject were guests.

The radio executives were particularly anxious that the indexes be improved, that assignments be recorded more promptly, and that it be made easier to connect assignments with original registrations. The meeting was one of several which Mr. Warner, who has charge of the administration of American copyright law, hopes to hold with various persons and groups who are extensive users of copyright material.

In addition to Mr. Warner, the guests included Richard W. Bannier, Joseph A. McDonald and Miss Norah K. Donovan, ABC; Jan Schimek, Henry Howard, Jr., and Julius F. Brauner, CBS; Thomas H. Belviso, E. Souhami and Miss Marrian E. Noyes, NBC; David H. Brown, MBS; Donald C. Hamilton and John R. Bogue, WOR. Don Petty, NAB general counsel and Bryce Rea, Jr., NAB attorney, were hosts at the dinner meeting.

TV RECEIVERS EXEMPTED FROM PRICE CONTROL

Household television receiving sets were exempted from price control by the OPA Friday (26).

According to the agency's announcement, the sets were exempted "because of the present limited demand due to the few sending stations and their limited range together with their high installation costs and the lack of base period prices for use in fixing ceiling prices. Moreover, products during a development period generally decline in price as demand increases and this same pattern is expected to be followed in the case of television sets."

Research Department

FCC GRANTS FOR FM AND TV ANALYZED

This week the Research Department presents analyses of FM and television stations, giving the total number of stations and the monthly changes since July 1, 1945 to July 1, 1946, as did the table for AM stations which was published in last week's Reports. The readers will note that both FM and television stations which were licensed or which had construction permits before the war are listed separately and are not added to the stations granted since the wartime freeze was lifted last October.

As of July 1 and since October 21, 1945, 452 FM conditional grants had been made, one of which had been deleted and 81 of which had been granted construction permits. Nineteen television stations were given construction permits between April 25 and July 1, 1946.

These tables will be brought up-to-date each month and published in the Reports as of the first day of the month.

LEMKE BILL ON FM ALLOCATION AMENDED

Rep. William Lemke (R), South Dakota, introduced a bill on Saturday (20) to provide assignment of a section of the fifty-megacycle band of radio frequencies for FM. The bill was referred to the Committee on Interstate and Foreign Commerce. Mr. Lemke introduced a somewhat similar bill on April 17.

The band, from 50-60 mc at present is allocated to amateurs from 50-54 mc and to television channel 2 from 54-60 mc.

The new bill differs from the original proposal only in that it mentions power assignments. Complete text of the measure, with the additional portion in italics, follows:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that the Federal Communications Commission is hereby authorized and directed to assign to frequency modulation (FM) radio broadcasting a section of the fifty-megacycle band of radio frequencies with power assignments available up to at least the maximum amount of power heretofore assigned to frequency modulation (FM) at any time."

Public Interest Programming

FIRE PREVENTION WEEK SET FOR OCTOBER

Fires cause a terrible toll of death, injury and destruction throughout the United States each year. Since 1900 some twenty-two million fires have caused death to four hundred fifty thousand of our people, injury to six hundred seventy-five thousand others and property destruction of fifteen billion dollars.

Most fires are preventable. Education of all men, women and children in the simple precautions needed to save life and property from fire destruction and forthright action is the only way to halt this needless human suffering and waste of our country’s wealth.

The week of October 6 to 12 has been designated by President Truman and by the forty-eight governors as Fire Prevention Week in an effort to focus public attention on this serious national problem. The National Fire Protection Association, as sponsors of Fire Prevention Week, asks the support of the National Association of Broadcasters in this worthwhile educational campaign.

Believing that the radio industry has a public opportunity and responsibility to assist in the education of all citizens in fire waste prevention, we call on all NAB members to support the observance of Fire Prevention Week.

PEACHES NEED PUSHING TO SAVE SURPLUS

(Message from OWMR—Approved by the Advertising Council)

The largest peach crop on record—now estimated at 82,838,000 bushels—exceeding the previous record production of 81,564,000 bushels in 1945, is expected this year. The result might be a serious problem, and everything possible must be done to prevent loss of this valuable food. Therefore an intensive promotion program should be initiated to encourage (1) maximum use of peaches to meet current food needs, and (2) maximum home-canning and community canning of peaches.

President Truman stated recently that the need for food is greater than ever, and that home preservation of food this year is just as important as production in view of the increased overseas requirements for commercially processed foods.

As part of the government Famine Emergency Program, radio station managers will be called on by representatives of the U. S. Department of Agriculture in areas where peaches are abundant and attractively priced, and continued cooperation will be requested. This is an important part of the Famine Emergency campaign, and dissemination of the information will be of material help to the Home Canning Program.

EMERGENCY FOOD COLLECTION CAMPAIGN ENDS, BUT CONSERVATION IS STILL IMPORTANT

In a letter to advertisers, advertising agencies and radio management, George Ludlam, radio director of The Advertising Council, announced Thursday (25) that “with the exception of a very few cities where local drives are continuing, the Emergency Food Collection is officially over.”

Lee Marshall, executive director, Emergency Food Collection, Inc., reported that his organization had received more than 2 million dollars and more than 10 million cans of food. He went on to say that “this does not include reports from large cities like New York, Boston, Chicago and Los Angeles. In these and a few other cities the drive is still continuing locally for cash only because of the late start that was made in these localities.”

Mr. Marshall pointed out that the end of the emergency food collection did not mean that the need for conservation was ended. He explained that aid was still vitally important to ease the privations of the starving millions in Europe and Asia.

STATIONS REQUESTED TO PUBLICIZE VETERANS ADVISORY CENTERS

The Retraining and Reemployment Administration has requested the broadcasting industry to publicize and explain the services of Veterans’ Community Advisory Centers during the week of August 4-10.

A letter to this effect has gone to broadcasting executives from Arthur Stringer, NAB director of special services, requesting especially that each station contact the directing official of at least one advisory center in its area and do whatever is possible to help

(Continued on next page)
in explaining the nature of the service available to veterans.

This station cooperation is requested coincident with the priority network and national spot allocations being provided by the Advertising Council. (See Fact Sheet below)

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 5-11, 1946, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Veterans' Information Centers

In order to provide the veteran with much-needed information and counseling service that will help guide him back into gainful and useful civilian life, the Retraining and Reemployment Administration has promoted the establishment of Veterans' Information Centers—sometimes known as Community Advisory Centers—to furnish all the facilities necessary to serve the individual veteran—complete and accurate information, counseling and referral service. But experience of the past several months indicates that many veterans—including those who need help most—do not know such centers exist. The immediate job, therefore, is to inform servicemen and women about the services that are available to them at the advisory center and urge them to go there. If you are a relative or friend of a veteran, tell him of the services available at his community advisory center. If you are a veteran, find out the location of the veterans' information center in your locality and take advantage of its information, counseling and referral facilities. If there is no veterans' information center or community advisory center in your locality to advise you, submit your problem in writing to the Retraining and Reemployment Administration, Washington, D. C. (Fact Sheet No. 29)

Hospitals Need Student Nurses

Despite predictions that conditions would improve due to the return of Army and Navy nurses to civilian service, there have become increasingly worse. In 1945, hospitals registered by the American Medical Association reported an increase of 220,544 patient admissions over 1944. A study conducted by the American Hospital Association shows that 2 out of 3 hospitals throughout the country are suffering from acute nursing shortages. A large percentage of these hospitals have been forced to close beds and facilities—in some cases, even whole floors or wings. As a result, literally thousands of patients are doing without adequate nursing care. Forty thousand student nurses must be recruited during the present school year in order to alleviate the current situation, and insure adequate nursing care for the nation in the future. The U. S. Cadet Nurse Corps, created during the war to train nurses for military and civilian nursing service, filled schools of nursing throughout the country; many of its graduates are now doing their part in essential nursing fields. But recruitment for the Corps was terminated last summer, and today there is an alarming shortage of student nurses in training in the hospitals of our country. A strong national-wide effort must be made, therefore, to interest young women in nursing as a career; to urge them to enroll at once—since only a few weeks remain in which to enlist in fall classes, complete information on how to become a student nurse should be obtained at once from either the administrator or the director of the hospital's nearest the interested applicant's home, or from the National Nursing Council, 1790 Broadway, New York City. (Fact Sheet No. 9-D)

Buy U. S. Saving Bonds—"Back Your Future"

Surplus cash invested in U. S. Savings Bonds, instead of being used to bid up the price of still-scarce goods, helps to combat inflation. Regular, substantial purchases of U. S. Savings Bonds create a reserve of buying power that will be essential to our economy when consumers' goods are again in adequate supply. The rate of interest, sound investment value and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. From V. L. Clark, Director of the U. S. Savings Bonds Division, U. S. Treasury: "Two significant facts underline the importance of this campaign. Thirty billion dollars in Bonds bought during the war are still owned by the people. An additional $22 billion—over and above what can be absorbed by taxes, insurance, normal savings and the purchase of ALL the consumers' goods and services that can be made available this year—will be earned by the American people in 1946. This money, a total of $52 billion, is figuratively a powder keg which if employed in present spending would skyrocket prices to unprecedented heights. The continued sale of Bonds will serve to offset current earnings. It will spread ownership of the public debt among as many Americans as possible so that the interest may go to people as holders as Bonds rather than to a comparatively few banks, corporate or individual investors. Continued Bond sales now while money is plentiful and goods scarce will insure a reserve of spending power for new homes, equipment, services and other individually desired things in the future. Finally, it is important for people who have developed habits of thrift during the war to continue to build financial security for themselves and for their children." "Back your future" today by: . . . buying and holding as many U. S. Savings Bonds as possible. . . by stepping up your Pay Roll Savings as much as you can. (Fact Sheet No. 11-C)

WHAM ESTABLISHES OWN NEWS BUREAU

Realizing the need for more intensive coverage of area and local news, radio station WHAM, Rochester, has established its own independent news bureau. News Bureau Chief is David E. Kessler, a veteran of over twenty years in the editorial side of the newspaper business and of additional years in radio. He took over his new duties, to handle WHAM's news bureau on a full time basis, July 15. Since 414 his morning news commentary on WHAM had been sponsored by Planters Peanuts.

During his active newspaper career, Mr. Kessler was police and court reporter, rewrite man, sports editor, city editor, music and dramatics critic. Consequently, he is well fortified by experience and training to handle his important post at WHAM.

Plans for handling the bureau will not jell until after a period of experimentation. String correspondents are to be employed throughout the station's area. A number are already at work. Four men besides Mr. Kessler gather and broadcast the news at the present time.

JULY 29, 1946 — 588
The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 29. They are subject to change.

**Monday, July 29**

WAKR—Summit Radio Corp., Akron, Ohio—C. P. 1590 kc., 5 KW, unlimited, DA-night and day.

Other Participants
KVGB, Intervenor

NEW—Mary A. Petru et al., d/b as Port Arthur Broadcasting Co., Port Arthur, Texas—C. P. 1340 kc., 250 watts, unlimited.

NEW—Harry Francis Banker et al., d/b as Lake Shore Broadcasting Co., Port Arthur, Texas—C. P. 1340 kc., 250 watts, unlimited.

Further Hearing
NEW—Southeastern Massachusetts Broadcasting Corp., New Bedford, Mass.—C. P. 1400 kc., 250 watts, unlimited.

NEW—Bay State Broadcasting Co., New Bedford, Mass.—C. P. 1400 kc., 250 watts, unlimited.

NEW—Narragansett Broadcasting Co., Fall River, Mass.—C. P. 1400 kc., 250 watts, unlimited.

**Tuesday, July 30**

Oral Argument Before the Commission

Beginning at ten o'clock a. m. the Commission will hear oral argument on the following matters in the order indicated.

1. The Washington FM Applications:
   - Mid-Coastal Broadcasting Co., Docket No. 7190
   - Commercial Radio Equipment Co., Docket No. 7192
   - Capital Broadcasting Co., Docket No. 7193
   - Cowles Broadcasting Co., Docket No. 7194
   - The National Broadcasting Co., Docket No. 7196
   - Metropolitan Broadcasting Co., Docket No. 7197
   - Potomac Broadcasting Cooperative, Inc., Docket No. 7198
   - Evening Star Broadcasting Co., Docket No. 7199
   - WINX Broadcasting Co., Inc., Docket No. 7200
   - Theodore Granik, Docket No. 7397
   - Chesapeake Broadcasting Co., Docket No. 7411

2. KQW Transfer of Control Case:
   - KQW—Sherwood B. Brunton, Mott O. Brunton, and Ralph B. Brunton as Individuals and Trustees and C. L. McCarthy (Transferees); Columbia Broadcasting System, Inc. (Transferee)—Application for transfer of control of Pacific Agricultural Foundation, Ltd., Licensee of Radio Station KQW.

Further Hearing
NEW—Radio Wisconsin, Inc., Madison, Wis.—C. P. 1180 kc., 1 KW, unlimited, DA-night.

NEW—Edwin Mead, Rockford, Ill.—C. P. 1180 kc., 1 KW, unlimited, DA-night and day.

**Wednesday, July 31**

Oral Argument Before the Commission

Beginning at ten o'clock a. m. the Commission will hear oral argument on the following matters in the order indicated.

1. Martinsburg, West Virginia AM Applications:
   - C. M. Zinn & C. Leslie Gollob, d/b as Martinsburg Broadcasting Co.—C. P. 1540 kc., 250 watts, unlimited.
   - Richard Field Lewis, Jr., and Grant Pollock, a partnership, d/b as Berkeley Broadcasting Co.—C. P. 1540 kc., 250 watts, unlimited.

2. Peoria, Illinois AM Applications:
   - Greater Peoria Radiobroadcasters, Inc.—C. P. 1290 kc., 5 KW, unlimited, DA-night and day.
   - Edward J. Altorfer, et al., d/b as Illinois Valley Broadcasting Co.—C. P. 1290 kc., 1 KW, unlimited, DA-night and day.
   - Central Illinois Radio Corp.—C. P. 1290 kc., 5 KW, unlimited, DA-night and day.

3. WTCN and WHB Applications for change of frequency:
   - Minneapolis Broadcasting Corp. (WTCN), Minneapolis, Minn.—C. P. 710 kc., 10 KW, unlimited, DA-night.
   - WHB Broadcasting Co. (WHB), Kansas City, Mo.—C. P. 710 kc., 5 KW, unlimited, DA-night and day.

4. Pensacola, Florida AM Applications:
   - Ruth Braden et al., d/b as Escambia Broadcasting Co., Inc.—C. P. 1450 kc., 250 watts, unlimited.
   - Gulfport Broadcasting Co., Inc.—C. P. 1450 kc., 250 watts, unlimited.

NEW—Kenneth G. Zweifel, Freeport, Ill.—C. P. 1570 kc., 1 KW, daytime.

NEW—Vincent S. Barker and Gladys J. Barker, a partnership, d/b as Freeport Broadcasting Co., Freeport, Ill.—C. P. 1570 kc., 1 KW, daytime.

KFVS—Oscar G. Hirsch, trading as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—C. P. to change frequency and increase power. 960 kc., 1 KW, unlimited, DA-night.

Intervenors
Mt. Vernon Radio & Television Co., Midwest Broadcasting Co., May Broadcasting Co. (KMA)—Action on petition to intervene pending at the time this calendar is being prepared.

To Be Held in Room No. 321, State Capitol Bldg., Salem, Oregon, on Wednesday, July 31, 1946, and in Room 23, Federal Bldg., Oregon City, Oregon on Thursday, August 1, 1946.

NEW—B. Loring Schmidt, Salem, Ore.—C. P. 1490 kc., 250 watts, unlimited.

NEW—John H. Fitzgibbon, Roy Jarmann and Temple V. Ehmsen, Oregon City, Ore.—C. P. 1490 kc., 250 watts, unlimited.
**FCC ACTIONS**

**DOCKET CASE DECISIONS**

The Commission announces its proposed decision looking towards the grant of an application of Roy F. Thompson, \textit{t/r} as Thompson Broadcasting Co. (Docket 630), for a new station in Altoona, Pa., to operate on 1240 kc., 250 watts power, unlimited time (Docket 6688), subject to the filing within 30 days of an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Commission's standards. Further, subject to the installation of approved frequency and modulation monitors when available, the provisions of Secs. 3.55(b) and 3.60 of the Commission's rules being waived pending such installation.

A denial is proposed of the application of the Altoona Broadcasting Co. (Docket 6967) for the same facilities.

* * *

At the same time a proposed decision (B-257) is announced to deny the application of Chronicle Publishing Co. (Docket 6768) for a new station at Marion, Ind., to operate on 1350 kc., with 250 watts, unlimited time.

* * *

An order was adopted making final the proposed decision (B-241), granting the application of Copper City Broadcasting Corp. (Docket 6744) for a new station at Rome, New York, to operate on 1450 kc., 250 watts, unlimited time, and denying the applications of Utica Observer-Dispatch, Inc. (Docket 6695), Mid-state Radio Corp. (Docket 6141), Utica Broadcasting Co., Inc. (Docket 6146), and Ronald B. Woodward (Docket 6958), each seeking the same facilities at Utica, N. Y.

**AM APPLICATIONS GRANTED**

NEW—John Gordon Studebaker and John Ward Studebaker, d/b a Studebaker Broadcasting Co., San Diego, Cal.—Granted petition for leave to amend its application (B5-P-3919) for a new station to request the frequency 1240 instead of 1230; and the application as amended to operate on 1210 kc., 250 watts, unlimited time, was granted. (Docket 7301)

NEW—Southwest Broadcasters, Inc., Raton, N. Mex.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time, contingent on selection of transmitter site, subject to CAA approval, and filing modification of permit therefor. Waiver of Secs. 3.55(b) and 3.60 of rules required. (B5-P-4668)

NEW—Highlands Broadcasters, Inc., Oak Ridge, Tenn.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time, subject to condition that applicant will within 60 days from date of grant, file an application for modification of permit with the Commission specifying a transmitter site and antenna system meeting the requirements of the Commission's standard approved modulation and frequency monitor to be installed when available. (B3-P-4846)

NEW—Northern Allegheny Broadcasting Co., Warren, Pa.—Granted CP for a new station to operate on 1310 kc., 1 KW, daytime only, contingent on approval of antenna system and transmitter site by CAA, and waiver of Secs. 3.55(b) and 3.60 of the rules required. (B2-P-4736)

NEW—Commonwealth Broadcasting Corp., Portsmouth, Va.—Granted CP for a new station to operate on 1290 kc., 1 KW, daytime only, subject to the condition that applicant will within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. (B2-P-4737)

NEW—James H. Littlejohn, Ogden, Utah—Granted CP for a new station to operate on 730 kc., 1 KW, daytime only, subject to the condition that applicant will within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. (B5-P-4249; Docket 7668)

NEW—WACK Broadcasting Co., Waukesha, Wis.—Granted CP for a new station to operate on 1510 kc., 250 watts, daytime, subject to condition that applicant will within 60 days from date of grant file an application for modification of permit with the Commission specifying a transmitter site and antenna system meeting the requirements of the standards. (B4-P-4833)

NEW—Herschel Bulien, \textit{t/r} as Elko Service Co., Elko, Nev.—Granted CP for a new station to operate on 1340 kc., 250 watts, unlimited time, subject to the condition that applicant, within 60 days of grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. Waiver of Sec. 3.60 is required. (B5-P-4836)

NEW—White Mountains Broadcasting Co., Inc., Berlin, N. H.—Granted CP for a new station to operate on 1230 kc., 250 watts, unlimited time. (B1-P-4819)

NEW—The Altus Broadcasting Co., Altus, Okla.—Granted petition in so far as it requests grant of application (Docket 7458), without hearing. Adopted an order granting CP for a new station to operate on 1450 kc., 250 watts power, unlimited time (B3-P-4543), provided the grant of application is made subject to the condition that the applicant, within 60 days from this action, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards.

**FM FINAL CP'S GRANTED**

The following stations were granted regular construction permits. (Note: power given is effective radiated power; antenna height given is height above average terrain):

Lehigh Valley Broadcasting Co., Allentown, Pa.—Class B; Channel 93.3 mc. (No. 240); 8 kw; antenna 700 feet. (B2-PH-428)

WKST, Inc., New Castle, Pa.—Class B; Channel 102.5 mc. (No. 275); 8.4 kw; antenna: 390 feet. (B2-PH-846)

Laurence W. Harry, Fostoria, Ohio—Class A; Channel 103.1 mc. (No. 286); 370 watts; antenna 125 feet. (B1-PH-463)

The Broadcasting Corp. of America, Riverside, Cal.—Class B; Channel 103.9 mc. (No. 271); 30 kw; antenna 5,280 feet. (B5-PH-188)

The Capital Broadcasting Co., Annapolis, Md.—Class B; Channel 100.1 mc. (No. 261); 15.0 kw; antenna 565 feet. (B1-PH-781)

The Tuscora Broadcasting Co., Dover, Ohio—Class A; Channel 105.5 mc. (No. 288); 700 watts; antenna 287 feet. (B1-PH-727)

Radio Broadcasting Corp., Twin Falls, Idaho—Class B; Channel 96.1 mc. (No. 277); 2 kw; antenna: 390 feet. (B2-PH-462)

Keystone Printing Service, Inc., Wanee, III.—Class A; Channel 98.1 mc. (No. 251); 4.0 kw; antenna: 315 feet. (B4-PH-234)

The Bethlehem's Globe Pub. Co., Bethlehem, Pa.—Class B; Channel 94.7 mc. (No. 234); 10 kw; antenna: 630 feet. (B2-PH-615)

Democrat Printing Co., Durant, Okla.—Class B; Channel 103.1 mc. (No. 270); 2 kw; antenna: 395 feet. (B3-PH-855)

Unibank Newspapers, Inc., Uniontown, Pa.—Class B; Channel 96.3 mc. (No. 243); 1.1 kw; antenna: 1,110 feet. (B2-PH-736)

Washemaw Broadcast Corp., Ann Arbor, Mich.—Class B; Channel 104.3 mc. (No. 277); 2 kw; antenna: 315 feet. (B2-PH-383)

WHBY, Inc., Green Bay, Wisc.—Class B; Channel 101.5 mc. (No. 268); 9.5 kw; antenna: 410 feet. (B4-PH-854)

R. G. Fournier, Topeco, Ga.—Class B; Channel 97.7 mc. (No. 249); 10 kw; antenna 910 feet. (B3-PH-826)

Home News Pub. Co., New Brunswick, N. J.—Class A; Channel 101.3 mc. (No. 282); 1 kw; antenna 170 feet. (B1-PH-298)

(Continued on next page)
A. H. Belo Corp., Dallas, Texas—Class B; Channel 94.3 mc. (No. 222): 37 kw; antenna: 470 feet. (B3-PH-288)
Hawley Broadcasting Co., Bellingham, Pa.—Class B; Channel 93.1 mc. (No. 226): 9.0 kw; antenna: 712 feet. (B2-PH-121)

Minnesota Broadcasting Corp., Minneapolis, Minn.—Modified CP for Class B station; Channel 93.1 mc. (No. 246): 409 kw; antenna: 480 feet. (B4-MPH-129)

**TELEVISION APPLICATION GRANTED**

**NEW**—American Broadcasting Co., Inc., Chicago, Ill.—Granted CP for a new station; Channel No. 7, 114-119 mc.; visual power 39 kw, audible 15 kw; antenna height 613 feet; contingent on CAA approval, and waiver of Sec. 3.652 required. Permittee to install frequency monitor of accuracy of .01% or better when available. (B4-PCT-80)

**FM CONDITIONAL GRANTS**

**AM LICENSE RENEWALS**

KVAL—Radio Station KEEN, Ltd., Brownsville, Texas—Granted renewal of license for the period ending June 1, 1947.
KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah—Granted renewal of license for the period ending November 1, 1948 (Comr. Durr voting for hearing).

The following stations were granted renewal of licenses for the period ending May 1, 1949:

- WMC and Aux., Memphis, Tenn.; WIOD, Miami, Fla.; KTAR (Comr. Wadefield voting for further inquiry)
- Phoenix, Ariz.

**FM LICENSE RENEWALS**

The following stations were granted renewal of licenses for the period ending May 1, 1947:

- KMBC-FM, Kansas City, Mo.; WBZA, Schenectady; WBRL, Baton Rouge, La.; WDRC-FM, Hartford, Conn.; WELD, Columbus, Ohio; WGNB, Chicago; WJOT, Pittsburgh, Pa., and WQXO, New York City.

Renewals for the following stations were granted for the period ending June 1, 1947:

**TELEVISION LICENSE RENEWALS**

**TELEVISION**

The following experimental television stations were granted renewal of licenses for the period ending February 1, 1947:

**MISCELLANEOUS LICENSE RENEWALS**

The following Studio Transmitter Broadcast Stations were granted renewal of licenses for the period April 1, 1947:

- W2XWD—WOKO, Inc., Albany, N. Y.—Facsimile broadcast station license was further extended upon a temporary basis only, for the period ending Nov. 1, 1946, pending determination upon application for renewal.

**MISCELLANEOUS ACTIONS**

Correction

The item on Page 570 of Current Reports referring to WVGB, should show power increase granted for 5 KW-DX night, instead of 3 KW; also change in transmitter location.

WABI—Community Broadcasting Service, Bangor, Me.—Granted modification of CP which authorized increase in power, etc., for extension of completion date to 10-18-46. (B1-MP-1933)

WCTA—Andalusia Broadcasting Co., Inc., Andalusia, Ala.—Granted modification of CP which authorized a new station, to change type of transmitter to RCA-BTA-250-L and for changes in ground system. (B3-MP-1933)

WKBX—The New Britain Broadcasting Co., New Britain, Conn.—Granted modification of CP which authorized a new station, to change type of transmitter to Raytheon RA-1000, and change transmitter location from Walsh Ave., Newington, Conn., to: Willard Ave., Newington, Conn. Permittee is granted a waiver of Secs. 3.54(b) and 3.69 of the Commission's Rules; conditions. (B1-MP-1933)

WWGP—Lee Broadcasting Co., Sanford, N. C.—Granted modification of CP which authorized a new station, to change type of transmitter to Gates BC-12, for approval of antenna and approval of transmitter location on U. S. Highway No. 1, Tramway, N. C. (B3-MP-1933)

WPFD—Penna. Broadcasting Co., Mobile, area of Philadelphia—Granted modification of CP, which authorized a new relay broadcast station, to change power from 15 to 30 watts, and to change type of transmitter. The CP is granted subject to changes in frequency assignment which may result from proceedings in Docket 653. (B2-MPRE-67)

WWLI—Loyola University, New Orleans, La.—Granted special temporary authorization to operate a 3 KW Federal Radio and Telephone Corp. FM transmitter, with 2-way square loop antenna on top the American Bank Bldg., 201 Carondelet St., New Orleans at an elevation of 334 feet above ground; Channel 94.9 mc. for a period of 90 days from date of grant. (B3-PH-291)

(Continued on next page)
Templetone Radio Mfg. Corp., Boston, Mass.—Granted petition for leave to amend its application for FM construction permit (Docket 6995), so as to amend the engineering statement filed with the application relative to the estimated area and population within the predicted 100 μv/m and the 50 μv/m contours, and the amendment was accepted.

WBET—Enterprise Pub. Co., Brockton, Mass.—Granted modification of CP which authorized a new station, for changes in transmitting equipment, vertical antenna and ground system and change in transmitter and studio locations at SE corner of Torrey and West Sts. bounded on South by Belmont Road, Brockton, Mass., and 60 Main St., Brockton, respectively. (B1-MP-1397)

WDLH—I.R. Ireland's Broadcasting Service, Inc., Marshall, Wis.—Granted modification of CP, which authorized a new station, to extend commencement and completion dates to 8-13-46 and 2-13-47, respectively. (B1-MP-1987.) Permittee is granted a waiver of Secs. 3.55(b) and 3.90 of the Commission’s rules; conditions.

WINR—Southern Tier Radio Service, Inc., Binghamton, N. Y.—Granted modification of CP which authorized a new station, for changes in transmitting equipment, vertical antenna and ground system and change in transmitter and studio locations to Cor. Margaret St. and Stokes Ave., Binghamton, and 58 Exchange St., respectively; and extend commencement and completion dates to 60 days and 180 days after grant respectively. (B1-MP-1996)

KPM—John B. Cooley, et al, d/b as Minot Broadcasting Co. (Licensee of WCAR, Permittee of new FM), voting for hearing). (B4-P-4342)

WASK—Summit Radio Corp., Akron, Ohio—Granted construction permit to make changes in directional antenna for a new station in Birmingham, Ala., to operate on Channel #237, using Federal FMTB 3000 transmitter and single section Federal square loop antenna mounted on 20 foot structure on roof of building to give overall height of 250 ft. above ground, at 314 N. Broadway, St. Louis, Mo., for a period beginning July 28 and ending Oct. 25. Station to be programmed from 12 noon to 7 p. m., CDST.

WCBW—Columbia Broadcasting System, Inc., New York City—Granted special temporary authority to make aural call letter announcements only during remote broadcasts in the afternoon, for the period July 22 to Oct. 20.

WXO—WOMPI Howard Radio, Inc., Knoxville, Tenn.—Granted authority to determine operating power by direct measurement. (B3-Z-1766)

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Granted CP to install new vertical antenna and mount FM antenna on top and change transmitter location from 15551 Woodrow Wilson Ave., Detroit, to Woodrow Wilson Ave., Detroit. (B2-P-4510)

W9XBT—Balaban & Katz Corp., Chicago, Ill.—Granted special temporary authority to operate an RCA television relay transmitter on 6530-6575 mc., for the period July 19 to July 28.

W3XO—WINX Broadcasting Co., Washington, D. C.—Granted CP to change transmitter site of developmental station from 3525 W2XDK—Sherron Metallic Corp., Brooklyn, N. Y.—Granted authority to change in transmitter and studio locations to Cor. Margaret St. and Stokes Ave., Binghamton, and 58 Exchange St., respectively; and extend commencement and completion dates to 60 days and 180 days after grant respectively. (B1-MP-1996)

KCHS—Sierra Broadcasting Service, a partnership, Hot Springs, N. Mex.—Granted modification of CP which authorized transmission of antenna power. (B2-Z-1780)

WQXR—Interstate Broadcasting Co., Inc., New York City—Granted authority to determine operating power by direct measurement and completion of antenna structure at the estimated area and population within the predicted 100 μv/m and the 50 μv/m contours. (B3-P-4376)

KPMC—Pioneer Mercantile Co., Bakersfield, Cal.—Granted CP to change transmitter site of developmental station, for extension of completion date for 6 months from 7-1-46. (B1-MPVB-150)

KCIH—Sierra Broadcasting Service, a partnership, Hot Springs, N. Mex.—Granted modification of CP which authorized testing of antenna transmission of antenna power. (B3-P-4376)

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted authority to determine operating power by direct measurement. (B2-Z-1980)

KFJ-FM—Earle C. Anthony, Inc., Los Angeles, Cal.—Granted extension of special temporary authority for the period July 26 to Aug. 24, to operate a 250 watt GE FM transmitter on 96.3 mc., with temporary antenna system, in order to make site tests. Operation shall be limited to that required for site tests, and no regular programs shall be broadcast.

W2XDR—Sherron Metallic Corp., Brooklyn, N. Y.—Granted modification of CP which authorized testing of antenna transmission of antenna power. (B3-P-4376)

WNOX—Scripps Howard Radio, Inc., Knoxville, Tenn.—Ordered that the motion of WQXR to continue consolidated hearing scheduled for July 24 on applications of Lake Broadcasting Co., Inc., and New Laurel Radio Station, Inc., be dismissed as moot.

WKRF—Interstate Broadcasting Co., Inc., New York City; KPMC—Pioneer Mercantile Co., Bakersfield, Cal.—Denied petition insofar as it requests consolidation of hearing upon applications of WAML, Laurel, Miss. (Docket 7527), Lake Broadcasting Co., Inc. (Docket 7533) and the applications of WQXR and KPMC; that insofar as the petition requests postponement of the hearings now scheduled for July 24 on the applications of WAML and Lake Broadcasting Co., Inc., the petition is granted, and the hearing scheduled for July 24 is continued without date until further order of the Commission.

SCHEDULED FOR HEARING

KVOX—KVOX Broadcasting Co., Moorhead, Minn.; Northern States Broadcasting Co., Fargo, N. Dak.—The Commission, on its own motion, ordered that the consolidated hearing on these applications be scheduled for Wednesday, Aug. 14, and Thursday, Aug. 15, at Fargo, N. Dak. Action 7-23.

McHenry Tichener, Boulder, Colo.; Gifford Phillips, Denver, Colo.—The Commission, on its own motion, scheduled the consolidated hearing on these applications for Monday, Aug. 12, at Denver, Colo. Action 7-24.

DESIGNATED FOR HEARING

Voice of Berger, Berger Texas—Designated for hearing application of Voice of Berger (B3-P-4376), requesting the frequency 1230 kc., with 250 watts, unlimited time, in a consolidated proceeding with application of Panhandle Broadcasting Corp. (Docket 7575) requesting the same facilities at Amarillo. (Continued on next page)
ACTION ON MOTIONS

Sun River Broadcasting, Inc., Great Falls, Mont.—Granted petition for leave to amend its application for CP (Docket 7328) so as to show additional and complete engineering information, and the amendment was accepted.

Chillicothe Broadcasting Co., Chillicothe, Ohio—Granted petition to dismiss without prejudice its application for CP (Docket 7414, B3-P-4157).

Shawnee Broadcasting Co., Chillicothe, Ohio—Granted petition insofar as it requests leave to amend and remove from hearing docket application for CP; and the amendment to show addition of Frank A. Bieringer as a stockholder, etc., was accepted and application removed from hearing docket. (Docket 7415, B2-P-4412).

WCBS, Inc., Decatur, Ill.—Granted petition to dismiss without prejudice application for CP. (Docket 7326; B4-P-4349).

Northeastern Ind. Broadcasting Co., Inc., Fort Wayne, Ind.—Granted petition for leave to amend its application for a new FM station (Docket 7085) so as to show additional and complete engineering information, and the amendment was accepted.

The News & Observer Pub. Co., Raleigh, N. C.—Granted motion to amend its application for CP (Docket 7505), so as to show a change in type of frequency and modulation monitor: new transmitter location, a different DA system, and the amendment was accepted.

S. W. McCready, Medford, Ore.—Granted petition to dismiss without prejudice its application for CP. (Docket 7328).

Medford Printing Co., Medford, Ore.—The Commission on its own motion, removed from the hearing docket application for CP (Docket 7327), heretofore scheduled for consolidated hearing with above application of S. W. McCready.

Gonzales Broadcasting Co., Gonzales, Texas—Granted petition requesting leave to amend application for CP (B3-P-4546, Docket 7432), so as to show financial condition of petitioner and of Frank Wilson, Jr., and Lawrence M. Walshak, the two general partners of said company. The amendment was accepted, the record reopened, and without further hearing the amendment is made a part of the record in Docket 7432.

Express Publishing Co., San Antonio, Texas—Granted petition requesting leave to amend application for CP (B3-P-4471; Docket 7301), so as to change Paragraph 8 of the application to delete the name of T. D. Anderson as a director of the petitioner; the amendment was accepted.

(Continued on next page)
accepted, the record reopened, and without further hearing the amendment is made a part of the record in Docket 7591.

Radio Kentucky, Inc., Louisville, Ky.—Granted petition for waiver of Sec. 1385 and accept petitioner's late appearance in re Docket 7635.

WCAE, Inc., Pittsburgh, Pa.—Granted petition requesting leave to amend its application for a new FM station (Docket 7202), so as to show distance from proposed WCAE FM site to all airports and airways in the Pittsburgh area. The amendment was accepted, the record reopened, and without further hearing the amendment is made a part of the record in Docket 7202.

WWRL—Long Island Broadcasting Corp., Woodside, L. I. — Granted petition for leave to amend its application for CP (Docket 7150) so as to show a modified directional antenna design, etc., and the amendment was accepted.

Lake Shore Broadcasting Co., Port Arthur, Texas—Granted petition to waive Sec. 1.384 of the Commission's rules and accept late appearance in re Docket 7580.

Hughes Tool Co., Los Angeles, Cal.— Granted petition requesting postponement until August 9 of the taking of the further testimony of Howard Hughes which was scheduled to be taken in Los Angeles on July 24, in re application for a new television station. (Docket 6570)

Queen City Broadcasting Co., Cincinnati, Ohio.—Denied petition requesting the Commission to reopen the record in the hearing on its applications for new FM stations (Docket 6573) and Scripps Howard Radio, Inc. (Docket 6574), to receive additional testimony.

Illinois Valley Broadcasting Co., Peoria, Ill.—Granted motion to amend its application for new FM station (Docket 7589) so as to supply complete engineering information, etc., and the amendment was accepted.

Big Sioux Broadcasting Co., Sioux Falls, S. Dak.—Granted petition requesting leave to amend its application for CP (Docket 7532) so as to specify the frequency 1270 with 1 kw, DA-national, instead of 1300 kw, with 250 watts, etc. The amendment was accepted and application removed from the hearing docket.

James Valley Broadcasting Co., Huron, S. Dak.—The Commission, on its own motion, removed from the hearing docket (Docket 7655) the application of James Valley Broadcasting Co., which was set for consolidated hearing with above application of Big Sioux Broadcasting Co.

Mobile Broadcasting Co., Mobile, Ala.—Granted petition to amend its application for CP (Docket 7482) so as to specify a new transmitter site; show new engineering data, etc., and the amendment was accepted.

Illmo Broadcasting Co., Quincy, Ill.—Granted petition for leave to amend its application for CP (Docket 7521) so as to show revised engineering plans, etc., and the amendment was accepted.

Port Arthur Broadcasting Co., a partnership, Port Arthur, Texas—Granted petition for leave to amend its application for CP (Docket 7539) so as to show revised installation costs, etc., and the amendment was accepted.

Tri-City Broadcasting Co., Goose Creek, Texas—Granted petition for leave to amend its application for CP (Docket 7669) so as to specify the frequency 1360 with 1 kw, DA, instead of 1430 kw, with 250 watts, nondirectional, etc. The amendment was accepted and application removed from the hearing docket.

I & L Broadcasting Co., Dayton, Ohio— Granted petition for leave to amend its application for CP (Docket 7556) so as to specify the frequency 910 kc, instead of 900 kc, and the amendment was accepted.

Piedmont Publishing Co., Winston-Salem, N. C.—Granted petition for leave to amend its application for CP (Docket 6045) so as to supply complete engineering information, and the amendment was accepted.

Mid-State Broadcasting Co., Peoria, Ill.—Granted petition for leave to amend its application for new FM station so as to supply complete engineering data, and the amendment was accepted.

WHYN— The Hampden-Hampshire Corp., Holyoke, Mass.— Granted petition for leave to dismiss without prejudice its application for CP (BP-6-4347; Docket 7325).

KVPB—Hirsch Battery & Radio Co., Cape Girardeau, Mo.— Granted petition for leave to amend its application for CP (Docket 7150) so as to show a modified directional antenna design, etc., and the amendment was accepted.

Atlanta Radio Enterprises, Inc., Atlanta, Ga.—Granted petition to dismiss without prejudice its application for CP (BP-7-1257; Docket 7324).

Piedmont Broadcasting Corp., Danville, Va.—Granted petition requesting leave to amend its application for a new FM station (Docket 7360) so as to show changes in ownership of applicant Corp., etc. The amendment was accepted and application removed from the hearing docket.

Roanoke Broadcasting Corp., Roanoke, Va.—Granted petition for leave to amend its application for a new FM station (Docket 7355) so as to show changes in ownership of applicant Corp., etc., and the amendment was accepted.

KVPB—Hirsch Battery & Radio Co., Cape Girardeau, Mo.— Granted petition for continuation of hearing on its application for CP (Docket 7130) now scheduled for July 31, and continued said hearing to September 16, 1946.

West Central Broadcasting Co., Peoria, Ill.—Granted petition for leave to amend its application for a new FM station (Docket 7360) so as to specify a new transmitter site; incorporate revised engineering information, etc., and the amendment was accepted.

The Commission, on its own motion, on July 25, continued indefinitely the hearing now scheduled for August 12 in San Francisco, Cal., before Commissioner Wakefield, on applications for new FM stations in the San Francisco area.

Lake Shore Broadcasting Co., Port Arthur, Texas—Withdrew petition for continuation of consolidated hearing scheduled for July 29 in re applications for CP. (Docket Nos. 7579 and 7580)

High Point Enterprises, Inc., High Point, N. C.—Granted petition requesting leave to amend application for CP (Docket 7533), so as to specify the frequency 1070 instead of 335 kc.; show revised engineering data, etc. The amendment was accepted and the application removed from the hearing docket (Docket Nos. 7579 and 7580).

Lake Superior Broadcasting Co., Duluth, Minn.— Granted petition requesting continuation of hearing on its application for CP (Docket 7583), scheduled for July 23, and the hearing was continued to Sept. 25.

W. Albert Lee, Houston, Texas—Granted petition requesting leave to amend its application for CP (Docket No. 7586), so as to submit amended engineering statement showing modified DA pattern and to revise engineering statement, and the amendment was accepted.

WCHM—The Ashland Broadcasting Co., Ashland, Ky.—Ordered continuance of the hearing in re application for CP (Docket 7555) scheduled for July 22, to August 22.

Lee Segall Broadcasting Co., Houston, Texas—Granted petition to reinstate its application for CP (BP-3-4182), which was dismissed without prejudice on May 25, 1946, subject to a right of reinstatement at a later date under provisions of the Commission's public notice of Jan. 5, 1946, and accept amendment filed with petition. The amendment to specify frequency 1130 instead of 790 kc., was accepted and the application reinstated.

Radio Springfield, Inc., Springfield, Ill.—Granted petition for leave to amend application for CP (Docket 7323), so as to specify frequency 1490 kc., with 250 watts.

(Continued on next page)
instead of 1550 kc, with 1 KW, etc. The amendment was accepted and the application as amended, was removed from the hearing dock.

Deep South Broadcasting Corp., New Orleans, La.—Granted petition requesting leave to amend its application for CP (Docket 7117) so as to specify a new antenna design, new transmitter site, and revised engineering date, and the amendment was accepted, objection to the ruling noted by Counsel for James A. Noe.

Press Wireless, Inc.—Granted motion to dismiss without prejudice the application for special temporary authority to communicate with Montreal, Canada, for handling transiting press and government traffic, (Docket 7446)

Federal Trade Commission

Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a Cease and Desist Order should not be issued against it.

Pretorius Approved Products—False advertising of cosmetics, therapeutic devices, food and drugs is charged in a complaint against Martin W. Pretorius, trading as Pretorius Approved Products, 1115 South Glendale Ave., Glendale, Calif. (5454)

CEASE AND DESIST ORDER

The Commission issued the following Cease and Desist Order last week:

William J. Ellison, Inc., custom tailors, 545 Fifth Ave., New York, and Albert A. Chapman, the corporation’s president and treasurer, are prohibited from the use of lottery methods in the sale or distribution of merchandise. (5327)

STIPULATIONS

During the past week the Commission announced no stipulations.

COMPLAINT DISMISSED

Mathieson Alkali Works—The Commission has issued an order dismissing its complaint as to Mathieson Alkali Works, Inc., 60 East 42nd St., New York, one of five corporations charged with conspiracy to eliminate price competition and to monopolize the production, sale and distribution of liquid and solid carbon dioxide.

The complaint was dismissed without prejudice to the right of the Commission to institute further proceedings in the matter. The respondent’s motion for dismissal declared that there was no evidence sufficient to sustain the allegations of the complaint as to the Mathieson Corporation and that the record showed it did not commit any unlawful trade practices and was not a party to any unlawful combination or conspiracy. (5143)
Commission, Making Transfer Rule Effective, Adopts Suggestions Urged By Industry

In an order made public last week, the FCC announced the adoption of the transfer rule originally proposed on December 13, 1945, but excepted from the rule several important types of transfers as had been urged by NAB and other industry representatives in the oral hearing before the Commission.

The possibility that such a rule would be proposed was brought out in August last year, when the decision on the transfer of WLW from Crosely to Avco was announced. Although the transfer was approved by the FCC, the Commission stated in its decision that it was considering the establishment of new requirements in future transactions involving transfer of radio station facilities.

The rule as adopted, provides that licensees who wish to effect a transfer must give public notice of the proposed sale through newspaper advertisements in their own communities, specifying the terms of the agreement. The advertisements are to be published twice weekly for the three weeks immediately following the filing of the application for the transfer with the Commission. The FCC will also give public notice.

The FCC will take no action on the application for a period of sixty days. If no competing application is filed during such period, the FCC will consider the original application and approve the transfer if it is deemed to be in the public interest.

However, if any other competing applications are filed, the Commission will consider all such applications. If the FCC finds that the original bidder is best qualified to assume the responsibilities of station ownership, it will approve the transfer without a hearing. If the Commission is not able to reach that conclusion, the original application and all competing applications will be considered and heard in a consolidated hearing.

The Commission will act on the application and approve a transfer to the applicant then deemed best qualified to serve the public interest.

One of the most important exceptions in the rule as adopted is that relating to transfers by way of gift or testamentary disposition, or an assignment to effect a testamentary disposition. The proposed rule had exempted only assignments from a decedent to his administrator or executor, or by the latter to their successors. As finally approved, the rule does not apply to dispositions to heirs, legatees or beneficiaries under a will, but does apply in the case of transfers by an administrator or executor to a person not designated in the will.

NAB, in oral argument and in its brief, had urged that, if the rule were adopted, exception should be made for transfers by way of gift or testamentary disposition.

The rule does not apply to dispositions to heirs, legatees or beneficiaries under a will, but does apply in the case of transfers by an administrator or executor to a person not designated in the will. NAB, in oral argument and in its brief, had urged that, if the rule were adopted, exception should be made for transfers by way of gift or testamentary disposition.

The rule does not apply to dispositions to heirs, legatees or beneficiaries under a will, but does apply in the case of transfers by an administrator or executor to a person not designated in the will.
Commission, Making Transfer Rule Effective, Adopts Suggestions Urged By Industry

(Continued from page 601)

to corporate reorganizations involving no substantial change in beneficial ownership. Nor does it apply to assignments by individuals to a corporation controlled by them, or from a corporation to stockholders, provided there is no substantial change in interest. As originally proposed, the latter exception was limited to situations in which there was no change in interest.

Finally, the Commission provides that in case parties are in doubt as to the applicability of the rule or feel that its application should be waived, they may request a ruling on its applicability or ask that it be waived. The Commission will then decide whether the rule should be followed or whether public interest will be served by waiving it. NAB had proposed a substantially similar exception, that the rule not apply if the Commission found that it worked a hardship or was unnecessary.

Complete text of the transfer rule, Section 1.388 of the Commission’s Rule and Regulations, follows:

“Section 1.388—Assignment and transfer of control.— (a) Applications for consent to the assignment of a construction permit or license for an AM, FM, television or other broadcast station or for consent to the transfer of control of a corporation holding such a construction permit or license shall be filed with the Commission on Form F.C.C. No. 814 (Assignment of License) or F.C.C. No. 315 (Transfer of Control). Each application shall be accompanied by a copy of a proposed notice in a form prescribed by the Commission which notice the licensee or permittee shall cause to be published at least twice a week for the 3 weeks immediately following the filing of such application in a daily newspaper of general circulation published in the community in which the station is located. The notice shall state the terms and conditions of the proposed assignment or transfer, the name of the proposed assignee or transferee, and, further, that any other person desiring to purchase the facilities upon the same terms and conditions may file an application to this effect with the Federal Communications Commission within 60 days from the date of the first publication of the notice, which date shall be expressly set forth therein. Upon receipt of the application, the Commission itself will issue a similar public notice stating the terms and conditions of the proposed sale and stating that others may file competing applications for the same facilities upon the same terms and conditions.

(b) No action on any such application will be taken by the Commission for a period of 60 days from the date of first publication, during which time any person desiring to purchase the facilities upon the same terms and conditions may file a competing application. In the case of such competing application, it shall be necessary for the applicant to execute only so much of the application form as relates to the proposed assignee or transferee—F.C.C. Form No. 814, Part II, and Form No. 315, Part III.

(c) If no competing application is filed during this 60-day period, the Commission will consider the original application upon its merits and will grant it if it appears from an examination of the application and supporting data that public interest will be served thereby; otherwise it will be designated for hearing. If, during such 60-day period, any other application is filed, all such applications will then be considered simultaneously upon their merits, and if, upon such consideration, it appears that the proposed assignee or transferee selected by the licensee is the best qualified and that the transfer would otherwise be in the public interest, the Commission will grant the original application without a hearing. If the Commission is unable to make such a determination upon consideration of the several applications, the original application and all competing applications will be designated for hearing, to be heard in a consolidated proceeding, to determine among other things which of the applicants is best qualified to operate the station in the public interest.

(d) If, at the conclusion of such hearing, the Commission is of the opinion that the proposed assignee or transferee selected by the licensee is the best qualified and that the transfer is otherwise in the public interest, an order will be entered granting the original application. However, if the Commission is of the opinion that one of the other applicants is the best qualified and that a transfer is otherwise in the public interest, an order will be entered denying the original application and stating that the Commission’s consent to an assignment of the license or construction permit or to the transfer of control of the corporate licensees or permittees to such competing applicant will be granted provided the licensee or permittee and such competing applicant enter into and file with the Commission within 30 days from the date of such order a contract for the assignment of the license or construction permit, or the transfer of control of the licensee or permittee, to such competing applicant upon the same terms and conditions as stated in the original application or upon such other terms and conditions as the parties may agree upon and which new terms and conditions the Commission shall find to be in the public interest.

(e) The provisions of this section shall not apply to the following cases:

(1) Where there is a reorganization of a corporation holding a license or construction permit which involves no substantial change in the beneficial ownership of that corporation;

(2) Where there is an assignment from an individual or individuals to a corporation owned and controlled by such individual or individuals without any substantial change in their respective interests or from a corporation to the individual stockholders controlling such corporation when there is no substantial change in their respective interests;

(Continued on next page)
“(3) Where there is an assignment or transfer by way of gift or testamentary disposition of a license or construction permit or of a controlling interest in a corporate licensee or permittee, or an assignment or transfer of a license, permit or interest to effect such testamentary disposition. This section shall, however, apply to an assignment or transfer by an administrator or executor to persons other than the lawful heirs or legatees of the licensee or permittee or to trustees or beneficiaries other than those designated in the licensee’s or permittee’s will or other testamentary instrument.

“(4) Where the interest being transferred, if acquired by a person other than the proposed assignee, would not result in such person acquiring control. The Commission, however, will scrutinize carefully successive transfers to the same person or persons to determine whether such transfers are for the purpose of evading compliance with this section.

“(5) In the case of any other assignments or transfers where the parties are in doubt as to whether the provisions of this section are applicable, or are of the opinion that if the section is applicable, the requirements should be waived, the application may be filed with a request for a ruling as to whether the section is applicable or with a petition for waiver of the rule. The Commission will determine on the facts of each case whether the section is applicable or whether public interest will be served by a waiver of the rule.”

**Broadcast Advertising**

**NEWSPAPER STUDY CRITICIZED BY AGENCY**

A booklet entitled, “Daily Newspapers and Radio Chains as National Media,” recently distributed by the American Association of Newspaper Representatives, has provoked the criticism of a leading advertising agency because of the methods used in its comparison of media costs.

Stating that the section which compares the cost of radio to the cost of newspapers is “based on a completely illogical and false premise,” one of the agency executives this month sent to key personnel a confidential memorandum which reads in part:

“The cost comparison is based on CAB rating in 33 cities for 15 network programs projected against the national set ownership figures (which is bad enough), and Continuing Study of Newspaper Readership figures for the top 15 newspaper ads, projected against 102 newspapers in 87 markets and 266 papers in 251 markets.

“The ridiculous part of this comparison is that each of the top fifteen ads was rated by CSNR once, in one newspaper and that one readership figure was projected to the entire list of newspapers. For example, the Johnson and Johnson ad which heads the list received its 66% readership in the Hagerstown, Md., Daily Mail, which had a circulation of 8,570, yet this limited circulation is projected against 266 papers for a total of 15,432,120 readers!

“The following is a list of the top fifteen ads, together with the newspapers in which they ran:

FIRST OHIO NEWS CLINIC SET; HOST IS WHBC

An all day Radio News Clinic is to be held Tuesday, August 20, in Canton, Ohio, with headquarters at the Onesto Hotel, according to announcement by John Pattison Williams, president, Ohio Association of Broadcasters, and general manager of WING, Dayton.

Mr. Pattison has appointed a committee of three Ohio broadcasters to handle all details of the clinic. General Clinic Chairman is Eugene Carr, director of radio for The Brush-Moore Newspapers, Canton. His associates on the committee are S. Bernard Berk, president and station manager of WAKR, Akron, and Len Nasman, business manager, WFMJ, Youngstown.

This will be the first radio news clinic to be held in Ohio; and plans are being made to cover the subjects of news gathering, writing, editing and broadcasting thoroughly from every point of view. Present plans call for a special luncheon with a speaker to handle an important phase of the morning's discussion.

Radio station WHBC, Canton, will be host station. Ohio broadcasters are to receive complete information on the agenda and facts of travel and hotel facilities in the immediate future from the committee.

Arthur Stringer, NAB director of special services, who has been participating in radio news clinics since November 1945, is to attend.

SECOND GROUP OF JOURNALISM TEACHERS SERVING INTERNSHIPS IN RADIO STATION NEWS ROOMS

Six professors of schools and departments of journalism, of American colleges and universities, are currently serving internships in the news departments of six broadcast stations. Sponsoring stations, the internes and the “professors of internships” are listed below:

The system of internship whereby journalism professors gain actual experience, under competent radio newsmen, is under the direction of the Committee on Teacher Training and Internship of the Council on Radio Journalism. This committee consists of: Arthur Stringer, NAB, chairman; Karl Koerper, vice-president and managing director, KMBC, Kansas City; Professor Ken Bartlett, Syracuse University; and E. R. Vadeboncoeur, vice president, WSYR, Syracuse.

The Council on Radio Journalism was created in 1945 by joint action of NAB and the American Association of Schools and Departments of Journalism.

Internships are made possible by the financial support of the cooperating stations.

The crop of 1945 internes reports, without exception, that their experience in newsrooms enables them to impart an authenticity to their teaching which, previously, was entirely lacking.

For this reason there can be no doubt that the 1946 contributions by the managements of the six stations cooperating this year will produce similar satisfactory results.

In addition to those on the teacher training committee the Council on Radio Journalism has these additional members: Prof. Fred S. Siebert, University of Illinois; William Brooks, vice president, NBC; Prof. Floyd K. Baskette, Emory University; Prof. Wilbur Schramm, University of Iowa; and Prof. Mitchell Charnley, University of Minnesota.

WJTN NOW HAS 4 FULLTIME NEWSMEN

Donald Laubenstein, ex-serviceman and recent graduate of Syracuse University, has been added to the local news bureau of WJTN, Jamestown, N. Y., it is announced by Simon Goldman, manager. Addition of Mr. Laubenstein brings the total personnel of the WJTN local news bureau to four fulltime men.

Mr. Laubenstein is a product of the Syracuse University Radio Workshop, with a journalism major.

(Continued on next page)

AUGUST 5, 1946 — 604
“Our listeners want complete local coverage of news and sports and we are going to give them just that,” said Mr. Goldman.

Small Market Stations

AMERICAN BROADCASTING COMPANY VIEWS CO-OP PROGRAM SELLING

American Broadcasting Company has complied with the request of NAB Small Market Stations Division to outline the network’s experiences and views on co-op program sales. (For NBC and Mutual co-op stories, see NAB REPORTS, pp. 470 and 543.) M. B. Grabhorn, ABC manager of station sales, reported keen interest on the subject. Earl Mullin, network’s publicity manager, released the following story.

“In recent weeks and months there has been considerable discussion, both verbally and in publications, concerning “co-operative” programs. One factor, unfortunately, has been overlooked in a greater portion of this discussion—the basic philosophy between this form of programming, and the relationship between co-ops and the general overall picture. To the American Broadcasting Company this deep underlying philosophy is fundamental.

“The twelve co-op programs of the American Broadcasting Company, sponsored throughout the country by about 500 local clients, points up the fundamental advantages of this type of program for the advertiser as well as for the local station.

“For the local client the “co-op basis” of sponsoring radio programs offers a national network program at a cost well within the advertising budget of the individual sponsor. For the local station it affords a means of building up and holding a high rating index, due to the fact that the program is of network calibre.

“ABC offers the local advertiser and station a wide assortment of programs ranging from top flight news shows through variety and programs dealing with the latest in fashions. Available for local sponsorship are ABC’s famous news programs, such as “Headline Edition,” Baukhage, Raymond Swing; Elmer Davis and Martin Agronsky. “Ethel and Albert,” featuring humorous incidents in the lives of a young married couple, and the “Powers Charm School of the Air,” which offers information on charm, style, fashions and beauty combined with light humor, serve as excellent examples of the program range of ABC co-ops.

“Today, ABC spends in excess of $60,000 per month, nearly three quarters of a million dollars a year, to program over 60 quarter hours weekly for its affiliated stations, which in turn may offer to local advertisers at an infinitesimal fraction of this staggering sum.

“Development of ABC co-op programs to this stature grew from the realization back in 1942 that few indeed are the communities that can produce local talent on a par with that offered by the networks, for sale to local advertisers.

“Thus, ABC through its network developed co-operative programs, fulfills the needs of a great majority of local stations, which are unable to afford talent payments commensurate with the outlay of network advertisers, yet are anxious to supply local advertisers with good programs for sponsorship.

“An even more far-reaching result from the standpoint of radio’s overall picture is that the co-op program tends to raise, by its own bootstraps, the general offering of entertainment quality of the average station without financial penalty to either the individual advertiser or local station.

“The rewards to the networks are manifold. Theoretically, at least, the general station index of its affiliates is maintained on a higher level than otherwise practical. Through the station it receives from local advertisers sufficient compensation to cover the added cost of such programming; and it tends to cement closer relations between station and network in a spirit of mutual helpfulness to the advancement of all radio in America.

“That, in our opinion, is fundamental.

“To understand the benefits derived from co-op programming by the local station, individual advertiser, the network and the national advertiser, it is only necessary to briefly examine the program day. Like other networks ABC, through arrangements with its affiliates, allocates certain blocks of time daily to “station option” and “network option.” For the most part the “network option time” is programmed with high calibre and high cost commercial shows with time and talent representing considerable outlay and investment on the part of the advertiser.

“With regard to “station option time” the better that period is programmed by the local affiliates, the higher the station’s rating index will be, ergo, the better the investment for the national advertiser.

“Thus, by siding the local station in programming during the “station option time” period through network-type co-operative programs multiple benefits are derived by all concerned.”

DISTRICT TWO CONDUCTS SURVEY OF SMALL MARKET STATIONS’ EARLY MORNING PROGRAMMING

Early morning programming of large and small stations is being studied by NAB Small Market Stations Division to assist stations in deriving additional revenue from this segment of the broadcast day. It it hoped that by this exchange of ideas stations may enhance their individual schedules.

A survey among small stations has been conducted by Simon Goldman, WJTN, Jamestown, N. Y., NAB Small Market Stations Chairman for District Two, on early morning programming by these stations.

The report reveals that 8 out of 13 stations, or 62%, regard the “musical clock” type of program as the most important for the broadcast period up to 9:00 A.M. Phonograph records and transcriptions constitute the principal part of programming, with one station using a singer and guitarist for live talent. These early morning shows vary in length on each outlet from 15 minutes to 2 hours. An emcee is assigned regularly to each program. One station reports a personality with thirteen years experience in conducting this type of show.

With the exception of the 15-minute program, which has a single sponsor, all of these are “announcement programs” with an average of five spot announcements per half hour. Every type of business is represented

(Continued on next page)
among the sponsors, who have found the programs good mediums of advertising.

One station reported that the largest drug store-cosmetic shop in their area discontinued all newspaper advertising because of the sales success enjoyed as a result of their first day’s advertising on the early morning program.

A special “shout-in club” feature is incorporated into one of the station’s morning shows. Cards are mailed on birthdays and wedding anniversaries. Appropriate salutes are given during the broadcasts.

The District Two study reveals that one station’s early morning program has been on the air for 12 years and has 4 of its original sponsors. Another station has had a morning personality show for only a year.

The singer-and-guitar live talent program is heard from 7:00 to 8:00 A.M., six days weekly, with participating local merchants as sponsors. Program has been on six months.

Two stations use variety programs. One, featuring live musical talent, consists of guitar, harmonica and vocalist. Hill-billy music predominates, with news, farm information, announcements of weddings, anniversaries, etc.

All the programs of the early morning variety proved to be popular and attractive to listeners and sponsors, according to the study.

Public Interest Programming

**AD COUNCIL NETWORK CAMPAIGNS**

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 12-18, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

**Atomic Energy**

Man’s control of atomic energy has created the most serious problem ever to face this nation and the world. The problem of how to prevent the use of scientific knowledge for destructive purposes, and to promote its use for the benefit of mankind, is one that is immediate and personal to every man, woman and child. The overwhelming majority of scientists and experts who developed the atomic bomb agree that: (1) The atomic bomb is primarily a weapon against cities and concentrations of people; (2) Present-day atomic weapons could kill 30 per cent or more of a country’s population and destroy most of its industry in attacks on its major cities over a short period of time. More powerful atomic bombs are possible. (3) There is no effective defense against atomic bombs and none can be expected. (4) No single big secret protects the atomic bomb. An Atomic Energy Commission has been set up in the United Nations to work toward the control of atomic energy in order to insure its use for peaceful purposes only. To this Atomic Energy Commission, the representative of the United States, Mr. Bernard Baruch, has submitted a plan as a basis for beginning a discussion on control measures to be taken. To eliminate atomic 

under international control of the dangerous raw materials, uranium and thorium. The United States plan, therefore, proposes the creation of an International Atomic Development Authority which would assume control (including ownership if necessary) of all atomic energy activities potentially dangerous to world security, actively conduct atomic research, and supervise through license and inspection all atomic activities throughout the world. To such an Authority we would in time disclose any exclusive knowledge of atomic energy in our possession—but we would hold these disclosures for various stages, as various parts of the plan go into successful operation. The building of effective atomic control will involve the cooperative efforts of many nations and peoples. The opinion of the citizens of the nation which developed the atomic bomb is of key importance, whatever method is arrived at for atomic control must be ratified by the people’s representatives in the form of a treaty subject to the approval of a two-thirds vote of the Senate. Unless whatever international policy is arrived at is backed by American public opinion, it will not stand. The people cannot become scientists or nuclear physicists. But every American who makes any pretense of good citizenship can and should inform himself of the proposals made by his government to the U. N. Atomic Energy Commission—and follow every modification or counter-proposal. Then, when the time of decision comes, that decision will be made by a citizenry armed with facts—instead of swayed by emotions or prejudices. (Fact Sheet No. 30.)

**Homes for Veterans**

Veterans feel the pinch of the housing shortage more acutely because they interrupted their lives to go into the Armed Services. It is simply a matter of fair play to help them, in every way possible to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. An estimated 1,300,000 single veterans will get married by December 31, 1946. It appears that more than 2 million veterans’ families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans’ housing situation. These steps will help, but the only real answer to the housing shortage is an extended period of volume construction. Until construction gets rolling, by all means the most important source of housing for veterans consists of vacancies which become available in the existing housing supply. Urge listeners to help ease the housing situation by “staying put” if they possibly can so that a maximum number of veterans can find living places in the existing housing supply; by sharing their homes with veterans’ families if they can possibly do so and listing vacancies and houses for sale at the veterans’ housing referral center, if one exists in their community, so that veterans can get first chance at them. (Fact Sheet No. 4-C.)

**Stay in the Fight Against Famine**

The food producing countries of the world have won the initial round in the fight against mass starvation in Europe and Asia. Millions of tons of grain and flour, thousands of tons of fats and oils, have been shipped to the famine stricken areas of the world, and the people of the United States are credited with making possible an impressive 40% of the total. BUT—This does not mean that hunger and undernourishment among millions of people have been arrested; that continuing, if decreased, demands on our food supply will not be made. It means only that our commitments to date have been fulfilled. Although mass starvation has been prevented, hunger is still acute in many areas overseas. As a result of our shipments of wheat products and fats and oils to famine stricken people abroad, less has become available here at home. There is all we need, if not all we want, if we share with our fellow Americans our wheat products and fats and oils. We can do this by: . Being content to eat one-third less wheat and rice products than usual; one-fourth less fats and oils.

(Continued on next page)
than usual. . . Buying no more than our fair share, even
when it is available. . . Eating more of the plentiful
foods instead. . . Eliminating all food waste and turning
in all used fats. . . Producing and preserving all food
possible through home gardening and canning. (Fact
Sheet No. 20-D.)

Federal Communications
Commission Docket

HEARINGS

The following hearings are scheduled to be heard before
the Commission, Washington, D. C., unless otherwise indi-
cated, during the week beginning Monday, August 5. They

For television facilities.

NEW—The Times-Mirror Co., Los Angeles, Calif.—For tele-
vision facilities.

FCC ACTIONS

DOCKET CASE DECISIONS

The Commission announces a proposed decision (B-265)
looking towards a grant of the application of Richard
George Hughes for a new station in Borger, Texas, to oper-
ate on 1450 kc., 250 watts, unlimited time, subject to ap-
proval by the CAA of proposed antenna system and site
(Docket 7006), and a denial of the application of W. J.
Harpole et al, d/b as Borger Broadcasting Co. (Docket
7005), seeking the same facilities.

A proposed decision is also announced looking towards
the grant of the application of Southwestern Broadcasting
Corp. (B-262) for a new station in Odessa, Texas, to oper-
ate on 1310 kc., 250 watts, unlimited time, subject to the
delay of that application for modification of permit is filed specifying the exact transmitter site and antenna system meeting the requirements of the Com-
mision's Standards (Docket 7008). A mutually exclusive
application of Peruvian Basin Broadcasting Co., Odessa,
Texas, is denied. (Docket 6942)

A decision was adopted making final the grant of the ap-
plication of C. M. Zhu and C. Leslie Gollday, d/b as Mar-
tinsburg Broadcasting Co. (Docket 6769), for a new station
at Martinsburg, W. Va., to operate on 1310 kc., 250 watts,
unlimited time, subject to CAA approval of transmitter site
and waiver of Rules 3.55(a) and 3.49. At the same time
the application of Lewis and Pollock, d/b as Berkeley Broad-
casting Co. (Docket 6770), seeking the same facilities, was
denied without prejudice. (B-240)

The Commission adopted its final decision (B-240) grant-
ing the application of WHB Broadcasting Co. to change
operating facilities of Station WHB, Kansas City, Mo., from
880 kc., 1 KW, daytime, to 710 kc., 5 KW, unlimited time,
using a directional antenna day and night (Docket 6022), and
denied without prejudice the application of Minnesotta
Broadcasting Corp. for change in operating facilities of
Station WTCN, Minneapolis, Minn., from 1280 kc., 1 KW,
night, 5 KW-L.S., unlimited time, to 710 kc., 10 KW, unlimited
time, directional antenna night. (Docket 6859)

A decision was adopted making final the grant of the ap-
plication of C. M. Zhu and C. Leslie Gollday, d/b as Mar-
tinsburg Broadcasting Co. (Docket 6769), for a new station
at Martinsburg, W. Va., to operate on 1310 kc., 250 watts,
unlimited time, subject to CAA approval of transmitter site
and waiver of Rules 3.55(a) and 3.49. At the same time
the application of Lewis and Pollock, d/b as Berkeley Broad-
casting Co. (Docket 6770), seeking the same facilities, was
denied without prejudice. (B-240)

The Commission adopted its final decision (B-240) grant-
ing the application of WHB Broadcasting Co. to change
operating facilities of Station WHB, Kansas City, Mo., from
880 kc., 1 KW, daytime, to 710 kc., 5 KW, unlimited time,
using a directional antenna day and night (Docket 6022), and
denied without prejudice the application of Minnesotta
Broadcasting Corp. for change in operating facilities of
Station WTCN, Minneapolis, Minn., from 1280 kc., 1 KW,
night, 5 KW-L.S., unlimited time, to 710 kc., 10 KW, unlimited
time, directional antenna night. (Docket 6859)

A proposed decision (B-266) was adopted looking toward
the grant of the application of Corpus Christi Broadcasting
Co. for a new station at Corpus Christi, Texas, to operate on
1250 kc., 250 watts, subject to condition that application is filed within 30 days for modifi-
cation of permit specifying an exact antenna system and
transmitter site meeting requirements of the Commission's
standards. At the same time the Commission proposes to
deny applications of Howard W. Davis, d/b as The Walmac
Co. (Docket 6911) and R. F. & W. Broadcasting Co. (Docket
7120), seeking the same facilities.

The Commission announces its proposed decision (B-259)
looking towards a grant of an application of Harold F.
Gross, d/b as The Southwestern Michigan Broadcasting Co.
for a new station in Kalamazoo, Mich., to operate on 1360
kc., with 1 KW, unlimited time, directional antenna night-
time only (Docket 7101), and a grant of application of Mon-
yough Broadcasting Co. (Docket 7110) for a new station in
McKeesport, Pa., on the same frequency, 1 KW, unlimited
time, using a directional antenna during nighttime operation
(Continued on next page)
only. The grants are proposed contingent upon compliance with the Commission's rules and standards, and approval of transmitter site by the CAA.

Mutually exclusive applications of McKeesport Radio Co., McKeesport, Pa. (Docket 6926), and Booth Radio Stations, Inc., Lansing, Mich. (Docket 6927), requesting the same facilities, are denied.

At the same time proposed findings of fact and conclusions (B-255) were also adopted looking towards a grant of a construction permit to The Gardner Broadcasting Co., Gardner, Mass., for a new station at Springfield, Mass., to operate on 1240 kc., with 250 watts power, unlimited time, and denial of the application of Finger Lakes Broadcasting System (Gordon P. Brown, Owner) for the same facilities at Geneva. (Docket 6994)

Denial is proposed of applications of WARC, Inc. (Docket 6604), and Seneca Broadcasting Corp. (Docket 6605), for a new station at Rochester, N. Y. (Continued on next page)

NEW—Cole E. Wylie, Spokane, Wash.—Granted construction permit for new station to operate on 1490 kc., 250 watts, unlimited time. (B1-P-4706)

NEW—Lt. Frank A. Van Wagenen et al, d/b as The Central Broadcasting Co., Provo, Utah.—Granted construction permit for new station to operate on 1530 kc., 250 watts, unlimited time, subject to the condition that the applicant will, within 60 days of date from this action, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Commission's standards, and file an application for the installation of a frequency monitor, when available, meeting the requirements of the Commission's standards. (B4-P-4858)

NEW—Robert F. Neathery, West Plains, Mo.—Granted construction permit for new station to operate on 1450 kc., 250 watts, unlimited time, subject to the condition that applicant will, within 60 days from date of this action, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Commission's standards. (B4-P-4860)

NEW—Intermountain Broadcasting Co., Inc., Artesia, N. M.—Granted construction permit for new station to operate on 1590 kc., 250 watts, unlimited time, subject to the condition that applicant will, within 60 days from date of this action, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Commission's standards. (B4-P-4860)

NEW—Columbia Basin Broadcasters, Moses Lake, Wash.—Granted construction permit for new station to operate on 1450 kc., 250 watts, unlimited time, subject to CAA approval of transmitter site and antenna system, and waiver of Sec. 3.55(b) and 3.60 of the Rules. (B3-P-4839)

NEW—Central Broadcasting Co., a partnership, composed of H. Ross Perkins and J. Eric Williams, Utica, N. Y.—Granted construction permit (Comr. Durr voting "No") for a new station to operate on 1100 kc., 250 watts, daytime only, subject to condition that applicant will, within 60 days from date of grant, file an application for modification of permit specifying a transmitter site and antenna system, and installing approved frequency monitor, when available, meeting the requirements of the standards. (B1-P-4838)

NEW—Lubbock Broadcasting Co., Lubbock, Texas.—Granted construction permit for a new station to operate on 950 kc., 1 KW, daytime only, contingent on CAA approval of site, and adjustment of all reasonable complaints of cross-modulation. (B3-P-4796)

NEW—Stillwater Publishing Co., Stillwater, Okla.—Granted construction permit for a new station to operate on 840 kc., 250 watts, daytime only, subject to the condition that applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. (B3-P-4435)

NEW—The Gardner Broadcasting Co., Gardner, Mass.—Granted construction permit for a new station to operate on 880 kc., 1 KW, daytime only, subject to condition that applicant will, within 60 days from date of grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards and waiver of Secs. 3.55(b) and 3.60 of rules. (B1-P-4776)

NEW—Appalachian Broadcasting Corp., Bristol, Va.—Granted construction permit for a new station to operate on 650 kc., 1 KW, daytime only, subject to condition that the applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. (12-P-4651)

NEW—Bunfox Radio Co., Inc., Bristol, Va.—Granted construction permit for a new station to operate on 860 kc., 1 KW, daytime only, subject to condition that applicant will, within 60 days from date of grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards and waiver of Secs. 3.55(b) and 3.60 of rules. (B2-P-4850)

NEW—Joe Y. Williams, Jr., Chattanooga, Tenn.—Granted construction permit for a new station to operate on 1190 kc., 250 watts, daytime only, subject to condition that applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards. (B3-P-4816)

NEW—Alice Broadcasting Co., Alice, Texas.—Granted construction permit for a new station to operate on 1070 kc., 1 KW, daytime only, subject to condition that applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Standards. (B3-P-4848)

NEW—Forrest Broadcasting Co., Columbia, Miss.—Granted construction permit for a new station to operate on 1500 kc., 250 watts, unlimited time, subject to condition that applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards and waiver of Secs. 3.55(b) and 3.60. (B3-P-4884)

NEW—The Vidalia Broadcasting Co., Vidalia, Ga.—Granted construction permit for new station to operate on 1450 kc., 250 watts, unlimited time, subject to CAA approval of antenna system. (B3-P-4823)

NEW—Belleville Broadcasting Co., Belleville, Ill.—Granted construction permit for a new station to operate on 1090 kc., 250 watts, daytime only, subject to any interference from WDZ if later moves to Decatur, Ill., and subject to condition that applicant will, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting requirements of the Standards, and waiver of Sec. 3.60 of the Rules. (B1-P-4654)

NEW—Civic Broadcasting Corp., Near Anderson, Ind.—Granted construction permit for a new station to operate on 1170 kc., 1 KW, daytime only, contingent on selection of satisfactory transmitter site and filing modification of permit therefor, subject to CAA approval. (B1-P-4752)

NEW—Public Radio Corp., Tulsa, Okla.—Granted construction permit for a new station to operate on 1370 kc., (Continued on next page)

(*) Comr. Durr voting for further inquiry.

MISCELLANEOUS ACTIONS

KROC—Southern Minn. Broadcasting Co., Rochester, Minn.—Granted CP to install a new transmitter (Collins 300-4). (B4-P-5041)

WG—Hampton Roads Broadcasting Corp., Newport News, Va.—Granted CP to install a new transmitter (RCA BTA-250-L). (B3-P-5184)

KXO—Valradio, Inc., El Centro, Cal.—Granted modification of CP, which authorized installation of new transmitter, etc., to move transmitter location from Main St., El Centro to Fourth St., extended approx. 3/4 mile south of El Centro City limits, and extend commencement and completion dates to 60 days after grant and 180 days thereafter. (B5-MP-1933)

WGNI—General Newspapers, Inc., Wilmington, N. C.—Granted modification of CP which authorized a new station, to change type of transmitter to (WE 451-A), and change transmitter and studio locations to; North Carolina State Highway $764, near Wilmington, and 21 E. Princess St., 2nd floor, Wilmington, N. C., respectively, and extend commencement and completion dates to 60 days after grant and 180 days thereafter. (B3-MP-1963)

WPPA—Pottsville Broadcasting Co., Pottsville, Pa.—Granted license to cover CP which authorized a new station to operate on ISBE9 kc., 500 watts, daytime. (B2-L-1966) Also authority to determine operating power by direct measurement. (B2-Z-1710). License is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's rules; conditions. (Action 7-29)

WGCM—WGCM Broadcasting Co., a partnership, Gulfport, Miss.—Granted CP to install a new transmitter (RCA BTA-250-L). (B5-P-1944)

WFAS—Westchester Broadcasting Corp., White Plains, N. Y. Granted CP to install a new transmitter (WE 451-A1) and vertical antenna and change transmitter location to Secor Road, 2.5 miles west of White Plains, Town of Greenburgh, N. Y. (B3-P-1962)

WHPP—Maytag Appliance Corp., Tallahassee, Fla.—Granted modification of CP, which authorized a new station, to change type of transmitter (Gates 250-C) for approval of antenna, and approval of transmitter and studio locations at East Park Ave., Tallahassee, and 200 Block N. Monroe St. (Floridian Hotel), Tallahassee, respectively. (B3-MP-1961)

KOOS—KOOS, Inc., Coos Bay, Ore.—Granted CP to install a new transmitter (RCA BTA-250-L). (B5-P-1962)

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted modification of CP, which authorized increase in power, etc., to change type of transmitter (RCA BTA-5F). (B4-MP-2004)

Miami Broadcasting Co., Miami, Fla.—Granted special temporary authority to operate on Channel #238, 85.5 mc, using 250 watt GE transmitter, with bent dipole antenna on WQAM tower, for a period of 90 days from date of grant.

WNOF—James A. Noc, New Orleans, La.—Denied petition for review of the action of the presiding officer of the motions docket on June 28, scheduling petitioner's application for CP (Docket 6316), and the application of Deep South Broadcasting Co., New Orleans (Docket 7117), for hearing in Washington on July 22, and denying petitioner's petition requesting that the hearing be held in New Orleans, in September, 1946, and affirmed said action of the presiding officer of the motions docket.

WPBB—Paradise Broadcasting Co., Mayaguez, P. R.—Granted modification of CP which authorized a new station, to change transmitter and studio locations from near Christi St., Mayaguez, and Dr. Rasca St. No. 15, to Christi St. and Comercio 24, Mayaguez, respectively. (B-MP-1958)

WLRS—Air-Waves, Inc, Baton Rouge, La.—Granted modification of CP which authorized a new station, to change type of transmitter to (W.E. 451-A1), for change in antenna and approval of studio location at 204 North St, Baton Rouge, and extend commencement and completion dates to 60 days after grant and 180 days thereafter, respectively. (B3-MP-1965).

(Continued on next page)
Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions.

WPIK—Potomac Broadcasting Corp., Alexandria, Va.—Granted modification of CP which authorized increase in power and installation of new transmitter, to change type of transmitter to (Gates BC-15), (B2-MP-2010). Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions.

WSAU—Northern Broadcasting Co., Inc., Wausau, Wis.—Granted construction permit to install a new transmitter (GE BT-29-A), (B4-P-5638).

KQEA—Rio Grande Broadcasting Co., Inc., Albuquerque, N. Mex.—Granted modification of CP which authorized a new station for antenna approval of transmitter and studio locations at Indian School Road, approx. 2 miles NW of Albuquerque, and 520 West Coolidge Ave., Albuquerque, respectively. (B5-MP-1923).

KSO—Murphy Broadcasting Co., Des Moines, Iowa.—Granted license to cover CP for a new relay station to be used with standard station KRLD. (B3-LR-349).

KUCS—Uncle of Southern Cal., Los Angeles, Cal.—Granted modification of CP which authorized a new non-commercial educational broadcast station, for extension of commencement and completion dates to June 21, 1946 and Dec. 21, 1946, respectively, to specify type of transmitter (Nat. 2000) and make changes in antenna system. (B3-MPED-35).

WWBZ—Community Broadcasting Service, Inc., Yonkers, N. Y.—Granted modification of CP which authorized a new station, to change type of transmitter to (Col. 22-16-R) and antenna and studio locations to: Corner of Inner Ave. and Corder St., near Alliance, N. J., and 612-14 Landis Ave., Vineland, respectively, and extend commencement and completion dates to 10 days after grant and 60 days thereafter, respectively. (B1-MP-1952).

KOAL—Eastern Utah Broadcasting Co., Price, Utah.—Granted license to cover CP which authorized increase in frequency to 1230 kc., (B5-L-1960). Also authority to determine operating power by direct measurement. (B5-Z-1765). Licensee is granted a waiver of Secs. 3.30 of the Commission's rules; conditions.

WKAN—Kankakee Daily Journal Co., Kankakee, Ill.—Granted modification of CP, which authorized a new station, to change type of transmitter to (Gates BC-15). Also authority to determine operating power by direct measurement. (B5-MP-1950).

KXOB—KXOB Broadcasting Co., Butte, Mont.—Granted license to cover CP which authorized a new station, change type of transmitter to Gates 250-C, for approval of antenna and transmitter location at Yule Ave. and Studio location at 730 Yule Ave., Butte, Mont. (B5-MP-1970). Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Granted authority to determine operating power by direct measurement of antenna power. (B5-Z-1781).

WDBR—Deep South Radio, Inc., Lake City, Fla.—Granted license to cover CP which authorized a new station to operate on 1310 kc., 250 watts, unlimited time. (B3-L-1963). Also authority to determine operating power by direct measurement. (B3-Z-1790). Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions.

KAMD—Camden Radio, Inc., Camden, Ark.—Granted license to cover CP which authorized a new station to operate on 1450 kc., 250 watts, unlimited time. (B3-L-1981). Also authority to determine operating power by direct measurement. (B5-Z-1982). Licensee is granted a waiver of Secs. 3.55(b) of the Rules; conditions.

KBNE—Boulder City Broadcasting Co., Boulder City, Nev.—Granted license to cover CP which authorized a new station to operate on 1240 kc., 250 watts, unlimited time, (B3-L-1930). Also authority to determine operating power by direct measurement. (B3-Z-1755). Licensee is granted a waiver of Secs. 3.60 of the Rules; conditions.

WMOX—Barney Ives, Jr., Meridian, Miss.—Granted license to cover CP which authorized a new station to operate on 1340 kc., 250 watts, unlimited time, (B3-L-1937). Also authority to determine operating power by direct measurement. (B3-Z-1764). Licensee is granted a waiver of Secs. 3.90 of the Rules; conditions.

KODI—Big Horn Basin Broadcasting Co., Cody, Wyo.—Granted modification of CP which authorized a new station, for approval of antenna, approval of transmitter and studio locations at City Water Works, Cody, and to change corporate name from Big Horn Basin Co. to Absaroka Broadcasting Co. (B5-MP-1967).

KGY—Hilliard Co., Scottsbluff, Neb.—Granted application to install a new transmitter, (B4-P-1924).
WEGO—Wayne M. Nelson, Concord, N. C.—Granted order to install a new transmitter, (B5-P-1832).
KWWB—Walla Walla Broadcasting Co., Walla Walla, Wash. —Granted application for new time and transmitter site near corner of 2nd St. and Cordline St., Walla Walla. The permittee hereunder is granted a waiver of Secs. 3.53(b) and 3.60 of the Commission’s rules; conditions. (B5-P-1965).
KPMC—Pioneer Mercantile Co., Bakersfield, Cal.—WQXR moved from hearing docket (No. 7097); also ordered for filing and that application, as amended, be reconsidered its action of May 16, granting increase of power from 1 to 5 KW, etc., conditionally (B5-P-4353), and made the grant of this application to KFAC unconditionally. (B5-P-4353).
WGO—Wayne M. Nelson, Concord, N. C.—Granted construction permit to change facilities from 1450 kc. to unlimited time, directional transmitter (Raytheon RA-1000), at Fort Wayne, Ind., and make other changes (Docket 7134). (B2-P-4311; Docket 7134), /A.
KFRE—J. E. Rodman, Fresno, Cal.—Adopted order granting application, as amended, to increase changes in transmitter location; engineering conditions. (B2-P-3550).
Bluff City Broadcasting Co., Ltd., Memphis, Tenn., and Kennett Broadcasting Corp., Kennett, Mo.—Ordered on Commissioner’s own motion, that applications of E. R. Ferguson and J. R. Pepper, Ltd., d/b as Bluff City Broadcasting Co., Ltd. for a new station at Memphis, Tenn. (Docket 7700) and of Kennett Broadcasting Corp. for a new station at Kennett, Mo. (Docket 7701) be removed from hearing docket.
KFRE—J. E. Rodman, Fresno, Cal.—Adopted order granting petition for leave to amend application so as to specify frequency 1450 kc. instead of 1060 kc., and make other changes (Docket 7125); accepted amendment; denied petition insofar as it requested consolidation of KFRE application, as amended, with application of Lake Broadcasting Co., Inc., Gary, Ind. (B4-P-4341) for a new station using 1500 kc., 500 watts, night, 1 KW-LS, unlimited time; also to consolidate both with application of El Paso Broadcasting Co., El Paso, Texas (B5-P-1024) for a new station using 1500 kc., 500 watts, night, 1 KW-LS, unlimited time, and to enlarge the issues.
WSSL—Standard Life Broadcasting Co., Jackson, Miss.—Granted construction permit to change facilities from 1450 kc., 500 watts, unlimited time, to 930 kc., 5 KW. (B2-P-4350).
KFRE—J. E. Rodman, Fresno, Cal.—Adopted order granting petition for leave to amend application so as to specify frequency 970 instead of 1060 kc., and make other changes (Docket 7125); accepted amendment; denied petition insofar as it requested consolidation of KFRE application, as amended, with application of KTTC; further ordered, on Commission’s own motion, that application of KFRE be removed from hearing docket.
WGL—Farnsworth Television & Radio Corp., Fort Wayne, Ind., and Homer Rodheaver, Whona Lake, Ind.—Adopted order granting application to change facilities of WGL from 1450 kc., 250 watts, unlimited time, at Fort Wayne, Ind., and make other changes, and (b) grant application of Farnsworth Television and Radio Corp. to change facilities of WGL from 1450 kc., 250 watts, unlimited time at Fort Wayne, to 1550 kc., 1 KW, unlimited time, directional antenna day and night, at Fort Wayne, and to change transmitter site (Docket 6756); denied petition in all other respects. The Commission ordered that the amendments to Rodheaver application be accepted for filing and that application, as amended, be removed from hearing docket (No. 7097); ordered the application of WGL to be removed from hearing docket and granted.
Seaman and Collins, El Paso, Texas—Adopted order granting in part, petition for leave to amend application so as to specify 1310 kc., 250 watts, unlimited time (instead of 1400 kc.); denied petition insofar as it requested removal of application from hearing docket and granted. (Docket 6875).
Syndicate Theatres, Inc., Columbus, Ind., and Universal Broadcasting Co., Inc., Indianapolis, Ind.—Adopted order granting joint petition filed by Syndicate Theatres, Inc., Universal Broadcasting Co., Inc., Inter-national Broadcasting Corp. (Station KWKK, Shreveport, La.), and Greater New York Broadcasting Corp. (Station WNEW, New York City), to re-open the record and designate for further hearing the applications of Syndicate Theatres, Inc., for a new station at Columbus, Ind., and Universal Broadcasting Co., Inc., for a new station at Indianapolis, Ind., so as to permit the receipt of certain engineering data on behalf of Universal Broadcasting Co., Inc., and evidence with respect thereto; such further hearing to be held Sept. 3, 1946. (Dockets 7099 and 7000).
WNGC—Edel Harris (Transferor), Dr. J. A. Gill, et al. (Transferee); Alhambra Broadcasting Co., (Licensee), Elizabeth City, N. C.—Granted consent to acquisition by Dr. J. A. Gill, W. K. Leary, and S. A. Twiford, of control of Alhambra Broadcasting Co. Licensee requested removal of application from hearing docket (B2-P-3959) for a new station, to change type of transmitter to (Westinghouse 6300), night, unlimited time, operating on 1450 kc., 500 watts to 1 KW, etc., conditionally (B5-P-4353), and made the grant of this application to KFAC unconditionally. (B5-P-4353).
KGZ—A. W. Talbot (Assignee), Donald C. Teboar (Assignee), Kallspeil, Ont.—Granted consent to voluntary assignment of license of station KGZ, from A. W. Talbot to Donald C. Teboar. The consideration involves assignor’s yielding up the possession of station KGZ in consideration of the cancellation of the lease agreement and payment of $2,600 by lessee. (B5-P-500).
1 & E. Broadcasting Co., Dayton, Ohio; Paul F. Braden, Middletown, Ohio.—Granted motion of Paul F. Braden to accept his late appearance in re his application for a new station (Docket 7857) and denied petition of 1 & E. Broadcasting Co. to deny the Braden application as in default.
KFAC—Los Angeles Broadcasting Co., Los Angeles, Cal.—The Commission, on its own motion, reconsidered its action of May 16, granting increase of power from 1 to 5 KW, etc., conditionally (B5-P-4353), and made the grant of this application to KFAC unconditionally.
KVOE—the Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted construction permit for a new station, to change frequency from 1400 to 2500 kc., 500 watts to 1 KW, etc., conditionally (B5-P-4353), and made the grant of this application to KFAC unconditionally.
WAGM—Aroostook Broadcasting Corp., Presque Isle, Me.—Granted construction permit to increase power of station KAGM from 10 kw to 50 kw, install a new transmitter and change transmitter location. (B3-P-3571).
KMPC—KMPC, The Station of the Stars, Inc., Los Angeles, Cal.—Granted construction permit to increase power of station KMPC from 10 kw to 50 kw, install a new transmitter and make changes in directional antenna for day and night use (710 kc.), provided that application agrees to investigate and correct legitimate complaints of blaring interference with the proposed 250 mV/m contour and further that after conclusive proof that the array has been satisfactorily adjusted to the 250 mV/m contour and further that after conclusive proof that the array has been satisfactorily adjusted in accordance with the application, the licensee be required to make weekly field intensity checks at designated monitoring points to confirm and/or insure satisfactory maintenance of the required operating characteristics. (B5-P-4665).
WRN—Nied and Stevens, Warren, Ohio; WFMJ—WFMJ Broadcasting Co., Youngstown, Ohio—Adopted order granting application of WRN for construction permit (B2-P-1130; Docket 6960) to change frequency from 1400 kc. to 1140 kc., and increase power from 250 watts to 5 Kw; granted application of WFMJ for construction permit to change frequency from 1450 kc. to 1390 kc., and increase power from 250 watts to 5 Kw.
WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Designated for hearing application for construction permit to increase power from 1 kw to 5 kw, install new transmitter, change transmitter location, and make changes in antenna system on presently assigned frequency 1450 kc., (B5-P-3959), to be consolidated with hearing on application of Southwestern Broadcasting Co. for new station at Clinton, Alabama. (Docket No. 7402).
FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

550 Kilocycles

NEW—James G. Thomas, Lubert W. Barefoot, Lawrence Gooding and Hector H. Clark, d/b as Sampson Broadcasting Co., Clinton, N. C.—Construction permit for a new standard broadcast station to be operated on 350 kc, power of 1 KW and daytime hours of operation. Amended to add Stewart B. Warren to partnership.

600 Kilocycles

KSJB—James Town Broadcasting Co., Inc., Jamestown, N. Dak.—Modification of construction permit (B4-P-3906, as modified, which authorized increase in power, installation of new transmitter and directional antenna and change transmitter and studio locations) for extension of completion date.

690 Kilocycles

NEW—William L. Warner, tr/ as The Sevier Valley Broadcasting Co., Richfield, Utah—Construction permit for a new standard broadcast station to be operated on 610 kc, power of 250 watts night, 1 KW day and unlimited hours of operation. Amended to change frequency from 610 to 690 kc, and hours of operation from unlimited to daytime.

710 Kilocycles

WKRG—Kenneth R. Giddens and T. J. Rester, d/b as Giddens and Rester, Mobile, Ala.—Modification of construction permit (B3-P-4293, which authorized a new standard broadcast station) to change transmitter location and change type of antenna with FM antenna mounted on top.

730 Kilocycles

Correction

According to a correction issued by FCC, the item concerning The Messenger Publishing Company which appeared on p. 355 of current REPORTS should show power of 1 KW instead of 730 kc.

WPIK—Potomac Broadcasting Corp., Alexandria, Va.—Modification of construction permit (B2-P-4888, which authorized increase in power and install new transmitter) to change type of transmitter.

NEW—Ernest E. Forbes, Jr., tr/ as Magic City Broadcasting Co., Birmingham, Ala.—Construction permit for a new standard broadcast station to be operated on 1490 kc, power of 250 watts and unlimited hours of operation. Amended to change frequency from 1490 to 730 kc, power of 250 watts to 1 KW, hours of operation from unlimited to daytime, change type of transmitter and specify studio location.

800 Kilocycles

WMGY—Dixie Broadcasting Co., Montgomery, Ala.—License to cover construction permit (B3-P-3819, as modified) which authorized a new standard broadcast station.

WMGY—Dixie Broadcasting Co., Montgomery, Ala.—Authority to determine operating power by direct measurement of antenna power.

810 Kilocycles

WASI—The Chesapeake Radio Corp., Annapolis, Md.—Modification of construction permit (B1-P-4139, which authorized a new standard broadcast station) for approval of antenna and transmitter and studio locations.

WEDO—Tri City Broadcasting Co., McKeesport, Penna.—Modification of construction permit (B2-P-4472, which authorized a new standard broadcast station) to change type of transmitter.

820 Kilocycles

NEW—South Central Broadcasting Corp., Evansville, Ind. (P. O. 316 Chandler Ave.)—Construction permit for a new standard broadcast station to be operated on 820 kc, power of 250 watts and daytime hours of operation.

NAB DIRECTORS AUTHORIZE NEW STUDY OF STANDARDS OF PRACTICE AND ORIGINAL CODE

The NAB Board of Directors, meeting at Estes Park, Colo. last week, took action on a variety of subjects affecting the broadcasting industry. Full details were unavailable as NAB REPORTS went to press, and complete coverage will be carried in next week's edition. Some of the highlights of the Board's actions are as follows:

- Authorized President Miller to appoint a new subcommittee to study the Standards of Practice as well as the original NAB Code.
- Proposed new section to Article 8 of the By-laws to give it power to originate standards of practice or codes and to adopt measures for observance thereof.
- Endorsed FCC proposed transcription rule 3.407 with request that it be made permanent.
- Approved completion of Employee-Employer Relations Department staff.
- Adopted resolution submitted by Music Advisory Committee for study of blanket and per program music licenses, report to be made before October convention.
- Approved a study of standards for program ratings.
- Approved standard A A A A contract form as proposed by Sales Managers Executive Committee and authorized continuing study.
- Tabled agency recognition bureau project.
- Approved Engineers Executive Committee recommendation for study of universal standards for recordings.
- Urged long-range study of operator classifications, suggesting creation of new class of licensed operators for local stations.
- Authorized continued study of feasibility of national and local awards to networks and stations sans NAB participation.
- Ruled that NAB staff members should not engage in station operation, own

(Continued on page 628)

DENNY TO DISCUSS FCC POLICY ON FM AT ANNUAL CONVENTION OPEN SESSION

The FCC and radio manufacturers as well as the broadcasting industry are represented on the panel for the special session on FM at the NAB convention, it was announced on Tuesday (6).

Charles R. Denny, acting chairman of the Federal Communications Commission, has accepted an invitation to discuss the Commission’s policy concerning FM.

Station promotion and program sources will be discussed by Lester H. Nafzger, general manager of WELD, FM station in Columbus, Ohio, which is recognized as having done an effective promotion job. Mr. Nafzger is also chief engineer of WBNS in Columbus.

W. R. G. Baker will appear as a representative of the Radio Manufacturers Association to discuss the transmitter and receiver situation. Dr. Baker is director of RMA’s Engineering Department and vice-president of the General Electric Company.

T. A. M. Cravan, vice-president in charge of engineering for the Cowles Stations, will cover the subject of FM stations’ technical operations.

Walter J. Damm, chairman of the NAB FM Executive Committee and president of FM Broadcasters, Inc., will preside and answer questions concerning managerial and operational aspects of FM broadcasting. Mr. Damm is also manager of WTMJ-FM in Milwaukee, Wisconsin.

Arrangements for the FM panel are being handled by Robert T. Bartley, director of NAB’s FM Department. This particular portion of the convention will be open to interested parties other than NAB and FMBI members. Those planning to attend are being invited to submit questions in advance to be presented to panel members.

stock in station, or accept fees from station sources.

Referred to Finance Committee proposal to place New York Office in charge of an assistant to the president.

Named Robert C. Coleson assistant to President Miller, with headquarters in Hollywood.

Rejected special $200,000 assessment of membership to cover investment in new NAB headquarters building, but authorized study of dues schedule.

Authorized Secretary-Treasurer Arney to study subscriptions and dues to outside organizations.

Approved report by Freedom of Radio Committee, recommending creation of councils in each district.

Streamlined district meeting procedure to permit joint meetings of contiguous districts.

Adopted proposed amendment to Article 14 of By-laws to permit complete revision of By-laws.

DENNY TO DISCUSS FCC POLICY ON FM AT ANNUAL CONVENTION OPEN SESSION
(Continued from page 627)

The convention will be held in Chicago, October 21 through October 24. The tentative program provides for a general luncheon and the FM panel on the opening day.

Research Department

NEWSPAPER REPRESENTATIVES STUDY ANALYZED
By KENNETH H. BAKER
NAB Director of Research

A rather remarkable piece of literature has appeared recently titled “Daily Newspapers and Radio Chains as National Media.” The brochure is offered by the American Association of Newspaper Representatives, although endorsement by the American Newspaper Publishers Association is also claimed. The brochure is apparently an attempt to state the case for the newspapers as a national medium as contrasted with the radio networks.

Here we are primarily concerned, however, with the fact that the piece may come to the attention of some local stations (we know of at least one who has received it) in support of a claim that newspapers can do as good or a better job than radio in advertising. In order that members may be forewarned of the existence of the document and thus forearmed against its use, we would like to state here and now and quite categorically that the case as presented in the brochure is so full of holes and so lacking in solid proof for the contentions which it makes, that it should not be accepted in whole or in part.

Mention of a few of the soft spots in the presentation perhaps is all that is needed to put any radio sales manager on his guard if and when the brochure is ever cited in support of a prospective account’s claim that the newspapers can do a better job for him.

Early in the piece (page 3) a map is presented with some red and blue dots—the red dots to represent 250 cities with daily newspapers and the blue dots, 230 cities with chain broadcasting outlets. Obviously, the map doesn’t contain this number of dots and there is no explanation of the why of this discrepancy. This would appear to be an unimportant detail except that these 250 cities are used in most of the subsequent comparisons between radio networks and national newspapers, and are supposed, to quote an early contention, to prove that “the two media parallel each other quite consistently throughout the nation.” Dots on a map are usually not important, but when this sort of thing is offered as the basis for the contention that subsequent comparisons are to be made on the assumption that the two media have been equated, the dots then take on more than usual significance. Discrepancies also occurred in the number of outlets given to each network. On one page the four networks are given a total of 472 outlets and on another page the same four networks are said to have 693 outlets. Again, these figures in and of themselves are not important, but they indicated to us a sloppy ap-

(Continued on next page)
network. The argument, of course, is even better with regard to the use of spot radio. If we are going to talk about national newspapers vs. national radio, let us not drag into the argument the use of newspapers to bolster sagging local markets.

(2) Several questions are raised (pages 12 and 13) throughout the report which boil down to whether or not you can compare a Hooperating with a newspaper circulation figure. Every media man knows that such comparisons are not possible and yet this brochure insists, on several occasions, in making these completely illegitimate comparisons. Hooperatings indicate a proportion of people actually listening to a radio program; circulation figures show the number of newspapers sold or delivered to a buyer or subscriber. Circulation figures do not show the number or proportion of people who read a particular advertisement. We must conclude, therefore, that where the authors are comparing a Hooperating (or a CAB rating, for that matter) with circulation figures, they are indulging in a form of mental gymnastics which, while pleasant, is completely unrevealing as far as any basic similarities or differences between radio and newspapers are concerned.

(3) The authors take a national program with a Hooperating of 3.0 in Philadelphia and 6.4 in St. Louis and then show that the advertiser could have been represented by a 500-line or 1000-line advertisement in the newspapers of either of these two cities for 25 to 52 weeks in the year for the cost of covering these two cities with one half-hour of a national network program. Since the authors are attempting to establish newspapers as a superior medium, nationally, it is their responsibility to follow-up this line of argument with proof that, by spending each city's proportion of the network cost, the advertiser could have gained an equal advantage in all 100 to 150 of the cities in which the national network program appeared or could be heard. In addition, it would be necessary to show that those individuals outside of the limits of the circulation of the newspapers, in which a series of advertisements might be run, could also be reached as easily by newspaper copy as by the radio network.

(4) Considerable space is devoted to a listing of the variations in the summer Hooperatings and CAB ratings by network, by city size and by season (September to May and June to August) and these variations in the ratings of several types of programs for all kinds of listeners are compared with (of all things!) the consistency with which women read advertisements for women, such as those for toilet requisites and groceries, and men's reading of advertisements for men, such as those for automotive supplies and alcoholic beverages. This is a fantastic comparison and, so far as we can see, has no legitimate basis at all. We cannot see why or how the overall summer Hooperatings should be expected to be comparable to the readership rating of certain classes of advertisements in newspapers by certain classes of people.

(5) In attempting to obtain a cost per thousand of listeners or readers, CAB (telephone) ratings for the ten most popular programs were projected to total radio homes in the United States and these figures were compared with the readership of the ten advertisements most frequently read by women. In the first place, the radio ratings are not projectable, although they may tell us the size of the telephone-owning audience for a particular program in certain cities. We do not know for sure just how the readership ratings for the various advertisements were obtained but since they came from the "Continuing Studies of Newspaper Reading," we assume that they also are not projectable—even for women—in spite of the fact that only the readership figures for women were used. (We saw in last week's REPORTS, for instance, that the 66% readership rating for the Johnson and Johnson ad was based entirely on a study of the Hagerstown, Md., Daily Mail. The idea of projecting this readership rating to the circulation of the 266 newspapers of the 251 cities compared comes very close to hitting a new low in scientific reasoning.) It follows that comparisons of figures derived from projections of non-projectable figures are meaningless. They cannot be used to show an advantage either for newspapers or for network radio.

(6) The comparisons in gain or loss between those advertisers who put most of their advertising in newspapers and those who put most of it on the air, are completely gratuitous. The second paragraph on page 6 tells why—"Many other factors enter into the sales curve." There is not the slightest evidence offered to substantiate the claim that these other factors "wash out, balance each other" for the comparisons made.

This list of inadequacies in the newspapers' promotion piece could be continued far into the night. This

| Building materials and      | 516       | 540      | 525        | 368       |
| Hardware group              |           |          |            |           |
| Home furnishings group      | 375       | 392      | 362        | 232       |
| Jewelry stores              | 101       | 99       | 89         | 82        |

Non-durable goods stores:

| Apparel group               | 725       | 713      | 814        | 604       |
| Drug stores                 | 205       | 200      | 284        | 245       |
| Eating and drinking places  | 1006      | 1018     | 967        | 923       |
| Food group                  | 1916      | 1978     | 1880       | 1710      |
| Filling stations            | 306       | 312      | 297        | 254       |
| General merchandise group   |           |          |            |           |
| Other retail stores         | 1138      | 1154     | 1193       | 904       |

Sales of retail stores in June are estimated at $7,700,000,000, about the same as in May, but 22 percent above sales in June a year ago. After seasonal adjustment, the June index of sales stood at 238 (1935-39=100), almost unchanged for the third successive month. A decline in food store sales during June, reflecting shortages of meats, fats, bread and canned goods, was the principal factor in holding down overall sales to about the May level. Durable goods stores registered a gain of 60 percent over June a year ago, and non-durable goods stores a gain of 15 percent.

MAY SET PRODUCTION TOTALS 1,128,193

According to the Bureau of the Census, 1,128,193 radios were produced in May—not quite as many as were produced in April, but 10.6 percent higher than the 1941 monthly average. Home radios, except battery sets, were 35 percent over the 1941 average and radio-phonograph combinations were up 45.4 percent.

Although shipments of radios in May (1,016,832) decreased by about 59,000 sets from those shipped in April, the value of the shipments increased by $764,000 to a total of $23,593,303.

LEGAL DEPARTMENT

FCC'S FINAL DECISION DENIES KQW TRANSFER; COMMISSIONERS JETT AND WAKEFIELD DISSENT

In a decision and opinion released Tuesday (6) the FCC, with Commissioners Jett and Wakefield dissenting, denied consent to the sale of station KQW to CBS.

The majority based its decision largely on what was termed the "consistent policy" of the Commission looking toward the decrease rather than the increase of "concentration of control in the hands of network organizations or others."

The majority was of the opinion that there was no occasion to deviate from that policy since Columbia's past and present operations demonstrated its ability to maintain its competitive position without an originating point or an outlet in the San Francisco Bay area, and its earnings record showed that ownership of an additional AM station was "not necessary in order to insure the economic stability of the network."

The opinion thus settled what it called the principal issue, "whether the acquisition of an additional station by Columbia Broadcasting System would result in such a concentration of broadcast facilities as not to be in the public interest," by holding that Columbia's present ownership of stations "already represents such a concentration of control of AM facilities that it should not be extended."

In a lengthy and thorough dissent Commissioner Jett, confining himself strictly to the issues raised in the proceeding, took the position that no rule, regulation or policy of the FCC prevented approval of the sale.

In rebutting the proposition of the majority with respect to the concentration of control, he pointed out that the Commission's Rule 3.106, expressing the policy of the Chain Broadcasting Report, merely forbids control by a network of two stations with substantially the same service area or of a station in an area where the total available facilities are so few or of such unequal desirability that competition would be thereby restrained. This rule would not be violated by the sale in question, he showed, since CBS has no other outlet in the San Francisco Bay area, and there are 11 AM stations operating there. Further, since NBC and ABC each own one of the 11 "the transfer of KQW to CBS would tend to improve the network competitive situation in that area."

Discussing the implication of the majority that Commission policy required a limit on the number of AM stations owned by one network, Commissioner Jett called attention to the fact that neither CBS nor ABC has ever been required to divest itself of a sta-

(Continued on next page)
tion because of any such rule or policy. Rather, Commissioner Jett said, the Commission in its Report on Chain Broadcasting, "recognized the need of network owned stations in 'key' cities including San Francisco," and there stated that it was not deemed advisable "to prohibit a national network from being the licensee of one station in these 'key' cities."

In summing up his dissent Commissioner Jett questioned the propriety of the opinion of the majority, insofar as it was based on a general policy rather than on the merits of the particular case.

"Moreover, in my opinion, the doctrine of free enterprise and competition does not lend itself to a policy which seems to set an arbitrary limit on the ownership of stations. It is my belief that each case should be considered separately upon its merits. It is possible, for example, that common ownership or control of say six stations in a small section of the country may militate against the public interest, while no opposition would be raised to twice that number over widely separated areas of the United States."

Commissioner Wakefield, in his dissent, addressed himself to the question of policy upon which the majority opinion turned. He took the view that there would not be an "unreasonable concentration of control in one organization" as a result of the sale and that the majority opinion "ignores completely such essential factors as the number of other broadcast services available in the San Francisco Bay area, the distant location of other Columbia-owned stations, and the importance of a San Francisco-owned station to Columbia operations as a network."

While admitting that "there may be a need for some limitation on the number of stations owned by a single group" the opinion goes on to state that since the Commission "subscribes to the view that networks are an integral and necessary part of broadcasting" it must recognize the needs of networks. To the extent that there are evils in the network situation they should be met by enforcing new and existing regulations and not by unnecessary restrictions on size.

**Employee-Employer Relations**

**EMPLOYEE-EMPLOYER RELATIONS COMMITTEE MEETS**

Convening today in Washington for its first meeting since activation of the Department shortly after the first of the year, the NAB Employee-Employer Relations Committee, under the chairmanship of John Elmer, WCBM, Baltimore, meets for a two-day session to be devoted to discussion of the work of the Department and labor problems of the industry.

The Committee will be given a detailed report of activities of the Department by Assistant Directors Ivar H. Peterson and Milton J. Kibler. A. D. Willard, Jr., NAB Executive Vice President, will also attend the meeting. Among the items on the agenda are reports on the labor relations information service being rendered to members and the progress being made in the collection and analysis of collective bargaining agreements. A number of current labor problems affecting the industry will be discussed. Projects now under way in the Department as well as future activity are additional topics on the agenda.

In addition to Chairman John Elmer, members of the Committee are: William Fay, WHAM, Rochester; Frank King, WMBR, Jacksonville; Howard Lane, Field Enterprises, Chicago; Harry LePoidevin, WRJN, Racine; John H. MacDonald, NBC, New York; J. O. Maland, WHO, Des Moines; Marshall Pengra, KRNR, Roseburg; Calvin J. Smith, KFAC, Los Angeles; and Frank White, CBS, New York. F. W. Burton, WQAM, Miami; John E. Petzer, WKZO, Kalamazoo; and Clair R. McCollough, WGAL, Lancaster, are NAB Board Liaison members.

**AFM DELAYS FILING LEA ACT BRIEF**

Attorneys for Mr. Petrillo and the American Federation of Musicians, have obtained a 10-day extension of time for filing their briefs in the WAAF case, testing the validity of the Lea Act.

Originally due on August 5, briefs on behalf of Mr. Petrillo are now due August 15. It is not unlikely that the Government will secure an extension of time for filing its reply, thereby postponing the oral argument before Judge Walter J. LaBuy, of the Federal District Court in Chicago, until late September or early October.

**CIO TEXTILE WORKERS UNION WINS STATION ELECTION**

The CIO Textile Workers Union of America last Monday (5) won an NLRB conducted election at Radio Station WBTM, Danville, Virginia, by a vote of 9 to 3. No other union was on the ballot.

All station employees, except executives and supervisors, will be represented by the Textile Workers, the new union entry into the broadcasting field. Normally the Union organizes employees in textile mills; it claims to have a membership of 450,000.
WILLARD TO SPEAK AT OHIO CLINIC NEXT WEEK

A. D. Willard, Jr., NAB executive vice president, will speak at the first Ohio News Clinic next Tuesday (20) at Canton, Ohio. Subject of Mr. Willard’s talk is “Freedom of Radio.”

The one-day meeting will present Ohio radio newsmen as discussion leaders in each of the three business sessions. The agenda includes a morning session which will be devoted to a discussion on the gathering of local news. Mr. Willard will speak at the luncheon. In the afternoon, the two o’clock session will cover editing, rewriting, etc., and the day’s final meeting will be devoted to a discussion on the general weaknesses in radio news coverage and presentation, and techniques in analyzing a news audience.

RADIO NEWSMAN ASKS CHICAGO BAR ASSOCIATION APPROVAL FOR COURTHOUSE BROADCASTING

William E. Ray, news manager of WMAQ—NBC, advocated more widespread radio coverage of Chicago court cases, in a statement made before the Chicago Bar Association last week.

Mr. Ray’s stand was that the radio as a medium of gathering and distributing news should have the same opportunity as the press in access to the news made in the courts. He emphasized that radio is in the unique position of being able “to present the words of people who make the news, as they make it.”

In seeking to break down the present ban on radio broadcasts from Chicago court rooms, Mr. Ray pointed out that radio reports from court rooms, made by recordings, would be handled with dignity and in good taste. As assurance of this he referred to the fact that radio must, under the terms of its license, operate in the public interest. “Our responsibility is, in fact, much more clearly defined than that of a newspaper, and moreover, is defined in the statute to which we owe our existence.”

(For previous story on courtroom broadcasting, see current REPORTS, p. 370.)

EARLY MORNING PROGRAMMING OF KMOX, ST. LOUIS, AND WGN, CHICAGO

NAB has secured the cooperation of two of the nation’s outstanding high-powered stations for a report on their early morning programming as part of the Small Market Stations Divisions continuing study on this subject.

Three types of shows have shown particular success and pulling power during the early morning hours on KMOX, 50,000 watt CBS owned and operated station in St. Louis, Mo. These are: (1) Lee Adams’ “Sunrise Salute,” (6:15 to 7:00) a participating feature, built around a single personality, who discourses on a wide variety of subjects; (2) “The Ted Mangner Show,” (6:00 to 6:15) featuring the KMOX farm director, provides a complete farm service; (3) “Ozark Varieties,” (7:15 to 7:45) features the KMOX National Champion Hill-billies.

C. W. Doebler, Sales Promotion Manager, reports that the format of “Sunrise Salute” is both simple and effective (its personality also conducts “Housewives Protective League,” broadcast daily as an afternoon feature). Mr. Adams talks with ease on everything from the psychology of smoking to the story of silk. He speaks informally, as though he is talking directly to each individual listener. The commercials are presented in the same informal, sincere manner. Of each product, he speaks honestly, humanly, avoiding under and over statement. The policy for the program: “No hokum”—in anything—advertising least of all!”

The station has published a brochure on the “Results of Early Morning Shows on KMOX—The Voice of St. Louis.” It cites the success enjoyed by the programs and results produced for the sponsors.

The early morning schedule of WGN, 50,000 watt MBS affiliate, Chicago, is as follows: 5:30, “WGN Farm Hour,” featuring live and recorded interviews with farm authorities, news, recorded folk music, and weather forecasts; 6:30, “Farm Hour Jamboree,” recorded folk music; 7:00, “Record Reveille,” popular music with human interest comment; 7:15, “News” and “Record Reveille”; 8:00, “Robert F. Hurleigh and the News.”

“WGN Farm Hour,” which opens the station each day except Sunday, is not sponsored, either as a unit or on a participating basis. The chief reason is that the majority of the agricultural colleges in the Middle West are unable, because of school regulations, to permit members of their staffs to take part in a commercial broadcast.

Highlight of the WGN Farm Hour is a daily interview, usually transcribed in advance, with persons prominent in the agricultural field. Most of the time this means with professors, instructors or extension specialists.

Hal Totten, WGN farm director states: “Being a clear channel station, we feel that we must render the fullest possible service over a wide area. To eliminate many of the educational institutions within our area by accepting sponsorship would, we feel, possibly interfere with the completeness of this WGN service. There is a tendency, growing rather rapidly among the agricultural schools, to change this attitude of isolation from cooperating with well-conducted commercial broadcasts. Whether this, in turn, changes our policy in the matter remains to be seen.

“As to the program itself, it is conducted with one thought in mind—service to the farmer. It is directed to the farm population only, with no thought given to urban listeners as far as the programming is concerned. However, it is interesting to note that it holds a wide metropolitan listener audience as well.

“It is our thought that the farmer wants and needs certain information each day. He is interested in improved farm practices, research, and suggestions...

Small Market Stations

(Continued on next page)
at all times. For these reasons, a rather strict schedule is maintained during the hour so that if a farmer, or his wife, is unable to listen conveniently to the complete program, he can learn within a minute or two exactly when certain information will be given—and can thus set aside a specific time to listen during the busy season for essential information.”

During the past fourteen months the WGN farm director has traveled more than 20,000 miles, with engineers and recording equipment, to obtain interviews with authorities at agricultural colleges, farms, fairs, and farm meetings. The engineers made 92 separate microphone set-ups, recorded 364 interviews, involving some 500 persons. WGN offers many bulletins and pamphlets in cooperation with various institutions, and receives several hundred responses monthly.

The daily content of the “WGN Farm Hour” includes: Complete midwestern weather forecast by states, transcribed music, farm news bulletins, meditation (a prayer or reading from the Bible), hymn, world and domestic news (five minutes), check watches and clocks with time signal, analysis of previous day’s livestock, grain and commodity markets, transcribed interview with farm authority and early estimated livestock receipts at mid-western markets.

FCC, GRANTING 5 CP’s, 1 POWER INCREASE, SAYS 1600 KCQUIRES WIDE STATION SEPARATION

In a proposed decision released Friday (9), the FCC tentatively granted five applications for new AM stations to operate on 1600 kc, and one application for an increase in power.

This frequency was designated as a regional channel under NARBA, available for assignment to Class B stations.

The proposed decision was the result of a consolidated hearing of eight applications in widely separated parts of the United States. The principal concern was with the technical phases of operation on this frequency, the highest in the standard broadcast band.

Pointing out that 1600 kc is characterized by “relatively poor” groundwave propagation, but good skywave propagation the FCC concluded that “greater station separation is necessary than is the case with lower frequencies in the standard broadcast band.”

Consequently, the commission chose to license a 5 kw station at Cedar Rapids, Iowa to the exclusion of a 1 kw at Madison, Wisc., and chose to license a 1 kw station at Reidsville, N. C., to the exclusion of a 1 kw station at Charlotte.

In addition, the FCC granted CP’s to applicants for facilities on 1600 kc in Ann Arbor, Mich., Pomona, Cal., Montgomery, Ala., and authorized WWRL, Woodside, L. I., an increase in power from 250 to 5900 watts.
At the clear channel hearing, the application would be granted and the others denied. If it appears that were it an adjacent channel which is a clear channel. Where an application is made because of the peculiar situation with respect to Station KOB. Prior to the effective date of NARBA, KOB operated unlimited time on 770 kc, and no other station was licensed to operate nighttime on the same channel. Under the shift in frequencies necessitated by NARBA no comparable facility was available and Station KOB was assigned to 1030 kc as a class II station. This necessitated reclassification of Station WBZ at Boston, Massachusetts, from I-A status to I-B status. Subsequently, because interference resulted between Station KOB and Station WBZ operating 1030 kc the Commission assigned KOB to 770 kc, issuing a special service authorization, while 1030 kc under the Commission's rules remains a I-B channel even though no other station operates on that frequency nighttime. An anomalous situation, therefore, exists so far as the frequencies 770 kc and 1030 kc are concerned. The Commission is desirous of resolving this situation as soon as possible but cannot do so effectively until after the conclusion of the clear channel hearing.

Accordingly, it is proposed that the KOB application and all other applications for operation on either 770 kc or 1030 kc be put in the pending files, until after a decision in the clear channel hearing. Any application which may be filed in the future for operation on either of these two frequencies will likewise be put in the pending files.

There are some applications pending before the Commission which do not request operation on a clear channel but are mutually exclusive with applications in the pending files for the same day and time or on an adjacent channel which is a clear channel. Where there is such a situation, now or in the future, the Commission will designate for hearing all such mutually exclusive applications and will include an issue as to which, if any, of the applications should be granted. If as a result of the hearing it appears that the application which does not request operation on a clear channel is the one that should be granted, such application will be granted and the others denied. If it appears that were it not for the clear channel issue public interest would best be served by a grant of the application requesting operation on the clear channel, the other applications will be denied, and the application requesting authority to operate on a clear channel will be placed in the pending files until after a decision in the clear channel hearing.

The Virginia State Junior Chamber of Commerce, held in Virginia for its past cooperation and support of the Junior Chamber's public service programs. At the moment, it would seem that radio deserves the lion's share of the credit for securing public cooperation and support.

Mr. Wilson praised radio's contribution to the campaign in a letter to Dorothy Lewis, NAB coordinator of listener activity, concerning the Association of Women's Directors' activities in behalf of food conservation.

The letter, dated August 6, reads as follows:

"Thanks—thanks—thanks for the part which you and your organization played in helping to put over the Famine Emergency Program. The material you sent us will be of real value in assessing the contribution of the radio industry to the program. At the moment, it would seem that radio deserves the lion's share of the credit for securing public cooperation and support."

JAYCEES COMMEND VIRGINIA RADIO STATIONS

Radio stations in Virginia have been commended "for genuine contributions to the advancement of the general welfare" in a resolution adopted by the Virginia State Junior Chamber of Commerce Board of Directors.

A copy of the resolution was sent to NAB President Miller and to the FCC by Robert A. Wilson, vice president of the Virginia organization. Mr. Wilson said the resolution had been sent to the FCC "In view of the recent discussions concerning the public service aspects of the radio broadcasting industry."

The resolution, adopted on July 14 at Danville, Va., reads as follows:

"Be it resolved by the Board of Directors of the Virginia State Junior Chamber of Commerce that this organization expresses its appreciation to the radio broadcasting industry of Virginia for its past cooperation and support of the civic activities of the Virginia State Junior Chamber of Commerce and its affiliated local junior chambers of commerce."

"And further, that it commend these radio stations for genuine contributions to the advancement of the general welfare through their assistance to the Junior Chamber's public service programs."

Mr. Wilson wrote to Judge Miller, under date of August 6, as follows:

"As you know, the Junior Chamber of Commerce is an organization devoted to the advancement of the general welfare through civic service projects carried on by the young men who are its members."

"The Junior Chamber has been very active in Virginia, and in recent years, it has had many occasions to call upon the broadcasting industry for cooperation and support. Almost without exception, these have been forthcoming."

"Accordingly, at a meeting of the Board of Directors of the Virginia State Junior Chamber of Commerce, held in..."
Danville on July 14, the enclosed resolution was adopted. A copy of this resolution has been forwarded to the Federal Communications Commission."

ROUND ROBIN PROGRAMS DRAW NATIONAL ATTENTION TO MINNEAPOLIS STATIONS DURING EPIDEMIC

National recognition in the press has been accorded to Minneapolis radio outlets for their programming during a local polio epidemic.

With thousands of children confined to their homes to keep them away from the danger of infection, broadcasters cooperated in scheduling "Fun At Home", a series of consecutive radio programs dedicated to the shut-ins.

On completion of a program on one station, an announcement was made plugging the competing outlet which would carry on with the next show.

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 19-25, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

What Price Housing?

America's critical housing shortage constitutes one of the most potentially explosive inflationary situations of the reconstruction period. A bold and vigorous program has been developed to whip that shortage. But even under that program the urgent demand for homes will far exceed the number that can be built for months to come. And in addition to the urgent demand by returning veterans and others, there are millions of Americans who would like to buy or remodel if they could. Under these conditions the threat of inflation in housing and building materials is more menacing than in any other section of the economy. Within limits people in urgent need of shelter are tempted to pay almost any price for it. It would be presumptuous for anyone to urge a man not to buy or build when he has the money and his family is without a place to live. However, it is in the interest of the nation as well as the home-seeker that he be told of the dangers involved in buying or building at inflated prices. During the period when the demand for housing is abnormally high and production is low, there are two alternatives open to us—to start a "boom-buy" cycle by frantically bidding up the prices of the limited housing supply, or to put the brakes on housing inflation by postponing buying or building if we do not urgently need a new house and by securing expert advice if we do build or buy. Explain that during the period when the shortage is most acute there is serious danger of a housing inflation that would affect our whole economy. Suggest that families not urgently in need of a home consider waiting until later to buy or build, meanwhile saving and planning for the time when more homes can be built and better values may be available. Strongly urge everyone who finds it necessary to buy or build today to secure expert advice and sound appraisals before doing so. (Fact Sheet No. 7-C)

Home Canning

Since a considerable part of our customary American food supply is going overseas for the relief of hunger-ridden millions, an increased drive is expected. Housewives are urged to help compensate for this scarcity and insure their families' food supply this coming winter by canning, preserving and storing as much of the so-called "alternate foods" as possible. Under the circumstances, waste—either through failure to preserve our surplus garden yield, or doing it improperly—is unpardonable. Housewives therefore should be urged to remember that the following points are of top importance: (1) Can, preserve and store as much as possible from Victory Gardens. Make your garden serve you all year. (2) When markets feature abundant supplies of locally-grown, good quality produce, suitable for home preservation, take advantage of the opportunity to build up food stocks for next winter. (3) Lay in supplies of containers and equipment early to enable manufacturers to gauge demand. (4) Conserve your sugar for canning purposes. Follow the wartime rule of 1 pound of sugar to 4 quarts of finished fruit. (5) Use only safe, tested methods, backed by scientific research. Take no chances on accidents, spoilage, unnecessary loss of food value. Study methods recommended for different foods; get competent advice. Consider freezing, pickling, brining, drying and storing, as well as canning, for different types of produce. (Fact Sheet No. 24-A)

Group Prejudice—A Post War Menace

You are asked to stress the reasons why we cannot afford divisive prejudice in America—(1) Division at home weakens the United States on the international scene—group strife here lowers the prestige of the United States among the nations of the world, hampers our efforts towards world peace, promotes the belief that democracy has failed, encourages aggression in the hope of easy conquests. (2) Division at home hampers production—discrimination against fellow employees or business associates because of race, creed, color, religious origin frequently robs the United States of millions of hours of productive labor and the best skill and abilities of countless workers. In a prejudice-filled America, no one would be secure—in his job, his business, his church, his home. A point to keep in mind is that the problem is especially acute now because of the many real difficulties that confront the American people—such as housing, jobs for servicemen, shortages, strikes, rising costs of living. We must not let ourselves be diverted from serious efforts to overcome these conditions by the "scapegoat" technique that blames them on some racial, religious or national group. Recall that hating an entire group of fellow citizens because of the behavior of individuals violates the American tradition of fair play. We should judge our neighbors by the character of their own lives alone and not on the basis of their race or religion. Racial and religious antagonisms are exploited, as a means for gaining political favor and easy money, by quacks and adventurers whose followers make up the irresponsible "lunatic fringe" of American Life. Show that every individual citizen can help keep America strong by: 1. Isolating and quarantining group antagonism. (If someone runs down a neighbor's race or religion, remind him that this is bad business for America both at home and abroad.) 2. Alertly guarding himself and his family against infection by racial and religious prejudice. (Don't spread prejudice now, any more than you would have spread enemy rumors during the war. Through your own behavior and otherwise, encourage respect in your children for neighbors of different races and religions—remind them that these very differences among Americans have resulted in a variety of contributions that have made our country great and kept her free.) 3. Work for you and you for your country, your business, your trade union, your school—to promote the American principles of racial and religious freedom. (Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning August 12. They are subject to change.

(Continued on next page)
**Monday, August 12**

**Further Hearing**

**Other Participants**

WRUF, Gainesville, Fla. (Intervenor)

**Thursday, August 15**

To be Held in Room 219, Federal Bldg., at Provo, Utah

- NEW—Mid-Utah Broadcasting Co., Provo, Utah—C. P. 1450 kc., 250 watts, unlimited.

**Broadcast**

**Further Hearing**

- WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—C. P. 620 kc., 1 kw, night; 5 kw, day; DA-night and day unlimited.
- WDNC—Durham Radio Corp., Durham, N. C.—C. P. 620 kc., 1 kw, night; 5 kw, day; DA-day and night, unlimited.
- NEW—Rebel Broadcasting Co., Jackson, Miss.—C. P. 620 kc., 1 kw, night; 5 kw, day; unlimited DA-night.
- WROL—Stuart Broadcasting Co., Knoxville, Tenn.—C. P. 620 kc., 5 kw, unlimited, DA-night and day.
- KWPT—Wichita Broadcasters, Wichita Falls, Texas—C. P. 620 kc., 5 kw, night; 5 kw, day; unlimited DA-day.
- NEW—Public Information Corp., Durham, N. C.—C. P. 1490 kc., 250 watts; unlimited.

**FCC ACTIONS**

**DOCKET CASE DECISIONS**

The Commission announces its final Decision (B-235) denying the application of Sherwood B. Brunton, et al, for consent to transfer of control of Pacific Agricultural Foundation, Ltd., licensee of Station K4W, San Jose, California, to Columbus Broadcasting System, Inc. (Docket No. 7013) Commissioners Wakefield and Jett issued separate dissenting opinions.

The Commission announces its Proposed Decision (B-263) looking towards a grant of the application of the Arkansas-Oklahoma Broadcasting Corporation for a construction permit for a new standard broadcast station in Fort Smith, Arkansas (Docket No. 6854) to operate on the frequency 1350 kc., 250 watts, unlimited time, and denial of the application of Donald W. Reynolds seeking the same facilities. (Docket No. 6855)

A Proposed Decision is also announced looking towards the grant of the application of H. C. Winslow for a construction permit for a new standard broadcast station at Menloville, Pennsylvania, to operate on 1490 kc., 250 watts, unlimited time (Docket No. 6890), and a denial of the application of Mendville Tribune Broadcasting Company seeking the same facilities (Docket No. 6898). The grant to Winslow is subject to the condition that the grantee file an application for modification of construction permit within 60 days specifying a transmitter location for approval of the Commission and the Civil Aeronautics Administration. (B-264)

The Commission announces its Proposed Decision (B-272) looking towards the grant of the application of the Capitol Broadcasting Company for a new station at Nashville, Tennessee, to operate on the frequency 1230 kc., 250 watts, unlimited time (Docket No. 6689), and a grant of the application of Murfreeboro Broadcasting Service for a new station at Murfreeboro, Tennessee, to operate on the frequency 1450 kc., 250 watts, unlimited time (Docket No. 6789). The Commission proposes to deny the applications of Nashville Radio Corporation (Docket No. 6108), Tennessee Radio Corporation (Docket No. 6193), Tennessee Broadcasters (Docket No. 6414), and J. W. Birdwell (Docket No. 6649), seeking new stations at Nashville, Tenn.

A Proposed Decision (B-271) is announced looking towards the grant of the application of the Savannah Valley Broadcasting Co. for a new standard broadcast station at Augusta, Georgia, to operate on 1540 kc., 250 watts, unlimited time (Docket No. 6883), and a denial of the applications of the Voice of Augusta, Inc. (Docket No. 6571), The Augusta Chronicle Broadcasting Co. (Docket No. 6872) and the Georgia-Carolina Broadcasting Company (Docket No. 7116), seeking the same facilities.

The Commission announces adoption of a Final Decision (B-256), looking towards the grant of an application of Miners Broadcasting Service for a new station in Pottsville, Pa., to operate on 1450 kc., 250 watts power, unlimited time (Docket 7089), and a grant of the application of the Wyoming Valley Broadcasting Company, for a new station in Wilkes-Barre, Pa., to operate on 1450 kc., 250 watts power, unlimited time (Docket 7165), upon condition that both these applicants file applications for modifications of permit within 60 days, for approval of antenna site.

Hazleton Broadcasting Service, Inc., Hazleton, Pa., is directed to file an application for modification of license of station WAZL to specify the use by it of frequency 1490 kc. in lieu of 1450 kc. now specified in its license. (Docket 7090)

The Commission announces a Proposed Decision (B-255) looking towards the grant of an application of Drohlich Brothers (Docket 6956), for a new station in Flint, Mich., to operate on 1470 kc., 1 kw power, unlimited time, and denial of mutually exclusive application of Booth Radio Stations, Inc. (Docket 6657), for a new station at Grand Rapids, for the same facilities.

The Commission announces its Decision (B-248) making final the grant of the application of the Illinois Valley Broadcasting Company (Docket No. 6710) for a new station in Peoria, Illinois, subject to the condition that applicant file, within 60 days, an appropriate application for modification of construction permit for operation with 5 kw, unlimited time, using a directional antenna, on 1290 kc. At the same time the application of Greater Peoria Broadcasters, Inc., for a new station at Peoria was denied (Docket No. 6709).

A Proposed Decision (B-267) is announced looking toward the grant of the application of Thomas H. Todd et al., d/d as Tuscaloosa Broadcasting Co., for a new station at Tuscaloosa, Ala., to operate on 1450 kc., 250 watts, unlimited time (Docket No. 7177), subject to approval by the Civil Aeronautics Administration of the antenna system and transmitter site, and a denial of the mutually exclusive application of West Alabama Broadcasting Co., a partnership composed of Frank W. Bruce and John E. Reynolds, Sr., seeking the same facilities (Docket No. 7178).

A Proposed Decision (B-269) is announced looking toward the grant of the application of The Radio Engineering Service for a new station at Pine Bluff, Ark., to operate on 1400 kc., 250 watts, unlimited time, subject to the condition that applicant file, within 60 days, an application for modification... (Continued on next page)
tion of construction permit specifying a transmitter site acceptable to the Commission and subject to approval of CAA, and waiver of Section 3.55(b) of the Commission's rules until a modulation monitor acceptable to the Commission and subject to approval of construction permits. (Note: Power given is effective radiated power; antenna height given is height above average terrain).

WTAX, Inc., Springfield, Ill.—Class B: Channel 101.3 me. (No. 267); 3.0 KW; 516 feet. (B4-PH-309)
The Metropolis Co., Jacksonville, Fla.—Class B; Channel: 96.7 me. (No. 241); 34 KW; 550 feet. (B3-PH-356)
The Palladium Pub. Co., Benton Harbor, Mich.—Class B; Channel: 103.9 me. (No. 280); 9.2 KW; 230 feet. (B2-PH-288)
Rome Sentinel Co., Utica, N. Y.—Class B; Channel: 98.3 me. (No. 272); 4.3 KW; 490 feet. (B1-PH-358)
Macomb Pub. Co., Mt. Clemens, Mich.—Class A; Channel: 106.1 me. (No. 286); 310 watts; 153 feet. (B2-PH-394)
Miners Broadcasting Service, Pottsville, Pa.—Class B; Channel: 98.3 me. (No. 252); 5.8 KW; 790 feet. (B2-PH-765)
Kanka Daily Journal Co., Kankanke, Ill.—Class B; Channel: 96.5 me. (No. 253); 600 KW; 275 feet. (B1-PH-717)
Valley Broadcasting Co., San Jose, Calif.—Class B; Channel: 100.5 me. (No. 263); 10 KW; 2530 feet. (B5-PH-742)
The following stations were granted regular construction permits. (Note: Power given is effective radiated power; antenna height given is height above average terrain):

Topkea Broadcasting Assn., Inc., Topeka, Kans.—Class B; Channel 102.5 me. (No. 275); 2.9 KW; 336 feet (B1-PH-394).

WAVE, INC., Louisville, Ky.—Class B; Channel 99.9 me. (No. 200); 33 KW; 490 feet (B2-PH-329).

Huntington Broadcasting Corp., Huntington, W. Va.—Class B; Channel 99.5 me. (No. 258); 3.9 KW; 510 feet (B5-PH-613).

S. W. Warner and E. N. Warner, d/b as Warner Brothers, Oakland, Calif.—Class B; Channel 97.3 me. (No. 247); 10 KW; 680 feet (B5-PH-552).

The Gazette Company near Cedar Rapids, Iowa—Class B; Channel 96.1 me. (No. 241); 11 KW; 550 feet (B4-PH-717).

Civic Broadcasting Corp., Syracuse, N. Y.—Class B; Channel 97.5 me. (No. 234); 1.5 KW; 725 feet (B1-PH-922).

James A. Hardman, North Adams, Mass.—Class B; Channel 101.5 me. (No. 298); 1.0 KW; 645 feet (B3-PH-552).

City of Jacksonvile, Jacksonville, Fla.—Class B; Channel 96.3 me. (No. 242); 159 KW; 364 feet (B3-PH-655).

KONX, Inc., Portland, Ore.—Class B; Channel 94.5 me. (No. 233); 50 KW; 1350 feet (B5-PH-345).

* John F. Easley, Ardmore, Okla.—Class B; Channel 97.1 me. (No. 246); 82 KW; 690 feet (B5-PH-726).

* Radio Sales Corp., Seattle, Wash.—Class B; Channel 93.5 me. (No. 228); 15 KW; 410 feet (B5-PH-394).

The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Class B; Channel 92.3 me. (No. 222); effective radiated power: as determined by the Commission: 615 feet (B4-PH-392)

FM CONDITIONAL GRANTS

Correction

A correction has been issued by the Commission on an item which appeared in last week's REPORTS referring to an *

* Previously authorized construction permits for different engineering details.

**FM APPLICATION DISMISSED**

The Commission granted the petition of Mississippi Valley Broadcasting Co. to dismiss without prejudice the application for a Class B FM station in East St. Louis, Ill. (Docket 7541)

**MODIFIED FM CP'S GRANTED**

Modifications of construction permits heretofore authorized, were granted to the following:

Thomas Patrick, Inc., St. Louis, Mo.—Class B: Channel: 95.3 mc. (No. 237) : 300 KW; 545 feet. (B4-PH-386)
Houston Printing Corp., Houston, Texas—Class B: Channel: 99.7 mc. (No. 250) : 39.2 KW; 497 feet. (B3-PH-126)
The Champaign News-Gazette, Inc., Champaign, Ill.—Class B: Channel: 99.5 mc. (No. 255) : 20 KW; 500 feet. (B4-MPH-130)

**DESIGNATED FOR HEARING—AM**

Corrections

According to a correction issued by the Commission, the item which appeared in last week's REPORTS referring to Tri-Suburban Broadcasting Corp., Silver Spring, Md., should have shown Commissioners Denny and Jett voting to grant Tri-Suburban application.

Also, the item referring to KFDA, which was shown to be designated for hearing, should be voided and the following is substituted:

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas—Denied petition to reconsider, sever and grant its application for CP to change facilities. (B3-P-4553; Docket 7555)

KSOO—Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. Dak.—Designated for hearing application (B4-P-4645) for CP to increase power from 5 KW limited time, to 10 KW, unlimited time, using directional antenna at night.

KGCU—Mandan Radio Association, Mandan, N. Dak.—Designated for hearing application for CP (B4-P-4516) to increase power of KGCU from 250 watts to 1 KW, install new type of transmitter and install directional antenna for night use.

Radio Television Corp., Medford, Ore.—Designated for hearing application for CP (B5-P-4716) for a new station to operate on 1270 kc., 5 KW, unlimited time, directional antenna at night.

Frank Mitchell Farris, Jr., Nashville, Tenn.—Designated for hearing application for CP (B3-P-1013) for a new station to operate on 1110 kc., 1 KW, D4-2, unlimited time.

Springfield Broadcasting Co., Springfield, Mass., and Telecolor Corp., W. Springfield, Mass.—Designated for consolidated hearing application (B2-P-4926) and (B2-P-4946), both requesting a new station on 1490 kc., 250 watts, unlimited time.

Glencs G. Merrill and Andrew H. Kovlan, a partnership, d/b as Mountain State Broadcasting Co., Clarksburg, W. Va.—Designated for hearing application (B2-P-4727) for a new station to operate on 1340 kc., 250 watts, unlimited time.

Crawford County Broadcasting Corp., Meadville, Pa.—Designated for hearing application (B2-P-4569) for a new station to operate on 1490 kc., 250 watts, unlimited time.

Wyanotte Broadcasting Co., Wyanotte, Mich., and Wyanotte News Co., Wyanotte, Mich.—Designated for consolidated hearing application (B2-P-5065) with application (B2-P-5084), both requesting 1310 kc., 250 watts, daytime only.

John G. Colling, et al., d/b as '49er Broadcasting Co., Grass Valley, Cal.—Designated for hearing application (B5-P-5077) for a new station to operate on frequency 1400 kc., 250 watts, unlimited time, in consolidation with applications of Grass Valley-Nevada City Broadcasters, Inc. (Docket 7461) and Town Talk Broadcasting Co. (Docket 7508), applicants for the same facilities in Grass Valley, and ordered that the orders designating these applications for hearing be amended to include application of '49er Broadcasting Co., Southwestern Broadcasting and Television Co., Albuquerque, N. Mex., and Intermountain Broadcasting Co., Inc., Albuquerque, N. Mex.—Designated for consolidated hearing application (B5-P-4837) with application (B5-P-5083), both requesting frequency 1490 kc., 250 watts, unlimited time.

C. Thomas Patten, Oakland, Cal., Radio Station Cruz, Santa Cruz, Cal.—Designated for consolidated hearing application of C. Thomas Patten (B5-P-4876), for a new station to operate on 1000 kc., 10 KW, daytime only, with application of Radio Station Cruz requesting 1000 kc., 1 KW, daytime only.

Wyoming Broadcasting Co., Laramie, Wyo., Snowy Range Broadcasting Co., Denver, Wyo.—Designated for consolidated hearing application (B5-P-4933) of Wyoming Broadcasting Co., with application of Snowy Range Broadcasting Co. (B5-P-5001), both requesting 1340 kc., 250 watts, unlimited time.

Theodore Granik, Washington, D. C.: Chesapeake Broadcasting Co., Inc., Washington, D. C.—Designated for hearing application (B1-P-4559) of Theodore Granik, with application (B1-P-4608) of Chesapeake Broadcasting Co., Inc., both requesting frequency 890 kc., 5 KW, daytime only.

Grant Street Radio Stations, Inc., Pittsburgh, Pa.—Designated for hearing application (B2-P-4908) for a new station to operate on 730 kc., 1 KW, day, with application of Liberty Broadcasting Co. (Docket 7163), requesting the same facilities.

Worth H. Kramer, Robert E. Wasdon and Jack J. Siegal, d/b as Fla. West Coast Broadcasting Co., Tampa, Fla.—Designated for hearing application (B3-P-4780) for a new station to operate on 1390 kc., 1 KW, daytime only.

(Continued on next page)
AM LICENSE RENEWALS

The following stations, which were listed twice under "AM License Renewals" in last week's REPORTS, were first granted temporary extensions by the Commission on July 25; later, on August 1, they were granted renewal of licenses for the period ending August 1, 1949:

KCOK, Tahara, Calif.; KFOR, Lincoln, Neb.; KGY, Olympia, Wash.; KPPC, Pasadena, Calif.; KAVE, Carlisle, N. M.; KDON, Monterey, Calif.; WEQ Harrisburg, Ill.; WIBU, Piquette, Wis.; WOKK, Sunbury, Pa.; WLAG, LaGrange, Ga.; WGMT, Manhewoac, Wis., and WSO, Charlotte, N. C.

The following stations were granted renewal of licenses for the period ending August 1, 1949:

The following stations were granted renewal of licenses for the period ending May 1, 1949:

KGFX, Pierre, S. Dak.; WSVA, Harrisonburg, Va.; WIAO San Juan, P. R.

WKBO—Keystone Broadcasting Corp., Harrisburg, Pa.—Granted renewal of license for the period ending February 1, 1949.

WGAL—WGAL, Inc., Lancaster, Pa.—Granted renewal of license for the period ending August 1, 1948.

WPRP—Station WPRP, Ponce, P. R.—Present license extended (five pro tempore) for the period July 20 to October 1, 1946.

MISCELLANEOUS LICENSE RENEWALS

The following non-commercial educational broadcast stations' licenses were renewed for the period ending May 1, 1947:

WBEZ, Chicago; WBOE, Cleveland; WUIC, Urbana, Ill.; and WNYE, Brooklyn.

MISCELLANEOUS LICENSE EXTENSIONS

The Administrative Board on July 29 extended the following relay broadcast stations upon a temporary basis only, for the period ending October 1, 1946, pending determination upon application for renewal of license:

Licenses for the following relay stations were further extended upon a temporary basis only, pending determination upon applications for renewal, for the period ending October 1, 1946:

MISCELLANEOUS ACTIONS

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Granted license to cover CP which authorized increase in power to 5 KW, day and night, and installation of new transmitter (B2-MP-1929); also authority to determine operating power by direct measurement of antenna power. (B3-Z-1840)

WFAH—Westchester B/cg Corp., White Plains, N. Y.—Granted renewal of license to cover present licensed main transmitter to Scars Ridge, S. 200 yards west of White Plains, Town of Greenburgh, N. Y., to be used as an auxiliary with power of 250 watts. (B1-P-1857)

WFAI—Twin City Broadcasting Co., Inc., Augusta, Maine—Granted renewal of license which authorized a new station, to change type of transmitter to Raytheon RA-270, for approval of antenna and approval of transmitter and studio locations at 160 Bangor Street, Augusta, Me. (B1-MP-1855)

WPVU—Southwest Broadcasting Co., Pullaski, Va.—Granted modification of CP which authorized a new station, to change location of studio to Maple Ave., extended, 1100 E., of Corporate limits of Pullaski, Waiver of Secs. 3,55(b) and 3,60 of rules granted. (B2-MP-1929)

WSIV—Pekin Broadcasting Co., Pekin, Ill.—Granted license to cover construction permit, which authorized a new station to operate on 1140 kc, 250 watts, daytime (B4-L-1854). Also authority to determine operating power by direct measurement. License is granted waiver of Sec. 3,55(b) of Rules; conditions. (B4-Z-1777)

WKTM—Mayfield Broadcasting Co., Inc., Mayfield, Ky.—Granted modification of construction permit which authorized a new station, for approval of antenna and approval of transmitter location on Highway #98, 2 miles west of Mayfield, Ky. (B2-MP-1929)

WCIF—Madisonville B/cg Co., Inc., Madisonville, Ky.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at: On Ky. Route 147, 1 1/2 miles north of Madisonville, Ky. (B1-MP-1949)

KRES—Mo. Valley B/cg Corp., St. Joseph, Mo.—Granted license to cover CP which authorized a new station, to specify studio location at 113 Stc. St. 7th St., St. Joseph, Mo. (B4-L-1896). Also authority to determine operating power by direct measurement. The licensee is granted a waiver of Secs. 3,55(b) and 3,60 of the Rules. (B4-Z-1806)

WNYF—Wyly J. Jones Adv. Agency, Binghamton, N. Y.—Granted modification of license to change name of station to KQX (B1-MP-1229)

KFJJ—Marshall Electric Co., Marshalltown, Iowa—Granted authority to determine operating power by direct measurement. (B4-Z-1810)

KVMV—Radio Sales Corp., Twin Falls, Idaho—Granted construction permit to install a new transmitter (Collins 200-6). Permission is granted waiver of Secs. 3,55(b) and 3,60 of Rules; conditions. (B5-P-1840)

KFOX—Nichels & Warnin, Inc., Long Beach, Calif.—Granted license to cover CP as modified, which authorized installation of a new transmitter. (B5-L-1955)

WVNC—Union City B/cg Co., Inc., Union City, Tenn.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations on Calhoun St., Calhoun St., 4 1/2 miles from city limits on U. S. Highway 51 N.E. of city 1 mile miles from center of Union City business district, and Clymer-Tittsworth Blvd., 303 Main St., Union City, respectively. Permittee is granted a waiver of Secs. 3,55(b) and 3,60 of the Rules; conditions. (B3-MP-1929)

WKRG—Giddens & Rester, Mobile, Ala.—Granted modification of CP which authorized a new station, to change transmission location to Scopes Field, 3/4 mile of Sec. 3, Mobile, and change type of antenna with FM antenna mounted on top. (B3-MP-1929)

(Continued on next page)
WMOI—Moline Broadcasting Co., Moline, Ill.—Granted modification of CP which authorized a new station, for approval of antenna and transmitter and studio locations at 7th St. extension just beyond Moline City limits, So. Moline Twp., Ill., and 1339 5th Ave. (Bergthun Bldg.) Moline, respectively; permittee is granted waiver of Secs. 3.45(b) and 3.90 of the Rules; conditions. (B3-PM-1946)

WGAP—Gateway B/cg Co., Maryville, Tenn.—Granted modification of CP which authorized a new station, for extension of commencement date to 10-6-46 and completion date to 2-6-47. (B3-P-3887)

WASK—WFAM, Inc., Lafayette, Ind.—Granted CP to install a new vertical antenna and change transmitter location to R.R. #5, McCarty Lane, near City of Lafayette. (B4-P-4827)

KXSR—News-Review Co., Roseburg, Ore—Granted CP to install a new transmitter (Gates 2300-L). (B5-P-3042)

WTIC—The Travelers B/cg Service Corp., Hartford, Conn.—Granted CP to install a new transmitter (Westinghouse 50-111-1). (B1-P-5652)

WNBZ—Upstate Broadcasting Corp., Saranac Lake, N. Y.—Denied request for special temporary authority to operate additional time during the months of October and November and six days in December.

KROG—Dorrance Broadcasting Corp. (Assignee), El Paso, Texas—Granted petition insofar as it requests leave to amend application for assignment of license of KROG, so as to substitute amended Exhibit A, and the amendment was accepted. Insofar as petition requested reconsideration and grant of application as amended, it was denied. (B1-AL-520; Docket 7614)

KXO—Airfan Radio Corp. (Transferor), Paul A. Jenkins, Kenneth H. Thornton, Edith J. Jenkins, Imperial Valley Publishing Co., Belle S. Hovey and Harry H. Hovey, for a consideration of $65,000 (plus any increase in the net worth and assets over $15,000) for all outstanding capital stock. (B5-TG-5841)

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted petition for leave to amend its application for a new Class B FM station, so as to show revised information on the stockholders and stock held by them, and change engineering details to request a Class A instead of a Class B station. The amendment was accepted and application as amended removed from hearing docket (Docket No. 7686; B3-PH-853) and granted conditionally, subject to further review and approval of the engineering details of the application.

Mid-Coastal Broadcasting Co., Washington, D. C.—Granted petition to dismiss without prejudice its application for a new FM station (Docket 7390; B1-PH-450). (Action taken 7-30.)

WABB—Albright & Straus, Inc. & Bloomingdale Bros., Inc. (Transferees), El Paso, Texas—Granted petition insofar as it requests leave to amend its application (B5-P-2818) so as to request change in DA pattern, and the amendment was accepted. Insofar as petition requested reconsideration and grant of application as amended, it was denied. (B3-P-488)

WUNZ—Greater New York Broadcasting Corp., New York City—Granted petition for leave to amend its application for CP (Docket 7317) so as to make a slight change in DA pattern, and the amendment was accepted. (B3-P-488)

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted petition for leave to intervene in the hearing on application of KNOB. (Docket 7655)

Alvin E. Nelson, Inc., San Francisco, Calif.—Denied petition requesting leave to amend its application for CP (Docket 7300), so as to incorporate additional engineering data.

WNEW—Greater New York Broadcasting Corp., New York City—Granted petition for leave to amend its application for CP (Docket 7317) so as to make a slight change in DA pattern, and the amendment was accepted. (Docket 7300)

Colonial Broadcasting Co., Providence, R. l.—Granted petition for leave to amend its application for a new FM station (Docket 7208), so as to make minor changes in the engineering information, and the amendment was accepted. (Continued on next page)
Peoria Broadcasting Co., Peoria, Ill.—Granted petition for leave to amend its application for a new FM station (Docket 7317), so as to specify revised information on type of transmitting apparatus, and the amendment was accepted.

Fulton County Broadcasting Corp., Atlanta, Ga.—Granted petition for leave to amend its application for CP (Docket 7536), so as to specify power of 50 KW day, 10 KW night with DA at night, instead of 50 KW with DA day and night, and the amendment was accepted.

WORC—Northside Broadcasting Corp., Louisville, Ky.—Granted petition requesting the Commission to extend time within which it may file an amendment to its application for CP (Docket 6834), and the time was extended to Sept. 1, 1946, within which WORC may file an amendment to its application to specify a revised DA pattern.

Radio Corp., of Cedar Rapids, Cedar Rapids, Iowa.—Granted petition to review the record in the hearing upon its application (Docket 6662 and application of Moline Dispatch Pub. Co. (Docket 6691), for the purpose of receiving information concerning extension of the terms of a stock subscription agreement; said agreement filed with petition was accepted, and the record requested for the sole purpose of permitting said stock agreement to be made a part of the record therein, and without further hearing said agreement is made part of the record in Docket 6698.

KROY—Royal Miller Radio, Sacramento, Calif.—Granted petition for leave to amend its application (Docket 7140), so as to substitute Harmaco, Inc. (KROY) as the applicant in place of Royal Miller Radio (KROY), and the amendment was accepted.

Lake Superior Broadcasting Co., Duluth, Minn.—Ordered that the application (Docket 7300) of Lake Superior B/c-g and Tele. Co., presently scheduled for hearing Sept. 25, 1946, be removed from the hearing docket.

Southern Calif. Broadcasting Co., Pasadena, Calif.—The Commission on its own motion, removed from the hearing docket the application of Southern Calif. Broadcasting Co. (Docket 6747), which was designated for hearing in a consolidated proceeding with application of Orange County Broadcasting Co. (Docket 7337).

B. Loring Schmidt, Salem, Ore.—Denied petition requesting the Commission to enlarge the issues in the proceeding upon its application for CP (Docket 7624) and application in Docket 7373.

Radio Wisc., Inc., Madison, Wis.; Edwin Mead, Rockford, Ill.—The Commission on its own motion continued the hearing on the application of these applicants from July 30, 1946, to August 29, 1946, at Washington, D.C.

Idaho Falls Broadcasting Co., Idaho Falls, Idaho; Eastern Idaho B/c-g and Tele. Co., Idaho Falls, Idaho—The Asher Broadcasting Service, Inc., Quincy, Mass.—Granted petition insofar as it requests leave to amend and remove application for CP from hearing docket: accepted amendment to specify frequency 910 kc. instead of 1490 kc. etc., and the application as amended was removed from hearing docket, which was designated for hearing in a consolidated proceeding with application of Orange County Broadcasting Co. (Docket 7337).

The Asher Broadcasting Service, Inc., Quincy, Mass.—Granted petition insofar as it requests leave to amend and remove application for CP from hearing docket: accepted amendment to specify frequency 910 kc. instead of 1490 kc. etc., and the application as amended was removed from hearing docket, which was designated for hearing in a consolidated proceeding with application of Orange County Broadcasting Co. (Docket 7337).

Utah Valley Broadcasting Co., Provo, Utah; Mid-Utah Broadcasting Co., Provo, Utah—The Commission on its own motion ordered that the consolidated hearing on these two applications be scheduled for August 15, at Provo, Utah.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

680 Kilocycles

WAPA—Jose Ramon Quinones, San Juan, P. R.—Modification of construction permit (B3-P-4189, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter location and change studio location.

NEW—Clearwater Broadcasting Co., Inc., Clearwater, Fla.—Construction permit for a new standard broadcast station to be operated on 660 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 660 to 680 kc.

690 Kilocycles

KYTO—Pacific Frontier Broadcasting Co., Ltd., Honolulu, T. H.—Modification of construction permit (B4-P-4380, which authorized a new standard broadcast station) to change type of transmitter, changes in antenna and change transmitter and studio locations and extend commencement and completion dates.

NEW—CH. Fisher, CO. Fisher, BN. Phillips and James E. Phillips, d/b as Yakima Valley Broadcasting Co., Yakima, Wash.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—T. J. Shriner, Hobart, Okla.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1490 Kilocycles

NEW—Mesilla Valley Broadcasting Co., Inc., Las Cruces, N. M.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1540 Kilocycles

NEW—Texhoma Broadcasting Co., Durant, Okla.—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

French Sardine Company of California—Violation of the brokerage section of the Robinson-Patman Act in connection with the interstate sale of seafood products is charged in a Commission complaint against French Sardine Company of California, 171-181 Fish Harbor Wharf, Terminal Island, Calif. (5436)

STIPULATIONS

Barbo Manufacturing Co.—The Commission has accepted from M. J. Block, trading as Barbo Manufacturing Co., 333 Hudson St., New York, and Allen C. Smith, trading as Allen C. Smith Advertising Co., 20 West 9th St., Kansas City, Mo., a stipulation to cease and desist from misrepresentation in connection with the sale of hair dye preparations known as Barbo Compound and Instant Barbo. (03321)

Vita-Fresh Dog Good Corp.—The Commission has approved a stipulation in which Vita-Fresh Dog Food Corp., 27-10 First St., Astoria, N. Y., and its former president, Reuben Gittelman, agree to discontinue misrepresenting the ingredients and therapeutic properties of Vita-Best Dog Food. The stipulation was also signed by Seymour Blum, trading as Seymour Blum Advertising, 25 West 45th St., New York, who is advertising agent for the corporation. (03322)

COMPLAINT DISMISSED

New Power Publications—A complaint charging Anna Schlossberg, trading as New Power Publications, and Eva Schlossberg, both of 441 Lexington Ave., New York, with misrepresentation in the advertising and sale of books entitled "Lightning Ju-Jitsu" and "Adventures of the Great Crime Busters" has been dismissed by the Federal Trade Commission. (5317)

CEASE AND DESIST ORDERS

No Cease and Desist Orders were issued by the Commission during the past week.
Extensive Agenda Covered at Board Meeting; Program Department Functions Approved

The Board of Directors concluded a three day session at Estes Park, Colorado, late Thursday afternoon (8th) too late to get a complete story in last week's Reports. The agenda was loaded with topics of great interest and concern to all broadcasters and all were discussed fully before final action was taken. All members, except James D. Shouse (7th District), who was kept away on doctor's orders, and J. Leonard Reinsch (At-Large), absent on account of prior commitments, were present.

New Members Admitted

Forty-eight applications for active or associate members were submitted and approved, bringing the total of NAB membership to 1003.

Internal Matters

The matter of internal organization of the Association was discussed at some length. The expansion in membership, as well as activities and services, makes imperative certain readjustments. The recent purchase of a larger building to serve as Washington headquarters was ratified and authorization given to recondition the building to adequately and efficiently accommodate the staff.

Performance Rights

The report and recommendations of the Music Advisory Committee were considered. This Committee is giving thorough consideration to problems incident to music performance rights. Two specific actions relative thereto were taken:

(1) The Committee's recommendation that a study be authorized to determine relative advantages of
(Continued on page 646)

Petrillo Files Brief in WAAF Case
Testing Constitutionality of Lea Act

A lengthy, 145-page brief, vigorously attacking the constitutionality of the Lea Act, was filed in the Chicago Federal District Court on Thursday (15) by attorneys for James C. Petrillo, president of the AFM. Also singled out for special comment were the Congress, for passing an act of "unrestrained vindictiveness," and the members of NAB who, it is claimed, with "virtually unlimited funds and with direct control over and access to the nation's major avenues of public communication, were firmly resolved to smash the Musicians Union."

Tracing the legislative history of the Lea Act, the brief asserts that the statute makes criminal "the ordinary strike and the peaceful picket for lawful purposes," and because it does so, is unconstitutional. Mr. Petrillo concedes that he directed the three WAAF musicians and other union members to refrain from working for the station and placed a picket in front of the station, and also concedes that these acts are made criminal under the Lea Act.

The first argument presented to the Court by the attorneys, Joseph Padway and Henry Kaiser of Washington, Henry A. Friedman of New York and David Katz of Chicago, is that the Lea Bill abridges freedom of speech because it proscribes peaceful picketing, a right guaranteed by the Constitution. In the second place, it is argued that the law imposes involuntary servitude; the claim is made that quitting work is made a crime, in violation of the Thirteenth Amendment.

A major part of the argument is devoted to demonstrating that the words in the law "number of employees needed by such licensee" define a crime "in so vague, uncertain and indefinite terms" as to violate the constitutional guarantee of due (Continued on page 646)
of the laws. Discrimination is found in the fact that advantageous contracts of employment.

through exercise of the right to strike can employees the theory being that only by collective action and justify the objectives said to be prohibited by the law as legitimate activities designed to create, preserve and expand the employment of musicians. Letters from Mr. Petrillo in 1942 to James L. Fly, then FCC Chairman, and Elmer Davis, OWI Director, are reproduced in full.

Attached to the brief is a chart giving 1944 figures collected by the AFM, which are claimed to show that “out of a total of 895 licensed radio stations only 335 employ live musicians.” According to the AFM figures, of a total of 684 network affiliates in 1944, 283 employed 2345 staff musicians and paid them and musicians playing single engagements $10,596,538; 52 of the 211 independent stations in 1944 employed 374 staff musicians and paid a total of $1,315,443 to musicians in that year.

AFL Backs Petrillo

The Executive Council of the AFL, with which the Musicians Union is affiliated, said on Tuesday (13) that it would back up the Musicians Union in its fight to have the Lea Act declared unconstitutional.

blanket and per program license in different types of operation was approved. (2) Stations are urged, in another Board resolution, to give early consideration to the matter of renewal of their BMI Agreements.

District Meetings

A special Board Committee to submit suggestions on improving district meetings reported. The recommendation that meetings be consolidated wherever possible was given Board approval. It was further agreed that no meetings involving the discussion with stations of matters involving industry policy should be scheduled in any district without prior consultation with the District Director involved.

Strategy Committee Reports

The report of the General Strategy Committee authorized by previous Board action to counsel with the president relative to matters of broad industry policy was presented. The following recommendations were approved:

“1. Any action taken by NAB in the field of programming and advertising should be without recognition of any power on the part of the Federal Communications Commission to take such matters into account in exercising its licensing and regulatory powers over broadcasting under the Communications Act.

“2. It is recommended that NAB, through appropriate committees, immediately review its past activities in this field to determine the extent to which such activities were effective and successful and to consider what additional steps are practicable and desirable.

“3. Since doubts have been expressed as to the legality of any concerted action by the industry, it is recommended that the NAB first carefully explore with the Department of Justice and the Federal Communications Commission the limits on the field within which the industry may safely act with respect to the Anti-Trust laws, the independent responsibilities of licensees under the Communications Act, etc.

“4. It is recommended that vigilance be continuously exercised with respect to attempts by the Commission to invade the field of regulation of broadcast programs and advertising and that arrangements be made so that all such attempts may be promptly reported to the NAB, and that the Board hold itself in readiness, in clear cases of actual or threatened usurpations of power, to authorize its representatives to take or participate in, appropriate legal proceedings in opposition thereto.

“5. It is recommended that a special committee, to be appointed by the President, be authorized by the Board of Directors to consider changes in, and additions to, the NAB Standards of Practice.”

Standards for Program Rating Approved

Former President J. H. Ryan (Director-at-Large) reported relative to discussions which he has had with representatives of ANA and AAAA looking to the establishment of standards for program rating. The recommendation that the activity be placed in the hands of the Advertising Research Foundation was presented. The following specific action was taken:

“Recognizing the need for the establishment of standards for program rating, the NAB Board feels...”
that the Advertising Research Foundation is not the agency through which such standards should be brought about. The Board desires to make further studies to determine proper methods and will cooperate with advertisers and agencies to that end.”

Air Awards

William B. Ryan (16th District Director), chairman of a special committee to consider the establishment of a system of national and local awards in the field of radio, submitted a final report. The action taken by the Board limits NAB participation to the appointment of the President of representatives to contact other elements of the industry to determine the feasibility of joint action. No financial commitment of any kind is authorized, and if an organization is created to make such awards, NAB will not be an active participant—but will leave decision as to participation in the hands of each broadcaster. The Committee was discharged with a vote of thanks for its work.

Transcription Rule Approved

After a lengthy discussion, the Board placed the stamp of approval on the recommendation of a special committee headed by Paul W. Morency (1st District Director) and consisting in addition of G. Richard Shafto (Director-at-Large) and John E. Fetzer (8th District Director). The Legal Department of NAB is instructed to prepare a brief and appear at the forthcoming hearings before FCC in support of the following proposed rule:

“Section 3.407 Mechanical Records.—(a) No recorded program consisting of a speech, news events, news commentator, forum, panel discussion, special event, or any recorded program in which the element of time is of special significance and a presentation of which would create, whether intentionally or otherwise, the impression or belief on the part of the radio audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made at the beginning and conclusion of the broadcast that it is a recorded program: Provided, however, any recorded program of one minute duration or less need only be announced at the beginning. The identifying announcement shall accurately describe the type of mechanical record.”

“(b) Any other program consisting of a mechanical record or series of mechanical records need not be announced as provided in subsection (a) but the licensee shall not attempt affirmatively to create the impression that the program being so broadcast consists of live talent.”

Observers at Inter-American Radio Conference

A communication from the organizers of the first Inter-American Radio Congress to attend a meeting to be held in Mexico City beginning September 30 was submitted. The purpose of the Congress is to promote unity and better understanding on the part of all broadcasters in North, South and Central America. The president was authorized, without committing the Association to any position, to appoint observers to attend the session and report to the Board at its next meeting.

Following the meeting, President Justin Miller announced that Campbell Arnoux (4th District Director) and Hugh A. L. Half (WOAI) former 13th District Director, have been appointed and have accepted.

Ownership by Staff Members Denied

The Board denied to members of the NAB staff the right to acquire stock or any other interest in any radio station, construction permit or application therefor, or to accept any fee or emolument for services rendered to any station or group of stations.

The President was empowered to take such steps as he deems proper with respect to the interest or holdings of present staff members.

Western Office Functions

The recommendation of a special committee consisting of William B. Ryan (16th District Director), William B. Smullin (15th District Director), and Lawrence McDowell, KFOX, was submitted and approved. It provides that the Hollywood office shall henceforth act simply as an arm of the Washington office to carry out directives issued by the President. The head of the office, Robert C. Coleson, is designated an Assistant to the President.

Motion Pictures Project

The report of the Advisory Committee, authorized by previous Board action to cooperate with Jerrold P. Brandt, producer of the film "Magic—In The Air", was submitted. The committee is made up as follows: Donald W. Thornburg, vice-president, CBS; Sidney Strotz, vice-president, NBC; Don Searle, vice-president, ABC; Lewis Allen Weiss, vice-president Don Lee-Mutual; Calvin Smith, president, KFAC; and William B. Ryan (16th District Director), KFI.

They reported that Mr. Brandt's plans are not yet sufficiently developed to make it possible for them to determine the extent to which the industry may, at this time, commit itself to support. The Board authorized the Committee to continue its cooperation with the producer and if it feels the project is one which the industry could support, it make a recommendation to be considered by the Board at its October meeting.

Convention Plans

G. Richard Shafto, chairman of the Board Subcommittee on Convention Arrangements, outlined the tentative plans for the program of the forthcoming 24th Annual Convention to be held in Chicago October 20-25th, inclusive. He reported that several of those chosen to participate have accepted and plans are taking more definite form. Other members of this Subcommittee are T. A. M. Craven (Director-at-Large) and Leslie Johnson (9th District Director).

The Board further authorized the Secretary-Treasurer to make a complete study of the facilities and availability of sites for the 1947 and future conventions.

Program Department Developments

The reorganized Program Executive Committee, created by Board action at its May meeting, reported. (Continued on page 649)
RICHARD P. DOHERTY TO DIRECT EMPLOYEE-Employer Relations Department

The appointment of Richard P. Doherty as director of the National Association of Broadcasters' Employee-employer Relations Department was announced today.

Mr. Doherty, who will assume his duties at the NAB early in September, is now executive director of the Industrial Relations Council of Metropolitan Boston. He was instrumental in the organization of the Council in 1941 and has served as its executive director since that time. The Council is a mutual labor-management organization, comprising a wide cross-section of the business executives and the labor union officials of the Greater Boston area.

Mr. Doherty also served during the past year as head of the Economics Department, Boston University College of Business Administration, having joined the faculty in 1927.

During the NRA period, he served as arbitrator and as panel chairman for a variety of labor disputes. Since that time he has been arbitrator, conciliator and mediator of numerous labor-management problems.

The new Director of Employee-Employer Relations at NAB is a member of the National Economic Policy Committee of the United States Chamber of Commerce and served recently as a consultant to President Truman's Labor-Management Conference.

Mr. Doherty was born in Wilton, N. H., May 5, 1905. He received his A.B. degree at Clark University in 1925 and his A.M. at Brown University in 1926.

FCC, INAGURATING NEW PROCESSING SYSTEM, HOPES TO SPEED ACTION ON APPLICATIONS

The FCC announced on Friday (16) a revised procedure for processing the numerous applications for new AM stations and changes in existing AM licenses. Simultaneously, the present status of all present AM applications (approximately 1000) was announced.

A brief summary of the FCC announcement, full copy of which is being sent by the Commission to all applicants, follows:

On receipt of an application at the FCC, it is first referred to the Broadcast License Division for determination of sufficient completeness for the commission to process it. The application will be returned only if major particulars are lacking. Reasons for rejection will be specified with the returned papers.

If the application is accepted, it is given a file number and referred to the Engineering Department for "classification." At this point, cases which involve obvious conflicts are sifted out and designated for hearing. In this connection, the FCC suggests that an applicant who knows his case will present a conflict may have his application put into line for hearing more quickly if he points out the fact when filing.

Applications may be placed in either of two processing lines. If the application presents a simple engineering problem, such as is presented by a 250 watter on a local frequency for daytime only operation, it is put into line #1. If the application is more complex and might, for instance, involve a directional antenna, it is put into processing line #2.

Two reasons are given by the FCC for setting up two lines. First, though highly trained engineers are required to work on either line, a greater degree of training and experience is required for men on line 2. Second, since it takes more time to process a complex case, the separate lines will permit more expeditious handling of applications which do not require weeks of study.

When it is determined that an application falls into a particular line, it is listed in order according to file number, the oldest application being placed at the head of the line. Therefore, the file number will be the determining factor in the order of staff work on the applications. The one exception is that in the case of interference conflicts, where a simultaneous study will save a substantial amount of time, the Broadcast Division is authorized to group together cases in lines 1 and 2.

The Law and Accounting Departments, by keeping track of cases in the processing lines, will be able to write their reports on the same applications that are being studied by the Engineering Department.

If the three departments and the Commission find that an application is satisfactory in all respects, it can be granted without a hearing. If the findings indicate otherwise, the application will be set for hearing.

The Commission reiterates that applicants may waive a hearing, thereby making possible a more prompt decision on applications submitted for consideration. (See current REPORTS, p. 302.)

U. S. TO ATTEND TELECOMMUNICATIONS MEETING

Responding to the Russian invitation that the United States attend a preliminary five-power telecommunications conference in Moscow, the State Department announced last week that it was sending a telegram accepting the invitation.

However, because of the time factor, it was suggested that instead of convening August 28, the date be postponed until after the middle of September.

In addition to Russia and the United States, the United Kingdom, China and France have been invited to participate.

The American delegation will be headed by Francis Cole deWolf, chief of the State Department's telecommunications division.

LOUISVILLE RADIO COUNCIL DOES RADIO PROMOTION JOB

The Louisville (Ky.) Radio Council will conduct a special radio promotion campaign during the Kentucky State Fair, Aug. 25 to 31. At Council headquarters, in the Old Kentucky Log Cabin, posters will be on display, promotional literature will be distributed, and numerous radio personalities will appear.

A committee to handle the campaign, made up from members of one hundred local organizations, is headed by Mrs. F. H. Linkenberg, president of the Louisville Radio Council.
Its recommendations received unanimous Board endorsement. They follow:

"The fundamental responsibilities of the individual licensees are:

"To promote the high standards of Practice promulgated by the NAB in the public interest.

"To recognize the foregoing as our duty and opportunity to keep our American System of Commercial Radio a free and strong means of mass communication.

"To continue to study our record of practices and programs to determine our inadequacies and our strengths.

"To survey the reaction of the listening public to determine our standing and strive for a higher level of appreciation of better programs."

"To this end the Program Executive Committee has been constituted as a means through which broad principles of program policy and standards of practice may be evolved which will serve as a guide to the individual licensee. This statement of principles and standards of practice will not and cannot be static but must, as in the past, be subjected to continuous examination and interpretation in the light of experience."

"To carry out these principles, the new NAB Program Department, with the advice of this Committee and the guidance of the Board of Directors will, among other things, assist individual broadcasters in:

"1. Maintaining standards of practice consistent with the needs and requirements of the community which he serves."

"2. Maintaining competent program management."

"3. Promoting even higher standards of radio news coverage, especially of local news, recognizing the vital force radio has become as a news medium and keeping always in mind that providing accurate, enlightening news is radio’s greatest opportunity for continuous service in the public interest."

"4. Providing for various types of stations and for various conditions of operation, fundamental program organization charts and statistics covering program costs."

"5. Recognizing that radio is the medium upon which vast numbers of rural people depend for weather, news, market and other essential information as well as entertainment and taking steps to review and where necessary to enlarge service to agriculture."

"6. Developing sound policies for religious, educational, civic, cultural and other types of special programs including those involving topics of controversial public character."

"7. Ascertaining facts relative to sources of program material and information relative to performing rights, copyrights, etc."

"8. Establishing methods of making surveys to ascertain listener preferences."

"9. Recognizing the obvious fact that the service rendered to the American people is the only gauge by which the public interest character of a program whether commercial or sustaining, may be judged and, to this end, reconciling commercial operation with public interest programming."

"10. Developing a method whereby a complete and current record of his public interest programming may be maintained."

---

"11. Developing a method for exchanging successful program ideas."

The members of the Committee are: Edgar Bill, WMBD; Stanley Hubbard, KSTP; Merle Jones, WOL; Arthur B. Church, KMBC; I. R. Lounsberry, WGR; Clarence Menser, NBC; Davidson Taylor, CBS; Phillips Carlin, MBS; Henry Slavick, WMC; Glen Snyder, WLS; E. R. Vadeboncoeur, WSYR and Herb Plambeck, WHO.

The President was authorized to immediately proceed to the appointment of a full time director for the department and to otherwise staff it as he deems fit.

**Freedom of Radio Committee**

The following report and recommendation of the recently created Freedom of Radio Committee was received and approved:

"1. It is the function of this Committee to concern itself with freedom of radio in all of its phases within this country, including legislation, government regulation, the availability of material, program and economic control, etc. Likewise the Committee should concern itself in the matter of the free flow of broadcast material, news, information and entertainment, including the right to obtain and disseminate such material into and out of all countries."

"2. The Committee recommends to the Board of Directors that the Association look to cooperation with the press and the motion picture industry and other appropriate groups with respect to freedom of expression as an ultimate objective but should defer action in that direction until we have clearly defined the needs and procedures especially applicable to our own problem."

"3. This Committee should be free to recommend to the Board appropriate action wherever necessary to establish or insure freedom of radio even though there may be a resulting overlapping with the work of other committees of the Association."

"4. In order to expedite the dissemination of material originating in this committee, we recommend the creation of a council in each district to be composed of a representative of each state to be selected by the NAB member stations within each state."

"5. The Committee recommends that the Board authorize it to prepare a statement of principles concerning freedom of radio to be submitted to the Board for approval."

(Continued on next page)
The members of this committee are:
Justin Miller, Chairman; Eugene Carr, WPAY; Henry P. Johnston, WSGN; Harold Hough, WBAP; James W. Woodruff, WRBL; Niles Trammell, NBC; Frank Stanton, CBS; Edgar Kobak, MBS; and Mark Woods, ABC.

Standards of Engineering Practice

The Engineering Executive Committee's report embodied a request that NAB be authorized to appear before the FCC in connection with hearings respecting Standards of Good Engineering Practice with the proviso that no participation will be had with respect to those phases of the hearing dealing with matters of a controversial nature as between classes of stations.

This recommendation was approved.

The further recommendation that the Committee be authorized, through a small sub-committee, to determine possible additions to the Recording Standards and their extension to other countries was likewise given the green light.

By-Laws to Be Changed

J. Harold Ryan, chairman of the Board By-Laws Revision Committee, then presented the following report:

"Your Committee on By-Laws has given considerable thought to the broad underlying problems of the By-Laws and the corporate Charter of the Association. We feel that many basic changes are necessary in both documents. The recent tremendous increase in membership, as well as the developing growth of the industry and its complicated evolutions make advisable, in our opinion, a complete rewriting of these guides to the Association's operations. We hope to persuade the Board to our viewpoint as to the best way in which to handle the solution of these problems.

"All of us are jealous of maintaining the democratic processes by which the affairs of the Association are governed. The recent increases in membership make it more than ever necessary that democratic procedure be kept and strengthened in every possible way. At present the only way in which our By-Laws and Charter can be amended or revised is by vote of the membership in annual meeting. We are deeply concerned at the small attendance of qualified members at the sessions at which such important matters as changes in these basic and fundamental documents are presented for action. The result in the past has been that changes in the By-Laws have been perfunctorily voted upon by a small minority. We desire to perfect a method by which such matters can be decided by a substantial majority, after considered deliberation.

"We are not unmindful that the Board has given this committee a mandate to suggest changes in at least two important matters—network membership and election of directors-at-large—and has expressed interest in certain alterations in district boundaries. We feel, however, that important as these matters are, they are secondary to the question of method by which amendments and revisions are to be voted on, and it is our considered opinion that the change in such method that we are now proposing should first be passed upon by the Board, and submitted to the membership for approval at the October meeting, and then the other changes in By-Laws and Charter that are anticipated can be submitted for action under the new procedure which we are sure will result in greatly increased interest and participation by our membership.

"We are consequently at this time submitting for your consideration only two proposals, which would change the method of passing upon such proposed amendments and revisions from the present action by membership at a session of the annual meeting to a plan of referendum by mail. There are two proposals necessary because the one alters the existing plan for action on proposed amendments and revisions to the By-Laws and Charter, while the other provides the machinery for action on the Standards of Practice, which is not covered by our present By-Laws. In the latter case, because the Code was first adopted by action of the membership itself, it has been assumed that any changes in the Code should receive the approval of the membership. This proposal, therefore, formalizes what has been practice.

"Your committee is firmly of the opinion that favorable action by the Board at this time on these two proposals, if approved by membership action at the October meeting, will preserve that democratic intent which is so necessary in an association of this nature. Further desirable changes can then be effected through the machinery herein set up."

The two proposals will be published officially in an edition of the REPORTS so that all members may study them prior to the Convention at which they will be voted upon.

Rule 91-D Considered

Acting upon the request of William B. Smullin (15th District Director), and Harry Spence (17th District Director), the Board gave assent to the suggestion of the Engineering Executive Committee that the NAB Engineering Department make every effort to secure a relaxation of FCC 91-D, easing the operator requirements.

Standard Spot Contract Approved

The Standard NAB-AAAA Contract covering spot broadcasting was considered on the basis of a report submitted by the Sales Managers' Executive Committee. The contract, as submitted, was approved and the Director of Broadcast Advertising instructed to prepare immediately mats to be sent to all stations for their possible use. The suggestion is made that the stations submit the contract to their own lawyer to determine if the provisions fit the conditions in their stations.

Agency Recognition Loses

A recommendation of the Sales Managers' Executive Committee's sub-committee calling for consideration of the establishment of an agency recognition bureau was tabled. The feeling was voiced that no such agency is needed at the national level and stations are at liberty to establish such agencies at local levels should they deem it practicable and needed.

Standards of Advertising Practice

President Justin Miller outlined the conferences he has had with ANA and AAAA representatives looking (Continued on next page)
to the establishment of standards of practice by the joint action of advertisers, agencies and broadcasters. He reported progress and was specifically authorized to pursue discussion of the subject, and if he felt it advisable, to create a committee to cooperate on the project.

EERD Discussion

Leslie Johnson (9th District Director) initiated a discussion of the policy and service of the NAB Employee-Employer Relations Department. He stated that some complaint has been made relative to the lack of specific helpful service to broadcasters. It was agreed that the President shall proceed with the utmost dispatch in fully staffing the Department and to seeing that it renders the needed service in this important field.

Compilation of FCC Rules

The Board instructed the Legal Department to proceed at once to compiling and indexing the Rules and Regulations of the FCC. They are to be printed in looseleaf form and sent to all members. From time to time as changes and amendments occur, the Legal Department is to issue supplements or replacements so that they may be at all times current.

Juvenile Delinquency Problem

A lengthy discussion of the part which radio broadcasting may play in the movement to curb juvenile delinquency was had. President Miller reported that he has—on the invitation of U. S. Attorney General Tom Clark—accepted chairmanship of the radio committee on juvenile delinquency. The Board also called the attention of station management to the provision of the Code. The resolution reads:

“The NAB Board taking cognizance of the growing problem of juvenile delinquency and the concern and activities of law enforcement agencies and civic organizations with reference thereto, emphasizes the need for careful attention on the part of all broadcasters to the long-established policy written in the NAB code requiring the closest supervision of broadcasters in selection and control of material, characterization and plot and urges wholehearted cooperation with all interested agencies and organizations in curbing juvenile delinquency, and further urges its President in connection with his membership on the Attorney General’s committee for juvenile delinquency to pledge to this cause the utmost support and cooperation of the broadcasting industry.”

State Associations

A report submitted by the Executive Vice-President shows that state associations of broadcasters now exist in a number of states. The encouragement of such organizations is endorsed and the NAB staff is instructed to encourage and assist further organization by preparing suggested by-laws. Whenever requested, direct assistance is to be rendered in organizing and furthering such associations.

Next Board Meeting

The Board will hold its next meeting just prior to the Annual Convention—on Monday—October 20th, at the Palmer House, Chicago.
**Employee-Employer Relations**

EER COMMITTEE MEETS, STUDIES UNION CONTRACTS; LABOR DATA TO BE ANALYZED FOR MEMBERSHIP

NAB's Employee-Employer Relations Department now has current information from approximately 750 radio stations showing whether or not they have union contracts, it reported to the EER Committee meeting in Washington last Monday (12).

Detailed analyses and summaries of the contract data from more than 390 stations, identifying the stations only as to power and city size, will be made available to NAB members. The committee expressed the desire that as much of the information as possible be distributed prior to the annual convention in October.

The EER Committee and the Department expressed gratification for the splendid cooperation of the membership in responding to the requests for copies of collective bargaining agreements and information as to contractual relations with unions.

At the meeting, NAB reported on its labor relations activities and discussed several industry labor problems.

Plans were made for distribution at an early date of aids in union contract negotiation, including analyses of standard labor proposals and suggestions for alternative proposals which may be made by industry.

The department reported to the committee that rule 91-D of the Federal Communications Commission, which requires that station transmitters be manned at all times by engineers holding first-class licenses, may hamper the on-the-job training program for veterans now being conducted by some stations. The fear was expressed, too, that some stations may not be able to comply with the rule because of the unavailability of qualified personnel.

The efforts of the International Brotherhood of Electrical Workers to persuade stations in certain areas to use only transcriptions bearing an IBEW label were discussed by the committee. Instructions were given to the NAB staff to keep itself and the membership informed concerning these developments.

The committee accepted a recommendation of the department that a study be made of group bargaining as it has been used by stations in various localities throughout the country.

Looking toward the 1947 district meetings, the group was unanimously of the opinion that a representative of the NAB Employee-Employer Relations Department and at least one committee member should attend each of these area sessions.

Those present were: Chairman John Elmer, WCBM, Baltimore; Board Liaison Member F. W. Bolton, WQAM, Miami; William Fay, WHAM, Rochester; Frank King, WMBR, Jacksonville; Howard Lane, WEAM, Atlanta; Harry R. LePoidevin, WRJN, Racine; Calvin J. Smith, KFAC, Los Angeles; Frank K. White, CBS, New York.

**Legal Department**

WWDC, AFTER STATING THAT AM PROGRAM POLICY WILL BE CHANGED, GRANTED FM PERMIT

In a final decision released last week, the FCC granted CP's for all 9 of the FM facilities now available in Washington. Two additional frequencies were withheld for future assignment under the reservation rule announced July 18 (Current Reports, p. 559). Of the original 11 applications, five were from stations now operating AM outlets in Washington. All of these were granted.

The final decision, with one significant difference, followed the proposed decision of June 6, 1946. That decision contemplated the grant of 8 applications and the denial of 3, including the request of Capital Broadcasting Company, licensee of WWDC. It was there proposed to deny facilities to WWDC on the grounds that (1) the legality of its telephone give-away program, Captain Cash, was doubtful; (2) the station broadcast complete race results daily; and (3) the station broadcast a three-hour evening participating program supported by spot announcements.

In reversing its stand on WWDC in the final decision, the FCC took notice of the fact that WWDC was willing to discontinue its Captain Cash program "if the Commission or a recognized court held such programs to be in violation of Section 316 of the Communications Act," which prohibits the broadcast of lotteries; that under new station policy horse racing information was confined to the names of the winners, without mention of odds, track conditions, etc., and was not aired until at least an hour after the race was run; and that, effective in September, evening time would be sold only in 15 minute periods.

The CPs granted are shown under FCC Actions.

**Small Market Stations**

WISCONSIN NETWORK ATTRACTS NATIONAL AND REGIONAL SPONSORS TO SMALL STATIONS

The Wisconsin Network, comprising 8 small market stations serving the Badger state, has found that an effective method for selling national advertisers is to contact the distributors. Don C. Wirth, managing director of the network, points out that his sales organization presents to prospective clients a sound program, which includes all types of promotion and advertising. Once the distributors are sold on a campaign it is fairly easy to sell the companies.

(Continued on next page)
NAB Small Market Stations Division's continuing study of group selling by small outlets reveals that the Wisconsin Network carries three hours of commercial programs weekly. However, their greatest dollar volume is derived from national spot announcement business.

This group of stations has found that because of the state's diversification in industry and agriculture, all the business they could handle could easily come from Wisconsin's manufacturers and other potential advertisers. Therefore, the regional network is vigorously pursuing all avenues in the state for the sale of station time.

Many success stories have developed from the advertising done by firms located in Wisconsin. The Tornado Mutual Insurance Company has increased its business 175% since it started using the group of stations some two years ago.

Plankinton Packing Company of Milwaukee started as the network's first advertiser back in 1941. They are currently sponsoring a five minute news period Monday through Saturday. The packing firm's sausage sales were in 12th place in the state at the time it started using the group of small stations. Following a season of sponsoring broadcasts of the University of Wisconsin football games, the packing company president, in an address before the Wisconsin Network's stockholders, reported that within a period of six to eight weeks his sausage sales had jumped to first place in the state. He attributed this success to his advertising on the network. The packing firm has been a continuous client despite the meat shortage.

The network has had considerable success in the sale of radio to the Wisconsin Bankers Association. They sold the bankers a campaign of one spot announcement daily, Monday through Saturday, which included 23 radio stations. As a result of a six months spot campaign, the bankers have been sold on the value of radio advertising. Copy stressed: "For every financial service, see your bank." Stations throughout the state are now reporting to be carrying regular financial advertising from the local banks.

The Wisconsin Network believes in the state and therefore sees a greater future in the prospective business from firms within its borders. There are 8 basic stations connected by leased lines. "Associate" stations are added for special occasions. The basic stations are: WHBY, Appleton; KFIZ, Fond du Lac; WCLO, Janesville; WIBU, Poyntette-Madison; WRJN, Racine; WHBL, Sheboygan; WSAU, Wausau; WFHR, Wisconsin Rapids. Five of the stations are affiliated with Mutual, two with ABC and one with CBS.

**Public Interest Programming**

**AD COUNCIL NETWORK CAMPAIGNS**

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 26-Septem-

**Atomic Energy**

Man's control of atomic energy has created the most serious problem ever to face this nation and the world. The problem of how to prevent the use of scientific knowledge for destructive purposes, and to promote its use for the benefit of mankind, is one that is immediate and personal to every man, woman and child. The overwhelming majority of scientists and experts who developed the atomic bomb agree that: (1) The atomic bomb is primarily a weapon against cities and concentrations of people. (2) Present-day atomic weapons can kill 50 per cent or more of a country's population and destroy most of its industry in attacks on its major cities over a short period of time. More powerful atomic bombs are possible. (3) There is no effective defense against atomic bombs and none can be expected. (4) No single big secret protects the atomic bomb. An Atomic Energy Commission has been set up in the United Nations to work toward the control of atomic energy in order to insure its use for peaceful purposes, and to prevent its use for military purposes only. To this Atomic Energy Commission, the representative of the United States, Mr. Bernard Baruch, has submitted a plan as a basis for beginning a discussion on control measures to be taken. To eliminate atomic weapons, the United States plan must maintain all development and use of atomic energy must be controlled, starting with the placing under international control of the dangerous raw materials, uranium and thorium. The United States plan, therefore, proposes the creation of an International Atomic Development Authority which would assume control (including ownership if necessary) of all atomic energy activities potentially dangerous to world security, actively conduct atomic research, and supervise through license and inspection all atomic activities throughout the world. To such an Authority would be Economic Control (including ownership of atomic energy in our possession—but we would make these disclosures in a series of stages, as various parts of the plan go into successful operation. The building of effective atomic control will involve the cooperative efforts of many nations and peoples. The opinion of the citizens of the nation which developed the atomic bomb is of key importance. Ultimately, whatever method is arrived at for atomic control must be ratified by the people's representatives in the form of a treaty subject to the approval of a two-thirds vote of the Senate. Unless whatever international policy is backed by American public opinion, it will not stand. The people cannot become scientists or nuclear physicists. But every American who makes any pretense of good citizenship can and should inform himself of the proposals made by his government to maintain the United States Atomic Energy Commission, and follow every modification or counter-proposal. Then, when the time of decision comes, that decision will be made by a citizenry armed with facts—instead of swayed by emotions or prejudices. (Fact Sheet No. 30)

**Help Prevent Forest Fires**

A tremendous amount of this nation's timber, instead of going up in sorely needed houses, is going up in smoke. The pulp potential from that timber is being reduced to ashes instead of newspaper and rayon. Much of the soil in which that timber flourished lies blackened and barren, inviting erosion and floods. Landscapes are disfigured and recreational areas turned into expanses of charred stumps. And burned forests mean fewer jobs in the building trades, sawmills, and factories. The nation's limited supply of timber is constantly being reduced by forest fires. Of all of which are man-made and therefore preventable. The forthcoming Labor Day weekend will find unprecedented numbers of vacationers living in or traveling through wooded areas. Every motorist, hiker, camper, fisherman and picnicker is potentially guilty of starting a forest fire through carelessness or thoughtlessness. Everyone, therefore should memorize and observe—particularly (Continued on next page)
over Labor Day weekend—these four rules of forest fire prevention: 1. Crush out cigarettes, cigar and pipe ashes.
2. Break matches in two after using.
3. Don't throw cigarettes, matches, or pipe ashes from your car.
4. Drawn all camp fires; then stir and drown again.

(Fact Sheet No. 15-A)

**Safety on the Highway**

The National Safety Council is working hard to make the public aware of the mass murder taking place on U. S. highways. Your cooperation is urgently needed to make everyone, woman and child in the nation accident-conscious. The difficulty is that people as a whole usually think horrible accidents always happen to somebody else. It simply doesn't occur to us that we may be killed dashing out to lunch tomorrow. Yet it could easily happen . . . for it's the careless little chances we all take every day that are causing the big accident fatalities . . . the purpose of the present campaign is to make 140 million Americans vividly aware of the little careless chances we've been taking . . . and to make us cut them out. Your programs can help put the brakes on America's rising traffic death toll. You can save lives this year by getting these points across to your listeners: (1) Make each listener realize accidents don't always happen to somebody else. Make him realize HE is a potential accident victim. (2) Point out to the listener as specifically as time will allow the little, thoughtless chances he may be taking today . . . this week. Jaywalking . . . trying to beat the light at intersections when it's turning red . . . speeding when the law isn't looking . . . driving so fast at night he can't stop within his headlight vision . . . driving when he's had a few drinks . . . neglecting repairs on his car . . . ignoring signals at railroad crossings. (3) Persuade him that never again can he afford to take a chance with injury or death. He may be next! (4) Your aim is to make each listener decide right then and there never again to take even a "little" chance with injury or death. Since this allocation falls in the week immediately preceding Labor Day, please remind listeners that the need for safety on the highway will be greater than ever during the Labor Day weekend when traffic will be abnormally heavy. (Fact Sheet No. 15-A)

**Federal Communications Commission Docket**

**HEARINGS**

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, August 19. They are subject to change.

**Wednesday, August 21**

**Further Hearings**

NEW—The Wren Broadcasting Co., Lawrence, Kans.—C. P. 1250 kc., 5 KW night, 5 KW day, S-KFKU.
NEW—Midwest Broadcasting Co., Milwaukee, Wisc.—C. P. 1250 kc., 5 KW unlimited, DA-day & night.

**Thursday, August 22**

WCMI—The Ashland Broadcasting Co., Ashland, Ky.—C. P. 1310 kc., 250 watts, unlimited.

**DOCKET CASE DECISIONS—AM**

The Commission announces its proposed Decision (B-268) looking towards the grant of the application of the Atlantic Shores Broadcasting, Ltd., for a construction permit for a new station at Coral Gables, Fla., to operate on 1390 kc., 250 watts, unlimited time (Docket No. 7133), and a denial of the applications of Southern Media Corporation seeking the same facilities at Coral Gables (Docket No. 6341), and of Miami Beach Publishing Co., seeking the same facilities at Miami Beach, Fla. (Docket No. 7132).

The proposed grant to Atlantic Shores Broadcasting, Ltd., is subject to the filing within 60 days of an application for modification of construction permit for approval of transmitter site and antenna system.

**DOCKET CASE DECISIONS—FM**

The Commission announces its Decision granting the following applications for FM broadcast stations in Washington, D. C.: Commercial Radio Equipment Co., 101.3 mc. (No. 267); 20 KW: 500 feet.

Cowles Broadcasting Co., 100.5 mc. (No. 263); 20 KW; 350 feet: subject to CAA approval of height and location of antenna structure, and subject to no adverse effects on radiation pattern of standard broadcast station WOL.

National Broadcasting Co., 94.5 mc. (No. 233); 20 KW; 490 feet: subject to condition that permittee shall satisfy legitimate complaints of blanketing.

Metropolitan Broadcasting Co., 101.7 mc. (No. 269); 20 KW; 500 feet.

Potomac Broadcasting Cooperative, Inc., 93.3 mc. (No. 227); 20 KW; 495 feet; subject to filing of application specifying new transmitter site which meets CAA approval, and for approval of technical features of proposed installation.

Evening Star Broadcasting Co., 94.1 mc. (No. 231); 20 KW; 500 feet; subject to condition that permittee shall satisfy legitimate complaints of blanketing.

WINX Broadcasting Co., 92.9 mc. (No. 225); 20 KW; 500 feet; subject to filing of application specifying the new location technical features of proposed operation.

Theodore Granik, 93.7 mc. (No. 229); 20 KW: 500 feet; subject to filing of application specifying new transmitter site which meets CAA approval, and for approval of technical features of proposed installation.

Capital Broadcasting Co., 100.9 mc. (No. 265); 20 KW; 500 feet; subject to condition that permittee shall satisfy legitimate complaints of blanketing.

At the same time, the Commission denied the application of the Chesapeake Broadcasting Co. for FM station in Washington, D. C.

**AM APPLICATIONS GRANTED**

NEW—Goggan Radio Sales, a partnership composed of Benjamin F. Goggan, Jr., and Howard E. Dennis, Henderson, Texas.—Granted CP(1) for a new station to operate on 1090 kc., 250 watts, daytime only. (B3-P-4612)

NEW—Ben Neely, tr./as Carter County Broadcasting Co., Odessa, Texas.—Granted CP(1) for a new station to operate on 1320 kc., 1 KW, daytime. (B3-P-118)

NEW—R. T. Waddell, P. C. Harbour, J. F. Postelle and J. S. McLeath, d/b as Odessa Broadcasting Co., Odessa, Texas.—Granted CP(1) for a new station to operate on 1390 kc., 5 KW, daytime only, subject to interference conditions with Monahans Broadcasting (B3-P-4882), for a new station at Monahans, Texas, if granted.

(*) Subject to condition that applicant will, within 60 days from date of this action, file application for modification of permit with the Commission specifying a transmitter site and antenna system meeting the requirements of the Commission's standards.

(Continued on next page)
COMMERCIAL TELEVISION APPLICATIONS GRANTED

NEW—Westinghouse Radio Stations, Inc., Boston, Mass.—Granted CP for a new commercial television station; frequency: Channel No. 4 (66-72 me.); 10 KW visual, 7.5 KW aural power; antenna, 500 feet on the following conditions: (1) Waiver of Sec. 3.632 required. Permittee to install frequency monitor of accuracy of 0.01% or better when available. (2) The Commission may, in the future, require permittee to increase effective radiated power or relocate transmitter site in order to bring the coverage into substantial conformance with its rules. (3) Contingent on filing Form 304 for changes in W11Z antenna. (B1-PCT-33)

NEW—WBEN, Inc., Buffalo, N. Y.— Granted CP for a new television station; frequency 66-72 me. (Channel # 4); 14.4 KW visual power; 7.2 KW aural power; antenna height 378 feet. (B1-PCT-156)

FM FINAL CP'S GRANTED

Correction

According to a correction issued by the Commission, the item on p. 637 of last week's REPORTS referring to the grant of an FM final CP for the Journal Company, Milwaukee, should show effective radiated power as 349 KW.

The following applications were granted regular Construction Permits. (Note: Power given is effective radiated power; antenna height given is height above average terrain):

American Broadcasting Corp. of Kentucky, Lexington, Ky.—Class B: Channel: 102.3 me. (No. 272); 3.0 KW; 320 feet. (B2-PH-131)

The Sun Pub. Co., Inc, Jackson, Tenn.—Class B; Channel: 95.1 me. (No. 236); 30 KW; 420 feet. (B3-PH-308)

WAGE—WAGE, Inc, Syracuse, N. Y.—Class B; Channel: 93.9 me. (No. 239); 1.6 KW; 410 feet. (B1-PH-705)

Radio Station WMFR, High Point, N. C.—Class B; Channel: 97.7 me. (No. 291); 3.3 KW; 310 feet. (B3-PH-359)

News-Journal Corp., Daytona Beach, Fla.—Class B; Channel: 91.5 me. (No. 235); 8.5 kw; 390 feet. (B3-PF-408)

Alexandria Broadcasting Co., Inc, Alexandria, La.—Class B; Channel: 100.1 me. (No. 261); 3 KW; 390 feet. (B3-PH-578)

Radiophone Broadcasting Station WP01, Inc, Bristol, Tenn.—Class B; Channel: 96.9 me. (No. 245); 40.1 KW; 2210 feet. (B3-PH-556)

George M. Ives, Brookfield, Ill.—Class A; Channel: 101.7 me. (No. 284); 250 watts; 168 feet. (B4-PH-711)

The Valley Electric Co., San Luis Obispo, Calif.—Class B; Channel: 92.3 me. (No. 222); 11.0 KW; 600 feet. (B5-PH-739)

James F. Hopkins, Inc., Detroit, Mich.—Class B; Channel: 94.5 me. (No. 228); 250 watts; 116 feet. (B1-PH-711)

Plains Radio Broadcasting Co., Amarillo, Texas.—Class B; Channel: 101.7 me. (No. 269); 35 KW; 400 feet. (B3-PF-529)

Bell Broadcasting Co., Inc, Temple, Texas.—Class A; Channel: 101.5 me. (No. 223); 210 watts; 50 feet. (B3-MPI-124; B3-PH-504)

Harwell V. Shepard, Denton, Texas.—Class B; Channel: 101.7 me. (No. 269); 3.1 KW; 290 feet. (B3-PH-556)

KOIN—KOIN, Inc, Portland, Oreg.—Class B; Channel: 91.5 me. (No. 292); 150 KW; 1350 feet. (B5-PH-541) (*)

KOMA—KOMA, Inc, Oklahoma City, Okla.—Class B; Channel: 100.1 me. (No. 261); 190 KW; 300 feet. (B3-PH-551) (*)

KSTP—KSTP, Inc, St. Paul, Minn.—Class B; Channel: 102.1 me. (No. 271); 320 KW; 620 feet. (B4-PH-551) (*)

DESIGNATED FOR HEARING

Abraham Kofman & Sara F. Kofman, d/b as Times-Star Publishing Co., Alameda, Calif., and Millard Kibbe & Donald K. Denning, d/b as D and K Broadcasting Co., Palo Alto, Calif.—Designated for consolidated hearing application of Times-Star Publishing Co. (B5-PH-656) for new station to use frequency 1210 kc., 1 KW, daytime, with application of D and K Broadcasting Co. (B5-PH-650) for new station to use frequency 1230 kc., 250 watts, daytime.

David C. Jones, Jr, d/b as Bryan Broadcasting Co., Bryan, Texas.—Designated for construction permit for new station to operate on 1210 kc., 250 watts, unlimited time. (B1-PH-4767)

Radio Springfield, Inc, Springfield, III.—Designated for hearing application for construction permit for new station to operate on 1340 kc., 500 watts, unlimited time. (B1-PH-4767)

Key Broadcasting Corp., Baltimore, Md.—Designated for hearing application for new station to operate on 1370 kc., 1 KW, daytime only (B1-PH-1713), in consolidated proceeding with application of Diamond State Broadcast Corp., Dover, Dela. (Docket 704) and James M. Tisdale, Chester, Pa. (Docket 7647)

MISCELLANEOUS LICENSE RENEWALS

Granted renewal of licenses for following developmental broadcast stations for regular period ending May 1, 1947: W3XMB, Maryland Broadcasting Co, Baltimore, Md.

MISCELLANEOUS ACTIONS

Albuquerque Broadcasting Co, Albuquerque, N. Mex.—Granted request to use call letters KOB-TV ("KOB" is the call letter of its standard broadcast station and "TV" is short for television) for its new television station. This is first authorization of this nature. This authorization was based upon Commission policy that the filing of exceptions to the proposed decision of the Commission in Dockets 6336, 6338 and 6339, is extended to August 29, 1946, for consolidated hearing application for construction permit for new station to operate on 1240 kc., daytime, with application of D and K Broadcasting Co. (B5-PH-656) for new station to use frequency 1250 mc.

WWBT—Hearst Radio, Inc, Baltimore, Md.—Granted modification of CP (B1-PH-98) to change frequency from Ch. # 6 to Ch. #11, 198-201 me., ESR from 1800 to 2570, transmitter location to approx. 3.5 miles northwest of Baltimore, change studio location to No. Charles St. and 26th St, Baltimore, change type of transmitters and make changes in antenna system of commercial television station.

WBTM— Piedmont Broadcasting Corp, Danville, Va.—Denied petition for leave to amend its application for CP (B2-PH-1327; Doc. 6938) so as to show changes in its officers, etc, and to substitute the frequency 1250 for 1390 kc, therefore requested with other related changes. Further ordered that the same allowed for the filing of exceptions to the proposed decision of the Commission in Dockets 6336, 6338 and 6339, is extended to August 29, 1946, for consolidated hearing application for construction permit for new station to use frequency 1240 mc.

WGBP—The Bethlehem Globe Pub. Co, Bethlehem, Pa.—Granted modification of CP which authorized a new station, for change in type of transmitter (RCA BTA-250), approval of antenna, and approval of transmitter and studio locations at 5th Ave. at intersection with Dell St, approximately 0.8 miles north of center of Bethlehem, Pa., and 425 Broad St, Bethlehem, respectively. (B2-PH-1291)

(Continued on next page)
AUGUST 19, 1946 — 656

KDRS—Progressive Broadcasting Co., Paragould, Ark.—
Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at Paragould. (B3-MP-1974)

KGHI—KGIII Broadcasting Service, Little Rock, Ark.—
 Granted license to cover CP which authorized installation of new antenna and ground system, and change transmitter location. (B5-L-2000.) Also authority to determine the operating power by direct measurement. (163-Z-1824)

WSUA—Warren, Davis Yeager & Ford, Inc., Bloomington, Ind.—Granted modification of CP which authorized a new station, to change name of-permittee from Warren, Davis, Yeager and Ford, Inc., to: Radio Station WSUA, Inc.; change type of transmitter to Gates 1-D, for approval of antenna and approval of transmitter location at 2 1/2 miles south of city limits on state road #57, RDF, Bloomington, Ind. (B4-MP-1931)

WMOA—Marietta Broadcasting Co., Marietta, Ohio.—
Granted modification of CP which authorized a new station, to extend completion date to 9-13-46. (B3-MP-1989)

KBUN—Bradford & Pihl, Bemidji, Minn.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations on highway #71, approximately 1.5 miles south of center of Bemidji, and for 419 1/2 Beltrand Ave., Bemidji, respectively. (B5-MP-1969)

KRIC—Oil Center Broadcasting Co., Odessa, Texas.—Granted license to cover CP which authorized a new station to operate on 1140 kc., 1 KW, DA, unlimited time, and change location of station to 111 E. Fifth St., Odessa, Texas. (B3-L-1962.) Also granted authority to determine operating power by direct measurement. (163-Z-1819.) Licensee is granted waiver of Secs. 3.55 (b) and 3.60, conditions.

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted modification of CP which authorized increase in power, etc., for extension of completion date to 9-13-46. Permit is issued with express provision that permittee will assume full responsibility for any adverse effects to the operation of KEVR, including interference, cross modulation, and/or distortion of antenna pattern, and that in the event of such effects, proper rejection circuits will be installed as required in the KEVR and/or KEVR antenna system. On completion of the adjustments to the KEVR antenna system, sufficient field intensity measurements will be made on Station KEVR to establish the absence of adverse effects referred to above. (B4-MP-2029)

WSTP—Piedmont Broadcasting Corp., Salisbury, N. C.—
Granted CP to mount FM antenna on top of AM antenna. (B3-P-5076)

WOLF—Civic Broadcasting Co., Syracuse, N. Y.—Granted modification of CP which authorized increase in power, etc., for extension of completion date to 9-13-46. (B1-P-3756)

KONX—KONX, Inc., Portland, Ore.—Granted CP to mount FM antenna on top AM tower. (B5-P-5090)

WESX—North Shore Broadcasting Co., Salem, Mass.—
Granted CP to mount FM antenna on top of present tower. (B1-P-5074)

The following actions were taken by the Administrative Board on August 8:

KJDB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Granted modification of CP, which authorized increase in power, etc., for extension of completion date to 9-8-46. (B4-MP-2026)

KXLO—Capitol Broadcasting Co., Lewiston, Mont.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter location at: On North Side of U. S. Highway #87, 1 mile east of Lewiston, Mont. (B5-MP-1945)

B. Loving Schmidt, Salem, Ore.—Denied petition for review of the action of the presiding officer of the Motions Docket on July 31, denying petitioner’s request to enlarge the issues in the consolidated proceeding upon his application for CP. (Docket 7624) and the application of John H. Fitzgibbon, et al (Docket 7579),

KTHK—KTO, Inc., Oklahoma City, Okla.; Darrell Alexander Callan, trustee, Wichita Falls, Texas—Adopted an order re-opening in May 1, 1946, hearing of Wichita Broadcasting Co., and designated application (Docket 7127) for consolidated hearing with application of KTO, Inc. (Docket 7757), and further ordered that the Commission’s order of January 16 designating Wichita application for hearing, be amended to include application of KTO, Inc.

KMLB—Liner’s Broadcasting Station, Inc., Monroe, La.—
Granted CP to mount FM antenna on top AM tower. (W. E. 353 E-1) at Richmond Road, Monroe, La. (present site of main transmitter), to be operated on 1140 kc., 1 KW, employing DA-night. (B5-P-5073)

WMPM—WMPM, Inc., Memphis, Tenn.—Granted modification of CP which authorized change in frequency, etc., to change type of transmitter to RCA BTA-10F. (B3-MP-2055)

WCOC—Miss. Broadcasting Co., Inc., Meridian, Miss.—
Granted modification of CP which authorized increase in power, etc., to change type of transmitter to (GATES BC-5A) and extend commencement and completion dates to 30 days after grant and 180 days thereafter, respectively, subject to the express condition that permittee shall satisfy legitimate complaints of blanketing within the 250 mv/m contour, including external cross modulation. (204-2L-2002)

WNAR—Rahall Broadcasting Co., Inc., Norristown, Pa.—
Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations near intersection of Old Arch Road and New Hove Street, NE of Norristown, Pa., and 135 W. Main St., Norristown, respectively; conditions in re interference. (B2-MP-1922)

WRNO—The Observer Radio Co., Orangeburg, S. C.—
Granted modification of CP which authorized a new station, for changes in transmitting equipment, approval of antenna location on U. S. Highway 21 (North), Orangeburg, and change studio location to U. S. Highway 21, (North), Orangeburg. Permittee is granted waiver of Secs. 3.55 (b) and 3.60 of rules; conditions. (B3-MP-2003)

WTO—Meridian Broadcasting Co., Meridian, Miss.—
Granted modification of CP which authorized a new station, to change type of transmitter to (W. E. 451-A-1), for approval of antenna and approval of transmitter and studio locations at 20th St. and 3rd Ave., and 298 22nd Ave., Meridian, respectively. (B5-MP-1930)

KVET—Austen Broadcasting Co., Austin, Texas.—Granted modification of CP which authorized a new station, for extension of completion date to 10-10-46. (B3-MP-2035)

KFBB—F. A. Buttrey (transferor), Fred Birch (transferee), Buttry Broadcast, Inc., Great Falls, Mont.—Granted consent to voluntary transfer of control of Buttry Broadcast, Inc., licensee of Station KFBB, from F. A. Buttrey to Fred Birch, for a consideration of $200,600 for all of the outstanding capital stock. (B5-TC-481)

I. & E. Broadcasting Co., Dayton, Ohio.—Granted request to dismiss petition filed by I. & E. Broadcasting Co. for reconsideration directed against the action of the Commission June 15, 1946, granting without hearing application of Peoples Broadcasting Corp., for a construction permit for new commercial television broadcast station to be operated on Channel No. 5, 76-82 mc, power (visual) 15.6 KW, (aural) 10.8KW, which had been granted May 16, 1946. (B1-PCT-153)

ACTIONS ON MOTIONS

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Granted petition insofar as it requests reopening of

(Continued on next page)
the record in re its application (Docket 8997) et al; denied petition insofar as it requests receiving into the record the affidavits from A. J. Fletcher and James Floyd Fletcher. The record was reopened for the sole purpose of receiving testimony from A. J. Fletcher and James Floyd Fletcher upon the question of overlap of multiple ownership between Durham Broadcasting Co., Durham, N. C., and the Capitol Broadcasting Co., Inc., WRAL, Raleigh, and further ordered that the further hearing in this proceeding be scheduled for August 12, at Washington.

Edwin Mead, Rockford, Ill.—Granted leave to amend his application (Docket 7599), so as to supply a supplemental engineering report containing changes in the nighttime coverage due to recent grants of other stations and presenting more complete data regarding possible conflicts with other pending applications, and the amendment was accepted.

Radio Wisconsin, Inc., Madison, Wis.—Granted petition for leave to amend its application (Docket 6940) so as to specify a revised directional antenna and supply current information on program plans, and the amendment was accepted.

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Granted petition for leave to amend its application for CP (Docket 7218; BL-8H-222) so as to dismiss without prejudice application for a new FM station.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted petition for leave to intervene in the hearing on applications of Modesto Broadcasting Co. and Turlock Broadcasting Group. (Dockets 7678 and 7679)

WDEV—Lloyd Squire and Wm. C. Ricker, d/b/a Radio Station WDEV, Waterbury, Vt.—Granited petition of Lloyd Squire, surviving partner of Lloyd E. Squire and Wm. C. Ricker, d/b/a Radio Station WDEV, for leave to amend application for CP (Docket 7495) so as to show death of one of the partners, Wm. C. Ricker; substitute Lloyd E. Squire, surviving partner, and Ernest C. Perkins, executor of the estate of Wm. G. Ricker, as the applicant in place of the original applicant, and the amendment was accepted.

Town Talk Broadcasting Co., Grass Valley, Calif.—Granted petition for leave to amend its application for CP (Docket 7698) so as to add to the various letters of endorsement from citizens and representatives of civic groups in Grass Valley, and the amendment was accepted.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted petition requesting reinstatement of its application for CP (B5-P-3532), which was dismissed without prejudice on May 5, 1946, subject to the right of reinstatement at a later date under the provisions of the Commission's public notice of Jan. 5, 1946, and to accept amendment filed simultaneously with the petition specifying the frequency 910 kc., with 1 KW, unlimited time, DA day and night. The application was reinstated and the amendment accepted.

Ark. Valley Broadcasting Co., Fort Smith, Ark.—Granted petition requesting reinstatement of application (B3-P-4309) which was dismissed without prejudice on June 7, 1946, subject to the right of reinstatement at a later date under provisions of the Commission's public notice of Jan. 5, 1946, and to accept the amendment filed simultaneously with the petition specifying the frequency 1270 kc., with 1 KW, unlimited time, using directional antenna. The application was reinstated and the amendment accepted.

Newark Broadcasting Corp., Newark, N. J.—Granted petition for leave to amend its application for CP (Docket 6190) so as to change Paragraph 17 of the application to show that petitioner is requesting in part the facilities of WAGE, Syracuse; and to show petitioner's willingness to pay the reasonable cost of a change in transmitter site by WA6E, and the amendment was accepted.

KVOX—KVOX Broadcasting Co., Moorhead, Minn.; Northern States B/cg Co., Fargo, N. Dak.—Granted petition for continuance of consolidated hearing now scheduled for August 14 and 15, at Fargo, N. Dak., on petitioner's application (Docket 7663) and application of Northern States Broadcasting Co. (Docket 7664) and said hearing was continued to Sept. 23 at Washington.

Mansfield Journal Co., Mansfield, Ohio; Lorain Journal Co., Lorain, Ohio.—Granted petition filed by Mansfield Journal Co. and Lorain Journal Co. requesting an extension of time to August 27 within which to file proposed findings of fact and conclusions in the proceeding upon their applications for construction permits and application of Lawrence W. Harry, d/b/a Fostoria Broadcasting Co., and the time within which Mansfield Journal Co. and The Lorain Journal Co. may file its proposed findings of fact is extended to include filing of proposed findings of fact on or before August 27, 1946.

Idaho Falls Broadcasting Co., Idaho Falls, Idaho; Eastern Idaho B/cg & Tel. Co., Idaho Falls, Idaho.—Ordered that the hearing on these cases now scheduled for August 19 at Idaho Falls, be continued to Sept. 18 at Idaho Falls.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

610 Kilocycles

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Authority to make changes in automatic frequency control equipment.

650 Kilocycles

NEW—Liberty Broadcasting Corp., Rochester, N. Y.—Construction permit for a new standard broadcast station to be operated on 640 kc., power of 5 KW and limited hours of operation. Amended to change frequency from 610 to 650 kc., and hours of operation from limited time to daytime.

680 Kilocycles

WMPS—WMPS, Inc., Memphis, Tenn.—Modification of construction permit (B5-P-6510, which authorized change in frequency, increase in power, install new transmitter and directional antenna for night use) change type transmitter.

FM APPLICATIONS ACCEPTED FOR FILING

Central Nebraska Broadcasting Corp., Kearney, Nebr.—Construction permit for a new FM broadcast station to be operated on Channel #226, 93.5 mc., and coverage of 16,965 square miles. Amended to specify class of station.

Amalgamated Broadcasting System, Inc., Chicago, Ill.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency and coverage as determined by FCC. Amended to change coverage to 9,448,000 square miles, specify population as 16,965,000, change transmitter site, specify type of transmitter and make changes in antenna system.

Templetone Radio Mfg. Corp., Boston, Mass.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by chief engineer of FCC and coverage to be determined by FCC. Amended to change coverage from "to be determined" to 9,413 square miles and population from 2,530,000 to 3,268,000.

Mrs. W. J. Virgin, Medford, Ore.—Application to purchase conditional grant by Medford Radio Corporation.

Advertisers Press, Inc., Flint, Mich. (P. O. Box 287, Saginaw, Mich.)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #286, 105.1 mc.

James Cullen Looney, Edinburg, Texas (P. O. Box 217½, Closer Blvd.)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC.

Sun Country Broadcasting Co., Phoenix, Ariz.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by chief engineer of FCC. Amended to change transmitter location.

George Anthony Waslovas, Cheviot, Ohio (P. O. Box 1121, Union Central Bldg., Cincinnati, Ohio)—Construction permit for a new FM broadcast station to be operated...
on Channel #224, 92.7 mc, and coverage of 13,700 square miles.

The Crosley Corp., Cincinnati, Ohio.—Modification of construction permit (B2-PH-214, which authorized a Metropolitan FM broadcast station) to change name from The Crosley Corporation to Crosley Broadcasting, specify frequency as Channel #251, 98.1 mc, coverage as 13,910 square miles, population as 1,588,936, transmitter site, type of transmitter and specify antenna system.

Inter-City Advertising Co., Charlotte, N. C. (P. O. 129 E. 3rd St.)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 12,000 square miles.

Everglades Broadcasting Co., Miami, Fla. (P. O. 224 N. E. 3rd St.)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 4,750 square miles.

KUOA, Inc., Siloam Springs, Ark. (P. O. John Brown University Campus)—Construction permit for a new FM broadcast station to be operated on Channel #245, 96.0 mc, and coverage of 8,513 square miles.

The Wren Broadcasting Co., Inc, Topeka, Kans.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel No. 273, 102.7 mc, and coverage of 13,720 square miles. Amended: To correct frequency as Channel No. 273, 102.3 mc.

TELEVISION APPLICATIONS ACCEPTED FOR FILING

Minnesota Broadcasting Corp., Minneapolis, Minn. (P. O. 115 E. Grant St.)—Construction permit for a new commercial television broadcast station to be operated on Channel #4, 66-72 mc, and ESR of 2080.

WBKB—Balaban & Katz Corp., Chicago, Ill.—Construction permit to change frequencies from Channel #2, 60-65 mc, to Channel #4, 66-72 mc, ESR from 550 to visual 2290, aural 1710, make changes in visual and visual transmitters, transmitter location, and make changes in antenna system.

Bendix Aviation Corp., Bendix Radio Division, Towson, Md. (P. O. Joppa Rd.)—Construction permit for a new FM broadcast station to be operated on 600-620 mc, power of visual 100 watts (peak) and aural 100 watts, and emission of visual special aural FM special.

Don Lee Broadcasting System, Hollywood, Calif. (P. O. 5515 Melrose Ave.)—Construction permit for a new experimental television broadcast station to be operated on frequencies to be assigned; power of visual, 250 watts (peak), aural, 250 watts, and emission of visual special A5 and aural special.

The St. Louis University, St. Louis, Mo. (P. O. 221 North Grand Blvd.)—Construction permit for a new experimental television broadcast station to be operated on frequency to be assigned in 480-920 mc, band and power of visual, 1 KW.

WCBW—Columbia Broadcasting System, Inc, New York, N. Y.—Modification of license to specify frequency as Channel No. 2, 34-80 mc, and to change ESR from 1000 to 1230.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

WBGO—The Board of Education of Newark in the County of Essex, Newark, N. J.—Modification of construction permit (BI-PED-50, as modified) which authorized a new non-commercial educational broadcast station for extension of completion date.

WABW—Associated Broadcasters, Inc., Indianapolis, Ind.—Application to purchase Radio Station WABW by Radio Indianapolis, Inc.

KATEG—Tarrant Broadcasting Co., Area of Fort Worth, Texas.—Construction permit to change transmitter power from 2 watts to 1.75 watts, change from portable-mobile to mobile.

KAAD—Tarrant Broadcasting Co., area of Fort Worth, Texas.—Construction permit to change transmitter, change power from 100 watts to 100 watts, change from portable-mobile to portable.

NEW—Northwest Broadcasting Co., Area of Fort Dodge, Iowa. (P. O. Warden Bldg.)—Construction permit for a new relay broadcast station to be operated on 1622, 2655, 2130 and 2720 kc, power of 29 watts, and A3 emission.

NEW—The Bible Institute of Los Angeles, Inc., Los Angeles, Calif. (P. O. 558 So. Hope St.)—Construction permit for a new non-commercial educational broadcast station to be operated on Channel No. 218, 91.3 mc, power of 3155 watts, and special for FM emission.

NEW—Leonard A. Vershuis, Area of Grand Rapids, Mich. (P. O. 6 Fountain St., N. E.)—Construction permit for a new relay broadcast station to be operated on 136.975, 137.575, 139.975 and 161.925 mc, power of 10 watts and A3 emission.

APPLICATIONS DISMISSED

WNB-FM—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Construction permit to change frequency from 44.9 to 45.7 mc, service area from 6500 square miles to be determined, type of transmitter, studio and transmitter location. Request of attorney.

WGST—Georgia School of Technology, Atlanta, Ga.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night, and install directional antenna for night use. (920 kc.)

Ronald B. Woodyard, Utica, N. Y.—Construction permit for a synchronous amplifier to be operated with a new standard broadcast station at Utica, N. Y. (BI-P-3683), on 1450 kc, power of 50 watts, and unlimited hours of operation.

APPLICATION RETURNED

Ralph E. Oliver, Thomas E. Davisson, Sillas S. Shippy, Leslie W. Oliver, d/b/a Napa Valley Broadcasting Co., Napa, Calif.—Construction permit for a new standard broadcast station to be operated on Channel #245, 92.7 mc, power of 900 watts and daytime hours of operation. Amended: To change frequency from 1570 to 880 kc.

APPLICATIONS TENDERED FOR FILING

590 Kilocycles

NEW—Bluegrass Broadcasting Co., Inc, Versailles, Ky.—Construction permit for a new standard broadcast station to be operated on 590 kc, power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Hudson Valley Broadcasting Co., Inc., Albany, N. Y.—Construction permit for a new standard broadcast station to be operated on 590 kc, power of 1 KW, night, 5 KW, day, directional antenna and unlimited hours of operation.

APPLICATIONS TENDERED FOR FILING

670 Kilocycles

NEW—News Publishing Co., Rome, Ga.—Construction permit for a new standard broadcast station to be operated on 670 kc, power of 1 KW, and daytime hours of operation.

720 Kilocycles

NEW—Carteret Broadcasting Co., in or near Morehead City, N. C.—Construction permit for a new standard broadcast station to be operated on 720 kc, power of 1 KW, and daytime hours of operation.

780 Kilocycles

NEW—General Broadcasting Co., a Partnership composed of William J. Edwards, Graydon L. Newman, Pearl...
McPherson Patrick, Birmingham, Ala.—Construction permit for a new standard broadcast station to be operated on 1280 kc., power of 1 KW, and daytime hours of operation.

810 Kilocycles

NEW—Denver Broadcasting Co., Denver, Colo.—Construction permit for a new standard broadcast station to be operated on 810 kc., power of 25 KW night, 50 KW day, directional antenna and unlimited hours of operation.

900 Kilocycles

NEW—Northwestern Theological Seminary and Bible Training School, Minneapolis, Minn.—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 1 KW, and daytime hours of operation.

910 Kilocycles

NEW—KJAN Broadcasting Co., Inc., Opelousas, La.—Construction permit for a new standard broadcast station to be operated on 910 kc., power of 1 KW, directional antenna night and unlimited hours of operation.

NEW—Batta Broadcasting Co., Braddock, Penna.—Construction permit for a new standard broadcast station to be operated on 910 kc., power of 1 KW and daytime hours of operation.

930 Kilocycles

NEW—Rocky Mountain Broadcasting Co., Pueblo, Colo.—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 5 KW, directional antenna night and unlimited hours of operation.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Construction permit to increase power from 500 watts to 1 KW, install new transmitter, and change transmitter location and make changes in directional antenna, night.

970 Kilocycles

WCSH—Congress Square Hotel Co., Portland, Me.—Construction permit to change operation of directional antenna day and night to directional antenna, night, on 5 KW, unlimited time.

1080 Kilocycles

NEW—Pittsburgh Broadcasting Co., Pittsburgh, Pa.—Construction permit for a new standard broadcast station to be operated on 1080 kc., power of 1 KW, and daytime hours of operation.

1170 Kilocycles

NEW—Suburban Broadcasting Corp., Upper Darby, Pa.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 1 KW, and daytime hours of operation.

1230 Kilocycles

NEW—Robert P. Strakos and John F. Kearney, a Partnership, d/b as the Colgren Broadcasting Co., Hudson, N. Y.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

1270 Kilocycles

NEW—Inter-American Radio Corp., Caguas, P. R.—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 250 watts, and unlimited hours of operation.

1280 Kilocycles

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Construction permit to change frequency from 1400 to 1280 kc., change power from 250 watts to 5 KW, install new transmitter and change transmitter location and install directional antenna for day and night use.

1290 Kilocycles

Edward J. Altorfer, John M. Camp, John H. Altorfer, Katherine A. Swain and Timothy W. Swain, d/b as Illinois Valley Broadcasting Co., Peoria, Ill.—Construction permit to change power from 1 KW to 5 KW, using directional antenna day and night.

1300 Kilocycles

WOOD—American Broadcasting Co., Inc., Grand Rapids, Mich.—Consent to assignment of license to Liberty Broadcasting, Inc.

1340 Kilocycles

NEW—Connelsville Broadcasters, Inc., Connellsville, Pa.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

1400 Kilocycles

NEW—Grand Forks Herald, Inc., Grand Forks, N. Dak.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

WGAP—Geo. Burne Smith and V. H. McLean, d/b as Gateway Broadcasting Co., Maryville, Tenn.—Consent to assignment of construction permit to George R. Dempster and V. H. McLean, d/b as Gateway Broadcasting Co.

1410 Kilocycles

WING—Great Trails Broadcasting Corp., Dayton, Ohio.—Application for reinstatement on 1410 kc., power of 5 KW, unlimited hours of operation, directional antenna.

1420 Kilocycles

NEW—Owensboro on the Air, Inc., Owensboro, Ky.—Construction permit for a new standard broadcast station to be operated on 1420 kc., power of 1 KW, directional antenna night, and unlimited hours of operation.

1470 Kilocycles

NEW—Lewiston-Auburn Broadcasting Corp., Lewiston, Me.—Construction permit for a new standard broadcast station to be operated on 1470 kc., power of 5 KW, directional antenna, and unlimited hours of operation.

1490 Kilocycles

NEW—Siskiyou County Broadcasting Co., Yreka, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Radio Anthracite, Inc., Nanticoke, Pa.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Clyde R. Horne, Jerrell A. Shepherd, a Partnership, d/b as The Valley Broadcasters, Russellville, Ark.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

1510 Kilocycles

NEW—Home News Publishing Co., New Brunswick, N. J.—Construction permit for a new standard broadcast (Continued on next page)
station to be operated on 1510 kc., power of 1 KW, and daytime hours of operation.

1590 Kilocycles

Caprock Broadcasting Co., Lubbock, Texas.—Construction permit to make changes in directional antenna system, operating with 1 KW, unlimited time.

FM

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Adelphi Hosiery Co.—Violation of the Wool Products Labeling Act is charged by the Commission in a complaint issued against Ben Friedlander, trading as Adelphi Hosiery Co., 93 Worth St., New York, and Louis G. Kauderer, trading as Double Knit Hosiery Mills, Riverside, N. J. (5457)

STIPULATIONS

No stipulations were issued by the Commission during the past week.

CEASE AND DESIST ORDERS

Kraupner and Kraupner, Inc.—Under the terms of a Commission order, Kraupner and Kraupner, Inc., 1375 Myrtle Ave., Brooklyn, and Diener & Dorskind, Inc., 147 West 42nd St., New York, are prohibited from disseminating false advertisements concerning the therapeutic properties of Kay's Medicated Ointment. Kraupner and Kraupner, Inc., sells and distributes the ointment, advertisements of which are prepared and disseminated by Diener & Dorskind, Inc., an advertising agency. (5380)

Oceanic Import Co.—Perfumes represented as coming from “the famous gardens of Miahati in Hawaii, where the exotic varicolored hibiscus and Jasmine mingle with honeysuckle and orange blossoms in riotous fragrance,” were actually manufactured in New York, the Federal Trade Commission found as it issued an order prohibiting misrepresentations as to the origin of perfumes.

The order is directed against Miahati, Inc., and Andrew Apicella, trading as Oceanic Import Co., both of 377 Fourth Ave., New York, and Abbot Manufacturing Co., Inc., 551 Fifth Ave., New York. It orders the respondents to cease and desist from representing that perfumes compounded in the United States are of Hawaiian origin. (471)

Snow’s Hatcheries—The Commission issued an order prohibiting Earl H. Snow and Pershing R. Snow, trading as Snow’s Hatcheries, Sleepy Eye, Minn., from falsely representing that they are R.O.P. poultry breeders or operate a poultry plant under the supervision of an official State agency supervising United States Record of Performance work. (5339)

Standard Oil Company of Indiana—The Commission has modified its cease and desist order of October 9, 1945, directed against discriminatory pricing practices in the sale of gasoline by Standard Oil Company of Indiana, which has its principal place of business at 910 South Michigan Avenue, Chicago. The price discriminations were found by the Commission to be in violation of section 2(a) of the Robinson-Patman Act. (4389)

FTC CASE CLOSED

John Stillman—The Commission has ordered closed without prejudice its case against John Stillman, former president of Kay Preparations Co., Inc., 522 Fifth Ave, New York, who was charged with dissemination of false advertisements concerning Kay cosmetics.

The case was closed because Stillman has sold his interest in the corporation, and it is unlikely that he will resume his business activities, the order said. The case against the corporation was closed in December, 1945, after it entered into a stipulation with the Commission to cease and desist from the practices complained of, but Stillman did not join in this agreement. (5318)
Advance Registration for NAB Convention Indicates Record Breaking Attendance

With more than 500 advance registrations from members already filed at NAB headquarters, all indications point to a record breaking attendance at the 24th Annual Convention to be held at the Palmer House in Chicago, October 21-24.

Wide interest is being shown by the membership in this year's meeting, the first full fledged industry convention since 1942. It is estimated that total registration will approach the 2000 mark.

This estimate is based on the 1942 attendance of 976 registrants, when the NAB membership totaled 552. Since that time the membership has almost doubled, with 1003 members on the rolls at the time the Board of Directors met earlier this month.

In order that members who are planning to attend the convention may be served most efficiently, NAB headquarters requests that they fill out and return the advance registration forms distributed recently.

Ohio Clinic, Drawing Record Attendance, Seeks Improvements in Radio News

A new attendance record of 83 for a NAB radio news clinic was established August 20 in Canton at the news clinic sponsored by the Ohio Association of Broadcasters. Broadcasters from every section of Ohio and two other states sat down together for a solid day’s discussion of how to do a better news gathering, writing, editing and broadcasting job. As an indication of the sincerity of attendants a segment of time at the end of the day was devoted to a consideration of “weaknesses of radio news.”

For the record it was well established at the conclusion of this period that most weaknesses could be cured by the addition of competent personnel.

Plans for the radio news clinic were set in motion some weeks ago by Pat Williams, OAB president, and general manager of WIZE and WING. He appointed Eugene Carr, director of radio of the Brush-Moore newspapers, Canton, chairman, with S. Bernard Berk, president and station manager, WAKR, Akron, and Len Nasman, business manager, WFMJ, Youngstown, as committee associates.

A. D. Willard, Jr., NAB executive vice president, came from Washington to give the luncheon address on “Freedom of Radio.” Arthur Stringer, director of special services, was present to report on what stations were doing in other sections of the country.

Because news clinics had not yet been held in Michigan and Pennsylvania and because both stations intend to strengthen their respective news departments, Forrest Owen, WELL, Battle Creek, and Elliott Jones, WPIC, Sharon, Pa., came to hear and participate in the discussions.

John Murphy, news editor, WCKY, Cincinnati, was discussion leader of the morning session on “Gathering News for Radio.”

Such things as news (Continued on page 664)
Ohio Clinic Seeks Improvements in Radio News

(Continued from page 663)

sources, local reporters, covering beats, special events, use and demonstration of the wire recorder highlighted Editor Murphy's section of the agenda. Set subjects led to the discussion of allied subjects.

Radio, Press, Pictures Must Stand Together

In his talk on "Freedom of Radio," Mr. Willard said that radio in particular was vulnerable to government domination and control. Emphasizing the fact that the United States is the last bulwark of freedom of expression, he urged broadcasters to accept the responsibility of defending this freedom.

In reply to a question put to him at the afternoon session by Robert T. Mason, former president of OAB, and licensee of WMRN, Marion, Mr. Willard commented on what could be done to enable radio to at¬tain the prestige which is accorded newspapers through editorializing.

Mr. Willard pointed out that radio stations voluntarily gave up editorial privileges as a result of a decision handed down in the Mayflower Case, in which the FCC asserted that no radio station should have an opinion of its own on controversial matters.

"We have paid the penalty of abiding by this rule. Why is it," he asked, "that in most communities today, the newspaper is a more influential factor than the radio station? We don't represent anything in many respects," he answered, "as a result of accepting the Mayflower decision.

"If a paper sees a condition in its community that should be remedied, it gets up and fights. We're wishy washy. The only thing we're 'agin,' is sin——and it has to be so obvious we are almost sure there is no contender on the other side of the question. The newspaper stands for what it knows to be right. The only thing we're 'agin,' is sin——and it has to be so obvious we are almost sure there is no contender on the other side of the question. The newspaper is no contender on the other side of the question. The newspaper is a more influential factor than the radio station? We don't represent anything in many respects," he answered, "as a result of accepting the Mayflower decision.

"If a paper sees a condition in its community that should be remedied, it gets up and fights. We're wishy washy. The only thing we're 'agin,' is sin——and it has to be so obvious we are almost sure there is no contender on the other side of the question. The newspaper stands for what it knows to be proper and right in its community and has gained prestige and standing for those things during the years. The time has to come soon when radio will accept that same responsibility. It's your right and duty to determine what your program structure will be. If you want to fight for something you think is right, it's your right to get up and fight for it. "No one has ever disputed the Mayflower decision, though even some Commissioners doubt that the ruling could stand in Court. Some stations and networks have already begun to have editorial policies and have so labeled them. NAB will do everything to hasten the day when every radio station will build for itself the same position newspapers have built for themselves in their editorial policies, and in standing up for what they believe is right."

The first afternoon session, led by Glen Jackson, program director, WSPD, Toledo, included the technical phases of news handling. Opposing points of view were presented and debated.

Lester Spencer, assistant manager, WHIO, Dayton, was discussion leader of the final afternoon stanza. This included "Analyzing Your News Audience," and "‘Obituary Calendar’ at 12:15 p.m. ‘This program,’ Mr. Haid said, ‘has the highest rating.’"

Local news is gathered by station's news editor, who is a former state congressman. By maintaining his former contacts at the Capital and elsewhere, he is in a class by himself in getting outstanding state news. Clinic attendants questioned Mr. Haid at length about the selection of the panel and whether or not members were overly critical. He stated emphatically that they were not overly critical. He believes that by picking 58 persons from all economic levels and walks of life (and he was able to do this because he knew everyone in town) he has an excellent cross section to guide him.

Good Public Relations Gets the News

The news operation of WPAY, Portsmouth, as reported by Manager Paul Wagner, was another high¬light. Mr. Wagner formerly handled the news himself. He then turned it over to the present news editor, Rusty Marshall, with eighteen years’ experience in the newspaper business.

Despite the fact that the newspaper owns WPAY, Mr. Wagner said that the two organizations work (Continued on next page)
entirely separate and on their own. He doesn't clip the newspapers and he doesn't have any trouble getting the news direct. In addition to local news, Mr. Marshall handles sports and special events. The department has one legman and two news announcers.

Mr. Wagner expressed the belief that the success of WPAY was due to the excellent public relations which the station maintains with news sources as well as the listening public. "We established such a firm foundation with officials, that a kick in the pants won't break it."

This came in reply to a question as to what he would do in the case his checking revealed some discrepancy in the original story which had been given by an official. Close checking, he pointed out, with all stories is a necessity. We tell the truth and make sure we get it. Recently several thousand postcards were mailed to a selected list of people telling them of the station's news department and soliciting news items. Results were good. Stories received over the telephone are used without checking.

Several news editors said that they believed radio stations had not yet had time to do a thorough job of establishing themselves as a major news source in their own communities. It was the consensus that this should be done vigorously by station management to speed the day when broadcast stations everywhere are recognized as a primary source of news.

Good Progress with Local News

WIZE, Springfield, and WING, Dayton, have made a highly satisfactory progress with local news, according to General Manager Pat Williams. In Springfield he has employed a woman-ace-reporter from the newspaper. She covers local news and is so well known that many people call her before they call the papers. The station broadcasts three all-local-news-shows of 5 minute duration across the board each week at 7:55 a.m.; 10:25 a.m. and 4:25 p.m.

The Dayton news operation was started by transferring the former WIZE news editor. He came in cold; unknown to anyone. Because he had the know-how, it did not take him long to establish the same kind of reliable contacts he had built up in Springfield. The three local newscasts which he gathers, writes and broadcasts are 15-minutes at twelve noon; 10-minutes at 3:00 p.m. and 15-minutes at 6:00 p.m.

These programs are regarded by Mr. Williams as the station's major newscasts.

As a promotion for the news department both WING and WIZE are to send scripts of the news program in which local persons were included. Stationery is expected momentarily from the printer.

Both of these stations make a flat service charge for news. For 6 quarter hours per week, charge is $25.

There are 10 different sponsors for the 10-station originated newscasts on each station.

Promotion for Radio News

James Dooley, news editor, WHBC, Canton, reported on the station news department promotion. Each weekday the department prepares a 2-minute script for messenger delivery to all of the city's clubs and organizations which have a noon luncheon meeting.

Telephone Calls Produce

An Akron station reported that an hourly round robin check by telephone of news originating points develops a good many news stories. This system (because hospitals are included) beats the police on accident stories.

Let 'em See It

Several stations have adopted the policy of automatically mailing scripts of newscasts in which the names of local persons were included. Script is reproduced on a special newsroom stationery. This practice makes friends and contacts.

Social

Mr. and Mrs. Roy Moore entertained almost a hundred broadcaster at cocktails and a buffet supper at their country estate at the close of the clinic.

Mrs. Eugene Carr, Mrs. Robert Fehlman and Mrs. William HERSHEY entertained the visiting ladies at the country club.

Registration at the clinic included:

Akron—WADC, Robert Wilson, assistant station manager; Harold Hagemen, program and news director; Fred C. Bock, sales manager; WAKR, John W. LaRue, news editor; Coleman Scott, program director; Bob French, audience relations director; WHK, Lew Henry, program director; Harvey Bogen, news editor; Emerson Batdorff, reporter; Alliance—WFAH, Paul W. Reid; Canton—WCMW, Vie Decker; WHBC, Robert Fehlman, manager; Richard Neher, program director; Martin Alexander, production manager; Julius Glass, publicity director; James Dooley, news editor; William Ebbcock, assistant news editor.

Cincinnati—WCKY, John Murphy, news editor; WKRC, Lew Kent, program director; WLW, Neil Smith; Cleveland—W GAR, Charles Day, assistant news editor; Dave Baylor, program director; WHK, Glenn Whisler, news editor; Murray Young, commentator; C. M. Hunter, program director; WTAM, Ed Wallace, news director; Hal Metzger, program director; AM Applicant, S. R. Sague, Cleveland Heights; Columbus—WBNS, Bill McKinnon, news editor; WCOL, Ted Shell, news editor; Dayton—WHIO, Lester Spencer, assistant manager; WING, John Pattison Williams, general manager.

Hamilton—WMOH, Don Meeks, program director; Lima—WLOK, Edgar Ulrick, program director; Mansfield—WMAN, Robert Horn, news editor; Marion—WMRN, Robert Mason, licensee; Robert Morrison, assistant manager; Portsmouth—WPAY, Paul Wagner, manager; Rusty Marshall, news editor; Springfield—WIZE, Robert Becher, news editor; Martha McIntyre, A. H. Korns, manager; John Pattison Williams, general manager; Steubenville—WSTV, Jack Merdian, assistant manager; Harry Cochran, local news editor; Toledo—WSPE, Jim Ublehart, news editor; Glenn Jackson, program director; WTOD, William H. Spencer, general man-

(Continued on page 667)
LAST-MINUTE FCC ACTIONS

The Commission announced Friday (23) its proposed decision looking towards the grant of the application of James L. Stapleton, et al., d/b as Grand Canyon Broadcasting Company, for a new station at Flagstaff, Arizona, to operate on 1340 kc. with 250 watts, unlimited time and denial of the application of N. Pratt Smith seeking the same facilities.

WTAX Transfer Granted

Following its en banc session last week, the Commission announced Friday (23) that it had granted consent to the transfer of control of Station WTAX from Jay A. Johnson to Oliver J. Keller, Archie Lee, Frederick G. Blackburn, Noah M. Dixon, and Lewis F. Gillespie for a consideration of $100,000. The petition of Commodore Broadcasting, Inc., Decatur, Ill., to withdraw its competing application for consent to acquire control of WTAX, was granted.

License Renewals

The FCC announced Friday (23) that the following stations were granted renewal of licenses for the period ending August 1, 1949:

- KANS, Wichita, Kans.; KDLR, Devils Lake, N. D.;
- KFXM, San Bernardino; KHG, Okmulgee, Okla.;
- KICD, Spencer, Iowa; KPFA, Helena, Mont.;
- KWAT, Watertown, S. Dak.; KWIL, Albany, Ore.;
- KWLC, Decorah, Iowa; WBIR, Knoxville; WCRW, Chicago;
- WGCM, Gulfport, Miss.; WJMC, Rice Lake, Wis.;
- WJNC, Jacksonville, N. C.; WJTN, Jamestown, N. Y.;
- WRAL, Raleigh, N. C.; WSBC, Chicago; WEDC, Chicago;
- WJNC, Jacksonville, N. C.; WJTN, Jamestown, N. Y.;
- WSLS, Roanoke, Va., and WCAO (*).

The following stations were granted renewal of licenses for the period ending May 1, 1949:

- KROD, El Paso, Texas, and KFAR, Fairbanks, Alaska.

Licenses for the following stations were renewed for the period ending February 1, 1949:

- KCRR, Midland, Texas, and KXO, El Centro, Cal.
- KTOK—KTOK, Inc., Oklahoma City, Okla.—Granted renewal of license for the period ending August 1, 1947 (*).
- WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Present license further extended upon a temporary basis for the period ending November 1, 1946. (Renewal application filed in improper form and was returned to applicant for correction.)
- WHKC—United Broadcasting Co., Columbus, Ohio—Present license further extended upon a temporary basis for the period ending November 1, 1946. (Renewal application filed in improper form and was returned to applicant for correction.)
- KSRO—Ruth W. Finley, Santa Rosa, Cal.—Present license further extended upon a temporary basis for the period ending November 1, 1946, pending investigation of possible violation of Sec. 310(b) of the Communications Act.

WSKB—McComb Broadcasting Corp., McComb, Miss.—Present license further extended upon a temporary basis for the period ending November 1, 1946, pending receipt of report of inspection re technical operation of station.

Licenses for the following stations were further extended upon a temporary basis only for the period ending November 1, 1946, pending receipt of additional information requested of applicants under Sec. 308(b) of the Communications Act:

- WKRC, Cincinnati; KFJZ and Aux., Fort Worth, Texas, and KMJ, Fresno, Cal.; KGHP, Pueblo, Colo.
- W9XJD—WJJD, Inc., Chicago, Ill.—Present license of developmental broadcast station was further extended upon a temporary basis only for the period ending November 1, 1946, pending receipt of renewal application.
- W5XIC—A. H. Belo Corp., Dallas, Texas—Present license for developmental broadcast station was further extended for a period of 60 days, pending final determination of hearing in applications of standard stations WFAA and KGKO.

OREGON DEPARTMENT OF AMERICAN LEGION CALLS FOR CONTINUATION OF AMERICA'S FREE RADIO

The American Legion, Department of Oregon, at its recent convention in Portland, went "on record favoring a continuation of the American system of broadcasting, which allows freedom of speech and no censorship imposed by any governmental agency on programs of networks or individual stations."

The resolution added that "any censorship of such broadcasting would be a violation of our American Bill of Rights and the freedom for which we have fought."

In particular, the Oregon Legionnaires expressed their appreciation for "the fine aid and assistance" given during the past year by the radio industry in their home state. The resolution stated: "That we particularly appreciate the fine public recognition given the program of The American Legion through their broadcasting, without charge the program: 'This Is Our Duty.' And for the widespread recognition they will give to the forthcoming series of programs produced by The American Legion calling attention to the Junior Baseball Program of The American Legion."

Stanley R. Church is radio chairman of the Legion's Oregon department.

BMB MAILS BOOK ON RADIO SET OWNERSHIP

Broadcast Measurement Bureau on Tuesday (20) mailed its first publication release to radio stations, advertisers and agencies. The book, "Radio Families—U. S. A. 1946," is being sent free of charge to BMB subscribers.

Through special arrangements between NAB and BMB, the Bureau is making copies of the book available to NAB members who have not subscribed to BMB for $2.50. Stations which are not NAB members may purchase the book for $5.00.

All orders for the publication should be sent directly to BMB, 270 Park Avenue, New York 17, N. Y.
Ohio Clinic Seeks Improvements in Radio News

District Meetings

15TH DISTRICT REQUESTS AID OF HEADQUARTERS STAFF IN DISCUSSIONS WITH IBEW

Meeting in special session at Monterey, Calif., August 12 and 13, the 15th NAB District passed a resolution calling upon the NAB headquarters staff for assistance to certain California stations in connection with their current discussions with the International Brotherhood of Electrical Workers. The union is demanding that the stations use only transcriptions which bear an IBEW label.

The resolution reads:

"WHEREAS demands have been placed before broadcasters of Northern California by the IBEW regarding rubber stamping of transcriptions,

"AND WHEREAS, these demands if succumbed to by said broadcasters will affect all members of NAB,

"IT IS HEREBY RESOLVED, that 15th District NAB request NAB headquarters staff to immediately make available whatever services are necessary to assist broadcasters in Northern California in meeting these demands, said services to include if deemed necessary the personal West Coast consultation by NAB staff with broadcasters involved and with the counsel which same have already retained."

Another resolution requested that the Employee-Employer Relations Department be augmented in view of the extensive activity currently taking place in that field. (Note: Richard P. Doherty has in the meaning time been appointed Director of Employee-Employer Relations. See current REPORTS, p. 648.)

The district meeting was called by District Director William B. Smullin for the purpose of reporting on the recent session of the Board of Directors.

President Justin Miller addressed the assembly concerning the freedom of radio and the FCC "Blue Book." The NAB staff was also represented by Robert C. Coleson, assistant to the president.

Broadcast Advertising

NEW STANDARD CONTRACT FORM APPROVED; MATS BEING MADE

The new standard contract form prepared by subcommittees of the NAB and AAAA was approved by the NAB Board of Directors at its August meeting. Mats containing the new standard conditions are now being made and will be sent to all NAB members as soon as possible.

The new standard form replaces the one adopted in 1942, which is still generally in use, and embodies many important changes to take care of later developments in broadcasting and agency practices.

Serving on the NAB Sales Managers subcommittee which negotiated the new form were Walter Johnson, WTIC, chairman; Howard Meighan, CBS; Frank Webb, Lewis H. Avery, Inc.; Ben Laird, Green Bay Broadcasting Co., and Sam H. Bennett, KMBC. On the AAAA subcommittee were Carlos Franco, Young & Rubicam, chairman; Linnea Nelson, J. Walter Thompson Co.; Charles Ayres, Ruthrauff & Ryan; Frank Silvernail, BBD&O, and William Maillefert, Compton Agency. Legal counsel was furnished by John Morgan Davis and Don Petty of NAB and George Link of AAAA.

Joske Report Delayed

Publication of "Radio for Retailers," a report of the year’s intensive study of radio advertising for retailers conducted jointly by the NAB and Joske’s of Texas, large San Antonio department store, is being delayed by labor difficulties in the Washington printing industry.

If a threatened printers’ strike develops, consideration is being given to taking the type already set and moving the publication to another city. Copy for the first release has been completed and is in type form, together with accompanying illustrations, charts, etc.

Small Market Stations

SMALL MARKET STATIONS EXECUTIVE COMMITTEE TO MEET SEPTEMBER 9-10 IN WASHINGTON

A fall meeting of the Small Market Stations Executive committee will be held September 9 and 10 in

(Continued on next page)
The meeting was called for September by Marshall H. Pengra, KNRN, Roseburg, Ore., committee chairman, so that members might present problems of particular interest to small station management prior to the October convention.

Small market stations (less than 5000 watts, located in cities of 50,000 or under) are invited to submit to NAB any matters which they desire the committee to act upon.

Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of September 2-8, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below.

Home Canning

Since a considerable part of our customary American food supply is going overseas for the relief of hunger-ridden millions, we are currently experiencing—and will continue to experience—a scarcity of certain foods such as wheat products, fats and oils. Housewives of America are urged to help compensate for this scarcity and insure their families' food supply this coming winter by canning, preserving and storing as much as possible from Victory Gardens. Under the circumstances, waste—either through failure to preserve our surplus garden yield, or doing it improperly—is unpardonable. Housewives therefore should be urged to remember that the following points are of top importance: (1) Can, preserve and store as much as possible from Victory Gardens. Make your garden serve you all year. (2) When markets feature abundant supplies of locally-grown, good quality produce, suitable for home preservation, take advantage of the opportunity to build up food stocks for next winter. (3) Lay in supplies of containers and equipment early to enable manufacturers to gauge demand. (4) Conserve your sugar for canning purposes. Follow the wartime rule of 1 pound of sugar to 4 quarts of finished fruit. (5) Use only safe, tested methods, backed by scientific research. Take no chances on accidents, spoilage, unnecessary loss of food value. Study methods recommended for different foods; get competent advice. Consider freezing, pickling, brining, drying and storing, as well as canning, for different types of product. (Fact Sheet No. 24-A)

U. S. Marine Corps Recruiting

Congress has authorized the U. S. Marine Corps to increase its peacetime strength to 100,000 men. Since the Marine Corps has not accepted inductees since shortly after V-J Day, the men who make up this force must necessarily be volunteers with high qualifications and training. The corps now numbers 140,000 but over half of these are inductees and reservists, many of whom are regularly becoming eligible for discharge. In addition, the enlistment period of 7500 regulars expires within the next three months. The Marine Corps is attempting to fulfill an unwritten obligation to discharge all wartime inductees and reservists—whether or not they are eligible—by Christmas, 1946. This will be impossible, however, unless volunteer enlistments are increased by approximately 15,000 immediately in order to bring the strength of the regular Corps up to 100,000 men. Young men between 17 and 30 should be told of the many advantages—travel, education, training, pay—offered by two, three or four year enlistments in the Marine Corps, and also urged to give serious consideration to the Corps as a career. Voluntary service or a career in the peacetime Marine Corps offers many advantages and opportunities—education and training, travel, good pay, veterans benefits at completion of enlistment period, monthly income on retirement. Men may be accepted for two, three or four year enlistments in the Marine Corps: . . . if they are between 17 and 30 and single. . . . if they are United States citizens . . . if they are in good health . . . if they have a normal education . . . if they are free of dependents. Go to the Marine Corps recruiting office nearest you or write directly to U. S. Marines, Washington 25, D. C., for an attractive booklet describing the advantages of service in the peacetime Marine Corps. (Fact Sheet No. 27-A)

Stop Home Accidents

There are two major reasons why the home accident problem is so serious: 1. MORE PEOPLE ARE ACCIDENTALLY KILLED AND INJURED AT HOME THAN ANYWHERE ELSE. One-third of all accidental deaths occur at home, the National Safety Council says. One-half of all accidental injuries occur at home. The annual cost is estimated at $600,000,000. 2. PEOPLE ARE UNAWARE OF THE FACTS. Because so few home accidents are reported in the newspapers, the public does not realize how prevalent they are. "It can't happen to me" or "I'll fix that loose step tomorrow" are the usual attitudes. But figures of the National Safety Council show that each year home accidents kill one family out of every seven. TELL YOUR LISTENERS: One home injury occurs every six and a half seconds; one death due to a home accident occurs every fifteen and a half minutes. Each year home accidents strike one family out of every seven. Make your home as safe as possible by eliminating all physical hazards such as inadequate lighting, cluttered rooms, dangerous stairways and unprotected play space. Cultivate habits of safety around the home and educate the children in safe conduct. REMEMBER—ACCIDENTS DON'T ALWAYS HAPPEN TO THE OTHER PERSON! (Fact Sheet No. 28)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, August 26. They are subject to change.

Monday, August 26

Further Hearing

NEW—John H. Fitzgibbon, Roy Jarman and Temple V. Ehmsen, Oregon City, Ore.—C. P. 1490 kc., 250 watts, unlimited.

(Continued on next page)
NEW—B. Loring Schmidt, Salem, Ore.—C. P. 1490 kc, 250 watts, unlimited.

Room 219, Federal Bldg., Provo, Utah

NEW—Utah Valley Broadcasting Co., Provo, Utah—C. P. 1550 kc, 250 watts, unlimited.

NEW—Mid-Utah Broadcasting Co., Provo, Utah—C. P. 1450 kc, 250 watts, unlimited.

Thursday, August 29

NEW—Radio Wisconsin, Inc., Madison, Wis.—C. P. 1180 kc, 1 KW, unlimited DA-night.

NEW—Edwin Mead, Rockford, Ill.—C. P. 1480 kc, 1 KW, unlimited time.

NEW—B. J. Barrier, Jr., II. T. Barrier, II. P. Holmes, B. Loring Schmidt, Salem, Ore.—C. P. 1490 kc, 250 watts, unlimited.

NEW—Mid-Utah Broadcasting Co., Provo, Utah—C. P. 1450 kc, 250 watts, unlimited.

NEW—Radio Wisconsin, Inc., Madison, Wis.—C. P. 1480 kc, 1 KW, unlimited time.

Other Participant

KGCX—Sidney, Montana (Respondent).

Further Hearing

AM APPLICATIONS GRANTED

NEW—B. J. Barrier, Jr., II. T. Barrier, II. P. Holmes, B. Loring Schmidt, Salem, Ore.—Granted CP* for a new station to operate on 1230 kc, 250 watts, unlimited time. (B3-P-3919)

NEW—Henry K. Arneson, Thief River Falls, Minn.—Granted CP* for a new station to operate on 1230 kc, 250 watts, unlimited time. (B4-P-4818)

NEW—Medford Printing Co., Medford, Ore.—Granted CP* for a new station to operate on 1230 kc, 250 watts, unlimited time. (B4-P-4818)

NEW—Edwin Mead, Rockford, Ill.—Granted CP* for a new station to operate on 800 kc, 250 watts, daytime only. (B3-P-4885)

NEW—Lake Huron Broadcasting Co., Saginaw, Mich.—Granted CP* for a new station to operate on 1210 kc, 1 KW, daytime only. (B3-P-4894)

NEW—Tarboro Broadcasting Co., Inc., Tarboro, N. C.—Granted CP* for a new station to operate on 750 kc, 1 KW, daytime only. (B3-P-4891)

NEW—Downing Musgrove, Douglas, Ga.—Granted amended CP for new station to operate on 880 kc, 1 KW, daytime only. Site to be determined. (B3-P-4770)

NEW—Huntsville Broadcasting Co., Huntsville, Ala.—Granted CP for a new station to operate on 1550 kc, 250 watts, unlimited time, contingent on installation of approved frequency modulation monitors when available and subject to CAA approval of transmitter site and antenna system. (B3-P-4861)

NEW—Queen City Broadcasting Co., Inc., Boise, Idaho—Granted CP for a new station to operate on 950 kc, 1 KW, DA-2, unlimited time, contingent on (1) the approval of antenna system and transmitter site by the CAA; (2) transmitter and operation of the WE D 800 station in accordance with the rules and standards; and modification of the 700 A automatic frequency control equipment to later approved types or replacement by approved types; (3) waiver of Rules 3.55(b) and 3.60 pending the obtaining by the applicant of approved modulation and frequency monitors. (B5-P-3615; Docket 6533)

FM FINAL CP’S GRANTED

The Commission en banc today granted regular construction permits for FM broadcast stations to the following. (Note: Power given is effective radiated power; antenna height given is height above average terrain.)

NEW—Radio Wisconsin, Inc., Madison, Wis.—Class B; Channel: 103.9 mc, (No. 290); 500 watts; 385 feet. (B2-PH-270)

NEW—Huntsville Broadcasting Co., Huntsville, Ala.—Class B; Channel: 101.3 mc, (No. 268); 500 watts; 350 feet. (B3-PH-753)

NEW—Mid-Utah Broadcasting Co., Provo, Utah—Class B; Channel: 101.3 mc, (No. 259); 690 watts; 580 feet. (B5-PH-753)

FM FINAL CP’S GRANTED (Continued on next page)

Designated for Hearing

MISCELLANEOUS ACTIONS

WDAR—A. C. Neff, Savannah, Ga.—Granted modification of CP, which authorized a new station, to change type of transmitter to W. E. 537-A, for approval of antenna and approval of transmitter location just east of intersections of Hull St. and Perry St. with Shiele St., Savannah. Permittee is granted waiver of Secs. 3.55(b) and 3.60 of Commission's Rules; conditions. (B3-P-4861)

WMRF—Methodist Radio Parish, Inc., Flint, Mich.—Granted modification of CP which authorized a new station, for approval of antenna, approval of transmitter location on Dort Highway and Lapeer Road, Flint, and change studio location to 575 Mary St., Flint. Permittee is granted waiver of Secs. 3.55(b) and 3.60 of Commission's Rules; conditions. (B3-P-4861)

WNOC—Norwich Broadcasting Co., Norwich, Conn.—Granted modification of CP which authorized a new station, to change type of transmitter to W. E. 530-C, modified, for approval of antenna and approval of transmitter location at Lucas Park Drive, Thamesville, Conn. Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions. (B1-MP-1996)

WHUM—Eastern Radio Corp., Reading, Pa.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at Hill location 0.2 mile West

In lieu of conditions previously authorized.

(Continued on next page)
of Schuylkill River, adjacent to downtown area, Reading, and Berkshire Hotel, 5th and Washington, Reading, respectively. Permittee is granted waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions. (B2-MI-1918)

Idaho Falls Broadcasting & Television Co., Idaho Falls, Idaho; Eastern Idaho Broadcasting & Television Co., Idaho Falls, Idaho—Ordered that the consolidated hearing scheduled for Sept. 18 at Idaho Falls, be removed from Idaho Falls to Washington, to be held on the same date.

WQXR—Interstate Broadcasting Co., New York City; KMP—Pioneer Mercantile Co., Bakersfield, Calif.—Adopted an order denying petitions filed by WQXR and KPMC for review of the Commission's decision denying their petitions for reconsideration directed against the Commission's grant of March 7, 1946, of application of Washita Valley Broadcasting Corp., Chickasha, Okla., to operate on 1490 kc., 250 watts, unlimited time, 1 KW power by direct measurement. (Bl-Z-1807)

DA (B3-Z-1809) for night use and move transmitter (B3-L-1974). Also granted authority to determine operating power by direct measurement. Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's rules; conditions. (B3-Z-1809)

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.— Granted license to cover CP which authorized change in frequency to 1440 kc., 250 watts, unlimited time (B3-L-1962). Also granted authority to determine operating power by direct measurement. Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's rules; conditions. (B3-Z-1809)

WTVL—Kennebec Broadcasting Co., Waterville, Me.— Granted license to cover CP authorizing a new station to operate on 1490 kc., 250 watts, unlimited time (B1-L-1970). Also authority to determine operating power by direct measurement. (B1-Z-1807)

WMFT—Tri-Cities Broadcast Co., Florence, Ala.— Granted license to cover CP which authorized a new station to operate on 1240 kc., 250 watts, unlimited time (B3-L-1962). Also granted authority to determine operating power by direct measurement. Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of Rules; conditions.

WPOR—Centennial Broadcasting Co., Portland, Me.— Granted license to cover CP which authorized a new station to operate on 1450 kc., 250 watts, unlimited time (B1-L-1959). Also granted authority to determine operating power by direct measurement. (B1-Z-1784). Licensee is granted waiver of Secs. 3.55(b) and 3.60 of Rules; conditions.

WICK—Upper Mich-Wisc. Broadcasting Co., Inc., Iron Mountain, Mich.—Granted modification of CP, which authorized a new station, for approval of antenna and approval of transmitter and studio locations at West “C” Street, between Pine and Forest, Iron Mountain, Michigan, and Dickinson Hotel, West “P” Street Iron Mountain, respectively. (B2-MP-1956)

KWCO—Washita Valley Broadcasting Corp., Chickasha, Okla.—Granted modification of CP, which authorized a new station, for approval of antenna and approval of new transmitter location at approximately 2 mile west of U.S. Highway 81, Chickasha, Okla. (B3-MP-1919)

W3XEP—Radio Corp. of America, Camden, N.J.—Granted modification of license to change frequencies to: Frequencies to be assigned from time to time as needed by the chief engineer, in experimental television station W3XEP. (B1-MLV-146)

W9XZC—Zenith Radio Corp., Chicago, Ill.—Granted license to CP which authorized a new experimental television broadcast station; frequencies that may be assigned by the chief engineer from time to time; power: 1 KW; vis. 1 KW peak. The license is granted upon experimental basis only, conditions. (B1-LYB-78)

KELO—Sioux Falls Broadcast Assn., Inc. (Assignor), Midcontinent Broadcasting Co. (Assignee), Sioux Falls, S.Dak.—Granted consent to voluntary assignment of license of KELO from Sioux Falls Broadcast Assn., Inc., to Midcontinent Broadcasting Co., for a consideration of $100,000. (B1-AL-529)

KIDO—Georgia Phillips, d/b/a Boise Broadcast Station (Assignor), KIDO, Inc. (Assignee), Boise, Idaho—Granted consent to voluntary assignment of license of station KIDO from Georgia Phillips, d/b/a Boise Broadcast Station, to KIDO, Inc., and for conditioned granted CP for a new FM station (provided it is understood by applicant that such grant does not carry with it the right of KIDO, Inc., to sell the 1400 shares of unissued stock to a third party without further Commission action). Assignor is to transfer and assign to Assignee all assets of KIDO shown in the application of F81,522, and Assignee to assume all liabilities shown as $85,616, leaving a net book value of $100,616 (including “Goodwill” of $61,944); and Assignee to issue to Assignor 1,007 shares, par value $100,700, of its authorized capital stock in full payment of such net assets; and Assignee to pay for assignee cash in the amount of 894, being the difference between the net book value of assets to be assigned and par value of capital stock proposed to be issued to assignor. (B3-AL-535; B3-AP15-5)

**ACTIONS ON MOTIONS**

Lake Shore Broadcasting Co., Evansville, Ill.—Granted motion for waiver of rules to accept late appearance in initial full CP. (B4-P-1750; Docket 7520)

Missionary Society of St. Paul the Apostle, New York City—Granted petition to dismiss without prejudice application for CP. (B1-P-1234; Docket 7516)

WCED—Tri-County Broadcasting Co., Dubois, Pa.—Granted petition to intervene in the hearing on application of Eagle Printing Co. (Docket 7672) for a new station in Butler, Pa.

Idaho Falls Broadcasting Co., Idaho Falls, Idaho, and Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho—Granted the joint petition requesting a continuance in the hearing on their applications which is presently scheduled for August 19 at Idaho Falls. (Dockets 7535 and 7536)

Edwin Mead, Rockford, Ill.—Granted petition for leave to amend his application for CP (B1-P-1720; Docket 7536), so as to file an amended Exhibit No. 7 setting forth detailed description of a proposed program policy, etc., and the amendment was accepted.

Cream City Broadcasting Co., Inc., Milwaukee, Wis.—Granted petition insofar as it requests leave to amend its application (B1-P-1720; Docket 7500), so as to specify 5 KW power, unlimited time, instead of 1 KW, daytime only, etc., and the amendment was accepted.

Veterans Broadcasting Co., Inc., Rochester, N.Y.—Granted petition for leave to amend its application (B1-P-1720; Docket 7500), so as to specify 5 KW power, unlimited time, instead of 1 KW, daytime only, etc., and the amendment was accepted.

Hughes Tool Co., Los Angeles, Calif.—Dismissed petition requesting a further continuance in the taking of the testimony of Howard Hughes in the proceeding upon its application for a new television permit. (B3-PCT-17; Docket 6570)

**CONTINUED ON NEXT PAGE**
Booth Radio Stations, Inc., Flint, Mich.—Granted petition requesting leave to amend its application (B2-P-1120; Docket 6925), so as to specify a new transmitter site; show increase in height of the antenna, etc., and to reopen the record. The amendment was accepted, the record reopened, and without further hearing said amendment is made a part of the record in Docket 6925.

KMA—May Broadcasting Co., Shenandoah, Iowa.—Dismissed petition for leave to intervene in the hearing upon application for CP of Hirsch Battery and Radio Co., Cape Girardeau, Mo. (B4-P-1228; Docket 7130) Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Granted petition for leave to amend application (B4-P-1228; Docket 7130) so as to substitute a revised sketch of “Details of Proposed Ground System for Radio Station KFVS,” etc., and the amendment was accepted.

**FCC APPLICATIONS**

**AM APPLICATIONS ACCEPTED FOR FILING**

**590 Kilocycles**

NEW—Bluegrass Broadcasting Co., Inc., Versailles, Ky.—Construction permit for a new standard broadcast station to be operated on 590 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Hudson Valley Broadcasting Co., Inc., Albany, N. Y. (P.O. 90 State St.)—Construction permit for a new standard broadcast station to be operated on 590 kc., power of 1 KW night, 5 KW day, directional antenna and unlimited hours of operation.

**610 Kilocycles**

WHKC—United Broadcasting Co., Columbus, Ohio—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and make changes in directional antenna for night use. Amended re changes in directional antenna for night use.

**670 Kilocycles**

NEW—Blue Bonnet Broadcasting Corp., Fort Worth, Texas—Construction permit for a new standard broadcast station to be operated on 670 kc., power of 1 KW and daytime hours of operation.

**720 Kilocycles**

NEW—Carteret Broadcasting Co., in or near Morehead City, N. C. (P.O. 248 Middle St., New Bern, N. C.)—Construction permit for a new standard broadcast station to be operated on 720 kc., power of 1 KW and daytime hours of operation.

**760 Kilocycles**

NEW—Carteret Broadcasting Co., in or near Morehead City, N. C. (P.O. 248 Middle St., New Bern, N. C.)—Construction permit for a new standard broadcast station to be operated on 720 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 1240 to 760 kc., power from 250 watts to 1 KW, daytime hours of operation from unlimited to daytime, and change type of transmitter.

**810 Kilocycles**

NEW—Denver Broadcasting Co., Denver, Colo. (P.O. Security Building)—Construction permit for a new standard broadcast station to be operated on 810 kc., power of 25 KW night, 50 KW day, directional antenna and unlimited hours of operation.
980 Kilocycles

KMBR—Midland Broadcasting Co., Kansas City, Mo.—License to cover construction permit (B4-P-4412), which authorized decrease in power of auxiliary transmitter and install new auxiliary transmitter.

1080 Kilocycles

NEW—Pittsburgh Broadcasting Co., Pittsburgh, Pa.—Construction permit for a new standard broadcast station to be operated on 1080 kc, power of 1 KW and daytime hours of operation.

1130 Kilocycles

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Special service authorization to operate from 7:00 a.m., EST, to local sunrise, with power of 250 watts, for the period beginning November 1, 1946, and ending in no event later than February 28, 1947.

1170 Kilocycles

NEW—Suburban Broadcasting Co., Upper Darby, Pa. (P. O. 239-241 Fairfield Ave.)—Construction permit for a new standard broadcast station to be operated on 1170 kc, power of 1 KW and daytime hours of operation.

1230 Kilocycles

NEW—Robert P. Strakos & John F. Kearney, a partnership, d/b as The Colgren Broadcasting Co., Hudson, N. Y. (P. O. Union Turnpike R. D. 1)—Construction permit for a new standard broadcast station to be operated on 1230 kc, power of 250 watts and unlimited hours of operation.

WJBC—Arthur Malcolm McGregor and Hugh L. Gately, a partnership, d/b as Radio Station WJBC, Bloomington, Ill.—Voluntary assignment of license to Bloomington Broadcasting Corporation.

1240 Kilocycles

WKBR—Concord Broadcasting Corp., Manchester, N. H.—Modification of construction permit (B4-P-4223, as modified, which authorized a new standard broadcast station) to change corporate name to Granite State Broadcasting Co., Inc., for approval of antenna and studio locations.

WTIP—Gus Zaharis and Penelope Zaharis, d/b as Chemical City Broadcasting Co., Charleston, W. Va.—Modification of construction permit (B2-P-4544, which authorized a new standard broadcast station) to change type of transmitter, change transmitter and studio locations, and extend commencement and completion dates. Amended to change frequency from 1240 to 1270 kc.

1270 Kilocycles

NEW—Inter-American Radio Corp., Caguas, P. R. (P. O. 236 Insular Road, No. 1, Stop 331/2, Hato Rey, Rio Pedras, P. R.)—Construction permit for a new standard broadcast station to be operated on 1270 kc, power of 250 watts and unlimited hours of operation.

NEW—Arkansas Valley Broadcasting Co., Fort Smith, Ark.—Construction permit for a new standard broadcast station to be operated on 1270 kc, power of 1 KW, directional antenna night and unlimited hours of operation. Amended to change frequency from 740 to 1270 kc, install new directional antenna for day and night use and change transmitter location.

1280 Kilocycles

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Construction permit to change frequency from 1280 kc, increase power from 250 watts to 5 KW, install new transmitter and directional antenna for day and night use, change transmitter and studio locations.

1290 Kilocycles

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Construction permit to change frequency from 1290 to 1270 kc, increase power from 250 watts to 1 KW, install new transmitter, directional antenna for night use, and change transmitter location. Amended to change frequency from 1270 to 1290 kc.

1300 Kilocycles

WOOD—King-Treadle Broadcasting Corp., Grand Rapids, Mich.—Voluntary assignment of license to Liberty Broadcasting, Inc.

1340 Kilocycles

NEW—Del Norte Broadcasting Co., Inc., El Paso, Texas—Construction permit for a new standard broadcast station to be operated on 1340 kc, power of 250 watts and unlimited hours of operation. Amended to change frequency from 1270 to 1400 kc.

1400 Kilocycles

KWIN—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—License to cover construction permit (B5-P-4545) which authorized a new standard broadcast station and for change of studio location.

KWIN—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—Authority to determine operating power by direct measurement of antenna power.

NEW—Grand Forks Herald, Inc., Grand Forks, N. D. (P. O. 118-120 North Fourth St.)—Construction permit for a new standard broadcast station to be operated on 1400 kc, power of 250 watts and unlimited hours of operation.

NEW—Oneonta Star, Inc., Oneonta, N. Y.—Construction permit for a new standard broadcast station to be operated on 1400 kc, power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 1400 kc.

NEW—Montana Broadcasting and Television Corp., Missoula, Mont. (P. O. 176 West Center St., Provo, Utah)—Construction permit for a new standard broadcast station to be operated on 1400 kc, power of 250 watts, and unlimited hours of operation.

1450 Kilocycles

WWDC—Capital Broadcasting Co., Washington, D. C.—Authority to determine operating power by direct measurement of antenna power. (Continued on next page)
NEW—Great Northern Radio, Inc., Glens Falls, N. Y.—Modification of construction permit (B1-P-4014, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter and studio locations. Amended to change transmitter location.

NEW—Natchitoches Broadcasting Co., Inc., Natchitoches, La. (P. O. 200 Front St.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation.

1490 Kilocycles

NEW—Radio Anthracite, Inc., Nanticoke, Pa. (P. O. 65 East Main St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Gulfport Broadcasting Co., Inc., Pensacola, Fla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1450 to 1490 kc., change transmitter location.

NEW—Clyde R. Horne, Jerrell A. Shepherd, a partnership d/b as They Valley Broadcasters, Russellville, Ark. (P. O. 128 East Main)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from Channel #4 to #2, 54-60 me., change transmitter location.

WARD—Central Broadcasting Co., Inc., Johnstown, Pa.—License to cover construction permit (B2-P-3732, as modified) which authorized a new standard broadcast station.

WARD—Central Broadcasting Co., Inc., Johnstown, Pa.—Authority to determine operating power by direct measurement of antenna power.

NEW—William H. Harpole, William T. Kemp and W. J. Harpole, a partnership, d/b as Uvalde Broadcasters, Uvalde, Texas (P. O. Box 758, 556 No. Getty St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Siskiyou County Broadcasting Co., Yreka, Calif. (P. O. 304 W. Miner St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

1510 Kilocycles

NEW—Home News Publishing Co., New Brunswick, N. J. (P. O. 127 Church St.)—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 1 KW and daytime hours of operation.

1580 Kilocycles

NEW—Arthur H. Croghan, Santa Monica, Calif.—Construction permit for a new standard broadcast station to be operated on 1580 kc., power of 1 KW and limited hours of operation. Amended to change frequency from 750 to 1580 kc., change power from 1 KW to 5 KW, change hours of operation from limited to daytime, install new transmitter and change transmitter location.

FM APPLICATIONS ACCEPTED FOR FILING

Wallace N. Lindskoog, Luther G. Boone, Gordon H. Moorer, Elmer A. Hyer, August Lindblom, C. H. Lindgren, Wilbur Merrill, Gilbert Moody, partners, d/b as Turlock Broadcasting Group, Turlock, Calif. (P. O. c/o Gilbert Moody, Berg Bldg.)—Construction permit for a new FM broadcast station to be operated on frequency to be specified by chief engineer of FCC and coverage of 355.8 square miles.

Narragansett Broadcasting Co., Fall River, Mass. (P. O. 130 So. Main St.)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC.

Independent Broadcasting Co., Des Moines, Iowa (P. O. 500 Bankers Trust Bldg.)—Construction permit for a new FM broadcast station to be operated on Channel #265, 1062 mc., or as assigned by chief engineer of FCC and coverage of 33,542 square miles.

Metropolitan Broadcasting Service, New York, N. Y.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage of 21,500 square miles. Amended to make minor changes in transmitter location and changes in antenna system.

Fayette Broadcasting Co., Lexington, Ky. (P. O. Security Trust Bldg.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #272, 1923 mc., and coverage of 13,700 square miles.

Southern Broadcasting Corp., San Antonio, Texas.—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 21,500 square miles. Amended to make minor changes in transmitter location and to specify class of station.

Burlington-Graham Broadcasting Co., Burlington, N. C.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #21, 1013 mc., or as assigned by FCC and coverage of 4,352.96 square miles, or as assigned by FCC. Amended to change class of station, frequency from 1013 mc. to 1014 to 1015 band, coverage from 4,352.96 to 673 square miles, population from 345.475 to 60.481, type of transmitter, make changes in others, directors and stockholders and make changes in antenna system.

Golden Empire Broadcasting Co., Chico, Calif. (P. O. Box 717, Merced, Calif.)—Construction permit for a new FM broadcast station to be operated on frequency to be determined.

TELEVISION APPLICATIONS ACCEPTED FOR FILING

George R. Call, Sioux City, Iowa.—Construction permit for a new experimental television broadcast station to be operated on Channel #9, 156-192 mc., power of aerial and visual of 100 watts and emission of aerial A4 and visual A5.

KRLD Radio Corp., Dallas, Texas—Construction permit for a new commercial television broadcast station to be operated on Channel #2, 54-60 mc., ESR of 1500 and power of 4 KW (peak) and aerial 3 KW. Amended to change frequency from Channel #2, 54-60 mc., to Channel #4, 65-72 mc., change transmitter, and transmitter locations and make changes in antenna system.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

KBNH—Boulder City Broadcasting Co., Boulder City, Nev.—License to cover construction permit (B5-PBY-305) which authorized a new relay broadcast station.

NEW—Gates Radio Co., Quincy, Ill. (P. O. 123 Hampshire St.)—Construction permit for a new developmental broadcast station to be operated on Channel #2, 54-60 mc., or as assigned by chief engineer of FCC.

W47C—WJJD, Inc., Chicago, Ill.—Modification of construction permit (B4-PH-17), as modified and which authorized a new high frequency broadcast station, changes in antenna system.

NEW—Independent Broadcasting Co., Des Moines, Iowa (P. O. 500 Bankers Trust Bldg.)—Construction permit for a new FM broadcast station to be operated on Channel #265, 1062 mc., or as assigned by chief engineer of FCC and coverage of 33,542 square miles.

NEW—American Colonial Broadcasting Corp., San Juan, Puerto Rico (P. O. Box 772, Arecibo, P. R.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage of 21,500 square miles. Amended to make minor changes in transmitter location and to specify class of station.

NEW—Independent Broadcasting Co., Des Moines, Iowa (P. O. 500 Bankers Trust Bldg.)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 21,500 square miles. Amended to make minor changes in transmitter location and to specify class of station.

NEW—Southern Broadcasting Corp., San Antonio, Texas.—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC and coverage of 21,500 square miles. Amended to make minor changes in transmitter location and to specify class of station.

NEW—Burlington-Graham Broadcasting Co., Burlington, N. C.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #21, 1013 mc., or as assigned by FCC and coverage of 4,352.96 square miles, or as assigned by FCC. Amended to change class of station, frequency from 1013 mc. to 1014 to 1015 band, coverage from 4,352.96 to 673 square miles, population from 345.475 to 60.481, type of transmitter, make changes in others, directors and stockholders and make changes in antenna system.
NEW—H. L. Corley tr/ as Corley Radio & Sound Service, Area of Trinidad, Colo. (P. O. So. Country Club Dr.)—Construction permit for a new relay broadcast station to be operated on 30.83, 33.74, 35.82 and 37.98, power of 15 watts and A3 emission.

WAFY—Minnesota Broadcasting Corp., Area of St. Paul and Minneapolis, Minn.—Modification of license to increase power from 25 watts to 50 watts.

Burns Avenue Baptist Church, Detroit, Mich.—Extension of authority to transmit programs from Burns Avenue Baptist Church at Detroit, Mich., to Station CKLW, Windsor, Canada, for period beginning October 10, 1946.

APPLICATION RETURNED

KXI—KXL Broadcasters, Portland, Ore.—Construction permit to increase power from 10 to 50 KW, install new transmitter, and change frequency to 1480 kc., power of 5 KW, daytime hours of operation and directional antenna.

APPLICATIONS TENDERED FOR FILING

550 Kilocycles

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Consent to assignment of license to WGR Broadcasting Corp.

NEW—Midland Broadcasting Co., Kansas City, Mo.—Construction permit for a new standard broadcast station to be operated on 550 kc., power of 5 KW, daytime hours of operation and directional antenna.

KFXD—Frank E. Hurt & Son, a partnership composed of Frank E. Hurt and Edward P. Hurt, Nampa, Idaho.—Construction permit to install new transmitter, change transmitter location and make changes in directional antenna system.

730 Kilocycles

WTIK—Durham Broadcasting Co., Inc., Durham, N. C.—Construction permit to change power from 500 watts to 1 KW, and daytime hours of operation.

1110 Kilocycles

NEW—Oneonta Broadcasting Co., a partnership comprised of John Nazak and Joanne May Levke, Oneonta, N. Y.—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 250 watts, and daytime hours of operation.

1140 Kilocycles

WSIV—Pekin Broadcasting Co., Pekin, Ill.—Construction permit to change power from 250 watts to 1 KW, and install new transmitter.

1230 Kilocycles

NEW—Howard J. Toms, Greenville, S. C.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 100 watts and unlimited hours of operation.

NEW—Gene Burke Brophy, Nogales, Ariz.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1240 Kilocycles

NEW—Odes E. Robinson, Bluefield, W. Va.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1310 Kilocycles

WGH—Hampton Roads Broadcasting Corp., Newport News, Va.—Construction permit to change frequency from 1310 to 1340 kc., power from 250 watts to 5 KW, install new transmitter and change transmitter location and install directional antenna for day and night use.

1400 Kilocycles

NEW—Montana Broadcasting and Television Corp., Missoula, Mont.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1450 Kilocycles

NEW—Norbert Bernard Donze and Elmer Lawrence Donze, a partnership, d/b as The Donze Co., Ste. Genevieve, Mo.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

1460 Kilocycles

WJPF—Orville W. Lyerla, Herrin, Ill.—Construction permit to change frequency from 1460 to 1480 kc., power of 250 watts to 1 KW and install new transmitter and directional antenna for night use.

1480 Kilocycles

KANS—Kansas Broadcasting, Inc., Wichita, Kans.—Construction permit to change frequency from 1480 to 1490 kc., power of 250 watts to 1 KW day, install directional antenna night, new transmitter and change transmitter location.

1490 Kilocycles

NEW—Community Broadcasting Co., Fort Worth, Texas—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Edward J. Harpole, William T. Kemp, and W. J. Harpole, a partnership d/b as Uvalde Broadcasters, Uvalde, Texas—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Anilos Broadcasting Corp., Hagerstown, Md.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Abe B. Harris, Ruston, La.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1510 Kilocycles

NEW—Marin Broadcasting Co., Inc., San Rafael, Calif.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 1 KW and daytime hours of operation.

1590 Kilocycles

NEW—Nonpareil Broadcasting Co., Council Bluffs, Iowa—Construction permit for a new standard broadcast (Continued on next page)
station to be operated on 1590 kc., power of 5 KW, directional antenna and unlimited hours of operation.

WCKA—Commonwealth Broadcasting Corp., Norfolk, Va.—Construction permit to change studio location from Portsmouth to Norfolk, Va.

Federal Trade Commission Actions

COMPLAINTS

No complaints were issued by the Commission during the past week.

STIPULATIONS

Acorn Chicks, Inc., and Max Kraft and Rose Kraft, 72 North Pennsylvania Ave., Morrisville, Pa., entered into a stipulation with the Commission to cease and desist from falsely representing that they own or control a poultry farm or hatchery in connection with the interstate sale of chicks. (4171)

American Dairies, Inc.—The Commission approved a stipulation in which American Dairies, Inc., 2438 Broadway, Kansas City, Mo., agrees to cease and desist from misrepresenting the therapeutic properties of a poultry and livestock feed designated A.B.C. Condensed Butter Milk. (03325)

Coordinators Corporation—Mailing of books or other publications for which a charge is made without a bona fide order of purchase is prohibited under the terms of a stipulation accepted by the Commission from Coordinators Corporation and Arnold R. Baar, Victor Herbert and Harry E. Sheasby, 11 South LaSalle St., Chicago. (4167)

Corley Diet Foods Co.—Advertisements of a laxative preparation under the name of Dr. Corley’s LaXX must reveal that the advertiser is not a doctor of medicine, under the terms of a stipulation accepted by the Commission from H. L. Corley, trading as Corley Diet Foods Co., 638 Market St., San Francisco, and Rufus Rhoades and Robert O. Davis, co-owners, trading as Rhoades & Davis, of the same address. (03324)

Finkelstein Bros.—Informative labeling of umbrellas to disclose the rayon content of their fabric coverings is required in a stipulation accepted by the Commission from Harry Finkelstein, trading as Finkelstein Bros., 11 West 30th St., New York. (4170)

Karnack-Ambrosia Co.—Casimir Albert Lesiak, trading as Karnack-Ambrosia Co., 722 Eynon St., Scranton, Pa., entered into a stipulation with the Commission to cease and desist from misrepresenting the therapeutic properties of three medicinal preparations. (03326)

Mennen Co.—Under the terms of a stipulation approved by the Commission, the Mennen Co., 345 Central Ave., Newark, N. J., agrees to cease and desist from representing that Mennen Antiseptic Oil is either self-sterilizing or germicidal. (03327)

National Church Goods Supply Co.—The Commission approved a stipulation in which National Costumers and Manufacturing Co., trading as National Church Goods Supply Co., and National Academic Cap & Gown Co., 821 Arch St., Philadelphia, together with its officers, agrees to cease and desist from false and misleading advertising in connection with the sale of ecclesiastical supplies. Officers of the corporation joining in the stipulation are Emanuel I. Cohen, Daniel R. Cohen and Abraham Kadis. (4169)

Sea Island Mills, Inc.—The Commission accepted from Sea Island Mills, Inc., 53 Worth St., New York, a stipulation to cease and desist from falsely representing that it owns or controls any mills where its textile fabrics are manufactured. (4166)

The Carey Salt Co., Hutchinson, Kans., and McJunkin Advertising Agency, 228 North LaSalle St., Chicago, entered into a stipulation with the Commission to cease and desist from misrepresenting the ingredients and therapeutic properties of Carey’s Mineral Supplement Salt for Livestock. (03323)

CEASE AND DESIST ORDER

A. P. W. Paper Co., Inc., Albany, N. Y., may continue to use the Red Cross name and symbol in the sale of toilet tissue and paper towels, but labels and advertisements of the products must contain a statement disclaiming any connection with the American National Red Cross, under the terms of a modified cease and desist order issued by the Commission. (4747)
New Part I of Rules Procedure Announced;  
NAB to Attend FCC Seminar on Revisions

The new Part I of the FCC Rules and Regulations relating to Organization and Practice and Procedure is completed and will be released on Wednesday (4), the Commission announced last week.

Because of the important nature of the rules and the length of the new Part I (approximately 150 pages), advance copies (not for publication) have been made available to members of the bar and the press for advance study, in order that interested parties might become familiar with the new rules. A seminar, to discuss the new rules is scheduled at the Commission’s offices in Washington for Tuesday (3).

NAB’s Legal Department will attend the seminar, which will be conducted by Assistant General Counsel Harry M. Plotkin of the FCC. At the seminar, questions on the new Part I will be considered, and suggestions for future amendments will be accepted for study.

NAB is planning to reprint the new Part I for distribution.

JUDGE MILLER NAMED TO UNESCO COMMISSION

NAB President Justin Miller was named last week to serve as the representative of the radio broadcasting industry on the National Commission for Educational, Scientific and Cultural Cooperation.

Assistant Secretary of State William Benton was advised of this action by letter in response to the State Department’s invitation to NAB to name a representative.

The National Commission is being created to advise the State Department on matters relating to the United Nations Educational, Scientific and Cultural Organization. The NAB is one of fifty organizations which have been invited to serve on the Commission to provide a link between UNESCO and national and local groups.

Two Rate Structure Found Most Prevalent

In Survey Conducted on Rate Card Practices

A study to determine the extent of the practice of charging multiple rates to advertisers has been completed by the NAB Research Department.

The study, made among NAB member stations only, was undertaken at the request of the Sales Managers Executive Committee. Replies were received from 82% of the stations. The questions which were asked together with the conclusions to be derived from a tabulation of the answers are as follows:

“How many rates do you now have for the same period of the day (local rates, national, regional, etc.)?”

Nearly three-fourths of the respondents have two rates for the same period of the day. The practice of charging two and three rates is more prevalent among the smaller stations and in the medium and small cities and towns. No station reported more than three rates.

“What do you call these rates, e.g., what names do you use for them (local, regional, general, national, etc.)?” “Are these rates commissionable to an advertising agency?”

“Local” and “National” are used together almost four times as frequently as “Retail” and “General,” although “General Rates” is the term most frequently used by the one-rate stations. Usually the latter designate their rates simply by their call letters.

The “General” or “National” rates of all respondents are commissionable to an advertising agency. A little more than three-fourths of the “Local” or “Retail” rates are not commissionable.

“Please state your definition of each kind of rate; tell us what type of account qualifies for each.”

There is a conspicuous lack of uniformity among respondents in these stipulations. The most frequently mentioned qualifications for the “Na- (Continued on page 680)
FCC PLANS TO SIMPLIFY APPLICATION FORMS

The Federal Communications Commission is currently announcing changes in forms which must be filled out by applicants and licensees in supplying information requested by the Commission. In general, these changes are in the direction of simplification. Short-cut changes are also being made in the procedures required for certain actions and authorizations by the Commission. Most of the changes announced to date affect aircraft, police, fire, forestry and other mobile operations.

In the process of revision, however, are several of the forms used commonly by standard broadcast licensees. The changes will mostly be toward simplification of some of the present forms, although it is known that there are plans to expand at least one of the schedules now a part of Form 324.

Also, in keeping with its earlier announcement, the Commission plans to revise certain of the forms so that they will include information implementing the “Blue Book.” It now appears that the suggested revisions of these forms will be submitted to the Budget Bureau for approval sometime during September and that the Industry’s advisory committee, headed by Wayne Coy, WINX, will be requested to make its recommendations at that time.

In any event, NAB urges that station managers keep themselves informed of the current status of this matter so that they will not fill out unnecessary forms and so that their records may be kept in such a way that the forms can be filled out as easily as possible.

Employee-Employer Relations

NLRB FINDS WSAV STRIKE LEGAL; DIRECTS REINSTATEMENT OF FIVE EMPLOYEES WITH BACK PAY

The National Association of Broadcast Engineers and Technicians strike at WSAV, Rochester, which began August 12, 1945 was declared legal by the National Labor Relations Board last Monday (26) and the Station was directed to offer reinstatement with back pay from November 10, 1945 to five transmitter and studio operators.

The Station had contended that the strike was illegal, being designed to compel compliance with a War Labor Board directive and also in violation of the strike notice provisions of the War Labor Disputes Act. While one member of the Board agreed with this contention, and consequently would have denied reinstatement and back pay, the majority concluded that the strike was not illegal and that the employees had lost their job rights.

The Board made a significant observation regarding strike activity. One Company contention had been that strikers should not be reinstated because on the morning of the strike it was discovered that the control room had been put out of operation by the removal of tubes and plugs. As a result, the station was off the air for about an hour. While finding the evidence insufficient to link any of the strikers with the sabotage, the Board said it “would have considered such misconduct as sufficient justification for discharge of an employee who had been clearly and unmistakably identified as a participant.”

In addition to the reinstatement and back pay provisions of its decision, the NLRB ordered the Station to bargain with NABET, refrain from questioning employees with regard to their union sentiments, and post appropriate cease and desist orders.

KLZ ISSUES BROCHURE ON NEWS DEPARTMENT

The news department of KLZ, Denver, is the subject covered in a brochure, “Hear Ye . . . Hear Ye . . .”, recently distributed to a list of several thousand by General Manager Hugh B. Terry.

(Continued on next page)
The two following paragraphs are quoted from the brochure because they describe the aims of the news department:

“To KLZ, newscasting is more than tearing a page from a newsprinter and reading it on the air. It is the cultivation of official sources of news, the development of private 'pipe-lines,' the maintaining of 'legmen' for local newsgathering and a full-time staff with years of newsgathering know-how to screen and edit raw material for the air. This is the complete way—the KLZ way—to serve more adequately the many thousands of listeners to whom news is one of the most important services of radio.

“KLZ keeps in mind the hometown listener, as well as those in remote communities who look to radio as their chief source of news. These listeners want more than national and international news. They want news from their own locality, region and state. To give them a really complete localised news service in addition to that of a greater scope, KLZ maintains a network of 36 regional correspondents who file news direct to KLZ by wire or telephone. Two major wire services, AP and INS, plus other news sources, make KLZ's news service complete.”

Inside front cover pictures News Editor Earl E. McCain. He has had twenty-five years of newspaper, magazine and radio experience. He was a reporter and rewrite man on the Pueblo Star Journal, night editor of the Denver Post and a fiction writer.

Broadcast Advertising

**DEALER-COOPERATIVE ADVERTISING STUDY UNDER WAY**

Work has begun on a survey by the NAB Broadcast Advertising and Research Departments of manufacturers' use of radio advertising on a dealer-cooperative basis.

Through the cooperation of 122 member stations, NAB in 1942 issued a national tabulation of manufacturers engaging in dealer-cooperative radio advertising. Since no studies were made during the war years, the present list is partially out of date, although it is useful to some extent. Copies are still available upon request to the Department of Broadcast Advertising.

As part of the survey, a questionnaire is being mailed to a selected list of manufacturers requesting information on their dealer-cooperative plans and policies. When returns are in, a booklet will be published showing firms' name, address, products and percentage of advertising costs borne by manufacturers. Based on problems that will be ascertained from the responses, suitable follow-up work will be done.

This project, approved at the last Sales Managers Executive Committee meeting in Washington, is in keeping with the resolution adopted at the recent NAB 15th District meeting, requesting that NAB "make every effort to obtain equal recognition for radio with other media on dealer-cooperative advertising."

**NRDGA SURVEY AVAILABLE**

The NAB has secured a supply of copies of the NRDGA survey, “Radio as a Retail Advertising Medium.”

If you wish to receive a copy, send a postcard or letter to NAB Department of Broadcast Advertising, 1760 N St., N. W., Washington 6, D. C.

**JOSKE REPORT PRINTING MOVED OUTSIDE WASHINGTON**

Because of delay in publication of the Joske report on radio advertising for retailers, caused by printing difficulties in Washington, it was decided last week to move the job to another city.

Publication of the report will go forward with all possible speed, to facilitate its release to NAB member stations and to retailers.

**TWO PER INQUIRY DEALS REPORTED**

Member stations have reported to NAB headquarters that business has been offered to them on a contingent basis by The Shotgun News and the Catholic Digest. NAB has written the publications advising them of the industry's attitude against per inquiry advertising. A copy of the resolution adopted at the 1942 NAB convention was also forwarded.

**ONE STORY—TWO VERSIONS**

"Member stores of the newly formed Retail Furniture Advertising Institute will be urged to make wider use of newspaper space and advised how to integrate their advertising expenditures to gain more complete coverage, it was learned yesterday. Furniture retailers ‘are not getting the most out of their advertising dollar,’ in the opinion of Francis H. Royer, president of the institute, which will function as a common advertising agency for its member stores. In the country-wide picture, he asserted, newspapers, spot radio and direct mail are the most popular media with furniture retailers, and of these spot radio receives more than half of the advertising budget. The reason advanced for this, he continued, is that generally the retailers haven’t had specific merchandise to sell and subscribe to radio spots to issue general selling messages, such as inviting listeners to come to their stores and ‘inspect new stock arriving daily.’"

"I did discuss ... the quantity of radio advertising used by many furniture stores and stated that many of our members were devoting as much as half of their budgets towards radio. This is largely due to the fact that it is much easier for many of the stores to advertise on the radio than in newspapers and direct mail, because of the ease with which material can be turned over to the radio station. It seems that in

SOME LAST-MINUTE FCC ACTIONS
(Further coverage of FCC actions announced on Friday (30) will be carried in next week's REPORTS)

AM Applications Granted

NEW—David W. Ratliff, Stamford, Texas—Granted CP(*) for a new station to operate on 1400 kc., 250 watts, unlimited time. (B3-P-4932)

NEW—Broadcasting Co., Goose Creek, Texas—Granted CP(*) for a new station to operate on 650 kc., 250 watts, daytime only. (B3-P-4867)

NEW—Wm. L. Warner, d/b/a WSB Radio Station, Richfield, Utah—Granted CP(*) for a new station to operate on 930 kc., 1 kw, daytime only. (B3-P-4877)

NEW—Greater Huntington Radio Corp., Huntington, W. Va.—Granted CP(*) for a new station to operate on 800 kc., 1 kw, daytime only; also subject to condition that a waiver of Secs. 3.55(b) and 3.60 of the rules is granted. (B2-P-3826; Docket 6842)

NEW—Palmetto Radio Corp., Columbia, S. C.—Granted CP(*) for a new station to operate on 1230 kc., 250 watts, unlimited time; also condition to any interference which may be caused to Augusta Chronicle Broadcasting Co.'s application on the same frequency if granted. (B3-P-4905)

NEW—Frederick A. Knorr, Harvey R. Hansen and Wm. H. McCoy, d/b/a Suburban Broadcasters, Dearborn, Mich.—Adopted Decision and Order granting CP(*) for a new station to operate on 1540 kc., 1 kw, daytime only; also ordered that the application (B2-P-4441; Docket 7384) of Henry F. Fett requesting the same facilities in Dearborn be denied.

(*) Subject to condition that applicant, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Standards.

FM Final CP's Granted

The following permittees were granted regular construction permits. (Note: Power given is effective radiated power; antenna height given is height above average terrain):

Sugisawa Broadcasting Co., Sugisawa, Mich.—Class B; Channel: 99.3 mc. (No. 252): 15 kw; 410 feet. (B2-PH-195)

Inland Broadcasting Co., Omaha, Neb.—Class B; Channel: 92.1 mc. (No. 221): 330 kw; 700 feet. (B4-PH-390)

Kingsley H. Murphy, Des Moines, Iowa—Class B; Channel: 101.3 mc. (No. 267): 174 kw; 505 feet. (B4-PH-620)

Capitol Broadcasting Co., Inc., Raleigh, N. C.—Class B; Channel: 95.3 mc. (No. 257): 12 kw; 615 feet. (B3-PH-861)

Palm Beach Broadcasting Corp., Palm Beach, Fla.—Class B; Channel: 97.9 mc. (No. 259): 7.2 kw; 310 feet. (B3-PH-878)

Nevada Broadcasting Co., Las Vegas, Nev.—Class A; Channel: 101.3 mc. (No. 282): 330 watts; 125 feet. (B5-PH-278) (*)

Contra Costa Broadcasting Co., Richmond, Calif.—Class A; Channel: 101.7 mc. (No. 284): 500 watts; 340 feet. (B4-PH-347) (*)

Tri-Suburban Broadcasting Corp., Silver Spring, Md.—Class A; Channel: 101.3 mc. (No. 282): 440 watts; 360 feet. (B1-PH-875) (*)

(*) In lieu of previous conditions specified.

Commercial Television Application Granted

WJAC, Inc., Johnstown, Pa.—Granted CP for a new station: Channel 14 (143): effective peak power radiated: 9 kw visual, 6.8 kw aural; antenna height 971 feet. (B2-PCT-93)

AM License Renewals

Granted renewal of following station licenses for the period ending November 1, 1948:

WADC, Tallmadge, Ohio: WNBF, Binghamton, N. Y.; WXEL, San Juan, P. R.; KHSIL, Chico, Calif.; WATR, Waterbury, Conn. (Com. Durr voting for further inquiry.)

Granted renewal of following station licenses for the period ending May 1, 1949:

WDGY—Twin Cities Broadcasting Corp., Minneapolis, Minn. Granted renewal of license for the period ending May 1, 1948. (B3-P-669)

KOTV—Universal Broadcasting Corp., Pine Bluff, Ark.—Granted renewal of license for period ending August 1, 1948.

WDEY—Lloyd E. Squier & William G. Ricker, d/b/a Radio Station WDEY, and Ernest C. Perkins, Executor of Estate of Wm. G. Ricker, Waterbury, Vt.—Granted renewal of license for period ending May 1, 1949.

WKAQ & aux.—Radio Corp. of Porto Rico, San Juan, P. R.—Granted renewal of license for period ending May 1, 1949.

KIUL—Frank D. Comard, d/b/a Radio Station KIUL, Garden City, Kans.—Granted renewal of license for period ending August 1, 1949.

DATE SET FOR TELECOMMUNICATIONS CONFERENCE

The State Department announced late Friday (30) that the date for the preliminary five power Telecommunications Conference in Moscow has been set for Sept. 28. China, France and the United Kingdom have also been invited to attend the conference to hold informal preliminary discussions prior to the proposed World Telecommunications Conference.

NAB is considering the advisability of naming an industry observer if attendance of observers at the conference is approved.

Details of the proposed agenda for the Moscow meeting will be published in REPORTS next week.

Two Rate Structure Found Most Prevalent

In Survey Conducted on Rate Card Practices

(Continued from page 677)

...ational" or "General" rate are that the account be placed by an agency and that the product be nationally distributed. For the "Local" or "Retail" rates, the most frequently mentioned qualification was that the account be a "bona fide" retailer, but there is little agreement as to the definition of such a dealer or what type of advertising he may place.

"What rate do you charge when a retailer buys time to advertise a nationally distributed product?"

About two-thirds of the respondents charge the "Local" or "Retail" rate. This represents about 80% of stations which have two or three rates. These rates are predominantly non-commissionable.

"What rate do you charge to local dealers, distributors or jobbers of nationally distributed products?"

The local wholesaler or distributor is usually charged more than the retailer, the chief exception being in the case of the small stations, about half of whom charge a local, non-commissionable rate for wholesalers.

A complete analysis of the findings of this study has been sent to the participating stations.
many small and medium size stores, all a dealer need do to advertise in radio is give the station a brief outline of the message and then it is carried out by the station. While in newspaper and direct mail, there is a great deal of detail to carry out.”

—FRANCIS H. ROYER, in a letter to HUGH M. P. HIGGINS, NAB, Aug. 27, 1946.

Small Market Stations

NAB MANAGEMENT STUDY #2 TO BE RELEASED THIS WEEK

The second in the series of management studies of small market stations, made at the direction of the NAB Small Market Stations Executive Committee, will be released this week. This is a study of a 250-watt full time NBC affiliate, located in a midwestern city of 10,000 to 13,000 population.

This station has done an outstanding job in selling national spot business, its 1945 net volume being $29,000. The sale of station time to the network in that year amounted to more than $12,000.

The Radio Management Study is being mailed to all NAB members in the small market station classification (less than 5000 watts in cities of 50,000 or under). Larger stations desiring the series should send their requests to NAB Small Market Stations Division.

Public Interest Programming

REINSCH, SPEAKING AT BAPTIST RADIO MEETING, ADVOCATES RELIGIOUS PROGRAMS FOR TEEN-AGERS

Development of teen-age programs that provide spiritual guidance is today’s challenge to radio and religious leaders, according to J. Leonard Reinsch, director of the Cox radio stations and radio advisor to President Truman. Speaking at the Baptist Radio Conference in Ridgecrest, North Carolina, Sunday, August 25th, Reinsch said that the major religious appeal in radio has been to the church-going adult who least needs help. He stated that one of the solutions to the juvenile delinquency problem could be radio programs with a religious theme, that attract and hold the attention of teen-agers.

He suggested that the appeal of the present religious programs should be broadened to reach the unchurched. Church attendance, he said, can be increased with the proper use of radio just as attendance at athletic events has increased by radio.

Urging religious leaders to use radio more effectively, Mr. Reinsch advised a study of surveys, successful religious broadcasts, leading commercial programs, audience trends and the effects of competition. Also discussed was the scientific future of radio, including television and facsimile. Wisely used, Mr. Reinsch concluded, these technical advancements in radio may develop a new era in religious tolerance and understanding.

INDUSTRY REQUESTED TO DEVELOP MORE PROGRAMS TO TEACH DEMOCRATIC IDEALS TO YOUNGSTERS

In a letter to NAB signed by Kenneth M. Birkhead, Executive Director, Friends of Democracy, the radio broadcasting industry is requested to develop additional children’s programs to educate young listeners in democratic concepts. The letter, dated August 26, was signed by Mr. Birkhead on behalf of a group of 18 organizations.

Text of the letter follows:

“Education in democracy cannot begin at too early an age. This applies not only in the field of learning to live together in ways which enhance individual personalities and, at the same time, teach social obligations, but it also applies in the area of indoctrinating young minds with democratic concepts of social, economic and political life.

“The success of the Nazi educational program for children testifies to the receptivity of youthful minds to theories in these fields. Democracy can and must be taught with equal success.

“Radio has tremendous potentialities as an educational medium and should be used to its fullest possibilities. Programs for children must entertain, appeal to fantasy, and yet be mixed with reality. They should also create young people who believe in and act for the extension of democracy.

“Less thought seems to have been given to this responsibility than has been given in the case of programs for adults—a recent, notable exception being the “Superman” radio show. This program, while still holding the listener interest by highlighting the physical exploits of Superman, has had him exploring the workings of organizations teaching prejudice and bigotry. The machinations of the anti-democratic movements have been presented forcibly to the listener, and the necessity of combating these groups demonstrated. Listener response indicates that the idea of the show has been grasped and the program appreciated.

“Radio must not feel, however, that one such program fulfills its responsibility. The young people of today are tomorrow’s citizens and leaders.

“We, therefore, call upon the radio industry to develop programs for the younger mind which will expand the start already made, and fulfill its potentialities as a creator extraordinary of good citizens for tomorrow.

“Yours for democracy.”

Mr. Birkhead’s letter was sent on behalf of the following organizations:

Americans United for World Government;
Church League for Industrial Democracy;
Committee of Catholics for Human Rights;
Council for Democracy;
Friends of Democracy;
Independent Citizens Committee of the Arts, Sciences and Professions;

(Continued on next page)
League for Fair Play;  
Methodist Federation for Social Services;  
National Association for Advancement of  
Colored People;  
National Citizens Political Action Committee;  
National Lawyers Guild;  
New York Educational Action Group;  
Society for the Prevention of World War III;  
Southern Conference for Human Welfare;  
Union for Democratic Action;  
United Christian Council for Democracy;  
American Veterans Committees;  
Council Against Intolerance.

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of September 9-15, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Atomic Energy

Man's control of atomic energy has created the most serious problem ever to face this nation and the world. The problem of how to prevent the use of scientific knowledge for destructive purposes, and to promote its use for the benefit of mankind, is one that is immediate and personal to every man, woman and child. The overwhelming majority of scientists and experts who developed the atomic bomb agree that: (1) the atomic bomb is primarily a weapon against cities and concentrations of people. (2) Present-day atomic weapons could kill 30 per cent or more of a country's population and destroy most of its industry in attacks on its major cities over a short period of time. More powerful atomic bombs are possible. (3) There is no effective defense against atomic bombs and none can be expected. (4) No single big secret protects the atomic bomb. Other nations could perfect atomic bombs within as little as three to five years, and many powers have access to the necessary raw materials. To the United Nations Atomic Energy Commission, the representative of the United States, Mr. Bernard Baruch, has submitted a plan as a basis for beginning a discussion on control measures to be taken. To eliminate atomic weapons, the United States plan maintains, all development and use of atomic energy must be controlled, starting with the placing under international control of the dangerous raw materials, uranium and thorium. The United States plan, therefore, proposes the creation of an international Atomic Development Authority which would assume control (including ownership if necessary) of all atomic energy activities potentially dangerous to world security, actively conduct atomic research, and supervise through license and inspection all atomic activities throughout the world. To such an Authority we would in time disclose any exclusive knowledge of atomic energy in our possession—but we urgently asks help in a concurrent back-drop campaign, for which its own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and the intelligence service officers. Except in war time Americans have always had a poor opinion of peace time soldiers. Actually, the new American Army of today is a compact, carefully chosen group of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of that peace for which thousands of other young Americans have already died. Your programs can aid in building public respect and enforce the peace and fulfill our obligations as a member of the United Nations Organization. (Fact Sheet, No. 2-B)

Home Canning

Since a considerable part of our customary American food supply is going overseas for the relief of hunger-ridden millions, we are currently experiencing—and will continue to experience—a scarcity of certain foods such as wheat products, fats and oils. Housewives of America are urged to help compensate for this scarcity and save their families' food supply this coming winter by canning, preserving and storing as much of the so-called "alternate foods" as possible. Under the circumstances, waste—either through failure to preserve our surplus garden yield, or doing it inefficiently and carelessly. Housewives therefore should be urged to remember that the following points are of top importance: (1) Can, preserve and store as much as possible from Victory Gardens. Make your garden serve you all year. (2) When markets feature abundant supplies of locally-grown, good quality produce available for home preservation, take maximum advantage of the opportunity to build up food stocks for next winter. (3) Lay in supplies of containers and equipment early to enable manufacturers to gauge demand. (4) Conserve your sugar for canning purposes. Follow the wartime rate of 1 pound of sugar to 4 quarts of finished fruit. (5) Use only safe, tested methods, backed by scientific research. Take no chances on accidents, spoilage, unnecessary loss of food value. Study methods recommended for different foods; get competent advice. Consider freezing, pickling, brining, drying and storing, as well as canning, for different types of produce. (Fact Sheet, No. 24-A)

Building Our New Army

Congress has authorized a peace time American Army larger and better trained than ever before in history. This Army is now being recruited by voluntary enlistment. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent back-drop campaign, for which its own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and the intelligence service officers. Except in war time Americans have always had a poor opinion of peace time soldiers. Actually, the new American Army of today is a compact, carefully chosen group of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of that peace for which thousands of other young Americans have already died. Your programs can aid in building public respect and enforce the peace and fulfill our obligations as a member of the United Nations Organization. (Fact Sheet, No. 2-B)

Federal Communications Commission Docket

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated.

(Continued on next page)
FCC ACTIONS

MISSCELLANEOUS ACTIONS

WTHT.—The Hartford Times, Inc., Hartford, Conn. — Adopted a decision and order denying petition of WTHT requesting that the Commission's decision of May 16, 1946, granting the application of Mitchell G. Meyers, et al., Waterbury, Conn., for a C. P. (B1-P-4083), for a new station to operate on 1200 kc., 250 watts, unlimited time, be vacated and said application designated for hearing with leave to petitioner to intervene in the hearing. (B1-P-1083; Docket 6850)

WHTM.—Piedmont Broadcasting Co., Danville, Va.—Denied petition for review of the Aug. 9th action of the Presiding Officer of the Motions Docket, denying WHTM's petition for leave to amend its application so as to change frequency and make other changes, and requesting the Commission to grant the petition without oral argument or designate the matter for oral argument before the Commission en banc, and affirmed said action of Presiding Officer of Motions Docket.

WTSB.—Robeson Broadcasting Corp., Lomberton, N. C.—Granted license to cover CP authorizing a new station to operate on 1310 kc., 250 watts, unlimited time. (B3-L-2091.) Also authority to determine operating power by direct measurement. (B3-Z-1915.) Waiver of Sec. 3.50 of rules granted; conditions.

WPUS.—Southwest Broadcasting Co., Pulaski, Va.—Granted license to cover CP for a new station to operate on 1290 kc., 250 watts, unlimited time. (B2-L-1975.) Also authority to determine operating power by direct measurement. (B2-Z-1759.) Waiver of Secs. 3.55(b) and 3.56 of rules granted; conditions.

KXYL.—Fox Broadcasting Co., Alexandria, La.—Granted modification of CP which authorized a new station to change type of transmitter, approval of antenna, and change studio location to Belton Ave. at Highway 71, Alexandria, and change studio location to Belton Ave. at Highway 71. (B3-Z-1978.) Also authority to determine operating power by direct measurement. (B3-L-2091.) Also authority to determine operating power by direct measurement. (B3-Z-1978.)

KSYL.—Fox Broadcasting Co., Alexandria, La.—Granted modification of CP which authorized a new station, to change type of transmitter, approval of antenna, approval of transmitter location at Belton Ave. at Highway 71, Alexandria, and change studio location to Belton Ave. at Highway 71. (B3-MP-198.) Also authority to determine operating power by direct measurement. (B3-Z-1978.)

KSYL.—Fox Broadcasting Co., Alexandria, La.—Granted modification of CP which authorized a new station, to change type of transmitter, approval of antenna, approval of transmitter location at Belton Ave. at Highway 71, Alexandria, and change studio location to Belton Ave. at Highway 71. (B3-MP-198.) Also authority to determine operating power by direct measurement. (B3-Z-1978.)
**DESIGNATED FOR HEARING**

Stanley S. Beanhaire and W. Keith Topping, d/b as Hanford Broadcasting Co., Albemarle, N. C.; Union Broadcasting Co., Joplin, Mo.—Designated for consolidated hearing the application of Hanford Broadcasting Co., with application of The Macomb Broadcasting Co., for a new station to operate on 1310 kc., 250 watts, daytime only, at Clinton and Macomb, Ill., respectively.

Albemarle Broadcasting Co., Albemarle, N. C.; Union Broadcasting Co., Monroe, N. C.—Designated for consolidated hearing the application of Albemarle Broadcasting Co. (B3-P-4901), to operate on 1010 kc., 250 watts, daytime only, with application of Okla. Agr. and Mechanical College (B3-P-4874), to operate on 1010 kc., 250 watts, daytime only, at Clinton and Monroe, respectively.

Democratic Printing Co., a partnership composed of R. F. Story and Bennett Story, Durant, Okla.; Okla. Agr. and Mech. College, Stillwater, Okla.—Designated for consolidated hearing the application of Democratic Printing Co. (B3-P-4597) for a new station to operate on 750 kc., 250 watts, daytime only, with application of Okla. Agr. and Mechanical College (B3-P-4748), for a new station to operate on 500 kc., with 10 kw, daytime only, at Durant and Stillwater, Okla., respectively.

Edward L. Schacht, Oneonta, N. Y.—Designated for hearing the application of WLBG, Inc., Laurens-Clinton, S. C.—Designated for consolidated hearing the application of Oneonta Broadcasting Co., Inc., for a new station to operate on 1400 kc., with 250 watts, unlimited time, at Oneonta, N. Y., and ordered that the Adirondack Broadcasting Co., WABY, be made a party to the proceeding.

Anderson Broadcasting Co., Inc., Anderson, S. C.; WLBG, Inc., Laurens-Clinton, S. C.—Designated for consolidated hearing the application of Anderson Broadcasting Co., Inc. (B3-P-4865) for a new station to operate on 800 kc., 1 kw, daytime only, with application of WLBG, Inc. (B3-P-4575), for a new station to operate on 800 kc., 250 watts, daytime only, at Anderson and Laurens-Clinton, S. C., respectively.

Four States Broadcasters, Inc., Joplin, Mo.; WMBH—Joplin Broadcasting Co., Joplin Mo.—Designated for consolidated hearing the application of Four States Broadcasters, Inc. (B3-P-4865), for a new station at Joplin to operate on 1310 kc., 5 kw-LS, 1 kw night, unlimited time, DA-night, with application of WMBH (B4-P-5010) to change facilities from 1450 kc., 250 watts, unlimited time, to 1510 kc., 1 kw, 5 kw-LS, unlimited time, DA-AM.

**Correction**

According to a correction by the Commission, the item on p. 693 of last week's REPORTS referring to Evening Journal Pub. Co. is corrected to read as follows:

Evening Journal Pub. Co., Martinsburg, W. Va.; Antietam Broadcasting Corp., Hagerstown, Md.—Designated for consolidated hearing the application (B1-P-1197) for a new station at Martinsburg, W. Va., with application (B1-P-5356) for a new station at Hagerstown, Md., both applicants requesting 1490 kc., 250 watts, unlimited time.

**ACTIONS ON MOTIONS**

**WCMJ**—Ashland Broadcasting Co., Ashland, Ky.—The Commission, on its own motion, ordered that the hearing now scheduled for Aug. 29 at Washington, in re application for CP (Docket 7365) be continued without date until further order of the Commission.

**John H. Fitzgibbons et al**, Salem, Ore.—The Commission, on its own motion, ordered that the consolidated hearing on applications of Fitzgibbon, et al., and B. Loring Schmidt, Salem, Ore., now scheduled for Aug. 26, be continued to Sept. 23, and the issues upon which said applications will be heard were enlarged to include a determination as to whether the operation of a proposed station in Oregon City on 1230 kc., operating with either 100 watts or 250 watts, unlimited time, would involve objectionable interference with any existing or proposed broadcast station, and if so, the nature and extent thereof, and the availability of other broadcast service to such areas and populations.

**WERC**—Presque Isle Broadcasting Co., Erie, Pa.—Granted petition for leave to intervene in the hearing on application of Eagle Printing Co., Inc. (Docket 7072)

**Penn Thomas Watson, Wilson, N. C.—**Granted petition for waiver of Sec. 1.384 of the Rules and accept petitioner's late application in re application for a new FM station. (Docket 7521)

**Altoona Broadcasting Co., Altoona, Pa.—**Granted petition requesting extension of time in re consolidated proceeding (B2-P-5090; Docket 6957) so as to specify the frequency 650 kc., 250 watts, limited time in lieu of 1210 kc., 250 watts, unlimited time; show revised costs of construction, etc. The amendment was accepted and application removed from the hearing docket. (B2-P-5091)

**Peoples Radio Foundation, Inc., New York City—**Granted petition for leave to amend its application for FM construction permit (B1-PH-5683) so as to change paragraphs 8 and 15 to show the election of Eugene Brown, Leslie A. Goldman, Milton Robertson and Marvin Wolfson as directors of the corporation, and submit information concerning each of aforesaid directors, and the amendment was accepted.

**Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho—**Granted petition for leave to amend its application for FM station. (Docket 7521)

**Donald W. Reynolds, Ft. Smith, Ark.—**Granted petition requesting extension of time within which to file exceptions to the proposed decision of the Commission in the consolidated proceeding in re applications (B5-P-4633), so as to specify the frequency 950 kc., 1 kw, daytime only, instead of 1230 kc., 250 watts, unlimited time in lieu of 1230 kc., 250 watts, unlimited time, and make changes in paragraphs. The amendment was accepted, the application removed from the hearing docket (No. 6835), and further ordered that the petition insofar as it requests a grant of application as amended, be dismissed.

**KTOP, Inc., Topeka, Kans.—**Granted petition requesting leave to amend its application for CP (B4-P-3727), to show deletion of J. J. Hoveoka as a stockholder and the name of J. P. Harris as a director and substitute Wendell Elliott as a stockholder and director of the corporation, and the amendment was accepted.

**WBPM—Piedmont Broadcasting Corp., Danville, Va.—**Granted petition requesting extension of time to file exceptions to the proposed decision of the Commission, in the consolidated proceeding in re applications (Dockets Nos. 6938 et al), and the time for filing exceptions was extended to and including Sept. 12, 1946.

**WCMJ**—Ashland Broadcasting Co., Ashland, Ky.—The Commission, on its own motion, continued to Aug. 29 the hearing on application (B2-P-1422) now scheduled for Aug. 22.

**E. T. Wright, Orlando, Fla.—**Granted petition for leave to amend his application for CP (B3-P-4268) so as to specify the frequency 900 kc., 250 watts, daytime only, instead of 1230 kc., 250 watts, unlimited time; show revised costs of installation, etc. The amendment was accepted and application amended, be dismissed.

(Continued on next page)
Radio Wise... Inc., Madison, Wis.; Edwin Mead, Rockford, Ill.—Granted petition for extension of time from which to file exceptions to the proposed decision of the Commission in re (Dockets 6898 and 6899) and the time within which Meadville Tribune Broadcasting Co. may file its exceptions was extended to and including Sept. 20, 1946.

Veterans Broadcasting Co., Inc., Rochester, N. Y.—Granted petition requesting Commission to change location of consolidated hearing now scheduled for Sept. 11, in re application of petitioner and that of Rochester Broadcasting Corp., and ordered that the hearing now scheduled for Sept. 11 be held in Rochester, N. Y., provided, however that the hearing may be adjourned to Washington for the presentation of any engineering testimony which may appear necessary.

WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—Granted petition for leave to amend its application for CP (B1-P-4066) so as to show revised financial information, etc.; the amendment was accepted, and the record reopened for the sole purpose of receiving testimony relative to the amendment; and it was further ordered that the further hearing in this proceeding be continued until further order of the Commission.

Radio Wisc., Inc., Madison, Wis.; Edwin Mead, Rockford, Ill.—The Commission, on its own motion, ordered that the consolidated hearing on these applications now scheduled for August 29 be continued without date until further order of the Commission.

The Yankee Network Corp., Boston, Mass.—Granted petition for leave to reopen the record in the hearing upon petitioner’s application for a new FM station (T1-P-1390) and the applications of some eight other applicants for FM stations in the Boston area, for the purpose of incorporating in the record an engineering study relating to an overlap that may result from the granting of the FM applications of petitioner now pending before the Commission and excerpts from the record in Doc. 7027 also relating to said overlap problem; the engineering report and excerpts from the record in Docket 7027 filed with the petition were accepted; the record in Docket 6993 was reopened for the sole purpose of incorporating therein the said engineering report and excerpts, and without further hearing said engineering report and excerpt from the record in Docket 7027 was made a part of the record in Docket 6993.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

550 Kilocycles

NEW—Midland Broadcasting Co., Kansas City, Mo. (P. O. 10th & McGee Sts., Pickwick Hotel)—Construction permit for a new standard broadcast station to be operated on 550 kc., power of 5 KW, directional antenna and daytime hours of operation.

WDEV—Lloyd E. Squier and William G. Ricker, d/b as Radio Station WDEV, Waterbury, Vt.—Construction permit to change hours of operation from daytime to unlimited time and install directional antenna for day and night use. Amended to change name of applicant from Lloyd E. Squier and William Ricker, d/b as Radio Station WDEV to Lloyd E. Squier, surviving partner of Lloyd E. Squier and William G. Ricker, a partnership d/b as Radio Station WDEV and Ernest C. Perkins, executor of estate of William G. Ricker, deceased.

650 Kilocycles

NEW—Altoona Broadcasting Co., Altoona, Pa.—Construction permit for a new standard broadcast station to be operated on 650 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 650 kc., and hours of operation from unlimited to limited.

780 Kilocycles

WCKB—North Carolina Central Broadcasters, Inc., Dunn, N. C.—Modification of construction permit (B3-P-1762), which authorized a new standard broadcast station for approval of antenna, approval of transmitter site and specify studio location.

810 Kilocycles

WEBO—Tri City Broadcasting Co., McKeever, Pa.—License to cover construction permit (B2-P-4172, as modified) which authorized a new standard broadcast station.

WEBO—Tri City Broadcasting Co., McKeever, Pa.—Authority to determine operating power by direct measurement of antenna power.

900 Kilocycles

NEW—E. T. Wright, Orlando, Fla.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 900 kc., change hours of operation from unlimited time to daytime and change type of transmitter.

910 Kilocycles

KVAN—Vancover Radio Corp., Vancouver, Wash.—Construction permit to change frequency from 910 to 930 and power and hours of operation from 500 watts daytime to 1 KW day and night. Amended to change frequency from 930 to 910 kc., install new transmitter and make changes in directional antenna for day and night use and change transmitter location.

930 Kilocycles

WSAZ—WSAZ, Inc., Huntington, W. Va.—Modification of construction permit (B2-P-4304), which authorized a new standard broadcast station for change in type of transmitter and extension of commencement and completion dates.

950 Kilocycles

NEW—Donald W. Reynolds, Fort Smith, Ark.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 950 kc., power of 250 watts to 1 KW, hours of operation from unlimited to daytime and change type of transmitter.

960 Kilocycles

KPYV—Oscar C. NEW—Cheyenne Broadcasting Co., Inc., Cheyenne, Wyo.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

Federal Trade Commission Actions

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Beechams Pills, Inc., 60 Orange St., Bloomfield, N. J., and its advertising agent, Street & Finney, 330 West 42nd St., New York, are charged in a Federal Trade Commission complaint with false and misleading advertising of Purina poultry feeds. (5459)

Ralston Purina Co., 815 South Eighth St., St. Louis, is charged in a Commission complaint with false and misleading advertising of Purina poultry feeds. (5458)

STIPULATIONS

Allergy and Medical Products Co.—J. B. Biederman, trading as Allergy and Medical Products Co., P. O. Box 1399, Cincinnati, entered into a stipulation with the Federal Trade Commission to cease and desist from representing that a device sold under the name of Hay Fox Inhaler has received favorable comment in any published article unless the author of such an article is wholly disassociated with and disinterested in the business enterprise. (6328)

(Continued on next page)
L. Heller & Son—Imitation pearls must be identified as such and may not be described as reproductions, replicas or gems, under the terms of a stipulation executed by L. Heller & Son, Inc. and The Heller Deltah Co., Inc., 411 Fifth Ave., New York. (4608)

Wil Equipment Co.—The Commission accepted from H. E. Wildermuth, trading as Wil Equipment Co., 1448 Stanford Ave., St. Paul, Minn. and David, Inc., First National Bank Building, St. Paul, a stipulation to cease and desist from misrepresenting the therapeutic properties of a device designated Wil Spinal Manipulator and Normalizer. Wildermuth is engaged in the sale of the device, advertisements of which are prepared and disseminated by David, Inc., an advertising agency. (63329)

CEASE AND DESIST ORDERS

Bolger Brothers—An order to cease and desist from misbranding of wool products was issued by the Commission against Bolger Brothers, 1159-61 East Chelten Ave., Germantown, Philadelphia, a corporation engaged in garnetting or branding of wool products. (5578)

COMPLAINT DISMISSED

Dr. E. E. Paddock—Because of the death of the respondent, the Commission has dismissed its complaint against E. E. Paddock, trading as Doctor E. E. Paddock and E. E. Paddock, M. D., whose address was 103 Glen Kidge Building, Kansas City, Mo. The respondent had been charged with misrepresenting the therapeutic properties of medicinal preparations. (4602)

WOMEN BROADCASTERS

Hoover, Herbert, Receives AWD Famine Support ............. 508
Willard States NAB Position Concerning Wholesale Licensing Policy of FCC

Any efforts on the part of the broadcasting industry to resist the Federal Communications Commission's current wholesale licensing of new radio stations would be incompatible with the industry's firm position that the Government should not interfere with the programming or business operation of stations, according to the National Association of Broadcasters.

This position was delineated in an exchange of correspondence, made public today, between NAB Executive Vice President A. D. Willard, Jr., and W. E. Whitmore, manager of Radio Station KGFL, Roswell, New Mexico.

Since Mr. Whitmore's letter so adequately points up the difficulties arising from this wholesale licensing, the two letters are presented here. Mr. Whitmore's letter follows:

"I no longer feel that I can remain silent while the FCC is indiscriminately granting new AM permits with complete disregard to the economics of the situation. It seems to me that this indiscriminate licensing may well result in the breaking down of public confidence in an industry which has been regarded as presenting the highest type of public service to the people.

"When the Commission grants one 5 KW, two 1 KW, and two 250 watt stations in a town with a population of approximately eighteen thousand, I think the Commission is forgetting its obligation to the public interest.

"I feel that it is time that broadcasters individually and through NAB should use every means at their disposal to have the Congress and the people express their opinions on this indiscriminate granting of facilities which will start cut-throat competition and innumerable failures of broadcasting stations in event of even a minor depression.

"While the Commission denies any interest in the economics of broadcasting, their own yard-stick says: public interest, convenience (Continued on page 698)

Deadline Near on Convention Reservations; Program Plans For Sessions Progress

In order to insure the NAB members who plan to attend the annual convention to be held in Chicago, October 21-24 inclusive, proper hotel accommodations, NAB reserved blocks of rooms at the Palmer House and the Stevens. Forms to facilitate handling requests for reservations were sent to all members over a month ago.

While many have been returned, it is likely that some of our members are holding up their reservations pending more definite planning. The priority which NAB has on these rooms at the Palmer House and the Stevens terminates on Friday, September 20. Applications for rooms received after that date cannot be accepted.

If at this time your plans are uncertain but you think there is a possibility that you will attend the convention, Secretary-Treasurer C. E. Arney, Jr. suggests that you play it safe and send your request for room reservations now. This will enable you to avoid a scramble with John Q. Public for rooms in Chicago. If you have lost the form, either wire or write the Secretary-Treasurer.

Convention Program

While convention plans are not final, the following summary provides an idea of what the schedule will be like.

Sunday: pre-registration and Broadcasting golf tournament. Monday morning: meetings of the NAB standing committees; luncheon and afternoon: FM and facsimile panels. Tuesday morning: formal opening, keynote speech by President Justin Miller; programming session; afternoon: BMB.

Wednesday morning: music copyright; small market stations; afternoon: public relations, NAB business session. Thursday morning: retail advertising; afternoon: broadcast advertising clinic.

SEPTEMBER 9, 1946—695
NO MAJOR POLICY CHANGES CONTAINED IN NEW PART I OF FCC RULES

The partial revision of the FCC's Rules and Regulations Relating to Organization and Practice and Procedure, issued Sept. 4, contains no substantial policy changes.

The primary purpose of the revision was to comply with the Administrative Procedure Act of 1946, which requires that all administrative agencies "separately state and currently publish in the Federal Register ... descriptions of its central and field organizations ... statements of the general course and method by which its functions are channelled and determined ... and substantive rules and statements of general policy or interpretations formulated and adopted for the guidance of the public ..."

On Tuesday (3) the assistant general counsel of the FCC, Harry Plotkin, held a meeting attended by a considerable number of radio lawyers. Don Petty, general counsel and Bryce Rea, Jr., attorney, attended from NAB. At the meeting there was a general discussion of the rules revision from the legal standpoint. Suggestions and criticisms were aired at the meeting and several questions put down for study by the Commission and the FCC Bar Association, with a view to amending the rules as practice under them discloses the need therefor.

The revised rules become effective September 11. Thereafter the FCC plans further revision of its rules relating to hearings which will, in accordance with the Administrative Procedure Act, become effective by December 11, 1946.

NEW "RESULTS FROM RADIO" FOLDER DESCRIBES PERISHABLES CAMPAIGN

Two $12 spot announcements that sold 1,700 bushels of peaches for a fruit stand operator marked the States Employment Service last week and formulated plans with the USES relative to that agency acting as a clearing house for the placement of licensed broadcast operators.

The FCC pointed out that in the past whenever a man passed an examination for an operator's license, he was furnished a form card which he could forward to the FCC stating whether he was available for employment.

During the meeting, several hundred of these cards were turned over to the U. S. Employment Service. Names of available operators will be forwarded to the 1700 regional USES offices.

Small Market Stations desiring first class operators should contact their nearest USES office. When the supply is exhausted in your area, request the local authorities to contact their Washington headquarters for names of available men at other USES offices.

The government agency proposes to maintain an up-to-date list of unemployed operators.

NAB representatives attending the meeting were James L. Middlebrooks, director of engineering; J. Allen Brown, head of Small Market Stations Division; and Bryce Rea, Jr., NAB attorney.

SMALL MARKET STATIONS COMMITTEE MEETING THIS WEEK IN WASHINGTON

The Small Market Stations program for the national convention will be an agenda subject at the Executive Committee meeting in Washington Monday and Tuesday, (9-10). The proposed agenda containing many phases of station operation was mailed to committee members last week. (REPORTS, p. 681).

STANDARD CONTRACT MATS HELD UP PENDING 4A APPROVAL

Distribution of mats containing the new standard conditions for the spot broadcasting contract form is being held up, pending approval of the form by the American Association of Advertising Agencies.

Distribution of the mats was authorized by the NAB Board of Directors when it approved the new form at its August meeting, but it was subsequently decided that prior approval of the AAAA would be desirable so that the new contract form would go to the radio and advertising industries with joint NAB-AAAA endorsement. Thus far the AAAA Time-Buyers committee has approved the form, but it must yet receive the okay of the Agency Administration committee, which meets this week, and the AAAA Board, which meets September 24. If approved, the mats will be distributed to all NAB members immediately thereafter.

NEW "RESULTS FROM RADIO" FOLDER DESCRIBES PERISHABLES CAMPAIGN

Two $12 spot announcements that sold 1,700 bushels of peaches for a fruit stand operator marked the

(Continued on next page)
start of a broadcast advertising campaign which last year earned more than $1,000 for a member station.

This success story, Number 4 in the current NAB series, is reported in an illustrated 4-page folder which will be mailed to members this week.

Engineering Department

PROPOSED AGENDA FOR MOSCOW CONFERENCE

The State Department has published the proposed agenda for the Preliminary Five Power Telecommunications Conference scheduled to start September 28 in Moscow. (REPORTS, p. 680).

Expected to be in session for approximately three weeks, the conference agenda covers four major topics suggested by the Soviet Government and accepted by the United States.

Subjects to be discussed include: (1) Time and place for the forthcoming World Telecommunications Conference; (2) questions of the provisional registration of frequencies, until the entry into effect of a new convention and regulations, and the question of a provisional bureau for the distribution of radio frequencies for civilian purposes; (3) consideration of the fundamental problems of the revision of the telecommunications convention and regulations; (4) preparation for special meetings in addition to the World Telecommunications Conference.

FCC

NAB WILL ATTEND FCC CONFERENCE TO DISCUSS PROPOSED FORM 324 REVISION

The FCC announced Thursday (5) that requests for an opportunity to present comments on proposed revision of Schedule 13 ("Employees and Their Compensation") of FCC Form 324 ("Annual Financial Report of Networks and Licensees of Broadcast Stations"), have resulted in the scheduling of an informal conference to discuss the proposed revision.

NAB's request to the Commission for such opportunity was sent on August 15.

The conference, to be held at the FCC offices in Washington on September 20, is open to all interested parties.

NAB will have staff representation at the meeting.

News

When station management appreciates how valuable news is to listeners, stations and clients and does something about it, all parties benefit.

WINR, Binghamton, N. Y., which went on the air August 5, is such a station. Here are the news programming facts as revealed by inspection, August 29, less than a month after opening.

1. This management asserts a belief in 15-minute news programs on the basis that 5 or 10-minutes devoted to news is insufficient time to present the complete news story. The 1:00-1:05 exception recorded below was explained as an error. The 5-minute sports show at 6:40 was a deliberate booking.

2. The management believes in and does present local news on every show. It is held that a regular flow of local news throughout the day builds and holds audience.

3. The management believes in local news-commentary. Such a program is broadcast at 7:45 p. m., five times weekly. Commentator is the news editor whose chief duty is to cover the town for local news. Another newsman handles wire copy and gives the news.

4. Station does not make a service charge for news; puts a talent fee on every news program, all of which goes to individual giving the news.

5. All news programs are sold on yearly contract.

Below is the schedule of WINR's station-originated news programs with description of sponsors' business. It is to be noted that all but one program is sponsored, and it is under consideration.

Station Executive and Vice President is E. R. Vadeboncoeur. David Carpenter is WINR General Manager.

Willard States NAB Position Concerning Wholesale Licensing Policy of FCC

(Continued from page 695)

and necessity. The granting of five stations in a community that can barely support one is not in the public interest, is not a public necessity.

"I have spent over twenty years in the radio business and I look with fear and trembling upon the economic repercussions from this indiscriminate use of the licensing power of the Commission. I intend to attend the convention in Chicago and if nothing is done before that time, I intend to be heard in committee or on the floor of the convention on this subject: although I do not feel that the matter should be allowed to continue until that time.

"May I have your reactions to this letter as I feel that there has to be a stopping place somewhere in the granting of facilities?"

Mr. Willard's letter follows:

"First, let me say to you that we at the NAB are just as disturbed as you concerning the FCC policy of indiscriminate licensing. We feel almost certain, as you do, that the industry will feel some measure of economic repercussions because of it.

"The problem is a knotty one. Like so many of broadcasting's tribulations, it has many facets.

"To begin with, the Commission itself has been enjoined (in the Sanders Case) by the Supreme Court of the United States from taking into consideration as a separate and independent element any economic injury to an existing station in the granting of licenses to independent broadcasters. In effect, if Joe Doakes is stupid enough to apply for a license for a new broadcasting station in a community which cannot support another facility, the Commission has no authority to refuse the grant for this reason.

"Since the Supreme Court decision is, in effect, the law upon this subject, only the Congress (as you pointed out in your letter) can remedy the situation.

"Here we run into facet number two. The Federal Communications Commission is prohibited by the Communications Act from interfering with the rate structure, or the business structure, of radio broadcast stations. The Act specifically exempts broadcasting from the kind of FCC supervision that is applied to common carriers. Despite this prohibition, the Commission has on a number of occasions, by indirect, attempted to exercise some measure of control over the "business" of broadcasting. The Commission's statements concerning the price of radio stations, concerning over-commercialism, etc., are examples. If we should go to the Congress and ask for laws which would authorize the Commission to deny or affirm grants in consideration of economic factors, we would most certainly be inviting—and most probably would get—FCC authority to regulate the quantity of advertising, the charge for advertising, the sale price of radio stations, and so on.

"I think you will agree with me that it is fairly obvious that a regulatory government body will not protect a franchise against competition unless it regulates its business, its income and its services.

"There is still another facet. The whole structure of the regulation of American broadcasting by the Federal Communications Commission is based upon the theory of "scarcity." Because there are not enough wavelengths to go around—because not everybody who wants to go into broadcasting can do it—the Congress placed certain restrictions and responsibilities upon the licensees who are privileged to operate stations. Theoretically—and quite possibly practically—if the day ever comes when there are more wavelengths than there are people who want to engage in broadcasting, federal control of the industry could and should be reduced to the simple policing of the wavelengths. Then, and then only, could we have a truly free American radio in the same sense that we have a free press—absolutely unfettered by any government regulation concerning public interest, convenience and necessity.

"At its last meeting, August 6-7-8, the Board of Directors of the NAB had a lengthy discussion of the problems arising under the Commission's policy of granting licenses in a wholesale method. The Board felt very strongly that the principle of free competitive enterprise must be upheld and that any action upon the part of the industry to bring about consideration by the Commission of economic factors would be contrary to the interest of the industry and to the principles of free enterprise.

"May I say to you finally that the matter is not closed and that your opinion concerning this whole problem is most certainly welcome here at headquarters, or at the convention in Chicago. Incidentally, I will be there and will be most happy to discuss this whole situation with you at length. In the meantime, I would welcome any reaction you may have to this letter."

LOS ANGELES FM HEARINGS POSTPONED

Acting on suggestions from NAB and interested broadcasters, the FCC announced on Wednesday (4) that the hearings on the Los Angeles FM applications have been postponed from Oct. 14 until No. 18.

Scheduled for hearing in Los Angeles, the original dates for the hearings would have been in direct conflict with the NAB convention.

NAB SEEKS TO EQUALIZE RADIO'S POSITION IN NEWS AND SPECIAL EVENTS COVERAGE

A number of broadcasters in widely scattered areas have had occasion to complain of discrimination in their treatment by government officials and others having supervision over special events and news-worthy public occasions. One or two instances of this character were discussed at the last meeting of the Board of Directors of the NAB and the Board instructed the headquarters' staff to investigate all such instances which might be brought to its attention.

Member stations of the NAB are urged to immediately report the details of any occasion at which radio does not receive the same consideration and assistance accorded the newspapers, the press services, or any other media. Your headquarters' staff can then investigate and take whatever action seems best to equalize radio's position.
Employee-Employer Relations

EER COMMITTEE TO MEET WITH DOHERTY

The Employee-Employer Relations Committee is scheduled to meet in Washington on September 23 to discuss radio industry employee-employer questions with Richard P. Doherty, new EER department director. Mr. Doherty assumes his position at NAB headquarters Monday (9).

At its recent meeting on August 12, the committee unanimously decided to meet with the new department head as soon as possible after his appointment.

Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of September 16-22, 1946 by The Advertising Council and the Media Programming Division of the OWMR. Copies of individual Fact Sheets, and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, N. Y.

Farm Labor Needed

America's farmers have planted millions more acres than were planted in 1945. Maximum harvest, essential to our own physical well-being and to the very existence of undernourished millions overseas, depends on two factors—weather and farm labor. About the weather we can do nothing. About farm labor we can do much to assist the farmer in getting the help he needs to prevent crop losses and insure maximum yields. Farmers will be unable to obtain the maximum yield from their vastly increased acreage this year unless a substantial number of hired domestic workers—seasonal and part-time—can be found. Currently, the total number of war veterans and war plant workers who have returned to farms barely offsets the number of 1945 farm operators and workers who have left. These departures include many aged men and women who are no longer able to carry on, young people who have withdrawn to go to school, youth who have been inducted into the armed services, and wartime hired men who have returned to industry or other non-farm jobs. The purpose of the present national campaign is to acquaint the American public with the urgency and complexity of the farm labor problem and to urge them to make themselves available if and when needed. Those who have the remainder of the summer to devote to farm work should contact the county agricultural agent or the farm labor office in their community. The county agent is usually located at the county seat. In cities where there is no county agent office, information generally is available at farm labor or other public employment offices, including the United States Employment Service Offices. This also applies to those seeking year-round farm work, whether experienced or inexperienced. Those who can devote only part of their time to farm work should stand by for the local call for workers in their towns, cities, and counties. This call will be made through newspapers, radio and other communication facilities. Prevailing wages and piece-work rates are paid to all who volunteer their services. These rates vary from state to state, and community to community. (Fact Sheet No. 26-A)

Fat Salvage

Supplies of fats and oils are still far short of demands and needs due to a decline in domestic production and the war-born loss of foreign imports. Fats and oils are essential to the production of soap, and countless other peacetime consumer items remaining in continued to sell. Used kitchen fats can housewives help . . . prevent possible shortages of soap . . . accelerate the production of other peacetime needs everyone wants and needs. About forty-seven per cent of the total allocations of fats and oils for domestic industrial uses goes to civilian soaps; five per cent to the manufacture of soaps for industrial purposes; the remaining forty eight per cent per cent to paints and varnishes, floor coverings, coated fabrics, lubricating oils, textiles and leather, core oils, pharmaceuticals, putty and calking, compounds, etc. The shortage of fats and oils in the face of the great need for them in all phases of peacetime production indicates the urgency of the need for continued fat salvage. Housewives can actually help themselves to get the peacetime products they want and need in greater abundance and sooner by keeping up their own work in salvaging fats. They are asked to:—Save every drop of used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates—Use those suitable for cooking, and salvage whatever is left—Turn in the fat salvage container to their meat dealers promptly. They'll get four cents for every pound turned in. (Fact Sheet No. 19-A)

Group Prejudice—A Post War Menace

Radio is asked to help with this campaign, approved with top priority by the Public Advisory Committee of The Advertising Council because in the midst of present post-war tensions public opinion surveys show that racial and religious antagonisms exist. BECAUSE . . . experience after the last war, both here and abroad, indicates that such antagonisms, following in the wake of war, menace existing institutions—interfere with productive gains, shops, mining, threaten to break out into open acts of destructive violence. BECAUSE . . . division at home weakens the United States on the international scene—group strife here lowers the prestige of the United States among the nations of the world, hampers our country in its efforts towards world peace, promotes the belief that democracy has failed, encourages aggression in the hope of easy conquests. Division at home hampers production—discrimination against fellow employees or business associates because of race, religion, or national origin, annually robs the United States of millions of hours of productive labor and the best skill and talents of countless workers. In a prejudice-filled America, no one can be secure—in his job, his business, his church, his home. The problem is especially acute now because of the many real difficulties that confront the American people—such as housing, jobs for veterans, shortages of daily things of living. We must not let ourselves be diverted from serious efforts to overcome these post-war difficulties by the “scapegoat” technique that blames them on some racial, religious, or national group. Every individual citizen can help keep America strong by: 1. Isolating and quarantining group antagonism. (If someone runs down a neighbor’s race or religion, remind him that this is bad business for America both at home and abroad.) 2. Alertly guarding himself and his family against infection by racial and religious prejudice. (Don't spread prejudice now, any more than you would have spread enemy rumors during

(Continued on next page)
the war. Through your own behavior and otherwise, encourage respect in your children for neighbors of different races and religions—remind them that these very differences among Americans have resulted in a variety of contributions that have made our country great and kept her free.) 3. Work in your community—your church, your business, your trade union, your school—to promote the American principles of racial and religious freedom.

(Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, September 9. They are subject to change.

Monday, September 9

KRBC—Reporter Broadcasting Co., Abilene, Texas—C. P. 1470 kc., 1 KW night, 1 KW day, DA-night unlimited.
KPLC—Calcasieu Broadcasting Co., Lake Charles, La.—C. P. 1470 kc., 1 KW, unlimited.
NEW—San Jacinto Broadcasting Co., Houston, Texas—C. P. 1470 kc., 1 KW, unlimited.
WTAW—Agricultural & Mechanical College of Texas, College Station, Texas—C. P. 1470 kc., 1 KW, unlimited.

Other Participants

Peoria Broadcasting Co. (Intervenor)

Other Participants

Booth Radio Stations, Inc. (Intervenor)

Monday, September 9 to 13

At Philadelphia

(Jury Room 3050, U. S. Courthouse, 9th St., between Market and Chestnut Sts.)

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Penna.—For FM facilities.
NEW—Crescent Broadcasting Corp., Philadelphia, Penna.—For FM facilities.
NEW—Unity Broadcasting Corp. of Pennsylvania, Philadelphia, Penna.—For FM facilities.
NEW—Percy B. Crawford, Philadelphia, Penna.—For FM facilities.
NEW—Patrick Joseph Stanton, Philadelphia, Penna.—For FM facilities.

Wednesday, September 11

Oral Argument before the Commission

Beginning at ten o'clock a. m. the Commission will hear Oral Argument in Room 6121 on the following matters in the order indicated:

1. Corpus Christi, Texas, Applications:
Howard W. Davis, tr/ as The Walmac Co., Corpus Christi, Texas.—C. P. 1230 kc., 250 watts, unlimited.
Corpus Christi Broadcasting Co., Inc., Corpus Christi, Texas—C. P. 1230 kc., 250 watts, unlimited.

2. McKeesept-Lansing-Kalamazoo Applications:
Harold F. Gross, d/b as The Southwestern Michigan Broadcasting Co., Kalamazoo, Mich.—C. P. 1360 kc., 1 KW, unlimited DA-night.
Mon-Yough Broadcasting Co., McKeesport, Pa.—C. P. 1360 kc., 1 KW, unlimited DA-night.

3. WCLS Renewal, Joliet, Illinois, Application:
WCLS, Inc., Joliet, Ill.—Renewal of license. 1340 kc., 250 watts, unlimited.

J. Sandusky, Ohio, Applications:
The Sandusky Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.
Lake Erie Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.
The Bay Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

5. Marion, Indiana, Case
Chronicle Publishing Co., Inc., Marion, Ind.—C. P. 1230 kc., 250 watts, unlimited.
NEW—Charles A. Sprague, Glenn R. Thayer & Wm. W. Behrman, d/b as WMIL Broadcasting Co.—C. P. 1200 kc., 250 watts, daytime only.
NEW—Lake Shore Broadcasting Co., Evanston, Ill.—C. P. 1200 kc., 5 KW, daytime only.

Other Participants

WO WO, Philadelphia, Pa. (Intervenor)

At Rochester, N. Y.

(Federal Station Bldg., Church and Fitzhugh Sts.)

NEW—Rochester Broadcasting Corp., Rochester, N. Y.—C. P. 1280 kc., 5 KW, unlimited, (request facilities of WSAY when vacated)

Friday, September 13

WLOF—Hazlewood, Inc., Orlando, Fla.—C. P. 950 kc., 5 KW, unlimited DA-night & day.

NEW—San Diego Broadcasting Co., San Diego, Calif.—C. P. 1510 kc., 5 KW LS, 1 KW nite, directional antenna, unlimited.

FCC ACTIONS

DOCKET CASE DECISIONS

The Commission announced its final Decision (B-265) granting the application of Richard George Hughes for a new station at Berger, Texas, to operate on 1490 kc., 250 watts, unlimited time, subject to CAA approval of antenna system and site (Docket 7006; 13-P-4205). At the same time
time the application of Berger Broadcasting Company seeking the same facilities, was denied (Docket 7006; B3-P-4204).

A final decision (B-262) granting the application of Southwestern Broadcasting Corporation, for a new station in Odessa, Texas, to operate at 1450 kc., 250 watts, unlimited time, and as amended, removed the application from the hearing docket. (B2-P-4323; Docket 7008), is also announced. The grant is subject to the condition that within 90 days herefrom an application for modification of permit be filed specifying the exact transmitter site and antenna system meeting the requirements of the Commission's standards. The mutually exclusive application of Permian Basin Broadcasting Company for the same facilities, is denied (B3-P-4022; Docket 6934).

An order was adopted making final the grant of the application of Roy F. Thompson, tr/ as Thompson Broadcasting Company (B-260), for a new station at Altoona, Pa., to operate on the frequency 1230 kc., with 250 watts power, unlimited time (B2-P-3703; Docket 6698), subject to the filing within 30 days of an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Commission's standards; further subject to the installation of approved frequency and modulation monitors when available, the provisions of Secs. 3.55 (b) and 3.60 of the Commission's rules being waived pending such installation.

With respect to conflicting application of Altoona Broadcasting Company for leave to amend its application to request the frequency 650 kc., with 250 watts power, unlimited time, and as amended, removed the application from the hearing docket.

**AM APPLICATIONS GRANTED**

NEW—Yellowstone Amusement Co., Livingston, Mont.—Granted CP for a new station to operate on 1390 kc., 250 watts, unlimited time, subject to approval of transmitter site and antenna system by the CAA. (B5-P-4565; Docket 7486)

NEW—Big Bend Broadcasters, Alpine, Texas—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time, subject to approval of transmitter site and antenna system by the CAA. (B5-P-4870)

NEW—James L. Frank, Colorado Springs, Colo.—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time, subject to installing approved frequency and modulation monitors when available, and to filing, within 90 days of grant, an application for modification of CP specifying transmitter site and antenna system meeting the requirements of the engineering standards; and subject to any interference it may receive if application of Morris Broadcasting Co., for a new station at Greeley, Colo., should be granted. (B5-P-4918)

**FM CONDITIONAL GRANTS**

The following were given conditional grants on Aug. 29 subject to engineering conditions:

<table>
<thead>
<tr>
<th>City and State</th>
<th>Grantee</th>
<th>Interest in Stand. Class of</th>
<th>Station</th>
</tr>
</thead>
<tbody>
<tr>
<td>Birmingham, Ala.</td>
<td>Voice of Alabama, Inc.</td>
<td>WAPI Class B</td>
<td></td>

(Continued on next page)
The Administrative Board set aside its action of August 26 (See p. 683 Current REPORTS), granting a license to The Alamo Broadcasting Co., Inc., San Antonio, Texas (KAJ3C), for license to cover CP authorizing change in frequency, etc. (B3-L-1802), with authority to determine operating power by direct measurement (B3-Z-1757).

ACTION SET ASIDE

According to a correction by the Commission, the item in last week's REPORTS p. 680 referring to Nevada Broadcasting Company's FM final CP should have shown antenna height as minus 125 feet. (B5-PH-278)

DESIGNATED FOR HEARING—AM

WLJ—WLJ, Inc., Brooklyn, N. Y.; Suburban Broadcast Co., Framingham, Mass., and Seacoast City Broadcast Co., Inc., Middletown, R. I.—Designated for hearing application of WLJ, Inc., for construction permit to increase power of WLJ, operating on 1190 kc., from 1 to 10 KW, change hours of operation from daytime only, L-WOWO, to unlimited time, install new transmitter and directional antenna for day and night use (DA-1), and change transmitter location (B1-P-4081), to be heard in consolidated proceeding with applications of Indianapolis Broadcasting, Inc., Indianapolis, Ind., to change frequency from 1330 to 1190 kc., increase power from 5 to 50 KW, install new transmitter and DA, and change transmitter location of Station WIJE (Docket 7675: B4-P-4646), and Westinghouse Radio Stations, Inc., Ft. Wayne, Ind., to increase power of Station WOWO from 10 to 50 KW, install new transmitter and DA, and change transmitter location, operating on 1190 kc. (Docket 7674: B4-P-4019) (both having been previously designated for consolidated hearing), and with applications of Suburban Broadcast Co. for a new station at Framingham, Mass., to operate on 1190 kc., 1 KW, daytime (B1-P-4050), and of Seacoast City Broadcast Co., Inc., for new station at Middletown, R. I., to operate on 1200 kc., 250 watts, limited time (B1-P-4902).

Northeast Oklahoma Broadcasting Co., Miami, Okla.; Miami Broadcasting Co., Miami, Okla.—Designated for consolidated hearing applications of Northeast Oklahoma Broadcasting Co. for new station to operate on 900 kc., 250 watts, daytime (B3-P-4930; Docket 7800), and Miami Broadcasting Co. for new station to operate on 910 kc., 1 KW, unlimited time, using DA-N. (B3-P-5129; Docket 7814)

Shawnee Broadcasting Co., Chillicothe, Ohio—Designated for hearing application for new station to operate on 1490 kc., 250 watts, unlimited time (B2-P-4512; Docket 7415); further ordered that licensees of WMRS, Marion, Ohio, WKIV, Richmond, Va., and WMOA, Wooster, Ohio, be made parties to these proceedings.

Grosse Pointe Broadcasting Corp., Grosse Pointe, Mich.—Designated for hearing application for new station to operate on 650 kc., 250 watts, daytime (B2-P-5015; Docket 7811); further ordered that previous orders designating application of Herman Radner and Wol¬verine State Broadcasting Service, Inc., for hearing be amended to include application of Grosse Pointe Broadcasting Corp.

Yakima Broadcasting Corp., Yakima, Wash., and Yakima Valley Broadcasting Co., Yakima, Wash.—Designated for consolidated hearing applications of Yakima Broadcasting Corp. (B5-P-5009; Docket 7815) and Yakima Valley Broadcasting Corp. (B3-P-5115; Docket 7816) both seeking 1400 kc., 250 watts, unlimited time. (B5-P-4917), to be included in consolidated proceeding with applications of Hollywood Community Radio Group (Docket 7665) and Huntington Broadcasting Co. (Docket 7694); further ordered that previous orders designating Dockets 7695 and 7694 for hearing be amended to include Coast Radio Broadcasting Corp.

G. Stanley Brewer, tr/as Southern Wyoming Broadcasting Co., Rawlins, Wyo.; Rawlins Broadcasting Co., Rawlins, Wyo.—Designated for consolidated hearing applications of Southern Wyoming Broadcasting Co. for new station at Rawlins, Wyo., to operate on 1220 kc., 250 watts, unlimited time (B2-P-4915; Docket 7583), with Rawlins Broadcasting Co. for new station at Rawlins to operate on 1240 kc., 250 watts, unlimited time (B5-P-4961; Docket 7804).

West Virginia Radio Corp., Pittsburgh, Pa., and Pittsburgh Broadcasting Co., Pittsburgh, Pa.—Designated for consolidated hearing applications of West Virginia Radio Corp. (B2-P-4915; Docket 7805) and Pittsburgh Broadcasting Co. (B2-P-5123; Docket 7806), each requesting 1080 kc., 1 KW, daytime only, at Pittsburgh, Pa.

Mario Acosta, Mayaguez, P. R., and Arecibo Broadcasting Co., Inc., Arecibo, P. R.—Designated for consolidated hearing applications of Mario Acosta (B-P-4562; Docket 7449) and Arecibo Broadcasting Co., Inc. (B1-P-5047; Docket 7807), each requesting 1400 kc., 250 watts, unlimited time at Mayaguez and Arecibo, respectively

Kola Broadcasting Co., a partnership composed of Hugh O. Jones, Wm. E. Jones, James O. Jones and Mrs. Sarah Stewart Jones, Opeouas, La.—Designated for hearing application for new station to operate on 1250 kc., 250 watts, unlimited time (B3-P-5117), to be included in consolidated proceeding with application of James (Continued on next page)
A. N. Noe (Docket 7416), Lake Charles, La., and that the licensee of Station KANE be made party to proceedings, and further ordered that the order designating the Noe application for hearing be amended to include Kola Broadcasting Co.

Gifford Phillips, Denver, Colo.; Meroco Broadcasting Co., Greeley, Colo. Designated for consolidated hearing, application of Gifford Phillips (B5-P-1831) for a new station at Denver to operate on 1150 kc., 250 watts, unlimited time, with application of Meroco Broadcasting Co. (B5-P-5196), requesting the same facilities at Greeley.

**DESIGNATED FOR HEARING—FM**

Adopted an order designating for consolidated hearing four applications for the Charlotte, North Carolina, area, as follows: Surety Broadcasting Co. (B5-PH-975); Capital Broadcasting Co., Inc. (B3-PH-105); Radio Station WSOC, Inc. (B3-PH-1021) and Intercity Advertising Co. (B3-PH-1045), for Class B stations.

Franklin Broadcasting Co., Philadelphia, Pa.—Designated for consolidated hearing with other Philadelphia applicants, application for new Class B station. (B2-PH-1056)

**AM LICENSE EXTENSIONS**

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio—Present license further extended upon a temporary basis to November 1, 1946, pending receipt of additional information furnished by licensee under Section 308(b) of the Communications Act. (B2-S-306)

KLAC—KMTK Radio Corp., Los Angeles, Calif.—Present license further extended upon a temporary basis to November 1, 1946, pending consideration of information furnished by licensee under Section 308(b) of the Act. (B5-S-17)

KOJ—Albuquerque Broadcasting Co., Albuquerque, N. M.—Present license further extended upon a temporary basis to November 1, 1946, pending consideration of information furnished by licensee under Section 308(b) of the Act. (B5-S-130)

K8JB—Jamestown Broadcasting Co., Inc., Jamestown, N. D.—Present license further extended upon a temporary basis to November 1, 1946, pending consideration of information furnished by licensee under Section 308(b) of the Act. (B4-S-919)

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted petition for further extension of special temporary authority to continue operation of Station KOMA to November 1, 1946. (Docket 6570)

WIP—Penna. Broadcasting Co., Philadelphia, Pa.—Present license for main and auxiliary transmitter further extended for a period of 60 days.

KVOO—Colo. Radio Corp., Denver, Colo.—Present license further extended for a period of 60 days.

**MISCELLANEOUS LICENSE RENEWALS**

WBKY—Univ. of Kentucky, Lexington, Ky.—Granted renewal of non-commercial educational broadcast station license for the regular period.

KALW—Board of Education of San Francisco Unified School Dist., San Francisco, Calif.—Granted renewal of non-commercial educational broadcast station license for the regular period.

WXAP, WXFM—Voice of Alu., Inc., Birmingham, Ala.—Granted renewal of developmental broadcast station license for the period ending May 1, 1947.

W4XCT—WAPO Broadcasting Service, Chattanooga, Ga.—Granted renewal of developmental broadcast station license for the period ending May 1, 1947.

**MISCELLANEOUS ACTIONS**

KHQ—Louis Wasmier, Inc. (assignor), KHQ, Inc. (assignee), Spokane, Wash.—Granted consent to voluntary assignment of license of Station KHQ from Louis Wasmier, Inc. to KHQ, Inc., for a consideration of $850,000. (B7-AI-533)

WCFL—Chicago Fed. of Labor, Chicago, Ill.—Granted CP to increase power of station WCFL from 10 to 50 kW, install new transmitter and make changes in DA for day and night use, operating on 1000 kc. (B4-P-4316)

O. E. Richardson, Hammond, Ind.—Denied petition requesting that his application for FM station be granted as a Class B rather than a Class A station.

WKV—Puerto Rico Advertising Co., Inc. (Transferee), Ralph Perez Perry (Transferee), American Colonial Broadcasting Corp. (Licencsee), Arecibo, P. R.—Granted consent to acquisition of license corporation by Ralph Perez Perry from Puerto Rico Adv. Co., Inc. by sale of 46 shares, or 0.13% of outstanding capital stock, to Ralph Perez Perry for $850,000. (B5-AL-533)

WPNA—Alpena Broadcasting Corp., Alpena, Mich.—Granted modification of CP which authorized a new station to change type of transmitter, approval of antenna and approval of transmitter and studio locations at 507 N. 2nd St., Alpena, Mich. (B2-MP-1979)

WRNO—The Observer Radio Co., Orangeburg, S. C.—Granted modification of CP which authorized a new station, to change name of applicant to WRNO, Inc., to make changes in antenna, changes in transmitting equipment, change transmitter and studio locations (Continued on next page)
to 0.3 mi. E. of Orangeburg on State Highway #4, and extend commencement and completion dates to 60 days and thereafter grant and 180 days thereafter, respectively. (B3-20656)

KWHK—James E. Murray, Hutchinson, Kans.—Granted modification of CP which authorized a new station, for approval of antenna and of transmitter and studio locations at RFD, Hutchinson, 8½ of SW ¼ Sec. 25-224-18, Hutchinson, and 12 West 5th St., Hutchinson, Kans., respectively. (B4-20026)

WDNL—Manatee Broadcasting Co., Inc., Bradenton, Fla.—Granted modification of CP which authorized a new station, for approval of antenna and of transmitter and studio locations at Chamber of Commerce Bldg., Municipal Pier, Bradenton. Permittee is granted a waiver of Sec. 3.55(b) of the Commission’s rules; conditions. (B3-MP-2011)

WHBS—The Huntsville Times Co., Inc., Huntsville, Ala.—Granted license to cover CP which authorized a new station, to change type of transmitter, approval of antenna, approval of transmitter and studio locations at W. side of County Road, Corner of O’Shaughnessy Ave., No. of Huntsville, and Corner of Gullitin and W. Clinton Sts., Huntsville, respectively. (B5-1973)

WKAB—Pursley Broadcasting Service, Mobile, Ala.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at Madison and Franklin Sts., Mobile, Ala., and change in transmitting equipment. (B3-MP-2024)

KSTT—Davenport Broadcasting Co., Inc., Davenport Iowa.—Granted license to cover CP which authorized a new station to operate on 750 kc., 250 watts, daytime, and for change in studio location to Main St., Davenport, Iowa. Licensee is granted a waiver of Sec. 3.55(b) of rules; conditions. (B4-L-2010). Also granted authority to determine operating power by direct measurement. (B4-Z-1834)

WDBK—W. W. Conch, Jr., Sam H. Campbell, Jr., and W. H. Lancaster, Jr. and Dunham, N. C.—Granted license to cover CP which authorized a new station to operate on 1310 kc., 1 KW, daytime, and for change in studio location to 265½ W. Main St., Durham (B3-L-2008). Licensee is granted a waiver of Sec. 3.60 of the Commission’s rules; conditions. Also authority to determine operating power by direct measurement. (B3-Z-1822)

WINX-FM—WINX Broadcasting Co., Washington, D. C.—Granted request for special temporary authority to operate WINX-FM commercially on both 432 and 292 kc., and such time as station can commence operation at the authorized power of 20 KW. (B3-Z-1835)

WMGY—Dick Broadcasting Co., Montgomery, Ala.—Granted license to cover CP which authorized a new station to operate on 800 kc., 1 KW, day (B3-L-1999). Also granted authority to determine operating power by direct measurement. (B3-Z-1823)

WKAX—Courier Broadcasting Service, Inc., Birmingham, Ala.—Granted license to cover CP which authorized a new station to operate on 900 kc., 1 KW, daytime (B3-L-1986). Also authority to determine operating power by direct measurement of antenna power. (B3-Z-1812)

WJOI—Florence Broadcasting Co., Florence, Ala.—Granted license to cover CP which authorized a new station to operate on 1340 kc., 250 watts, unlimited time. Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the rules; conditions. (B3-Z-2004). Also authority to determine operating power by direct measurement. (B3-Z-1899)

WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Granted CP to specify frequency as channel #219, 917 kc., and change power to 20 KW core radiated power; change type of transmitter and make changes in antenna system of noncommercial educational broadcast station. (B1-PED-72)

WTBO—Cumberland Broadcasting Co., Cumberland, Md.—Granted license to cover CP which authorized installation of new antenna and ground system (B1-L-1995). Also granted authority to determine operating power by direct measurement. (B1-Z-1816)

WCOL—The Pixleys, Columbus, Ohio.—Granted license to cover CP which authorized installation of a new transmitter and vertical antenna and change in transmission location (B2-L-2003). Also authority to determine operating power by direct measurement. (B2-Z-1828)

KERO—J. E. Rodman, Bakersfield, Calif.—Granted license to cover CP which authorized a new station to operate on 1250 kc., 250 watts, unlimited time, and change in studio location to 1420 Truxtum Ave., Bakersfield (B3-L-2001). Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1825). Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the rules; conditions.

KUGN—Valley Broadcasting Co., Eugene, Ore.—Granted license to cover CP which authorized a new station to operate on 1400 kc., 250 watts, unlimited time (B3-L-1997). Also granted authority to determine operating power by direct measurement. (B3-Z-1815)

WDGG—State Gazette Broadcasting Co., Dyersburg, Tenn.—Granted license to cover CP which authorized a new station to operate on 1470 kc., 250 watts, unlimited time (B3-L-1997). Also granted authority to determine operating power by direct measurement. (B3-Z-1820). Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the rules; conditions.

WDSC—The Border Broadcasting Co., Dillon, S. C.—Granted license to cover CP which authorized a new station to operate on 800 kc., 1 KW, daytime, and for approval of studio location on U. S. Highway #301, 3.7 mi. southwest of Dillon. Licensee is granted waiver of Secs. 3.55(b) and 3.60 of the rules; conditions (B3-Z-1998). Also authority to determine operating power by direct measurement. (B3-Z-1821)

KGAK—Gallup Broadcasting Co., Gallup, N. Mex.—Granted license to cover CP which authorized a new station to operate on 1230 kc., 250 watts, unlimited time. Licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission’s rules; conditions. (B5-L-1944). Also granted authority to determine operating power by direct measurement. (B5-Z-1770)

KSBF—The Associated Broadcasters, Inc., San Francisco, Calif.—Granted petition for leave to amend its application for CP (B3-P-2776; Docket 6005) so as to specify new transmitter site; specify engineering data, etc., and the amendment was accepted.

ACTIONS ON MOTIONS

P. D. Gold Pub. Co., Wilson, N. C.—Granted petition to dismiss without prejudice application for new FM station. (B3-PH-817; Docket 7521)

Penn Thomas Watson, Wilson, N. C.—The Commission on its own motion ordered application for new FM station removed from the hearing docket. (B3-PH-829; Docket 7521)

Colonial Broadcasting Co., Providence, R. I.—Granted petition for leave to amend its application for a new FM station (B1-PH-606; Docket 7028), so as to show changes in proposed antenna system, and the amendment was accepted.

KMPC—The State of the Stars, Inc., Los Angeles, Calif.—Granted petition for leave to amend its application for new FM station (B3-PH-895; Docket 7742), to show revised estimates of construction costs, etc., and the amendment was accepted.

Walter A. Graham, Tifton, Ga.—Granted petition for leave to amend its application for new station as petitioner now scheduled for Sept. 20 in re petitioner’s written appearance in re application for CP (B3-PH-2776; Docket 6005). Petitioner’s written appearance was accepted, and the amendment was accepted.

Westinghouse Broadcasting Co., Inc., Port Wayne, Ind.—Granted petition for continuance of consolidated hearing now scheduled for Sept. 20 in re petitioner’s application for new station in Indianapolis Broadcasting, Inc. (Docket Nos. 7674 and 7675), and continued hearing to Nov. 12, 1946.

Hollywood Community Radio Group, Gardenia, Calif.—Granted petition for waiver of Sec. 1.381 of the Commission’s rules; conditions. (Continued on next page)
mission's rules, and accepted petitioner's written appearance in re application for CP. (Docket 7695)

James M. Tisdale, Chester, Pa.—Granted motion for leave to amend application for CP (Docket 7617; B3-P-4784), so as to include in Exhibit 9, letters purporting to support a grant of said application, and the amendment was accepted.

Wilbur Cortland Fouts, Nacogdoches, Texas.—Granted petition for leave to amend its application for CP (B5-P-4779; Docket 7652), so as to specify a revised DA pattern; show revised engineering information, etc. The amendment was accepted, and the record reopened for the sole purpose of incorporating therein said engineering report, and without further hearing the amendment and engineering report is made a part of the record in Docket 7652. It was further ordered that the petition insofar as it requests grant of application as amended, be dismissed.

Maricopa Broadcasters, Inc., Phoenix, Ariz.—Granted motion to take depositions on Sept. 18 in re application for CP. (Docket 7626; B5-P-4053)

Tower Realty Co., Baltimore, Md.—Granted motion to take depositions in re application for CP. (Docket 7619) said depositions to be taken at hearing room, State Tax Commission, Union Trust Bldg., Baltimore, except that of Archbishop Curley, which will be taken at his residence.

Maricopa Broadcasters, Inc., Phoenix, Ariz.; Radio Phoenix, Inc., Phoenix, Ariz.—Denied petition requesting leave to take depositions on its applications (Dockets 7626 and 7627), now scheduled for Sept. 26 in Washington, be held at Phoenix insofar as the non-engineering testimony is concerned.

Century Broadcasting Co., Corpus Christi, Texas.—The Commission on its own motion continued without date until further order of the Commission, the hearing now set for Oct 10 in re application in Docket 7666; B3-L-1890; B3-P-1584.

Tennessee Radio Corp., Nashville, Tenn.—Granted petition for extension of time in which to file request for oral argument, etc., to proposed decision (Docket 6195), and extended the time to Sept. 5 in which to file exceptions to the proposed decision.

KAW—KAW Broadcasting, Inc., Topeka, Kans.—Denied petition to dismiss without prejudice application for new station (B3-P-3989; Docket 7454).

Electronic Time, Inc., New York City.—Denied petition to dismiss without prejudice application for new developmental AM station (B1-PEX-57; Docket 7599).

State Broadcasting Co., Oklahoma City, Okla.—The Commission on its own motion ordered the following docket application for new station (B3-P-4465; Docket 7457).

Joseph T. Connolly, et al, Williamsport, Pa.—Denied petition for leave to amend its application for a new station (R5-P-6288; Docket 7455) so as to substitute the Lycoming County Broadcasting Co, as the applicant in place of the named individual applicants; show revised information in re applicant's financial qualifications, etc. And the Commission on its own motion ordered that its order of March 7, 1946, insofar as it relates to the "legal, technical, financial, and other qualifications of the applicant partnership and of its individual partners" be amended to read, "legal, technical, financial and other qualifications of applicant corporation."

Hollywood Community Radio Group, Gardena, Calif.—Denied petition for leave to amend application for a new station (Docket 7695), so as to specify 5 KW instead of 1 KW power, etc., and the amendment was accepted.

The Blue Valley Co., Independence, Mo.—Denied petition requesting leave to take deposition of Uriah Siegfried in the hearing in re its application for CP (Docket 7498; B4-P-4597).

WARC—WARC, Inc., Rochester, N. Y.—Denied petition for leave to amend its application for CP (Docket 7606; B4-P-4355) so as to specify frequency 1600 with 5 KW instead of 1230 with 250 watts power, etc. The amendment was accepted and the application removed from the hearing docket.

WARC—WARC, Inc., Rochester, N. Y.—Denied as moot the petition of WARC, Inc., requesting extension of time for filing exceptions to proposed findings in re Docket 6895, et al.

The Tower Realty Co., Baltimore, Md.—Denied petition for continuance of consolidated hearing in re applicant's application (Docket 7429) and application of WCBM (Docket 7572) now scheduled for Sept. 18, and continued said hearing to Oct. 7, 1946.

Peoria Broadcasting Co., Peoria, Ill.—Denied petition requesting leave to amend its application for CP (Docket 7610; B4-P-5717) so as to specify a modified DA system, etc., and the amendment was accepted.

KSFO—The Associated Broadcasters, Inc., San Francisco, Calif.—Denied petition for continuance of hearing now scheduled for Sept. 5 in re application for CP (Docket 6895) and KQW's application (Docket 6214), and continued said hearing to Nov. 14, 1946.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

580 Kilocycles

KFXD—Frank E. Hurt & Son, a partnership composed of Frank E. Hurt & Edward P. Hurt, Boise, Idaho.—Modification of construction permit (B5-P-3968), which authorized change in frequency, increase in power, changes in transmitting equipment, installation of directional antenna for day and night use, and change in transmitter and studio locations.

KOOS—KOOS, Inc., Coos Bay, Ore.—Construction permit to change frequency from 1230 to 630 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for day and night use and change transmitter location.

KPOA—Henry C. Putnam, John D. Keating & J. Elroy McCaw, a partnership, d/b/a The Island Broadcasting Co., Honolulu, T. H.—Modification of construction permit (B3-P-1444, which authorized a new standard broadcast station) for approval of antenna and transmitter location.

730 Kilocycles

WTIK—Durham Broadcasting Co., Inc., Durham, N. C.—Construction permit to increase power from 500 watts to 1 KW and change type of transmitter.

970 Kilocycles

WFLA—The Tribune Co., Tampa, Fla.—Modification of construction permit (B3-P-4141, which authorized changes in directional antenna for night use) for extension of commencement and completion dates.

NEW—Roy C. Kelley, Ray M. Veenstra and George S. Norcross, a partnership d/b/a KVNN Co., Benton Harbor, Mich.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Ashbacker Radio Corp., Manistee, Mich.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. (Contingent on grant of WKBZ.)

1490 Kilocycles

NEW—Ashbacker Radio Corp., Manistee, Mich.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. (Contingent on grant of WKBZ.)

Federal Trade Commission

Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

The Cooter Co. and Mart Sales Co.—Paul M. Cooter, trading as The Cooter Co. and Mart Sales Co., 228 North LaSalle St., Chicago, and Recorg Supply Corp., 201 North Wells St., Chicago, are charged in a Commission complaint with violating the Robinson-Patman Act by accepting brokerage fees or commissions from sellers of grocery products and related merchandise when they were actually acting for or under the control of wholesalers for whom they were buying agents. The fees allegedly were passed on in part to the wholesalers. (5460)

STIPULATIONS

Block Bros. Hat Co.—Max Block and Henry Block, trading as Block Bros. Hat Co., 14 West 14th St., New York, entered into a stipulation with the Commission to cease and desist from falsely representing that they manufacture the men's hats which they sell.

Under the terms of the stipulation, the respondents agree to discontinue representing, directly or inferentially, that they manufacture hats unless they actually own and operate, or directly and absolutely control, a factory or plant where such products are made. (4172)

Legumin Products Co.—The Commission accepted from C. A. Seroy, trading as Legumin Products Co., 850 Euclid Ave., Cleveland, a stipulation to cease and desist from misrepresenting the therapeutic properties of a medicinal preparation sold under the names of Legu-Con, Legucon and Leguminus Herbolas Tablets. (0331)

H. M. Sheer Co.—The Commission approved a stipulation in which H. M. Sheer Co., Quincy, Ill., agrees to cease and desist from falsely representing that it manufactures equipment and supplies for poultry raisers. (0332)

CEASE AND DESIST ORDER

Paebar Co.—Under the terms of a cease and desist order issued by the Commission, The Paebar Co., Inc., and Alan F. Puter, both of 1539 Broadway, New York, must discontinue using the term "Who's Who" in connection with their book-publishing business and must also make clear that they are not associated with the radio program known as "We, the People." Acting Chairman Denny Interprets Definitions Of “Wire” News Program Classifications

In a letter dated August 30, 1946, Acting Chairman Charles R. Denny, of FCC, provides an interpretation of the Blue Book's section devoted to radio news. The letter was addressed to Robert W. Brown, executive news editor, International News Service, New York City, and is quoted in full:

“This will reply to your letter of August 1, 1946, with further reference to the definition of a 'wire' program as originally defined in our report of March 7, 1946, and amended in our Public Notice 95462 of July 2, 1946. You submit the following questions in the light of that definition:

1. Does the revised rule mean that the station no longer is required to pro rate 50 per cent or more of its news cast time to purely local items in order to receive for the news cast a 'local live' instead of a 'wire program' rating?

2. Does the revised rule mean that a station can base an entire news cast on a teletype service and receive 'local live' rating for said news cast providing the station has edited, selected, rewritten or otherwise 'localized' half or more of the news content from the standpoint of local interest?

Under the definition contained in our report of March 7, 1946, and the amendments set out in the Public Notice of July 2, 1946, referred to above, it (Continued on page 712)
Industry Problems and Convention Plans Discussed At Small Markets Group Meeting

(Continued from page 709)

ported to the committee details of the arrangements which have been completed by the USES, FCC and NAB to assist stations in the procurement of qualified technical employees.

J. Allen Brown, Director of the Small Market Stations Division discussed plans for developing new advertising business on a local level. He urged that small market stations concentrate on securing new business from state distributors, utilities, industrial firms and contractors and other large firms requiring a public relations program.

Mr. Brown cited effective selling campaigns on a state-wide basis by small stations which have organized state and regional networks. The groups maintain networks for handling programs, but place their spot announcement business on each station according to availabilities. The spot campaigns, however, are sold by one office. It was pointed out that bakeries, flour millers, soft drink and meat packing firms with state wide distribution are using small stations individually and on the “group selling” plan of the regional networks.

Continuing, Mr. Brown, stated that many services are available to the small market station through the medium of the NAB staff. He pointed out that between 200 and 300 executives of new small market stations have visited the NAB headquarters for consultation and aids on sales, programming, management, etc.

Following a discussion led by Frank E. Pellegrin and Kenneth H. Baker on audience measurement, the committee commended the action taken by the Board of Directors and agreed that NAB should make efforts to obtain standards for audience measurements, with proper recognition of varying size markets.

Miss Lee Hart, Assistant Director of the Broadcast Advertising Department reported on the status of the Joske Report, which is expected to be released prior to the convention. The first section to be released will contain approximately 90 pages, while the full report will run to some 200 pages with supplements to be added.

A discussion of the proposed convention agenda for the small market stations was held with C. E. Arney, Jr. The Small Markets Session is scheduled for Wednesday morning, October 23 from 10:30 until 12:15. Arrangements are being made for a special small market stations “headquarters office” at the Palmer House.

Present for the meeting were: Marshall H. Pengra, KRNN, Chairman; Wayne W. Cribb, KHMO; James R. Curtis, KFRO; Monroe B. England, WBRK; William C. Grove, KPBC; Robert T. Mason, WMRN; and Glenn Marshall, WFOY.

Board of Directors Subcommittee members present included: William M. Smullin, KBEM; Clair R. McCullough, WGA; and Harry R. Spence, KXRO.

PULSE TIME MODULATION TRANSMISSION PERMITS 8 SIMULTANEOUS BROADCASTS

At the invitation of I. T. and T., James L. Middlebrooks, NAB Director of Engineering, attended a demonstration of transmission by Pulse Time Modulation last Monday (9). Following is Mr. Middlebrook's report of the demonstration.

Just a year ago the Federal Telecommunications Laboratories, an I. T. & T. associate, was permitted by the United States Navy Department to reveal its method of multiplex transmission from point to point by Pulse Time Modulation (PTM) by microwave.

Pulse Time Modulation is a method of radio communication which involves the transmission of a series of short bursts, or pulses, each approximately one-half millisecond of a second long. Unlike previous radio systems which operate by modulating the strength or amplitude of the wave (AM), or its rapidity of vibration or frequency (FM), the amplitude and frequency of PTM waves do not carry the intelligence. As the name implies, the actual communication is achieved by varying the time interval between the pulses.

This concept reverts back to some of the first methods of communication, such as telegraphy. But the signals of the first telegraph system were limited by their lack of precise time-measurement. Today, PTM employs electronic tubes and techniques capable of measuring less than a millionth of a second, and determining the exact time lapse between one such pulse and the next. These differences in timing constitute the PTM signal and permit the simultaneous transmission of multiple programs of high fidelity over a single frequency channel. The programs are selected by the listener simply by pushing a button on his permanently tuned receiver.

(Continued on next page)

SEPTEMBER 16, 1946 — 710
Allowing for the variable time—lapses between pulses—these PTM transmitters can still send out several hundred thousand pulses a second. But the ordinary human ear can only receive vibrations which range from 16 to 10,000 times per second. Therefore, when the transmitter divides its attention equally between eight programs, it still sends the parts of each in such rapid sequence that, for the listener, there is no perceptible difference between what he hears and continuous sound. It is a similar effect to that which the eye receives when witnessing a “motion” picture. In reality, the eye sees a series of still pictures, each varying so slightly from the one preceding that the illusion of motion is perfect.

In similar manner, each program broadcast from an 8-channel multiplex transmitter is “sampled” 24,000 times per second, and a minuscule quantity of the sound wave is broadcast so that in the receiver these samples create a smooth reproduction of the broadcast with extremely high fidelity.

On September 9, 1946, this new system was demonstrated to FCC Commissioners, FCC Engineers, high ranking Army, Navy and Coast Guard officers and the industry. The system demonstrated consisted of eight 9 kc audio channels and a marker channel. The transmitter employed was a 50 watt transmitter operating on a carrier frequency of 930 kc. An eight bay, square loop antenna, having a power gain of approximately eight was used for the demonstration.

Eight broadcasting booths—representing in miniature eight broadcasting studios—operating simultaneously, fed the following into the transmitter located atop the I. T. & T. Building, 67 Broad Street, New York City: (1) New York Times Telephoto and Facsimile, (2) Dow Jones News ticker, (3) Teletype similar to that used by the major press associations (AP, UP, INS) in news transmission, (4) a live voice news commentator, (5) a frequency modulation (FM) program by the Columbia Broadcasting System, (6) a rebroadcast of an amplitude modulation (AM) radio program, (7) a “Muzak” recording, and (8) a recording of popular music.

Following a demonstration of the eight studios and transmitter installation at 67 Broad Street, those present were motored to the Federal Telecommunications Laboratories, located at Nutley, New Jersey. Here the broadcast was received on Federal’s specially-designed receivers, the programs being repeated from 67 Broad Street for the group identically as they had been presented earlier.

A parabolic receiving antenna was used, having a gain of 17 db, which is equal to multiplying the received signals power by 50. The receiver demonstrated was mounted in a typical console type radio cabinet which also included an automatic record player. The receiver controls consisted of a volume control, tone control, and eight push buttons for program selection. Receiver design is simplified somewhat by the fact that it need only tune to one carrier frequency. Federal engineers anticipate that receivers, built in quantity production, will cost about the same as a good AM or FM receiver.

As applied to regular commercial broadcasting, the PTM radio broadcasting system increases by at least eight-fold the time available on the air, thus permitting a wide variety of programs transmitted on a single frequency.

Federal Telecommunications Laboratories officials who explained the system, pointed out that one of the first applications of PTM multiplex broadcasting in the United States will be for special business uses. Subject to frequency allocations by the Federal Communications Commission, companies furnishing recorded musical programs will be able to dispense with wires and offer to each customer his choice of eight or more different programs. PTM multiplex broadcasting is ideally suited to the growing needs of newspapers and news services. The various channels may be allocated to teletype, voice or photo-facsimile circuits in any combination of local, national or international coverage. More specialized adaptations will be found to suit the requirements of Stock Exchanges, banks, brokerage concerns and advertising agencies.

The development of PTM embodies implications and applications which are deserving of the broadcasting industry’s serious consideration.

LEGAL DEPARTMENT

FCC GRANTS CP FOR NEW STATION TO LOCAL CLEVELAND INTERESTS

In a proposed decision adopted September 4, the FCC granted a CP for a 5 KW AM station in Cleveland to the Cleveland Broadcasting Company. The decision came after a hearing on the conflicting applications of Cleveland Broadcasting and Scripps-Howard Radio, Inc.

In rejecting the application of Scripps-Howard the Commission based its conclusion “primarily upon comparison of the facts of residence and familiarity with Cleveland shown by the principal officers, directors and stockholders of the respective applicants.” The FCC pointed out that the directors of Cleveland Broadcasting are residents of or closely identified with Cleveland and whose “diverse backgrounds of law, industry, banking and labor, . . . will result in the operation of a radio station which will be responsive to the needs and desires of the people of Cleveland.” By way of comparison it was stated that the Scripps-Howard directors have no “close kinship” with Cleveland, that the President of the Company lives in New York and spend most of his time in the newspaper business, which is the principal business of the Scripps Company, sole stock owner of Scripps-Howard Radio.

The Commission added that the grant to Cleveland Broadcasting would give “greater diversity of ownership of the media of mass communication.” Scripps-Howard is licensee of WCPO, Cincinnati, Ohio, WNOX, Knoxville, Tennessee and owns all voting stock in the Memphis Publishing Company, licensee of WMC, Memphis, Tennessee. It has FM applications pending for Cleveland, Pittsburgh and Indianapolis and holds a conditional grant for an FM station in Cincinnati. Among the newspapers controlled by Scripps-Howard interests is the Cleveland Press.
Acting Chairman Denny Interprets Definitions
Of "Wire" News Program Classifications
(Continued from page 709)

is not required that 50 percent or more of a news program usually be devoted to 'purely local items' in order for such a program to be classified as 'local live.'

"With respect to your second question, a news program based upon material received by wire, but more than half of which is very substantially edited and rewritten by a station staff member or by a writer employed by a sponsor and announced in its edited and rewritten form, should not be classified as a 'wire program' because of its being based upon material received by wire. [Italics added.]

"The important factor in this regard is the treatment given locally to the news rather than its origin. For example, a program consisting of a verbatim reading by a station in New York of a wire news text about New York affairs would still be wire. On the other hand a program of national and international news based entirely upon material furnished by the wire news services would be classified 'local live' if more than half of it consists of material which has been very substantially edited and rewritten as indicated above.

"The nature of your inquiry suggests that a misconception may still persist on the part of your organization and your clients concerning the purpose and language of the definitions in question. May we again point out that it was neither our desire nor intention to cast aspersions upon wire news programs or to discourage their use. On the contrary, we have expressly recognized the highly important role that such programs play in the field of radio broadcasting. This is evident, for example, both in our report of March 7, 1946, and our letter to you of June 10, 1946, in which we also pointed out that the only reason for establishment of the program categories was as a convenience for analytical and statistical purposes."

Following receipt of Mr. Denny's letter, International New Service stated:

"We are grateful to the FCC for the amendment to the new wire program rule, and thankful to Mr. Denny for his clarification and interpretation. Thus the questions we raised in our petition several months ago are answered satisfactorily. The danger of a threat to free speech, unintentional though it might have been, is removed as is the implication of any penalty against conscientious news programming based on teletype news reports."

**RATE CARD GROUP TO FORMULATE RECOMMENDATIONS FOR STUDY AT CONVENTION**

A meeting of the NAB Sales Managers subcommittee on Standardization of Rate Card Format will be held in New York City, September 23-24, it was announced Friday (13), by Arthur Hull Hayes, WABC, chairman.

At this meeting final recommendations will be formulated for presentation to the industry at the NAB convention.

"An invitation is issued to any interested parties who wish to attend this meeting and be heard on the subject of recommendations for standardizing rate cards," Mr. Hayes said. He stated that appointments can be made by communicating with him direct at WABC, or with Frank Pellegrin of the NAB Department of Broadcast Advertising.

Representatives of the Time Buyers committee of the American Association of Advertising Agencies and of the rate card committees of NBC and CBS have already asked to be present, he said.

Members of the subcommittee, in addition to Mr. Hayes, are Kelly Smith, CBS director of station relations; William C. Roux, NBC Spot Sales; Ken Church, WCKY, Covington, Ky.; Craig Lawrence, Wkop, Boston, and George Southerland, Wilm, Wilmington, Del. James McConnell, chairman of the NAB Sales Managers Executive Committee, will also attend.

**SOME LAST-MINUTE FCC ACTIONS**

**Docket Case Decisions**

The Commission announced its Final Decision granting the application of Harold F. Gross, d/b as Southwestern Mich. Broadcasting Company for a new station in Kalamazoo, Mich., and the application of Mon-Yough Broadcasting Company for a new station in McKeesport, Pa., to operate on 1360 kc., 1 kw., unlimited time, directional antenna at nighttime only.

Mutually exclusive applications of McKeesport Radio Co., McKeesport, Pa., and Booth Radio Stations, Inc., Lansing, Mich., requesting the same facilities, were denied.

Final Decision is also announced granting the application of Corpus Christi Broadcasting Company, for a new station at Corpus Christi, Texas; to operate on 1290 kc., 250 watts, unlimited time, subject to the condition that application is filed within 30 days for modification of permit specifying an exact antenna system and transmitter site meeting the requirements of the Commission's Standards.

Mutually exclusive applications of Howard W. Davis, tr/as The Walmac Company and R. F. & W. Broadcasting Co., for the same facilities, were denied.

**MISCELLANEOUS ACTION**

Scheduled Oral Argument in the matter of amendment to Sec. 3.407 of the Commission's Rules governing the announcement of mechanical records (Docket 7611) for November 25 and extended time for filing briefs to November 18, 1946.

**AM LICENSE RENEWALS**

The following stations were granted renewal of licenses for the period ending August 1, 1949:

- WCHV, Charlottesville, Va.; Wgbb, Freeport, N. Y.; kWos, Jefferson City, Mo.; Kwjb, Globe, Ariz.; kvso (*), Ardmore, Okla.; whiz, Zanesville, Ohio; kovo (*), Provo, Utah; WFOY, St. Augustine, Fla.

(*) Comr. Durr for further inquiry.

Wclo—Southern Wis. Radio, Inc., Janesville, Wis.—Granted renewal of license for the period ending February 1, 1949.

**CP'S GRANTED**

The FCC on Friday (13) announced the granting of 18 CP's for AM stations, 21 final CP's for FM stations, 5 conditional CP's for FM stations and 1 CP for a television station.

Because of space limitations this week, REPORTS will publish the details of these grants in the next issue.
BARGAINING ELECTION ORDERED AT WSB

In a ruling released Monday (9), the NLRB rejected the contention made by the IBEW that the bargaining unit of technicians at WSB be limited to the 7 men working at the main transmitter, excluding 8 studio control operators and 2 technicians at the FM transmitter. All 17 employees will be eligible to vote for or against representation by Local 1195 of the IBEW at the election to be held within 30 days.

The NLRB, in agreeing with the station that all three groups of technicians should be treated as one bargaining unit, pointed to the integrated functioning of all technicians, their similar conditions of employment, the extent of employee interchange, similarity in skills, and the collective bargaining pattern in the industry as well as in the area. The Board noted that the IBEW representative testified that at least 70 percent of the Union's approximately 350 agreements covering technicians, included both transmitter technicians, and studio control operators.

RADIO DIRECTORS GUILD CHARTERED
BY AMERICAN FEDERATION OF LABOR

The American Federation of Labor has just announced the issuance of an international charter to the Radio Directors Guild and the inauguration of an organizational campaign claiming a current nucleus of approximately 1,000 persons in New York, Chicago, Hollywood, and Washington. The Guild president, George Zachary, proposes to organize radio directors throughout stations in the United States and Canada.

At the moment it is not clear as to what station personnel will be considered as coming within the jurisdiction of the Radio Directors Guild.

RADIO SET PRODUCTION FOR JUNE UP; 20% OVER MONTHLY AVERAGE IN 1941

Last week the Department of Commerce released its radio set production figures for June. Total production for all types of receivers in June was 1.2 million sets—up 9% over the 1.1 million produced in May and 20% over the average monthly production in 1941. By far the greatest effort was put into AM table models and compacts. June production of console models represented only 28% of the average 1941 monthly production of this type of receiver. By far the larger proportion of the 17,857 console models produced are AM-FM combinations.

There was no activity in straight FM sets during June and no marked increase in the number of FM converters produced. Automobile set production dropped off further—running now about 50% of the 1941 monthly average. Radio-phonograph combinations increased markedly from 118 thousand in May to 174 thousand in June—twice the monthly production of 1941 for this model. An unknown proportion of these combinations are also wired for FM.

STATION ANALYSES

The following tables present the status of all standard, commercial FM and commercial television stations by month through August 31, 1946. These analyses are kept up-to-date as of the beginning of each month and are published once a month in REPORTS.

NOTE: A few stations, licensed to operate, may be temporarily off the air during period of changing to new frequencies.
POST-WAR MARKETS IN SOUTH AND WEST TO BE WIDER SAYS COMMERCE DEPT.

In the immediate post-war period the South and Far West will probably constitute a much larger share of the nation's markets than they did before the war, the Department of Commerce predicted last week.

This conclusion is based upon a recently-completed study of income payments to individuals in the United States which showed that the long-time trend towards a redistribution of the nation's total income payments in favor of the South and Far West was continued over the war period.

Total income payments in the United States—including wages and salaries, net income from unincorporated business and farms, rents and royalties, interest, dividends and other items such as military payments, relief payments and unemployment benefits—increased from $76 billion in 1940 to $153 billion in 1945—more than double.

This war-time increase in income was not distributed evenly throughout the country. In the high-income states of New England and the Middle Eastern regions, the increase was only about 75 percent, whereas in the South and West the increase ranged from 128 to 140 percent.

FURTHER REVISIONS PLANNED BY FCC IN NEW PART I OF COMMISSION RULES

As a result of the seminar conducted by the FCC on the new Part I of the FCC Rules and Regulations relating to Organization and Practice and Procedure, the Commission has decided to incorporate several changes suggested at the seminar. (REPORTS, p. 677)

NAB plans to publish a reprint of the new Part I when all revisions have been completed. It is expected that the FCC will complete the further revisions later this month.

Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of September 23-29, 1946 by The Advertising Council and the Media Programming Division of the OWMR. Copies of individual Fact Sheets, and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West Forty-Second Street, New York 18, N. Y.

Veterans' Information Centers

In order to provide the veteran with much-needed information and counseling service that will help guide him back into gainful and useful civilian life, the Reemployment and Reemployment Administration has promoted the establishment of Veterans' Information Centers—sometimes known as Community Advisory Centers—in nearly three thousand communities throughout the country. Additional centers are being established regularly. It is the function of each center to furnish all the facilities necessary to serve the individual veteran—complete and accurate information, counseling and referral facilities. But experience of the past several months indicates that many veterans—including those who need help most—do not know such centers exist. The immediate job, therefore, is to inform ex-servicemen and women about the services that are available to them at the advisory center and urge them to go there. If you are a relative or friend of a veteran, tell him of the services available at his community advisory center. If you are a veteran, find out the location of the veterans' information center in your locality and take advantage of its information, counseling and referral facilities. If there is no veterans' information center or community advisory center in your locality to advise you, submit your problem in writing to the Reemployment and Reemployment Administration, Washington 25, D. C. (Fact Sheet No. 29)

USO Needs 19 Million Dollars for 1947

President Truman, Generals Eisenhower and Bradley, and Admiral Nimitz urge all Americans to support the USO in its campaign for 19 million dollars with which to serve the servicemen in 1947, the USO's final year of operation. There will be more men in service during the next year—1½ million—than there were when USO was started in 1941, and the morale problem has been intensified for the men still sweating it out on occupation duty. For teenagers just drafted into the service, for troops in training, the war over, they have less action and a greater need than ever for a well-balanced USO program, a "home away from home." The war is not yet over for the 199 thousand veterans still in hospitals in the United States, fighting a battle against pain and boredom, sometimes wondering if the nation has forgotten them and their sacrifices. USO as a bond between the GI and the community he left behind is a steadying influence in the nation's transition to peacetime and a bridge between war and peace for the veterans. Stress the services offered by USO: (1) USO provides the clubs which serve as a "home away from home" for the GI in the U. S. and overseas. It helps him in traveling to and from home, gives a helping hand to his family living in towns near army camps. It helps him in wholesome entertainment in pleasant circumstances. It is a source of heart-warming hospitality and good cheer in strange surroundings. (2) USO Camp Shows and Sketching Service come regularly to entertain men who have to spend long, weary months in plaster casts, or lying in bed, men who need an antidote for trouble, a relief from pain. (3) USO brings activity into the hospital and adjusts its club programs to help the convalescent veteran and GI return to normal, everyday community living. Emphasize the universal appeal, the volunteer backing of USO. (4) USO represents the three great faiths, combines the efforts of six member agencies. (5) USO is the voluntary expression of the American people's desire to stand beside the GI—as shown by the remarkable record of service by USO volunteers. Emphasize that USO's task in 1947 is part of the unfinished task of winning the war of safeguarding the fruits of victory, that not until the end of 1947 will USO have earned its honorable discharge for a job well done—so GIVE TO THE USO—THROUGH YOUR COMMUNITY CHEST OR THROUGH YOUR LOCAL USO CAMPAIGN.* Note: The line above is the approved USO radio "tag line." Be sure to incorporate it in all allocated programs. (Fact Sheet No. 32)

CHRISTMAS GIFT CAMPAIGN LAUNCHED

World Festivals for Friendship, Inc., 2 West 45th Street, New York 19, N. Y., is engaged in its second annual national campaign to solicit Christmas gifts for the children of war torn countries.

Mrs. Gertrude Mittlemann is chairman of the gift committee. She advises that National Retail Dry Goods Association is among the groups cooperating in this year’s campaign. Last year, when “Share Your Christmas” was launched, 200,000 presents were donated.

DAR RADIO PLANS CALL FOR TRANSCRIPTIONS AND SPOTS FOR LOCAL USE

Radio plans of the DAR have been announced for 1946-47 by Mrs. George Howard, national radio chairman of the organization.

A series of spot announcements has been released to the 48 state chairmen for use by local chapters on patriotic holidays.

Other plans include a series of transcriptions featuring Mrs. Julius Talmadge, President General of the DAR.

Through these releases, it is expected that local DAR leaders and radio stations will be provided with authentic material for public interest programs.

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, September 16. They are subject to change.

Monday, September 16

Tuesday, September 17

NEW—James A. Noe, Lake Charles, La.—C. P. 1230 kc., 100 watts, unlimited.

Friday, September 20

Further Hearings

WGTM—Penn Thomas Watson, Wilson, N. C.—C. P. 590 kc., 5 KW, unlimited DA-night and day.

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—C. P. 590 kc., 1 KW, unlimited. DA-daytime only.

WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—C. P. 610 kc., 1 KW, unlimited, DA-night & daytime.

NEW—Virginia Broadcasting Corp., Roanoke, Va.—C. P. 610 kc., 1 KW, unlimited DA-night and day.

(In Room 2232)

Informal Conference on Revision of Schedule 13.

FCC ACTIONS

DOCKET CASE DECISIONS

The Commission announces adoption of a final decision granting the application of Radio Engineering Service (B3-P-4498; Docket 7422) for a new station in Pine Bluff, Ark., to operate on 1400 kc., with 250 watts, unlimited time, conditioned upon submission of an application for modification of CP within 60 days, specifying a transmitter location acceptable to the Commission and subject to the approval of the CAA, and waiver of Sec. 3.55(b) of the rules, until a modulation monitor acceptable to the Commission can be obtained.

The mutually exclusive application of Arkansas Democrat Company for the same facilities at Little Rock (B3-P-3760; Docket 6731) is denied. (B-269)

The Commission announces adoption of a proposed decision (B-274) looking towards the grant of an application of the Cleveland Broadcasting Co., Inc. for a new station (Continued on next page)
in Cleveland, Ohio (B2-P-4058; Docket 6917), to operate on 1300 kc., with 5 KW, unlimited time, directional antenna, conditioned upon the approval of site by the CAA, and waiver of Sec. 3.55(b) of the rules, until a modulation monitor acceptable to the Commission can be obtained.

The Commission proposes to deny the applications of WOFX, Inc., for renewal of license of WTNJ, Trenton, N. J.; WCAP, Camden, N. J., and WCAP, Asbury Park, N. J.

The Commission proposes to deny the applications of WOCN, Inc., for renewal of license of WTNJ, Trenton, N. J., and for modification of license requesting unlimited time on 1310 kc., and assignment to WCAP and WCAP of frequency 1260 kc. (Dockets 5893 and 6161); deny the applications of The City of Camden for renewal of license and modification of license on WCAP, Camden, N. J., to share with WCAP the time now used on 1310 kc. by WTNJ, without prejudice, however, to the City of Camden filing a new application for a construction permit and license to operate on 1310 kc., sharing time with WCAP, providing it is affirmatively shown that the City of Camden would have the exclusive use and control of the station and that no further effect would be given to the agreements here declared to be contrary to the public interest (Dockets 5361 and 6144); and to grant the application of Radio Industries Broadcasting Co. for renewal of license of Station WCAP, Asbury Park, N. J., and to dismiss without prejudice its application for modification of license to share the 1310 kc. frequency with only WCAM, instead of with both WCAM and WTNJ. (Dockets 5778 and 6145)

AM APPLICATION GRANTED

NEW—Las Vegas Broadcasters, Inc., Las Vegas, Nev.—Granted CP for a new station to operate on 1230 kc., 250 watts, unlimited time, subject to the conditions that applicant will within 60 days from date of action file an application for modification of permit with the Commission specifying a transmitter site and antenna system meeting the requirements of the Commission's standards; waiver of Secs. 3.55(b) and 3.60. (B5-P-4787)

MISCELLANEOUS APPLICATIONS GRANTED

NEW—Cherry & Webb Broadcasting Co., near Providence, R. I.—Granted construction permit for a new experimental television broadcast station. (B1-PVR-173)

NEW—Coralie Radio & Sound Service, area of Trinidad, Colo.—Granted construction permit for new relay broadcast station. (B5-PRE-474)

NEW—Gates Radio Co., Quincy, Ill.—Granted construction permit for new developmental broadcast station. (B4-PREX-97)

NEW—News-Press Publishing Co., area of Santa Barbara, Calif.—Granted CP for a new relay station to be used with standard station KTMS. (B5-PRE-470) Frequency assignment subject to change in accordance with proceedings in Docket 6651.

NEW—Leonard A. Versluis (mobile), area of Grand Rapids, Mich.—Granted CP for a new relay station to be used with standard station WLAV. (B2-PRE-473) Frequency assignment subject to change in accordance with proceedings in Docket 6651.

NEW—News-Press Publishing Co., area of Santa Barbara, Calif.—Granted CP for a new relay station to be used with standard station KTMS. (B5-PRE-470) Frequency assignment subject to change in accordance with proceedings in Docket 6651.

NEW—Radiophone Broadcasting Station WOPI, Inc., area of Bristol, Tenn., and Bristol, Va.—Granted CP for a new relay station to be used with standard station WOPI. (B4-PRE-464) Frequency assignment subject to change in accordance with proceedings in Docket 6651.

DESIGNATED FOR HEARING

Four States Broadcasting Corp., Texarkana, Ark.; Magnolia Broadcasting Co., Magnolia, Ark.—Designated for consolidated hearing the application of Four States Broadcasting Corp. (B5-P-4838) with application of Magnolia Broadcasting Co. (B5-P-5088) both requesting the frequency 1490 kc., with 250 watts, unlimited time, at Texarkana and Magnolia, Ark., respectively.

Oneonta Star, Inc., Oneonta, N. Y.—Designated for hearing the application of Oneonta Star, Inc. (B1-P-5114), for a new station to operate on 1400 kc., 250 watts, unlimited time, in a consolidated proceeding with application of Edw. L. Schacht. Further ordered that the order of Aug. 22 designating the Schacht application for hearing and making WABY a party to the proceeding, be amended to include the application of Oneonta Star, Inc.

Bluefield Broadcasting Co., a partnership, Bluefield, W. Va.; Odes E. Robinson, Bluefield, W. Va.—Designated for consolidated hearing the application of Bluefield Broadcasting Co. (B2-P-4090) for a new station to operate on 1240 kc., 250 watts, unlimited time, with application of Odes E. Robinson (B2-P-5160), requesting the same facilities.

Ben K. Weatherwax, Aberdeen, Wash.; Fred G. Goddard, Hoquiam, Wash.—Designated for consolidated hearing the application of Ben K. Weatherwax (B5-P-5098) with application of Fred G. Goddard (B5-P-5180), both requesting the frequency 1450 kc., 250 watts, unlimited time, at Aberdeen and Hoquiam, Wash., respectively.

WGBB—The Fort Industry Co., Miami, Fla.—Designated for hearing on engineering issues only, application for CP to increase power from 10 to 50 KW, install new transmitter, make changes in DA and change transmitter location. (B3-P-3393)

Booth Radio Stations, Inc., Saginaw, Mich.—Designated for hearing on interference issue, application for a new station to operate on 790 kc., 1 KW, unlimited time, DA-2. (B2-P-4088; Docket 6805)

WBBW-WABW—Associated Broadcasters, Inc. (assignor); Evansville On The Air, Inc. (assignee), Indianapolis, Ind.—Designated for consolidated hearing applications for consent to voluntary assignment of construction permit of Station WBBW and assignment of license of FM station WABW from Associated Broadcasters, Inc., to Evansville On The Air, Inc. (B4-AL-538; B4-ALH-6)

AM LICENSE RENEWALS

Correction

According to a correction by the Commission, Station WADC was erroneously listed as having received a renewal of license for the period ending November 1, 1945. (See Current REPORTS, p. 630.) The action should have read:

WADC—Allen T. Simmons, Tallmadge, Ohio—Present license extended on a temporary basis to November 1, 1946.

(Continued on next page)

KGB—East Texas Broadcasting Co., Tyler, Texas—Granted renewal of license for the period ending August 1, 1948.

**MISCELLANEOUS ACTIONS**

WEEK—West Central Broadcasting Co., Peoria, Ill.—Granted modification of construction permit which authorized new station, to change type of transmitter, change transmitter and studio location, and extend commencement and completion dates to 60 days after grant and 180 days thereafter. NEW—R. C. Goshorn and R. L. Rose, a co-partnership, d/b as Alton Broadcasting Co., Alton, Ill.—Construction permit for a new standard broadcast station to be operated on 1570 kc., power of 1 KW and daytime hours of operation.

Federal Trade Commission Actions

No complaints or cease and desist orders were issued during the past week by the Commission.

STIPULATIONS

H. M. Sheer Co.—The Federal Trade Commission approved a stipulation in which H. M. Sheer Co., Quincy, Ill., agrees to cease and desist from falsely representing that it manufactures equipment and supplies for poultry raisers. (03332)

Norman Shultz, Post Office Box 746, Salt Lake City, entered into a stipulation with the Federal Trade Commission to cease and desist from representing that souvenir tokens he sells are solid gold or that they are coins. He also agrees to discontinue advertising them as “gold” without disclosing the carat fineness of the alloy by a proper quality mark or designation in lettering of equal conspicuousness. (03330)

Well-Fit Hat Co.—The Federal Trade Commission accepted from Charles Dolin, trading as Well-Fit Hat Co., 32 West 38th St., New York, a stipulation to cease and desist from representing in any manner that women’s hats made in whole or in part from old, used or second-hand materials are new or made of new materials. (4173)
Six Renewal Applications Set for Hearing
Under Provisions of March 7th Report

The FCC announced on Friday (20) that the license renewal applications of six stations had been designated for hearing as a result of the program analysis requirements specified in the Commission's March 7th report on "Public Service Responsibilities of Broadcast Licenses." The stations listed were WBIX, KGFJ, KMAC, KONO, WIBG, and WTOL. In February the renewal application for WBAL was designated for hearing.

"In designating these seven applications for hearing," the announcement stated, "the Commission was of the opinion that the statistical and other data before the Commission concerning the program service rendered by these stations indicated that these stations were not rendering a well-rounded program service in accordance with the licensees' obligation to operate in the public interest. It should be emphasized that the statistical data before the Commission constitute an index only of the manner of operation of the stations and are not considered by the Commission as conclusive of the overall operation of the stations in question. In the renewal hearings thus ordered the licensees will have an opportunity to show the nature of their program service and to introduce any other relevant evidence which would demonstrate that in actual operation the program service of the station is in fact a well-rounded program service and is in conformity with the promises and representations previously made in prior applications to the Commission."

The Commission also announced that the 322 stations operating on temporary licenses at the time of the March 7th Report, together with 88 whose regular licenses expired on May 1, 1946, and 75 whose regular licenses expired on August 1, 1946 (total of 485), have since filed the program analyses contemplated by the report. Of this number the Commission has taken action on (Continued on page 728)

Radio's Election Opportunity
By A. D. Willard, Jr.
Executive Vice President

Before long now, as in election years gone by, political groups, pressure groups, patriotic groups, and others, will be asking radio stations and networks for time to present announcements and programs to "Get Out the Vote." It is a swell way to get good institutional advertising free. And perhaps radio will be generous again and will perform under another's auspices a service which it could and should be performing itself.

This is the kind of job radio can do better than anybody else—radio should do it—and radio should get the credit for it.

Radio stations are good citizens and most Americans are good citizens. Let us work together to promote good citizenship. Let us begin now to remind our people that the right to vote is the duty to vote. Let us urge our listeners with all our hearts and with all our energies to accept their responsibilities as citizens of the world's most representative government.

And let us accept our responsibility by doing the job ourselves—better than it's ever been done before.

Convention Program
Taking Shape

While several of those who have been invited to speak at the forthcoming NAB convention have not yet finally accepted and some topics remain to be assigned, the program is shaping up nicely and is almost definitely set.

Sunday, October 20, will be devoted to pre-convention registration. The registration desk will be open from 10:00 a.m. to 5:00 p.m. The golf tournament, sponsored by Broadcasting Magazine is scheduled to take place beginning at 9:30 a.m., at the Acacia Country Club near La-(Continued on page 726)
A LETTER FROM JUDGE MILLER

To all Members of NAB:

In my capacity as Chairman of an American Bar Association Committee on cooperation between the courts, the lawyers and lay people, to improve the administration of justice, I would like to find out the extent to which radio broadcasting has been used to inform the people concerning the way in which the courts operate, and in which justice is administered. This notice is being inserted in the REPORTS for the purpose of asking radio broadcasters throughout the country to advise me what contacts they have had with Bar Associations, looking toward the improvement of working relations between the people, the courts and the lawyers.

Specifically, I would like information about what has been done in the way of broadcasting public interest programs by lawyers, or by broadcasting stations on behalf of lawyers.

What difficulties have been experienced by broadcasters in the material presented by lawyers or judges; what has been the audience response to such broadcasts; what experience have the broadcasters had in efforts to improve the material which lawyers and judges have used in their broadcasts; to what extent has it been possible for station operators and their program departments to assist in the preparation of scripts, or to make material used by lawyers and judges more palatable to listeners; what suggestions can you give as to the improvement of such broadcasting, both generally and in particular cases.

In this respect, let me call your attention, particularly, to the administration of the traffic courts, the operation of juvenile welfare laws; laws relating to jury service; the way in which the courts operate; the provision of court facilities; the way in which witnesses are treated in the courts; housing facilities for witnesses and jurors in the courts, and other related subjects which are of vital importance to the people of the communities.

Please send to me any ideas which you may have upon the subject.

Sincerely yours,

(Signed) JUSTIN MILLER
President.

Convention Program Taking Shape

(Continued from page 725)

Grange, Illinois. Complete details of this will be made available to all broadcasters by Broadcasting.

On Monday several of the standing executive committees of NAB will hold sessions in the morning. The afternoon will be given over entirely to FM and facsimile. That night the NAB Board is to meet in closed session.

On Tuesday morning, the 22nd, a no-host breakfast will be held under the auspices of the Chicago Radio Management Club. The speaker for this occasion is yet to be announced.

The convention proper gets under way at 10:00 a.m., when President Miller will deliver the keynote address. A discussion of programming will follow and the Broadcast Measurement Bureau will have its session.

On Wednesday discussions of music copyright, small market stations, public relations and the NAB business session are scheduled. At this latter meeting, directors-at-large will be elected and the membership will vote on proposed By-Law amendments. At a no-host dinner that evening freedom of the press, freedom of speech, freedom to listen, etc., will be discussed by a well selected panel.

Thursday's schedule includes a short talk by a representative of the Civil Aeronautics Administration. The rest of the day will be taken up with the retail advertising and the broadcast advertising clinics. The Banquet takes place that evening.

In an early issue of the REPORTS the names of the speakers at the noon luncheons and their topics will be announced.

Hotel Reservations

No more hotel reservations can be accepted. All of the rooms for which NAB contracted have been applied for and we are earnestly endeavoring to secure an additional allotment to care for applications already on file.

(For other Convention News, see Small Market Stations.)

Legal Department

DELEGATION OF CONGRESSIONAL POWER TO AGENCIES RISKY, PETTY TELLS ROTARIANS

When quasi-legislative powers are delegated by Congress to an administrative agency, not only is the purpose, viz, cutting red tape, not accomplished, but the practice tends to make our Government one of men rather than of laws. So NAB General Counsel Don Petty told the Rotary Club of Charleston, W. Va., Friday (13).

"Experience has already taught us that bureaus themselves create the same kind of red tape they were
Official Notice
OF
PROPOSED AMENDMENTS TO BY-LAWS
★ ★ ★

Article XIV, Section 1, of the NAB By-Laws now reads as follows:

"These By-Laws may be amended, repealed, or altered, in whole or in part, by a two-thirds vote at any annual meeting of the Association provided the proposed change is submitted by mail to the last recorded address of each member at least thirty days before the time of the meeting which is to consider the change."

Pursuant to this provision of the By-Laws, the following proposed amendments, to be voted upon by the membership at the business session held in connection with the Annual Membership Meeting (convention) on Wednesday afternoon, October 23, are hereby submitted.

We also submit the statement made to the Board of Directors by former NAB President J. Harold Ryan, who is Chairman of the Board's sub-committee on By-Law Revision. This statement outlines the reasons underlying these proposed amendments. The statement is as follows:

"Your Committee on By-Laws has given considerable thought to the broad underlying problems of the By-Laws and the corporate Charter of the Association. We feel that many basic changes are necessary in both documents. The recent tremendous increase in membership, as well as the developing growth of the industry and its complicated evolutions made advisable, in our opinion, a complete rewriting of these guides to the Association's operations. We hope to persuade the Board to our viewpoint as to the best way in which to handle the solution of these problems.

"All of us are jealous of maintaining the democratic processes by which the affairs of the Association are governed. The recent increases in membership make it more than ever necessary that democratic procedure be kept and strengthened in every possible way. At present the only way in which our By-Laws and Charter can be amended or revised is by vote of the membership in annual meeting. We are deeply concerned at the small attendance of qualified members at the sessions at which such important matters as changes in these basic and fundamental documents are presented for action. The result in the past has been that changes in the By-Laws have been perfunctorily voted upon by a small minority. We desire to perfect a method by which such matters can be decided by a substantial majority, after considered deliberation.

"We are not unmindful that the Board has given this committee a mandate to suggest changes in at least two important matters—network membership and election of directors-at-large—and has expressed interest in certain alterations in district boundaries. We feel, however, that important as these matters are, they are secondary to the question of method by which amendments and revisions are to be voted on, and it is our considered opinion that the change in such method that we are now proposing should first be passed upon by the Board, and submitted to the membership for approval at the October meeting, and then the other changes in By-Laws and Charter that are anticipated can be submitted for action under the new procedure which we are sure will result in greatly increased interest and participation by our membership.

"We are consequently at this time submitting for your consideration only two proposals, which would change the method of passing upon such proposed amendments and revisions from the present action by membership at a session of the annual meeting to a plan of referendum by mail. There are two proposals necessary because the one alters the existing plan for action on proposed amendments and revisions to the By-Laws and Charter, while the other provides the machinery for action on the Standards of Practice, which is not covered by our present By-Laws. In the latter case, because the Code was first adopted by action of the membership itself, it has been assumed that any changes in the Code should receive the approval of the membership. This proposal, therefore, formalizes what has been practice.

"Your committee is firmly of the opinion that favorable action by the Board at this time on these two proposals, if approved by membership action at the October meeting, will preserve that democratic intent which is so necessary in an Association of this nature. Further desirable changes can then be effected through the machinery herein set up."

PROPOSAL NO. 1—"Amend Article VIII, by adding thereto a new section to be numbered 3, and renumbering the present Section 3, Section 4, and succeeding Sections of said Article, accordingly.

"ARTICLE VIII

"Section 3. The Board of Directors shall have the power to enact, amend and promulgate Standards of Practice or Codes and to establish such methods to secure observance thereof as it may deem advisable."

PROPOSAL NO. 2—"Strike the present Article XIV and insert in lieu thereof the following:

"ARTICLE XIV

"Amendments

"Section 1. The charter or by-laws of the National Association of Broadcasters may be amended, repealed or altered in whole or in part by a majority referendum vote submitted by the Board of Directors to the qualified voting membership in such manner as the Board may prescribe; provided, upon petition signed by not less than five (5) per centum of the active membership of the Association respecting the amendment of the charter or the by-laws filed with the Secretary-Treasurer at least thirty (30) days prior to any meeting of the Board of Directors the Board shall at such meeting provide for the submission of such proposals in accordance with the provisions of this section."

Ballots containing these proposed amendments will be made available to each certified representative of an active member in attendance at the membership meeting (convention).

C. E. ARNEY, Jr.
Secretary-Treasurer

SEPTEMBER 23, 1946 — 727
Six Renewal Applications Set for Hearing
(Continued from page 725)

406. 400 have been regular license renewals.

"Of the remaining 79 renewal applications not yet acted upon," the FCC reported, "the following 39 have not been processed pending the outcome of other hearings in which the licensees are now directly or indirectly involved (e.g. hearings on multiple ownership, for increased power, for transfer of control, etc.): KDAL, KDB, KELO, KFRC, KGB, KGGF, KGKO, KHJ, KOB, KODY, KOMA, KSOO, WABY, WADC, WBAL, WBAP, WBAI, WBLK, WCAM, WCAP, WCHS, WEOA, WFAA, WGBF, WGV, WGR, WHTS, WJEB, WJOL, WKBW, WKEU, WNEW, WOKO, WORL, WOW, WPAR, WOW, WPRP, WTNJ.

The other 40 not yet processed are still operating on temporary licenses for differing reasons: 6 for accounting studies (KBIZ, KOCU, KSJB, WCQ, WCQM, WHTB), 5 for possible engineering violations (KGDE, WBLJ, WING, WKBH, WSKH), 6 for legal studies not related to overall program service (KASA, KSRO, KVNU, KXOX, WATT, WNCE), 7 awaiting action on applications for assignment or transfer of licenses (KABC, KSAM, WACO, WAGM, WINN, WJXN, WTAX) and 16 awaiting the receipt of further information from the licensees (KFJI, KFJZ, KGHF, KHHUB, KICA, KLAC, KMJ, KROY, KSAN, KTOH, WDEC, WFTC, WKRC, WMJM, WMOM, WSPE.

NAB EXECUTIVES MEET WITH RMA GROUP TO DISCUSS PLANS FOR RADIO WEEK

A National Radio Week observance for November 24-30 was tentatively agreed upon Thursday (19) at a joint meeting of the advertising committee of the Radio Manufacturers Association with top executives of the National Association of Broadcasters.

The purpose of the observance, which will follow the pattern established last year, will be to stress the values of a free radio, particularly in days of national and international confusion and turmoil—values which can be fully realized only through the widest possible diffusion of broadcasting and receiving equipment, and the unhindered ability of broadcasters and manufacturers to operate in consonance with our free institutions as an integral part of our system of free enterprise.

Representing NAB were Justin Miller, president, A. D. Willard, Jr., executive vice president, and E. J. Heffron, executive assistant-public relations. Representing RMA were Bond Geddes, executive vice president of RMA, and the following members of RMA’s advertising committee: John Garceau of Farnsworth, chairman; John K. West of RCA Victor; W. B. McGill of Westinghouse; David McCuickin of Philco, and James D. Secrest, RMA director of publications.

NATIONAL CRITICISM OF RADIO HELPS WOULD-BE TOTALITARIANS, MILLER STATES

The present rash of recriminations against radio is playing into the hands of would-be totalitarians, NAB President Justin Miller stated in an address to the Rotary Club of the City of New York on Thursday (19).

In a speech mainly concerned with administrative law, Judge Miller suggested that the FCC “Blue Book” was a rich source of material for the unscrupulous and unwary who are interested in destroying the free radio enjoyed—practically alone—by the people of the United States.

He said that just as it was the fashion, a generation ago, to belittle Rotary and other service clubs, so is it the fashion today to berate radio. He pointed out a further parallel. Just as Hitler suppressed Rotary in Germany, so did he destroy free radio.

There is a group of people in this country today, he said, which is just as anxious to take over the free institutions of our country as Hitler was to take over the free institutions of Germany; and he identified this group as the Communist Party.

"From this point on," he said, "I will speak merely in terms of hypothesis. Suppose you or I were a communist; intent on using available situations, in government and out of it, to further the purposes of the party. What strategy would we use; or in what ‘skull practice’ would we indulge, to use the football term. I suggest the following: first, the technique of confusion; dividing the people, setting one group against the other; breaking down their faith in established things; so that when the time of crisis came it would be more easy to ‘take over’ as was done in the various countries where the dictators came into power.

"For this purpose it would be possible to use the structure of administrative government and the technique of administrative interpretation, which I shall explain later. Next it would be possible to use the technique of getting a well-respected man in public life to ‘front’ for us. Third, would be the technique of using a respectable organization theretofore definitely committed to American traditions."

Judge Miller gave examples of how this device was being used to undermine free radio. He did not suggest that the Federal Communications Commission was consciously playing the game, but he implied that the FCC Blue Book was being used by others to that end.

He pointed out that he had held several posts in the government in Washington over a number of years, which gave him familiarity with administrative procedures, including the United States Court of Appeals bench in Washington, where many administrative decisions were reviewed; that he therefore had a legitimate basis on which to evaluate administrative legal procedures.

"Because of the fact that it has more than it can do," he said, "Congress provides for an administrative agency. The powers of the administrative agency are determined by the Act of Congress which establishes it. The language of this Act is always a compromise. Once the agency is set up, it begins to interpret these powers. Not unnaturally, its interpretations tend to favor itself. If it is not watched, it will soon be exercising legislative and judicial powers that the Congress did not intend it to have.

"The Federal Radio Commission was set up, under the Radio Act of 1927, in just this fashion, and with the purpose of curing the electrical confusion in broadcasting which existed at that time. The Communications Act of 1934 was its legitimate successor."

(Continued on page 742)
Delegation of Congressional Power to Agencies
Risky, Petty Tells Rotarians
(Continued from page 726)

intended to bypass and that matters have not been settled as expeditiously as was originally intended," Mr. Petty stated.

The NAB legal chief asserted that whenever an administrative law system has developed without safeguards such as those provided by our Constitution against concentration of power "the trend is toward a government of men and not of law." He added: "Short-sighted people will scoff at this premise and will take the position that the exigency of the moment justifies the removal of such safeguards. But history has demonstrated time and again that once the safeguards are removed, government never voluntarily returns to the people."

FCC Blue Book Cited

As an example of the efforts made by federal agencies to expand their powers, Mr. Petty pointed to the Blue Book which was issued by the Federal Communications Commission last spring. The Blue Book, he said, "regardless of the reason for its issuance, has posed the question of whether or not the radio broadcasting industry of this country shall be protected by the First Amendment—as have other media of communication."

"The problem presented is not merely one of present concern," the NAB General Counsel argued. "The answer to this problem will determine whether or not an administrative bureau is to determine what you and I are able to hear over the air."

Mr. Petty said in conclusion: "The radio industry is entitled to the protection afforded by the First Amendment to the U. S. Constitution and it intends to establish that fact by every lawful means."

NEW MEXICO SUPREME COURT REVERSES DECISION IN KGFL TAX CASE

The Supreme Court of New Mexico, reversing the decision of the lower court held recently that the state had not shown that KGFL, a 100 w. AM station at Roswell, N. M., was liable for payment and penalties under a New Mexico franchise tax for the privilege of doing business in the state. The Supreme Court took the position that the state had failed to prove that the station "was not engaged exclusively in interstate commerce. . . ."

"There is no evidence," said the Supreme Court, "as to the distance a hundred watt local channel station will carry a broadcast, and we are not authorized to assume that a station, though small, will not carry further than 90 miles, the distance to the Texas state line on the east . . . Nor is there evidence that the business does or does not include service in the state of Texas; and if so no attempt has been made to separate the in-state from the interstate activities . . . or to show that it can or cannot be done. The [station] may be liable to the tax, but we find no proof of it in the record."

This case is companion to one brought by KGFL in the Federal Court in New Mexico to test the validity, as applied to radio stations, of another New Mexico statute levying a tax on the gross receipts of all corporations doing business in the state.

That case, in which NAB appeared amicus curiae by John Davis and Milton Kibler, arose as a suit to enjoin enforcement of the tax. The action was dismissed by the three-judge court for want of jurisdiction on the ground that there was an adequate remedy in the state courts. This case has been appealed by the station to the Supreme Court of the United States and briefs have been filed on the question of the jurisdiction of the Supreme Court. It is expected that the case will be reached by the Court this fall term.

Small Market Stations

PROPOSED AGENDA ANNOUNCED FOR SMALL MARKET STATION SESSION AT CONVENTION

The Small Market Stations session at the national NAB convention in Chicago, Oct. 21-24, is expected to attract a record number of broadcasters.

Many problems have developed among the small stations during the year and the important issues will be aired. The seventeen NAB district chairmen will present problems from their respective areas when they meet on Monday, Oct. 21, with the Small Market Stations Executive Committee.

The proposed agenda for the Small Market Stations Session, scheduled for Wednesday, Oct. 23, 10:30 A.M. until 12:00 noon, includes the following:

The Small Market Stations Executive Committee, during a recent meeting, adopted the following resolution:

"WHEREAS the agenda of the NAB National Convention in Chicago will include discussions, talks, exhibits, and clinics on station management, sales, promotion, programming, engineering, research, employee-employer relations, and a multitude of other important matters, some of which will by necessity be scheduled simultaneously, now therefore,

"BE IT RESOLVED that the NAB urge all Small Market Stations to send, in addition to the management, the "second man," assistant manager or chief engineer to the convention."

SEPTEMBER 23, 1946 — 729
STATE DEP'T EXTENDS INVITATION FOR 1947 TELECOMMUNICATIONS CONFERENCE

The State Department has authorized the American Legation at Bern to present an invitation to the Director of the Bureau of International Telecommunications Union for a World Telecommunications Conference to be convened in the United States in the spring of 1947.

The invitation, published on Wednesday (18), stated that governments of the following countries have indicated their agreement to the convening of the conference in the U. S.: Canada, China, Columbia, Cuba, Dominican Republic, Ethiopia, Finland, Haiti, Italy, Lebanon, New Zealand, Panama, Paraguay, Poland, Siam, Syria, Turkey, United States, Uruguay, Vatican City and Venezuela.

Suggested meeting date is April 15 in or near Washington, D. C.

U. S. RESUMES NOTIFICATION OF RADIO FREQUENCIES TO THE I.T.U.

The United States is resuming normal notification of radio frequencies to the Director of the International Telecommunications Union at Bern, Switzerland, the State Department announced on Tuesday (17).

Effective September 16, 1946, all new radio frequencies assigned to radio stations in the United States will be registered at Bern; and effective October 16, 1946, the backlog of new radio frequencies which were assigned during the war years will be registered.

The notifications will be made to the I.T.U. Bern Bureau by the Federal Communications Commission.

The submission of new frequencies to I.T.U. was discontinued in September, 1939.

INDEX OF INCOME PAYMENTS IN U. S. RISES TO ALL-TIME HIGH IN JULY

With one of the largest monthly increases on record, the index of income payments to individuals in the United States rose to an all-time high during July, the Department of Commerce announced last week.

The index, which makes allowance for seasonal influences, rose to 251.1 in July from 240.9 in June (1935-39=100). This was more than 2 percent above the wartime peak of 245.2 reached by the index in February 1945.

Income payments to individuals include wages and salaries, net incomes of unincorporated businesses, dividends and interest, net rents received by landlords, and other types of individual incomes.

Agricultural income, the chief factor in the steep July increase, expanded sharply as higher prices resulted in exceptionally heavy marketings of livestock.

SEPTEMBER 23, 1946 — 730
and close to 5,000,000 persons are laid up for at least one day by something happening while they were "safe at home," says the National Safety Council. There are two major reasons why the home accident problem is so serious: 1. More people are accidently killed and injured at home than anywhere else. One-third of all accidental deaths occur at home, the National Safety Council says. One-half of all accidental injuries occur at home. The annual cost is estimated at $600,000,000. 2. People are unaware of the facts. Because so few home accidents are reported in the newspapers, the public does not realize how prevalent they are. "It can't happen to me," or "I'll fix that loose step tomorrow," are the usual attitudes. But figures of the National Safety Council show that each year home accidents hit one family out of every seven, and that nearly half of all home fatality are due to falls. Other causes are: burns, poisons, firearms, suffocation, asphyxiation, etc. The kitchen is the most dangerous room in the house with approximately one-fifth of home accidents occurring there. The bathroom accounts for only two or three per cent of the accidents. About one in every four home accidents occurs on flights of steps (front or back steps, inside stairway, basement stairway, etc.) About one out of every five home accidents occurs outside of the house itself; that is, in the yard, garden, garage, shed, etc. It is a truism that accidents don't just happen—they are caused. And the cause is sometimes difficult to analyze. In general, the National Safety Council finds that home accidents have two major causes: (1) Unsafe conditions, i.e., the physical or mechanical causes of an accident, and (2) Unsafe practices, or personal causes. Make your home as safe as possible by eliminating all physical hazards such as inadequate lighting, cluttered rooms, dangerous stairways and unprotected play space. Cultivate habits of safety around the home by avoiding hurry, distractions, fatigue, and carelessness, and educate the children in safe conduct. REMEMBER—ACCIDENTS DON'T ALWAYS HAPPEN TO THE OTHER PERSON! (Fact Sheet No. 28)

**DOCKET CASE DECISIONS**

The Commission today announced its Proposed Findings (B-279) looking towards a grant of the application of I. K. Corkern for a new station in Bogalusa, La., to operate on 1490 kc., with 250 watts, unlimited time, conditioned on the filing within 30 days hereof of an application specifying a transmitter site and antenna system which will comply with the Commission's Standards. (Docket 6894; B3-P-4033)

The mutually exclusive application of John L. Plummer, tr/as John L. Plummer Enterprises (Docket 6892; B3-P-3798), for the same facilities is proposed to be denied.

**AM APPLICATIONS GRANTED**

**NEW—Broadcast Management, Inc., Bethesda, Md.—**
Granted CP for a new station to operate on 1120 kc., 250 watts, daytime only. (B3-P-9928)

**NEW—Iron Mountain-Kingsford Broadcasting Co., Iron Mountain, Mich.—**
Granted CP for a new station to operate on 1150 kc., 250 watts, unlimited time, on condition that permittee satisfies complaints of interference within the 250 mi/m blanket contour; and

subject to approval of transmitter site and antenna system by the CAA. (B2-P-4820)

**NEW—Caldwell Broadcasting Co., Inc., Caldwell, Idaho—**
Granted CP (***) for a new station to operate on 1190 kc., 250 watts, unlimited time. (B5-P-4900)

**NEW—Alva B. Adams, Jr., Pueblo, Colo.—**
Granted CP (***) for a new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-4945)

**NEW—The Oueida Broadcasting Co., Rhineland, Wis.—**
Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time, subject to CAA approval of site and antenna system. (B4-P-4900)

**NEW—Edney Ridge and Hadley Hayes, d/b as Carolina-Northwest Broadcasting Co., No. Wilkesboro, N. C.—**
Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time, subject to CAA approval of antenna system and transmitter site, and; Secs. 3.55(b) and 3.90 of Standards waived. (B3-P-4953)

**NEW—Fayetteville Broadcasters, Inc., Fayetteville, N. C.—**
Granted CP for a new station to operate on 1300 kc., 250 watts, unlimited time. (B3-P-4963)

**NEW—W. S. Weatherly, tr/as Calhoun Broadcasting Co., Anniston, Ala.—**
Granted CP (**) for a new station to operate on 1900 kc., 250 watts, unlimited time. (B3-P-4973)

**NEW—Alfred Achilles Corcanges, Mineral Wells, Texas—**
Granted CP for a new station to operate on 1140 kc., 250 watts, daytime only, subject to remedying any interference to Oklahoma City. (B3-P-4952)

**NEW—Lee Segall Broadcasting Co., Houston, Texas—**
Granted CP for a new station to operate on 1430 kc., 1 KW, daytime only, on condition that applicant, within 60 days from grant, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Standards; and Sec. 3.55 waives. (B3-P-4182; Doc. 7532)

**NEW—St. Louis County Broadcasting Co., Clayton, Mo.—**
Granted CP (*) for a new station to operate on 1320 kc., 1 KW, daytime only. (D4-P-4856)
NEW—Jessica L. Longston, et al., d/b as Montana Broadcasters, Havre, Mont.— Granted CP (**) for a new station to operate on 1420 kc., 250 watts, unlimited time. (B5-P-4644; Doc. 7513)

**NEW—Clearwater Broadcasting Co., Clearwater, Fla.—**
Granted CP (**) for a new station to operate on 690 kc., 1 KW, daytime only. (B3-P-4555; Doc. 7502)
NEW—Mike Benton, d/b as General Broadcasting Co., Atlanta, Ga.—Granted CP (**) for a new station to operate on 1310 kc., 250 watts, unlimited time. (B3-P-3825)
NEW—Robert W. Ronsaville and Geo. M. Clark, d/b as Pulaski Broadcasting Co., Pulaski, Tenn.—Granted CP (Comm. Durr not participating), for a new station to operate on 730 kc., 250 watts, daytime only, (B3-P-4835), subject to condition that applicant will within 60 days from date of action file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the Standards; waiver of Sec. 3.55(b) required. (B3-P-4835)

**NEW—Ernest E. Forbes, Jr., tr/as Magic City Broadcasting Co., Birmingham, Ala.—**
Granted CP (**) for a new station to operate on 1330 kc., 1 KW, daytime only. (B3-P-3671; Doc. 6979)

**NEW—The Times Pecoyune Pub. Co., New Orleans, La.—**
Granted CP (**) for a new station to operate on 940 kc., 1 KW, daytime only. (B3-P-4167; Doc. 7141)

(Continued on next page)
FM FINAL CP'S GRANTED

The following permittees were granted regular construction permits on September 12. (Note: power given is effective radiated power; antenna height given is height above average terrain):

- Twin City Broadcasting Corp., Longview, Wash.—Class A: Channel: 104.3 mc. (No. 251); 270 KW; antenna 390 feet. (B5-PH-852)
- Telecast, Inc., Roanoke Rapids, N. C.—Class B: Channel: 102.5 mc. (No. 273); 3 KW; antenna 500 feet. (B5-PH-320)
- WCBT, Inc., Roanoke Rapids, N. C.—Class B: Channel: 102.9 mc. (No. 255); 10 KW; antenna 390 feet. (B3-PH-561)
- CBC, Inc., Roanoke Rapids, N. C.—Class B: Channel: 103.7 mc. (No. 275); 240 watts; antenna 330 feet. (B2-PH-110)
- The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Class B: Channel: 95.5 mc. (No. 257); 20 KW; antenna 440 feet. (B1-PH-858)
- The A. S. Abell Co., Baltimore, Md.—Class B: Channel: 95.5 mc. (No. 257); 20 KW; antenna 440 feet. (B1-PH-257)
- Skywave Broadcasting Corp., Asheville, N. C.—Class B: Channel: 94.3 mc. (No. 252); 88 KW; antenna 130 feet. (B3-PH-971)
- Rose Bowl Broadcasters, Inc., Pasadena, Calif.—Class A: Channel: 105.1 mc. (No. 286); 180 watts; antenna 760 feet. (B5-PH-1000)
- Radio Roanoke, Inc., Roanoke, Va.—Class B: Channel: 93.7 mc. (No. 229); 3 KW; antenna 1700 feet. (B2-PH-1012)
- Quincy Newspapers, Inc., Quincy, Ill.—Class B: Channel: 97.5 mc. (No. 240); 13 KW; antenna 490 feet. (B4-PH-857)*
- KFXD-FM—Frank E. Hurt & Sou (a partnership, composed of Frank E. and Edward P. Hurt), Nampa, Idaho—Class B: Channel: 101.3 mc. (No. 267); 2.5 KW; antenna 390 feet. (B5-PH-857)*

*In lieu of previous conditions specified.

Correction

According to a correction by the Commission, the item previously reported, referring to The Journal Company's FM final CP, should show power as 349 KW and antenna 695 feet. (See current REPORTS p. 657.)
The following were given Conditional Grants on Sept. 12 subject to engineering conditions:

The station previously granted conditionally to O. E. Richardson, Hammond Ind., designated as Class A, has been redesignated as Class B.

**TELEVISION APPLICATION GRANTED**

- NEW—KRLD Radio Corp., Dallas, Texas—Granted CP for new television station; Channel No. 4; freq. 66-72 mc.; visual power 46 KW; aural: to be determined; antenna: 519 feet. (B3-PCT-137)
- NEW—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted CP for new television station; Channel No. 9; freq. 186-192 mc.; power: visual 9.6 kw.; aural 7.2 kw.; antenna 529 feet. (B2-PCT-137)
- NEW—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa—Granted CP for new television station; Channel No. 4; freq. 66-72 mc.; power: visual 15 KW; aural 10.4 KW; antenna 506 feet; to be operated on non-commercial basis. (B4-PCT-129)

**DESIGNATED FOR HEARING**

According to a correction by the Commission, the item appearing in last week's REPORTS referring to WBBW, Chicago, for the period ending August 1, 1949, was inadvertently included and should be omitted. Station WEDC is still under temporary license. (See current REPORTS, page 606.)

**LICENSE RENEWALS**

Correction

According to a correction by the Commission, the item previously reported referring to renewal of license of WEDC, Chicago, for the period ending August 1, 1949, was inadvertently included and should be omitted. Station WEDC is still under temporary license. (See current REPORTS, page 606.)

**MISCELLANEOUS ACTIONS**

WDEL, Inc., Wilmington, Del.—The Commission ordered that its action of August 29 granting conditional FM CP to WDEL, Inc. (B1-PH-177), be set aside, and further order the application be designated for hearing upon the following issue: “To determine whether the granting of this application would be in conformity with Rule 3.240 (Multiple Ownership Rule) of the Commission’s Rules and Regulations.”

James G. Ulmer, d/b/a East Texas Broadcasting Co., Tyler, Texas—Granted consent for issuance of permit for FM station KISW from James G. Ulmer to the partnership, East Texas Broadcasting Co.

KNER—O. L. Burns, Brady, Texas—Granted modification of license to increase power from 100 watts night, 250 watts day, to 250 watts, operating on 1490 kc., unlimited time. (B3-MI-1232)

WLDS—Edge & Korsmeyer, Jacksonville, Ill.—Granted CP to increase power from 250 watts to 1 KW, and install new transmitter. (B4-P-4067)

KSEP—Radio Service Corp., Pocatello, Idaho—Granted CP for new television station; Channel No. 4; freq. 66-72 mc.; power: visual 15 kw.; aural 10 kw.; antenna of number of basis. (B4-PCT-129)

KEX—Westinghouse Radio Stations, Inc., Portland, Ore.—Granted CP to increase facilities of KEX, Class II, 1190 kc., 50 kw., unlimited, to Class 1-A, 1190 kc., 50 kw., unlimited, DA-X, install new transmitter and change transmitter and studio locations. (B5-P-4035)

KFX—Westinghouse Radio Stations, Inc., Portland, Ore.—Granted CP to increase facilities of KFX, Class II, 1190 kc., 50 kw., unlimited, to Class 1-A, 1190 kc., 50 kw., unlimited, DA-X, install new transmitter and change transmitter and studio locations. (B5-P-4035)

WMBR—Fla. Broadcasting Co., Jacksonville, Fla.—Denied petition requesting that its application (B3-P-3036, Docket 7521) be severed from the eight other applications in the consolidated hearing and granted.

KXK—Century Broadcasting Co., Corpus Christi, Texas—Granted application to change frequency from 1010 to 1030 kc., and ordered (B3-P-3524) to operate on 1010 kc. from hearing; (2)
allowed KWBU to amend application to specify 1030 kc, and (3) placed application as amended in pending file pending decision in the clear channel cases.

WKTM—Mayfield Broadcasting Co., Inc., Mayfield, Ky., and WPMF—Purchase Broadcasting Co., Inc., Mayfield, Ky.—Adopted an order approving the reorganization of Mayfield Broadcasting Co., Inc. as to include therein as minority stockholders the stockholders of Purchase Broadcasting Co., Inc., and ordered full report with respect thereto to be filed as required by Rules 1.302-1.304; and ordered further the cancellation of the construction permit (B2-P-1791) hereof for WMFM on June 27, on 910 kc, 1 KW, day, (Action taken 9-5.)

KTCC—Tulare-Kings County Radio Associates, Visalia, Calif.—Granted petition for indefinite continuance of hearing, now scheduled for September 16 in re application for CP (Docket 7601), and said further hearing was continued without date until further order of the Commission.

KKT—Carl E. Haymond, Yakima, Wash.—Granted application to determine operating power by direct measurement of antenna power; Sec. 3.55(b) waived; conditions.

WMBO—WMBO, Inc., Auburn, N. Y.—Granted application to determine operating power by direct measurement of antenna power.

WHJ—Dalton Broadcasting Corp., Dalton, Ga.—Granted application to determine operating power by direct measurement of antenna power.

WKKZ—Kenneth Edw. Rennekeamp, Oil City, Pa.—Granted application to install a new transmitter; Sec. 3.90 of Rules waived; conditions. (B2-P-5211)

WALT—Tampa Broadcasting Co., Tampa, Fla.—Granted modification of CP which authorized a new station, for approval of antenna approval of transmitter location, to specify studio location, and to change applicant’s name from W. Walter Tison to W. Walter Tison, tr/ as Tampa Broadcasting Co. (B3-MP-2052). Sec. 3.55(b) and 3.90 of rules waived.

KPOF—Pillar of Fire, (a Corp.), Denver, Colo.—Granted modification of CP which authorized increase in power, etc., for extension of completion date to 3-15-47. (B3-MP-2090)

KFVD—Standard Broadcasting Co., Los Angeles, Calif.—Granted modification of CP (15-P-3808) to make changes in antenna, subject to condition that permittee shall satisfy legitimate complaints of blanketing within the 250 mv/m contour, including external cross modulation. (B5-MP-2082)

The Commission on September 5 adopted an Order in re applications of WDAS and other applicants for FM stations in Philadelphia (Docket 7616) in place of the Rules of Practice and Procedure be waived for the purpose only of permitting amendments relating solely to additional data requested by the Commission in connection with the applications, to be filed directly with the presiding officer of the consolidated hearing; that the presiding officer is authorized to accept for filing all such amendments which comply with Sec. 1.74 of the Rules, and where no objection thereto is made by any party; that in the event of objection by any party to such amendment, the amendment was accepted.

The American Broadcasting Service Corp., Bridgeport, Conn.—Granted petition for leave to amend its application for a new FM station (B1-PH-758; Doc. 7463), so as to show complete and current engineering information, and the amendment was accepted.

James A. C. Lake, Birmingham, Ala.—Granted application for FM station, and the amendment was accepted.

The Travelers Broadcasting Service Corp., Bridgeport, Conn.—Granted petition for lease to amend its application for a new FM station (B1-PH-758; Doc. 7463), so as to show complete and current engineering information, and the amendment was accepted.

James A. C. Lake, Birmingham, Ala.—Granted application for lease to amend its application for a new FM station (B1-PH-758; Doc. 7463), so as to show complete and current engineering information, and the amendment was accepted.

The Danbury News-Times Co., Danbury, Conn.—Granted petition for lease to amend its application for a new FM station (B5-PH-445; Doc. 7733), so as to show that Elizabeth S. Dalton as stockholder now holds 6.66% of the stock instead of 10%, and the amendment was accepted.

Miami Broadcasting Co., Miami, Okla.—Granted petition for leave to amend its application for CP (13-P-4857; Doc. 7810), so as to show a modified DA system, and the amendment was accepted.

Middle West Broadcasting Co., Inc., St. Paul, Minn.—Granted petition requesting amendment of application and removal from hearing docket; accepted amendment to specify frequency 700 kc, 1 KW, daytime only, instead of 580 kc, 5 KW, 1 KW-LS, etc., and removed application as amended from the hearing docket (B4-P-4261; Doc. 7472). Dismissed petition insofar as it requests grant of application.

The Bridgeport Herald Corp., Bridgeport, Conn.—Granted petition for waiver of Rules and accepted petitioner's

(Continued on next page)
late appearance in re application for FM station (Docket 7745).

Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Granted motion or continuance of hearing on application for new station (B1-P-4288: Doc. 7130), now scheduled for September 18, and continued said hearing to October 16.

Marshall Broadcasting Co., Marshall, Texas—Granted petition for leave to amend its application for new station (13-P-3675: Doc. 7060), so as to show deletion of Houston Harte, Bernard Hanks and A. G. Mayse as stockholders and officers of corporation, and addition of five new stockholders, etc., and the amendment was accepted.

WEET—A. S. Abell Co., Baltimore, Md.; Berks Broadcasting Co., Reading, Pa.—The Commission on its own motion continued the hearing now scheduled for October 9 in re these applications to November 12.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

560 Kilocycles

NEW—Pynchon Broadcasting Co., Springfield, Mass. (P.O. 1200 Main St.)—Construction permit for a new standard broadcast station to be operated on 560 kc., power of 5 KW, directional antenna and unlimited hours of operation.

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Construction permit to install new transmitter.

590 Kilocycles

NEW—Andrew Jarema and Frank H. Altderffer, a partnership d/b as the Binghamton Broadcasters, Binghamton, N. Y. (P. O. 9 Perkins Ave., Fort Dick)—Construction permit for a new standard broadcast station to be operated on 590 kc., power of 500 watts and daytime hours of operation.

- NEW—Cecil W. Roberts, Farmington, Mo.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.
- NEW—Clarence E. Faulk, Jr., d/b as Ruston Broadcasting Co., Ruston, La.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

(Continued on next page)
1240 Kilocycles

NEW-West Virginia Radio Corp., Elkins, W. Va.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1290 Kilocycles

WIRL—Edward J. Altorfer, John M. Camp, John H. Altorfer, Katherine A. Swain and Timothy W. Swain, d/b as Illinois Valley Broadcasting Co., Peoria, Ill.—Construction permit to change power from 1 KW to 5 KW, using directional antenna day and night.

1340 Kilocycles

NEW-The Pittsburg Publishing Co., Pittsburg, Kans.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

1390 Kilocycles

NEW—Model City Broadcasting Co., Inc., Anniston, Ala.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 1 KW, directional antenna and unlimited hours of operation.

1400 Kilocycles

NEW-Coastal Broadcasting Co., Lakeland, Fla.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1450 Kilocycles

NEW—John A. Boling, d/b as Live Oak Broadcasting Co., Live Oak, Fla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. (Contingent on grant of WGOV to change from 1450 to 950 kc.)

1490 Kilocycles

NEW—Burbank Broadcasters, Inc., Burbank, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1510 Kilocycles

NEW—Golden West Broadcasting Co., Childress, Texas.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 250 watts and daytime hours of operation.

FM

WHPC-FM—The Patriot Co., Harrisburg, Pa.—Consent to transfer of control to Gertrude Howard McCormick, Conway Olmsted, and Dauphin Deposit Trust Company, executors of the estate of Vance C. McCormick, deceased.

Federal Trade Commission Actions

SUPPLEMENTAL COMPLAINT

Vawne Foundations—Because of changes in the business since issuance of a complaint in December 1943 against Arthur R. LeM 79 is and Ben A. Hensler, co-partners trading as Vawne Foundations, 302 Fifth Ave., New York, the Commission has issued an amended and supplemental complaint naming additional respondents. (5106)

STIPULATIONS

No stipulations were issued during the past week by the Commission.

CEASE AND DESIST ORDERS

Amasia Importing Co.—The Commission issued an order directing Amasia Importing Corp., 10 East 39th St., New York, to cease and desist from misrepresenting the silk content of corsets and foundation garments for women. (4459)

Langendorf United Bakeries, Inc., 1160 McAllister St., San Francisco, must stop advertising that it has been appointed official baker for the Dionne quintuplets or that its Holsun brand bread is part of their diet, under the terms of a cease-and-desist order issued by the Commission. (5250)

West Coast Packing Corp.—The Commission issued an order prohibiting West Coast Packing Corp., Long Beach, Calif., and its officers from paying any brokerage fees or commissions to any buyer on purchases for such buyer's own account. Officers of the corporation, which packs and distributes fish and seafood products, are Albert Vignolo, Sr., president; Eugene Giacomino, vice-president; and Albert Vignolo, Jr., general manager and treasurer. (5432)

COMPLAINT DISMISSED

National Wholesale Hardware Association—The Commission, by a 3 to 2 vote, dismissed its complaint charging The National Wholesale Hardware Association, Philadelphia, and others with violation of the Federal Trade Commission Act in the sale of hardware and related merchandise. The complaint alleged that the association, together with its officers, executive committee, advisory board, member companies and several cooperating companies, had conspired to hinder and suppress competition among hardware dealers and among manufacturers and also to create a monopoly in the respondents in the distribution of hardware and related merchandise.

Commissioners Evin L. Davis and Robert E. Freer voted against dismissal of the complaint and filed a statement in explanation of their vote. The majority opinion in support of the dismissal was written by Commissioner Garland S. Ferguson, and was concurred in by Chairman William A. Ayres and Commissioner Lowell B. Mason.

The order of dismissal was issued after consideration of testimony and other evidence, the report of the trial examiner and briefs of counsel. (4592)
NAB Executives Meet With RMA Group
To Discuss Plans for Radio Week
(Continued from page 728)

“Under these acts the Congress set up a Commission to allocate frequencies on the basis of the public interest, convenience and necessity. In so acting Congress was exercising the powers delegated to it by the Commerce Clause of the Constitution. But recognizing the limitations imposed upon it by the first amendment of the Constitution and that it was dealing with an instrumentality of free speech, it expressly provided that, ‘nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.’

‘Last spring FCC released what is called the Blue Book; citing a number of stations which were doing a poor job. It recited a series of questions, e.g., Who should select commentators?, Should commentators be allowed to express their own views?, etc. And it said that ‘rather than enunciating general policies, the Commission reaches decisions on such matters in the crucible of particular cases.’

‘Then, to support its declared policy, it cited the Mayflower case, in which the FCC had previously held that a station could not broadcast editorial matter. This case was never tested in the courts for the reason that because renewal of the license was granted the operator was not an aggrieved person and therefore had no right to appeal, just as in the Robert Harold Scott case, in which FCC held that any station carrying an affirmative religious program is under obligation, on request, to carry an atheistic program. The mischief of this kind of decision is that the real aggrieved party cannot appeal. For there is an aggrieved party. And that is the people of the United States.

“But to get back to the Mayflower case, imagine any governmental agency undertaking to tell the newspapers that they could not editorialize!

‘Radio, press, and motion pictures are in the same boat. If the government can control one, it can control all. Its powers under the Constitution are no greater with respect to radio broadcasting than with respect to any other medium of communication. The proponents of the Blue Book use the argument of scarcity. But if radio channels are scarce, so is newspaper and print and raw film. And the fact is that radio channels are becoming much less scarce, what with FM and Pulse Modulation—a fact which is seriously embarrassing the advocates of the Blue Book philosophy. Furthermore, if radio can be censored by FCC, then FX—facsimile broadcasting—can be censored. And FX is nothing other than a radio-transmitted newspaper.

‘Thus the decision in the Mayflower case is an example—an ominous example—of the spontaneous growth and self-enlargement of administrative law.

‘The Blue Book is only one of many criticisms currently directed against radio. A woman called me recently and complained that people on the radio were saying ‘veteran’ rather than ‘veteran’. She wanted to invoke the power of the appropriate government agency to cure what she considered an egregious error. Of course she was in good faith. But she didn’t realize that in trying to correct so trivial and inconsequential a thing as a slight mispronunciation she was willing to invoke and acquiesce in the exercise of power that could be the end of free radio, free communication, free government.

“But consciously or unconsciously such criticisms of radio as the Blue Book do tend to obfuscate people like the good woman who didn’t like to hear ‘veteran’ mispronounced ‘vetran’. If such confusion becomes sufficiently widespread, the way will have been paved for the government to take radio over—and to take the press and motion pictures over.

“And that, I submit, is the Communist technique. ‘That is the first thing you and I would try to do if we were Communists.

‘Let me use for an example of the second possibility, the recent address of Thurman Arnold—my former associate—in support of the Blue Book. Mr. Arnold said among other things: ‘What the broadcasters ask is that they be delegated the absolute power to decide the proportion of advertising and nonadvertising programs over the radio. . . . The broadcasters say that unless they have the power to determine the proportion of advertising programs they are being censored.’

Now, the broadcasters do not ask any such thing and they do not say any such thing. Instead, they say that the Commission is attempting to encroach upon the power of the broadcasters to determine program character and content, in many other ways which interfere with freedom of speech. You might suppose that only an ignorant person could make such a statement concerning the Commission’s assertions of power and the broadcaster’s protest. But Mr. Arnold is not an ignorant man; he is not a dishonest man. It is obvious that he did not read the Blue Book or he would not have made such a statement. The obvious conclusion is that someone wrote the speech for him and he—a very busy man—read it as prepared.

“Now, I do not suggest that there was bad motive in this case. As I said I am speaking, merely hypothetically of possible techniques. But suppose that someone with an ulterior purpose were intent upon hiding behind a prominent, highly-respected man, like Mr. Arnold, do you not see what the effect would be upon the people, in confusing them, in persuading them of the supposed necessity of government regulation over broadcasting, even to the extent of destroying the people’s right to free communication and of their right that truth shall be tried out in the market place of ideas, as Justice Holmes once expressed it.

“The third thing you and I would do if we were trying to ‘take over’ is to get certain respectable organizations to front for us. An organization which has undertaken to stand up and be counted in favor of the kind of confusion created by the Blue Book is the American Civil Liberties Union. How such a group of men, who have heretofore leaned over backward to defend the individual’s right to free speech, could defend the Mayflower decision and the Blue Book is well-nigh incomprehensible. One wonders if some other forces might not have been at work to bring about this perversion of principle.”
Wide Utilization of Radio By UN Urged
At Mass Communications Round Table

NAB President Justin Miller was named Chairman of the Round Table on Media of Mass Communication during last week's meetings of the National Commission on International Educational, Scientific and Cultural Cooperation. The National Commission met to formulate recommendations for the State Department on matters relating to the UNESCO meeting to be held in Paris in November.

The State Department announced that the National Commission endorsed full utilization of all mass communication media including radio, the press and motion pictures, in the promotion of international relations.

At the same time, the Department made public the recommendations of the mass communications group. Several of these recommendations, of particular interest to the broadcasting industry, follow:

"In the opinion of the Round Table the United Nations—UNESCO should establish and operate as soon as possible a world wide radio network."

"The Round Table believes that pending the establishment of the world wide radio network approved in the resolution above, United Nations—UNESCO should use all present radio facilities, including, if necessary exploration of the possibility of purchasing one or more existing radio stations."

In another recommendation, the Round Table suggested "That the commercial media of Mass Communication have a large part to play in furthering the objectives of UNESCO and that these objectives of UNESCO can be accomplished through the mass media of communications only if all channels (commercial, governmental, United Nations and the facilities of specialized agencies) are used to their utmost."

(Continued on page 746)

Denny and Jett of FCC, Cohen of UN Are Among Major Convention Speakers

The names of three major speakers for the NAB’s 24th Annual Convention were announced last week. Acting Chairman Charles R. Denny and Commissioner Ewell K. Jett of the FCC will address luncheon sessions during the four-day meeting, and Benjamin Cohen, assistant secretary general of the United Nations, will speak on the morning of October 22nd.

Mr. Denny, whose topic will be announced later, will be heard by the full assembly at the noon meeting on Wednesday, October 23rd, and Commissioner Jett will address a similar session the preceding day. Mr. Jett will discuss the “Application of War Developments to Postwar Broadcasting.”

Mr. Cohen will discuss the United Nations’ radio plans and their relation to American broadcasting.

Chairman Denny is also scheduled to participate in a panel discussion of frequency modulation, which will occupy a large portion of the afternoon schedule on Monday, October 21st, opening day of the convention. He will give particular attention to the Commission’s policy concerning FM.

With the number of advance registrations nearing the thousand mark and already equalling the total attendance of similar sessions in previous years, indications continue to point toward a final registration of approximately 2000 members of the broadcasting industry.

Officials of the Association reemphasized last week that the NAB block of hotel reservations for the convention has been completely taken and that it will be necessary for those not already accommodated to make their own arrangements for living quarters directly with Chicago hotels.

The Convention will be held at the Palmer House and the Stevens Hotel, October 21 through 24. All official meetings will be at the Palmer House.
Radio in War and Peace Is Theme of Judge Miller’s Legion Convention Talk

NAB President Justin Miller will deliver a talk at the American Legion Convention in San Francisco next Wednesday (2) at the invitation of John Stelle, National Commander of the Legion.

The subject of Judge Miller’s address is “Radio Broadcasting—in War and In Peace.” In addition to his talk at the Civic Auditorium, Judge Miller will be Mr. Stelle’s guest at the National Commander’s Jubilee during the evening of October 1.

Promotion Material and Contest Discussed in Planning for National Radio Week

The RMA Advertising Committee met in Chicago last Tuesday (24) to discuss plans for widespread participation of radio dealers in the observance of National Radio Week, Nov. 24-30. RMA representatives met with top executives from NAB the week before last. (REPORTS, p. 728)

A proposed budget of $10,000 was approved by RMA’s Advertising Committee to finance the preparation and distribution of promotion material for dealers. The proposal will be submitted to the RMA Board of Directors when it meets in Quebec on Oct. 10-11.

Assurance of active support to NAB and RMA in the plans to promote National Radio Week was received from trade associations such as NRDGA, National Retail Furniture Association and the National Music Merchants Association.

Plans were made at the RMA meeting to solicit from manufacturers a number of radio sets to be awarded as prizes to winners of a proposed essay contest among women listeners. Suggestions for the contest were made by Dorothy Lewis, AWD vice-president and NAB Coordinator of Listener Activity.

Dealer promotion material includes streamers in two sizes, urging listeners to hear the new fall programs and to see the new radio sets. A broadside containing ideas for dealers for use in cooperation with local stations will also be supplied.

Objections Raised to Portions of Proposed FCC Salary Data Form

Considerable opposition to certain portions of the proposed Schedule 13, FCC Form 324 (Annual Financial Report) was expressed by spokesmen of the NAB and the networks during the September 20th conference attended by representatives of the Commission, AFRA, IBEW, NABET, ACA, the NAB and the four national networks.

Schedule 13, as proposed for the 1946 report, calls for employment and wage data, by occupational classifications, relative to the standard work week, overtime, performance pay of “free lance” employees, and for separate hourly and weekly wage rate brackets of employees.

The chief objection concerned the reporting of the distribution by brackets of each station’s employees, the effect of which would be to show the number of employees in each hourly wage classification. It was held that this presented a very complex and difficult accounting problem for many stations without adding to the effectiveness and significance of the total FCC schedule.

It was further claimed that these hourly wage rate data constituted private business information of individual stations and, therefore, should not be included in a mandatory FCC report. It was contended that this type of employment and wage data, if needed by certain governmental bureaus, could be collected through the voluntary cooperation of stations and made a part of Form 324.

All the union representatives at the conference maintained that this hourly wage data was necessary to show the true picture of wages in the radio industry and, therefore, should be collected and made available by the Commission.

CIO Office and Professional Workers and Radio Directors Guild Win CBS Elections

Challenged ballots in the NLRB elections among CBS white-collar employees and television directors, held last June, were opened on Tuesday (24). In the overall white-collar group, the United Office and Professional Workers of America (CIO), won by 3 votes more than a bare majority, receiving 338 of the 669 valid ballots cast. The Radio Directors Guild defeated the Stagehands Union (IATSE) by a vote of 8 to 5 in the balloting among television directors.

Counting of the ballots followed the September 20
decision of the NLRB ruling on the challenged ballots, which had kept the results in doubt for the past 3 months.

At the same time, the Board amended its finding regarding the bargaining unit by ruling that miscellaneous television studio employees should be merged with the overall group, as had been contended by the Company. Previously the Board had decided that IATSE’s claim for a separate unit for these few television employees should be granted if the employees concerned so voted.

The change in ruling, according to the Board, resulted from a “fuller consideration of the entire record” pointing to the conclusion that “the miscellaneous studio employees do not constitute a cohesive, identifiable group of employees who may effectively bargain in a separate unit.” The ruling represents a rejection of IATSE’s principal contention that, for bargaining purposes, television employees should be separated from other broadcasting employees.

FCC Denies New Orleans Application Though Proposed Service Is “Impressive”

In a proposed decision released Monday (23) the FCC, with Commissioner Durr dissenting, approved tentatively the grant of a new 1 KW unlimited time AM station on 1580K at Lake Charles, Louisiana to F. R. Gibson, and at the same time denied an application for the same frequency from New Orleans.

The Commission based its decision on Rule 307 (b) of the Communications Act, which requires a “fair, efficient, and equitable distribution” of facilities, “when and insofar as there is demand for the same.” In the instant case the Rule was brought into operation by the facts that there are 4 stations in New Orleans and only one in Lake Charles, and that there is a large population surrounding Lake Charles not now receiving primary service at night.

The majority pointed out that it was “impressed by the quality of the service proposed” by the New Orleans applicant. Nevertheless, “the provision of primary service to a rural area not now receiving such service, is a decisive factor favoring the grant of the Lake Charles application.” In thus reaching its decision the Commission, having applied Rule 307 (b) to eliminate the New Orleans applicant, in effect treated the proceeding as an uncontested request for an available frequency at Lake Charles. Consequently, it granted the request notwithstanding what the minority referred to as the failure of the applicant “to demonstrate his qualifications or even his understanding of the problems and responsibilities of a broadcast licensee.”

Commissioner Durr based his dissent on his and Commissioner Walker’s minority opinion in the AVCO case, where they stated that one entering a business carrying “public responsibilities, imposed by law” should be expected to be, if not experienced, at least informed of the nature of the business. He was unable to find that the Lake Charles applicant had any knowledge of broadcasting or had made any real effort to gain it. Therefore, he would have denied the application, although he agreed with the majority that the New Orleans applicant should also be denied in view of the need for a station at Lake Charles. This need he would have filled by having the Commission “publicly invite the filing of a new application for a station in that area.”

Opinion Approving WXYZ Sale Released

On Monday (23) the FCC released the opinion on which it based its order of July 17 approving the transfer of control of WXYZ, Detroit to ABC. (Current Reports p. 563).

Commissioners Walker and Durr dissented on two grounds. First, they were of the view that the sale price, $2,800,000 net, “the highest known price” yet approved by the Commission, was exorbitant. Recognizing that the majority disagreed with their view, as set out in the AVCO Case, that the Commission had authority under the Communications Act to concern itself with these matters, they urged that action be postponed until Congress had had an opportunity to consider legislation to meet the problem.

Second, they took the position that to approve the transfer was not consistent with the Commission’s obligation under Sec. 303 (g) of the Communications Act to “generally encourage the larger and more effective use of radio in the public interest.” They argued that ABC’s proposed plan of operation affords no incentive for the development of FM, since affiliates will receive no additional revenue in the event they operate FM stations, except slight increases at a later period, and ABC representatives testified that the ownership of FM stations was not as important as good relations with existing affiliates. The dissenting opinion concluded that ABC was investing $2,800,000 in a station providing inferior coverage and inferior service to that which would be provided by an FM station.

The majority, referring to the dissent, were of the view that ABC because of its competitive position with the other networks could be relied upon to foster FM and that the fact that its heavy investment might prove unwise in the long run formed no basis for concluding that the development of FM would be retarded.

Rate Card Standardization Report Ready for Presentation at NAB Convention

The final report on standardization of station rate cards together with sample rate cards have been drawn and approved for presentation at the forthcoming NAB convention on October 24, it was announced last (Continued on page 747)
Nation's 1000th AM Station Licensed

The 1000th station in the United States was licensed the FCC announced last Wednesday (25), when the Indian River Broadcasting Company was approved for full-fledged operation of a station at Ft. Pierce, Florida. WIRA, call letters of the new station is licensed to operate unlimited time on 1400 kc. with 250 watts.

The grant was announced with five other new licenses making a total of 1005 standard broadcast stations as of Wednesday. 330 other new stations are in process of construction pursuant to permits issued by the FCC. In addition, 827 applications for new standard broadcast facilities are pending.

"The rapidly increasing number of radio stations as indicated by the issuance of this 1000th license is in line with the Commission's policy of encouraging the spread of radio service over the country as widely as possible and also encouraging diversification of ownership for the promotion of freedom of speech," commented Acting Chairman Charles R. Denny.

Wide Utilization of Radio by UN Urged

At Mass Communications Round Table

(Continued from page 743)

The Round Table made note of a preliminary report issued by the State Department. The report, said the Round Table, “implies financial support by UNESCO of means of mass communications which might lead to forms of government control going beyond the clear intent of the Report.” It was recommended “that when financial assistance is extended, it should be on terms of emergency aid, safeguarded against the types of control which would limit rather than extend freedom of mass information.”

In a letter to Assistant Secretary of State William Benton, Judge Miller pointed out that NAB is not committed to the proposals as adopted by the Round Table.

The text of President Miller's letter follows:

"Dear Mr. Secretary:

"As everyone at the Round Table on Mass Communications and all the members of the Commission seemed in accord on the suggestion proposed by General Sarnoff for an international radio network to be operated by United Nations or UNESCO, I went along with the recommendation with great interest but without comment.

"However, I feel that it is only fair to all concerned for me to say that the National Association of Broadcasters has not had an opportunity to consider the proposition and, in the event that another policy should be adopted by the Association, I must reserve the privilege of supporting whatever other policy might be so adopted.

"I do not intend to suggest by this letter that I anticipate the adoption of any other policy, but merely that in my representative capacity, I must necessarily reserve the privilege of representing the point of view of the National Association of Broadcasters.

Sincerely,
Justin Miller."
Rate Card Standardization Report Ready for Presentation at NAB Convention

(Continued from page 745)

week by Arthur Hull Hayes, WABC, chairman of the NAB’s Rate Card subcommittee.

The draft, in booklet form, was made available to interested groups at open hearings during the meetings of the subcommittee held on Monday and Tuesday (23-24) in New York. Their suggestions and criticisms were welcomed.

Among those who took advantage of the open hearing and gave the report their endorsement were representatives of the AAAA’s time buyers committee, headed by Carlos Franco of Young and Rubicam; Standard Rate & Data as well as representatives of NBC, CBS, ABC and other station groups.

“It is the hope of this committee that member stations will be guided by this booklet and sample Rate Cards in preparing future Rate Cards,” says Mr. Hayes, “to the end that these suggestions incorporated in these reports will make Time Buying more efficient for both buyers and sellers.”

Other members of the Rate Card Subcommittee include: Kenneth Church, Station WCKY, Cincinnati, Ohio; Craig Lawrence, Station WCOP, Boston, Mass.; Willan Roux, NBC; J. Kelly Smith, CBS; George L. Sutherland, Station WILM, Wilmington, Del.

Small Market Stations

Small Stations Launch Campaign to Attract National Business

NAB Small Market Stations Division, headed by J. Allen Brown, during its continuous study of “group selling” has encouraged small stations, which desire to attract national spot business, to form groups represented by a single sales office.

A number of such groups using various organizational set-ups have been formed. Some have leased wired regional networks, while others are sold in groups. Plans also include a Direct Mail campaign.

Ads will be placed in several National Trade Publications. Undertake a vigorous twelve months campaign starting Oct. 1st to attract national advertisers. Full page ads will be placed in several National Trade Publications. Plans also include a Direct Mail campaign.

“The campaign is designed primarily to impress time buyers on two essential facts concerning their market: (1) That this group of 15 non-metropolitan stations represents the Pacific Northwest’s number one market, with a per capita effective buying income of $2688.00 annually, the highest in the nation. (2) Broadcasts originating in the “metropolitan” centers fail to penetrate the greater portion of this rich country,” according to Fred F. Chitty, KVAN Vancouver-

KOOS, Coos Bay, who reports that stations may be purchased as a group, singly, or in any combination. The Oregon-Washington Group includes: (Oregon) KWIL, Albany; KORE, Eugene; KRNR, Roseburg; KAST, Astoria; KFLW, Klamath Falls; KSLM, Salem; KBND, Bend; KOOS, Coos Bay; (Washington) KXRO, Aberdeen; KRKO, Everett; KPQ, Wenatchee; KVOS, Bellingham; KWL, Longview; KELA, Centralia and KGY, Olympia.

Research Department

August Radio Set Production Over 1.5 Million, RMA Estimates

Heretofore, this column has reported monthly the figures on radio set production released by the Commerce Department. These figures are usually three months late and are not the result of a complete census of the Industry. They are projections based upon samplings of “substantial segments” of the Industry.

Since broadcasters are interested in more current estimates of set production, we will—beginning with this issue—hereafter report the set production figures released by the Radio Manufacturers Association whose membership comprises more than 90% of the radio set manufacturers. Since the production of non-members of RMA is not included, these figures are incomplete. They are not to be interpreted as total production of the Industry. From month to month, however, they will reliably reflect trends in the manufacturing of receivers.

The last report in this column was the Department of Commerce estimates of set production for June, 1946. According to the RMA, the July production of radio sets was slightly in excess of June, on the basis of reports from RMA member companies. The total output by these producers, representing all the major manufacturers, was 1,061,853 as compared with 1,052,597 in June.

The July Fourth holiday, together with the abrupt ending of OPA controls, cut sharply into the first week’s production, while the output during the remainder of July was above normal.

RMA also announced that a new peak in radio receiving tube production was reached in June, when 17,979,636 tubes were shipped. Of these, 10,442,841 were intended for new radio sets. Exports accounted for 828,740. In June, 1941, the radio tube industry produced 12,722,188 tubes. Total tube production during the first half of 1946 was 85,470,800.

FM production rose slightly in July to 19,642 sets. Auto sets rose to 110,375. Forty-one television sets were reported.

Table models continued to dominate production with 770,633 of this variety as against about 71,500 consoles and radio-combination models. Battery sets, all table and portable, numbered 152,165.

Further, according to RMA, production of radio receiving sets in August established a new record for the

(Continued on next page)
Industry both for this year and as against prewar averages.

RMA member-companies reported an aggregate output of 1,442,757 sets during August, and it is estimated that the Industry's total production for the month is well over 1,500,000. August's record for RMA companies was almost 350,000 above the Industry's prewar monthly rate and about 400,000 above comparable July figures.

RMA is now engaged in a drive to free the radio Industry from OPA price controls on the ground that current production is well ahead of the Industry's prewar output.

Console and radio-phonograph production rose substantially and almost equalled the prewar unit average during August as RMA companies reported they manufactured 101,744 as compared with 71,500 in July. Table models of the electric type continued to dominate with 1,030,183 of which about 132,000 were radio-phonograph models.

FM set production dropped under July's output, reaching only 13,892 as compared with 19,642. A number of set manufacturers, however, have announced plans for bringing out their new FM models this month or later in the fall. Only three television receivers were reported, but some new lines are expected to be introduced this month.

Battery set receivers, all portable or table models, numbered 184,306 and auto sets totalled 124,645.

Production of radio receiving tubes dropped to 14,439,130 in July, RMA also reported, as against a peace-time record of 17,979,636 in June. Of the July output, 8,482,826 were for new sets and 5,212,922 for replacements. Exports totalled 750,491.

### Public Interest Programming

Week to Promote Employment of Physically Handicapped Scheduled for Oct. 6-12

(This is a message from OWMR)

October 6-12 is National Employ the Physically Handicapped Week. This Week, observed annually, has been established by Congressional enactment and Presidential proclamation.

Spot announcements covering the subject have been mailed to all program directors. These announcements were prepared by the United States Employment Service and the Retraining and Reemployment Administration. By using them as often as possible, you will be doing the physically handicapped a great service and showing cooperation in what is a very grave problem at the present time.

The following are facts which may be useful in preparing programs:

At least 28 million persons in the United States have some physical disability. Of these about 2½ million are of working age but have permanent disabilities which interfere with their getting or holding suitable jobs. According to the National Rehabilitation Asso-
Help Prevent Forest Fires

A tremendous amount of this nation's timber, instead of going up in sorely needed houses, is going up in smoke. The pulp potential from that timber is being reduced to ashes instead of newsprint and rayon. Much of the soil in which that timber flourished lies blackened and barren, inviting erosion and floods. Landscapes are disfigured and recreational areas turned into expanses of charred stumps. And burned forests mean fewer jobs in the building trades, sawmills, and factories. The nation's limited supply of timber is constantly being reduced by forest fires, 9 out of 10 of which are man-made and therefore preventable. The forthcoming Columbus Day weekend will find unprecedented numbers of vacationers living in or traveling through wooded areas. Every motorist, hiker, camper, fisherman and picnicker is potentially guilty of starting a forest or woods fire through carelessness or thoughtlessness. Everyone, therefore, should memorize and observe—particularly over the Columbus Day weekend—these four rules of forest fire prevention:

1. Crush out cigarettes, cigar and pipe ashes.
2. Break matches in two after using. Don't throw cigars, cigarettes, matches or pipe ashes from your car.
3. Drown all camp fires; then stir and drown again. (Fact Sheet No. 16-B)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, September 30. They are subject to change.

Monday, September 30

Further Hearing
(10 o'clock A.M.)

NEW—WBNX Broadcasting Co., Inc., New York City, N. Y.—For FM facilities.
NEW—WCMA, Inc., New York City, N. Y.—For FM facilities.
NEW—Frequency Broadcasting Corp., Brooklyn, N. Y.—For FM facilities.
NEW— Bernard Fein, New York, N. Y.—For FM facilities.
NEW—Unity Broadcasting Corp. of New York, New York, N. Y.—For FM facilities.
NEW—North Jersey Radio Inc., Newark, N. J.—For FM facilities.

NEW—Board of Missions of Church Exts. of the Methodist Church, New York City, N. Y.—For FM facilities.
NEW—Tifton Broadcasting Corp., Tifton, Ga.—C. P. 1340 kc., 250 watts, unlimited.

Further Hearing

KTRC—Reporter Broadcasting Co., Abilene, Texas—C. P. 1470 kc., 1 KW night, 1 KW day DA-night, unlimited.
KPLC—Calcasieu Broadcasting Co., Lake Charles, La.—C. P. 1470 kc., 1 KW, unlimited.

DOCKET CASE DECISIONS

The Commission announced adoption of a final decision (B-253) granting the application of Star Broadcasting Co., Inc. (Bl-P-3979; Docket 6788), for a new station in Geneva, N. Y., to operate on 1240 kc., 250 watts, unlimited daytime, and denial of the applications of The Finger Lakes Broadcasting System (Bl-P-3581; Doc. 6931), Geneva, N. Y., and Seneac Broadcasting Co., Inc., Rochester, N. Y. (Bl-P-3618; Doc. 6967), for the same facilities.

The Commission directed that the following cases be scheduled for Oral Argument Wednesday, October 2, at 10:00 A. M.:

1. The Sandusky Broadcasting Co., Sandusky, Ohio (Doc. 7001); Lake Erie Broadcasting Co., Sandusky, Ohio (Doc. 7004); The Bay Broadcasting Co., Sandusky, Ohio (Docket 7172).

2. WCLS, Inc., Joliet, Ill. (Docket 6983).

5. The 1000 (kc.) Cases (Docket 6230 et al).

6. Southern Media Corp., Coral Gables, Fla. (Doc. 6934); Atlantic Shores Broadcasting, Ltd., Coral Gables, Fla. (Doc. 7131); Miami Beach Publishing Co., Miami Beach, Fla. (Doc. 7152).

7. Valley Broadcasting Assn., Inc., McAllen, Texas (Doc. 6956); Howard W. Davis, McAllen, Tex. (Doc. 6860); Radio Station KEEW, Ltd. (KVAL), Brownsville, Texas (Doc. 6861).

The Commission announces its final decision (B-257) denying the application of the Chronicle Publishing Company (Docket No. 6758) for a new standard broadcast station at Marion, Indiana, to operate on 1330 kc., 250 watts, unlimited time.

The Commission announces its proposed decision (B-278) looking toward a grant of the application of the Fetzer Broadcasting Company (Docket 7387) for a construction permit and license for a standard station in Grand Rapids, Michigan, to operate on 1230 kc., 250 watts, unlimited time, subject to waiver of Rule 3.60 until approved frequency monitors are available.

At the same time, the Commission proposes to deny the application of the Ashbaeker Radio Corporation (Docket 7007), for the same facilities.

The Commission announces its final decision (B-277) looking towards a grant of the application of Frank R. Gibson (Docket No. 7160) for a new standard broadcast station at Marion, Indiana, to operate on 1330 kc., 250 watts, unlimited time.

(Continued on next page)
station at Lake Charles, La., to operate on 1580 kc., 1 kw., unlimited time, conditioned upon the satisfactory adjustment of any reasonable complaints because of blanketing.

At the same time the Commission proposes to deny the application of Roy Hofheinz and W. N. Hooper, d/b as Louisiana Broadcasting Co. (Docket No. 7182), seeking the same facilities at New Orleans, La.

Commissioner Durr issued a dissenting opinion suggesting that both applications be denied, and that the Commission invite applications from other qualified applicants who are willing to undertake to operate a station which will serve the Lake Charles area.

**AM APPLICATIONS GRANTED**

NEW—William T. Brown, et al., d/b as Mojave Valley Broadcasting Co., Barstow, Calif.—Granted construction permit for new station to operate on 1490 kc., 250 watts, unlimited time, subject to CAA approval of transmitter site and antenna system; waiver of Sections 3.55 (b) and 3.60. (B3-P-4900)

NEW—Robert L. Tomlinson, Sr., and Jr., d/b as Rome Radio Broadcasting Co., Rome, Ga.—Granted construction permit for new station to operate on 1190 kc., 1 kw., daytime only, provided applicant agrees to satisfy legitimate complaints of blanket interference occurring within the 250 mv/m contour and subject to approval of transmitter site and antenna system by CAA and to compliance with Sec. 3.46 of the Rules. (B3-P-4977)

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Farmers' Mail Order House—Misrepresentation in the sale of wearing apparel is charged in a complaint issued by the Commission against Joie Wlodinger, Celia Wlodinger and Harriet Wlodinger, trading as Farmers' Mail Order House, 628 Broadway, New York. (7501)

STIPULATIONS

W. K. Buckley, Inc., 25 Forbes St., Rochester, N. Y., entered into a stipulation with the Commission to cease and desist from misrepresenting the therapeutic properties of a medicinal preparation known as Buckley's Canadian Mixture. (7501)

Larum Products—The Commission accepted from A. Grabcewski, trading as Larum Products, 316 Williamson St., Elizabeth, N. J., a stipulation to cease and desist from misrepresenting the sale of an ointment known as Rumex. (7506)

The Overton-Hygienic Mfg. Co.—Falsely representing that a hair dressing will grow hair and failure to disclose the possible harmful affects of bleaching creams are among the practices which The Overton-Hygienic Mfg. Co., State and 36th Sis., Chicago, agrees to discontinue under the terms of a stipulation approved by the Commission. (7510)

Paul & Weissman—The Commission approved a stipulation in which Andrew Paul and Samuel Weissman, co-partners trading as Paul & Weissman, 154 West 27th St., New York, agree to cease and desist from misrepresentation in connection with the sale of fur garments. (7511)

Red Arrow Laboratories—Southwestern Drug Corp., trading as Red Arrow Laboratories, Dallas, and its advertising agent, Rutherfud & Ryan, Inc., 405 Lexington Ave., New York, entered into a stipulation with the Commission to cease and desist from misrepresentation in the sale of

(Continued on next page)
nose and throat drops, vitamin pills and a laxative preparation. (7509)

CEASE AND DESIST ORDERS

Blumenthal Print Works—The Commission ordered Sidney E. Blumenthal, Harry J. Blumenthal and Mrs. Ruby S. Blumenthal, trading as Blumenthal Print Works, 425 Godchaux Building, New Orleans, to cease and desist from misrepresenting the properties of mattress ticking and other cloth fabrics. (5142)

Frontier Asthma Co., Inc.—Misrepresentation of medicinal preparations sold by Frontier Asthma Co., Inc., 462 Niagara St., Buffalo, N. Y., for the treatment of asthma is prohibited under the terms of a cease and desist order issued by the Commission. (2935)

COMPLAINT DISMISSED

Fada Radio and Electric Co., Inc.—The Commission has dismissed its complaint charging Fada Radio and Electric Co., Inc., 30-20 Thomson Ave., Long Island City, N. Y., and its president, Jacob M. Marks, with misrepresentation in connection with the sale of radios.

The complaint charged that the respondents falsely represented that they originated Fada radio sets and have manufactured them since 1920. The order of dismissal says that after consideration of the record and the briefs and oral argument of counsel, the Commission is “of the opinion that the evidence is insufficient to show that the public is misled by the advertising in question” and that “there is insufficient public interest in the matter to warrant further proceedings.”

All of the Commissioners participated in the decision. (5313)
Network Executives to Speak at Convention; Kobak, Paley, Trammell Accept Invitations

Pre-registration for the 24th Annual NAB Convention climbed to well over the thousand mark last week, and NAB headquarters in Washington received acceptances from three top broadcasting executives and a leading educator who were invited to speak at major convention meetings.

Edgar Kobak, president, Mutual Broadcasting System, William S. Paley, chairman of the Board of Directors, Columbia Broadcasting System and Niles Trammell, President, National Broadcasting Company have accepted NAB's invitation to participate in various (Continued on page 764)

Lea Act Defended in Government Brief

Department of Justice attorneys, in a brief filed September 30 with the Federal District Court in Chicago, asserted that the Lea Act, as applied in the criminal prosecution of Mr. Petrillo for attempting to coerce Radio Station WAAF to employ more musicians than needed to perform actual services, is valid and constitutional.

The government brief, in answer to the contention that the Lea Act restricts the right to strike and thus imposes "involuntary servitude" and deprives Mr. Petrillo of "due process of law,"—points out that the Supreme Court has said that the Constitution does not confer "the absolute right to strike." The prohibition against coercion of licensees to employ more workers than they need is entirely consistent with the Congressional purpose in the Communications Act to secure the maximum benefits of radio to all the people. This purpose, the brief argues, would be defeated if Mr. Petrillo's argument that he is constitutionally entitled to coerce broadcasters, prevailed. This point is summed up as follows: (Continued on page 764)

First Sections of Joske Report Ready; Retailer Survey Still Underway

Suggested techniques for the application of radio advertising to the sales promotion problems of retailers are contained in "Radio for Retailers," a new publication to be distributed this week by the National Retail Dry Goods Association and the NAB.

The 90-page report is based on results of an extensive year-long clinical study of radio conducted by Joske's of Texas, large San Antonio department store, in cooperation with the NAB.

Chapters on "Planning" and "Results" are contained in the first release, together with an introductory section and four appendices. Scheduled for release by the end of October are three additional chapters covering "Copy," "Programs," and "Promotion and Merchandising." Each chapter is a complete unit designed to fit into an especially prepared loose-leaf binder. Research still underway at Joske's of Texas will form the basis for future releases to this continuing study.

Widely known in retailing circles as "the largest store in the largest state," Joske's of Texas is a subsidiary of Allied Stores Corporation and has achieved prominence through its spectacular growth and its application of progressive merchandising methods. Development of a series of "do's and don'ts" in radio advertising and a number of recommended techniques, disclosed in this report, were the result of the careful controls during the radio study year applied by the store and by the various experts in research, retailing and broadcasting who participated.

Prominent among the recommendations emerging from the study is one calling for the use of the "beamed program technique," whereby specific objectives are set by the retailer; specific customer-types are predetermined as (Continued on page 764)
desired audiences, and specific programs and stations are selected to appeal to those audiences. Selection of merchandise, preparation of commercial copy and program content, and all other radio factors are then tailor-made to conform to this technique, which the report describes as the “rifled” rather than “shot-gun” method. “Use of this technique,” says the report, “tended to make the store’s use of radio advertising more logical and more effective.”

Methods of the clinical study led the store to designate certain controlled departments to receive considerable radio advertising through 54 programs and 199 spot announcements weekly, while other departments received little or no radio. Various tests were applied to the selection of merchandise to be radio-advertised, to the different approaches to be used in commercial copy, and to types of programs and announcements used. Broad evaluations were made of the value of radio advertising for “institutional” and for “item-merchandising” purposes.

Mr. James H. Calvert, president of Joske’s of Texas, at whose invitation the joint study was undertaken, said: “We know that the thoroughness of the study and the contributions of the many highly qualified specialists who cooperated, justify close examination of our experience by all those interested in retail promotional problems.”

Emphasizing that the study was undertaken with a clinical attitude, “without prejudices and with an open mind—but we had to be shown,” Mr. James H. Keenan, Joske’s vice president in charge of sales promotion, declared that “the study has enabled us to develop new and effective techniques in the use of an important advertising medium. After our year’s experience it is fair to conclude that radio advertising has now become a permanent part of our store promotional program. We are most pleased to share with other retailers what we have learned.”

The report discloses that radio advertising during the study year, using 20.5% of the store’s newspaper-radio advertising budget, “contributed to a profitable increase of sales volume; directly and indirectly brought more traffic to the store; widened the range of Joske’s trading area; reached new customers not previously reached by other advertising; helped increase the prestige of the Joske name and substantially aided in establishing the store’s character, service and slogans.”

Results from radio improved as the year progressed, the report states, indicating a cumulative value from regular, persistent use. Volume increased in radio-advertised store services, such as fur storage, mail order, gift wrapping, etc., and institutional values of radio advertising were described by a store official as “limitless and immeasurable,” particularly in publicizing the Joske slogan of “the largest store in the largest state.” In some instances radio was found to be more effective when coordinated with other media.

Special research disclosed a close relationship between verified radio listening and increased sales. Throughout the study year numerous surveys were made, and the report stresses the application of such research to the practical solution of merchandising problems.

Another series of surveys disclosed that the average audience ratings of Joske programs increased during the year, “indicating ample listener-acceptance of locally-sponsored programs in competition with network shows.”

Copies of the report are available at $3 through the National Retail Dry Goods Association, New York City, or the National Association of Broadcasters, Washington, D. C. As an outgrowth of the study, lending libraries of selected radio programs and scripts are being installed by both associations.

Assisting in preparation of the report were Russell A. Brown, vice president in charge of sales promotion and advertising, Allied Stores Corporation; James H. Keenan, vice president in charge of sales promotion, and James Shand, assistant to the president, Joske’s of Texas; Willard H. Campbell, sales manager, Sibley, Lindsay & Curr Co.; Howard Abrahams, manager of the sales promotion division, National Retail Dry Goods Association; Walt Dennis, radio and television director, Allied Stores Corporation; Cecil K. Beaver, general manager, KTBS; James Brown, general manager, KONO; Lewis H. Avery, president of Lewis H. Avery, Inc.; Walter Johnson, assistant general manager, WTIC; Frank E. Pellegrin, director of broadcast advertising, and Miss Lee Hart, assistant director, NAB.
In maintaining an active public information program, the Junior Bar Conference has cooperated with radio station management in presenting speakers and panel members on forum broadcasts.

**Paying High Schools For Sports Broadcasts Is Opposed In Ninth District Protest**

A protest against paying fees to high schools for permission to broadcast local school sports events was registered recently by Leslie C. Johnson, WHBF, Rock Island, Ill., NAB 9th District Director.

Mr. Johnson, writing to radio station management in his district, urged broadcasters "to present a solid front against this practice" and requested that information be forwarded to him when authorities of high schools in the Ninth District proposed to charge for school broadcast rights.

This action occurred when the principal of the West Frankford Community High School, West Frankfort, Ill., requested a $25 fee from Station WDWS, Champaign, Ill., for the broadcast of a football game.

Frank R. Mills, director of the station, explained to the school principal that the station sustained a slight loss in carrying the games even without payment of the proposed fee. The station, said Mr. Mills, would be forced to forego such broadcasts if additional charges were imposed by school authorities.

**BMB Station-Audience Reports Mailed; New Survey Planned For 1948**

The BMB station-audience reports are in the mail. They are being mailed to subscribers over a period of a week with a release date of October 7, to permit all BMB station-audience information is released to advertisers and agencies.

With regard to BMB's next step the BMB Board of Directors meeting in New York on Friday, September 27 adopted the following resolution:

"Whereas the advertising and radio industries were long in need of a uniform measurement of radio station and network audiences in order to permit valid comparisons and thus make possible more informed use of the medium, and

"Whereas such a measurement, to win full acceptance, support and use by all segments of both industries, had to be undertaken by an organization which was truly cooperative in concept, organization and operation, and

"Whereas Broadcast Measurement Bureau, being so established, has available the full resources of the advertising and radio industries with respect to research methods, techniques and experience, as well as skilled personnel for its staff and the consultative services of leaders within the industry, and

"Whereas Broadcast Measurement Bureau, by reason of representing the common interests of buyer and seller, has both a rounded understanding of the problems involved in the measurement of radio station and network audiences and an objective approach to the solution of those problems, and

"Whereas Broadcast Measurement Bureau has won the financial support of three quarters of the radio stations, the four major networks, and prominent regional networks, representing a true cross section of the industry with respect to station power, frequency and city size, and

"Whereas Broadcast Measurement Bureau has completed the first study of radio station and network audiences, which has been validated by advertisers and agencies and the results of which are in the process of being issued, and

"Whereas, in the interests of maintaining a measurement characterized by comparability, uniformity and continuity, no interim audience studies shall be made between scheduled national U. S. studies, for portions of the United States or for individual stations or networks, and

"Whereas the results of the first study of radio station and network audiences should be fully understood, correctly interpreted and properly used by advertisers, agencies and broadcasters prior to embarking upon a second study, and

"Whereas, despite the requests of numerous broadcasters, advertisers and agencies for a 1947 survey and despite the desirability of frequent measurements of radio station and network audiences in order that data be always of as recent origin as possible, the second study may be improved by careful evaluation of the first study and a refinement of techniques, now therefore:

"Be it resolved that Broadcast Measurement Bureau undertake its second U. S. station and network audience study in March 1948 as a continuation of the original program adopted unanimously by the ANA, AAAA and NAB in 1944 and put into operation by BMB in 1945 and 1946, and

"Be it further resolved that, the advantages of annual surveys notwithstanding, in acknowledgement of practical considerations and the long term interests of the advertising and radio industries Broadcast Measurement Bureau forego a survey in 1947 and devote the year to the following activities: (1) evaluation of its first study, refinement of techniques, methods and procedures, experimental research and exploratory activities in the field of radio audience measurements; (2) promulgation of the full and proper use of the first study findings by advertisers, agencies and broadcasters and (3) the solicitation of present station and network subscribers and new contracts for the continuing participation in the activities of the Bureau, including the 1948 U. S. survey and (4) servicing subscribers with respect to the interpretation of the data and its correct statistical presentation."

This action of the BMB Board frees BMB from the necessity of embarking on a second survey prior to a

(Continued on page 765)
Network Executives to Speak at Convention

(Continued from page 761)

sessions. Subjects to be discussed by these industry leaders and schedules on their talks will be announced this week.

Dr. Paul F. Lazarsfeld will address industry representatives on the subject "How Broadcasters Can Use the NORC Radio Study." Dr. Lazarsfeld, author of "The Public Looks at Radio," is professor of sociology at Columbia University and director of the university’s Bureau of Applied Social Research. His talk is scheduled for Thursday morning, Oct. 24.

With all signs pointing to an overflow attendance, the following message was received from convention management:

When preliminary plans were made for the convention it was estimated that the attendance would run in excess of that of any previous convention. To protect NAB members, active and associate, in the matter of sleeping, as well as exhibit rooms, a block of over 1000 of the former and 50 of the latter was optioned. It was felt that this would adequately serve all possible requirements. However, it has been found necessary to increase the number of exhibit rooms and every effort is being made to secure more sleeping rooms in other than the headquarters hotels.

Over 50 applications for sleeping rooms have not yet been filled, and unless more rooms or cancellations are forthcoming it is just going to be necessary to tell the applicants that unless they can make their own arrangements for sleeping quarters in Chicago, they had better not attempt to attend the convention. In the first announcements it was stated that any reservations received after September 20 could not be honored. All those received prior to that date will be accommodated.

Plans for the Annual Banquet on Thursday evening, Oct. 24, are progressing satisfactorily. While no announcement is yet possible with regard to the show it will be good entertainment.

All those planning to attend the convention are requested to forego invitations to their friends or business associates who are not registered at the convention.

From the foregoing it can be seen that the management of the convention is struggling with some very serious "growing pain" problems. Whole hearted cooperation of each individual member is a necessity. These conventions are just growing too big to be held in a hotel. The Board of Directors already has taken action looking to improvement of the situation in years to come but for this year we are "stuck" with a situation which is likely to prove inadequate and to some, annoying. Everything possible is being done to avoid aggravating incidents and the hotel management are cooperating whole heartedly and to the limit of their ability.

Lea Act Defended in Government Brief

(Continued from page 761)

"To require broadcasters to expend their assets in paying many more employees than they need—something which they normally would not do in the absence of some form of coercion—diminishes the resources available for giving the public the best possible radio service. In particular, such demands may affect the very existence of the large number of small stations with small resources upon which a substantial portion of the nation depends. If the broadcasters comply with the demand for unneeded employees, their capacity to furnish the community with other useful services, such as non-renumerative programs, will obviously be impaired. If they do not comply they will, at the very least, be unable to provide the public with the musical entertainment which it desires, and in many instances, as Congress was aware, will be forced by outside pressure to shut down altogether."

Citing various Supreme Court opinions, the brief argues that both strikes and picketing for unlawful purposes may be prohibited, without conflicting with the Constitution. Even though picketing has been regarded as a form of freedom of speech, it is not "entitled to greater constitutional protection than other forms of speech and writing. *** Speech which constitutes coercion, as distinct from dissemination of information or persuasion by appeal to reason, may be prohibited."

One of the claims made by attorneys for Mr. Petrillo in the brief they filed August 15 (see Current Reports, p. 645), was that the Lea Act is discriminatory. This contention is answered by the Department of Justice as follows: "It is clear that Congress had good reason for believing the coercive enforcement of the harmful practices referred to in Section 506 to be especially serious in the broadcasting industry. Although other unions may have so-called feather-bedding restrictions, it does not appear that in any similar industry (if there be one) a union is in a position, because of a nation-wide closed shop and a president with completely unfettered powers, to coerce employers to the same extent, or that a union is seeking to impose restrictions so contrary to the public interest."

The Lea Act prohibition against coercion to force employment of persons "in excess of the number of employees needed by such licensee to perform actual services" does not, it is urged, establish a vague and unconstitutional definition of crime. The Government attorneys call attention to the fact that a criminal penalty is imposed only on persons who willfully violate the Lea Act prohibitions, and that in several recent decisions the Supreme Court has held such a claim unavailable "when the crime must consist of conduct which is willful—that is, known by the defendant to be in violation of law." This aspect of the case is summarized as follows:

"There can be no question that in the type of case Congress intended the statute to reach, a defendant would know that he was forcing upon an employer more employees than were needed. No one could claim in good faith that a station needed two microphones and two transmitters. No one could claim in good faith that a station needed a number of persons to act exclusively as platter turners, that is to say, to put on and take off phonograph records, when announcers and other technicians had been able to perform this difficult operation in a few seconds per program along with their other duties. In these and other cases which Congress had in mind, the union pays no attention to the employer's need. It treats that as irrelevant, and is concerned entirely with what it regards as its own interest in securing employment for its members. When it makes that the criterion, irrespective of the need of the employer, it is deliberately and knowingly—that is, willfully—violating the statutory mandate, and cannot pretend that the statute is too indefinite for it to know that its conduct is unlawful."

OCTOBER 7, 1946 — 764
full examination of the first survey and assures a second survey in 1948 which will take advantage of whatever findings may evolve from a year's study of the present survey.

Use Of Spot Announcements And Programs By 300 National Radio Accounts Analyzed

The N. C. Rorabaugh Company of New York, publishers of monthly reports on national spot radio business, presented in its August report an interesting analysis of the way in which spot programs and announcements are used. Using a representative sample of 300 of the active accounts for June 1946 the breakdowns appear as follows:

<table>
<thead>
<tr>
<th>LIVE vs TRANSCRIBED</th>
<th>Anncs. Only</th>
<th>Progs. Only</th>
<th>Both Anncs. and Progs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Used Live material only</td>

Radio Journalists' Council Schedules Meeting At Convention on October 20

The Council of Radio Journalism is to meet during the NAB Chicago Convention according to announcement by Chairman Fred Siebert, director, School of Journalism, University of Illinois. The call is for 2:00 p.m., October 20, at the Palmer House.

Industry Members

Industry members of the Council are: E. R. Vadeboncoeur, WSYR, Syracuse, also Chairman, NAB News Committee; William Brooks, NBC, New York City; Karl Koerper, KMBC, Kansas City; and Arthur Stringer, NAB, Council Secretary-Treasurer.

Educator Members

Educator members are: Prof. Siebert; Wilbur Schramm, vice-chairman of the Council and director, school of journalism, University of Iowa; Kenneth Bartlett, director, radio workshop, Syracuse University; Floyd K. Baskette, assistant professor of journalism, Emory University; and Mitchell V. Charnley, professor of journalism, University of Minnesota.

Small Market Stations

"Mayflower Group" Formed in New England To Cooperate in National Spot Sales

Management of several small market stations in New England have organized "The Mayflower Group" to handle national spot business. Approximately twenty stations, located in Maine, New Hampshire, Vermont, Massachusetts and Connecticut are expected to become members of the group. The organization is now in the formative stage with each station subscribing to a fund for promotional purposes.

The Mayflower Group will be represented by Miss Bertha Bannon, 553 Little Building, Boston, Mass. Miss Bannon, with many years' radio experience, opened her own station representative agency in 1938. Well known in New England stations of all sizes, Miss Bannon informed the NAB Small Market Stations Division last week that The Mayflower Group will be sold to national and regional advertisers as supplementary to the metropolitan stations she represents. A package rate is being set up to make the entire list of small stations attractive to the national advertiser. Careful selections will be made so as not to include outlets which overlap in coverage. Coverage data are now being compiled and plans are expected to be completed within two months.

Miss Bannon has consulted Monroe B. England, WBRK Pittsfield, Mass., member of the NAB Small
Market England reports that all stations have been enthusiastic over progress to date in the formation of the group.

"Group Selling" will be included in a talk by J. Allen Brown, head of NAB Small Market Stations Division, at the convention in Chicago October 21-24th. In this connection, Kenneth H. Baker, NAB director of research, reports that there are 40 regional networks (or groups) organized in the United States, and seven in Canada.

Public Interest Programming

Treasury Dept. Bond Drive Scheduled To Run From November 11 Through December 7

Treasury's second 1946 bond selling campaign has been set for November 11-December 7, inclusive.

Brent O. Gunts, chief, radio section, Treasury Department, room 2712, 1270 Sixth Avenue, New York 20, N. Y., has mailed all stations a three-page letter on the campaign. It outlines material available—what is being sent and what must be requested.

Some stations may find it difficult to handle the 1-minute transcribed announcements that Treasury is offering. On many stations, announcement programs are not as numerous as formerly and many others do not now broadcast 1-minute announcements after 6:00 p.m.

Since all Treasury material may be sponsored, the question also arises as to whether 15 seconds for the commercial on the 5-minute "Sports Spots" are sufficient.

However, the industry has always rallied around Treasury more aggressively than any other medium. For the War Loans and Victory Loans, more than 50% of the promotion effort was always contributed by broadcasting.

So it is logical to expect that the ingenuity of all station personnel can be counted upon to repeat during the forthcoming campaign. And, as matter of fact, better broadcasting will result if station personnel will plan their own programs and announcements especially for their own area.

Ad Council Networks Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of October 14-20, 1946 by The Advertising Council and the Media Programming Division of the OWMR. Copies of individual Fact Sheets, and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West Forty-Second Street, New York 18, New York.

Community Chests of America

The largest voluntary campaign in America this year for the support of health and welfare services will be the combined campaigns of local Community Chests of America this October. President Truman has urged full support of the Community Chest Red Feather services vital to the health and welfare of millions of Americans. Every city of more than 100,000 population in the United States, with the exception of New York, Wilmington, Delaware, and Fall River, Mass., has a Community Chest. By giving generously to his local Community Chest every citizen can be sure that he is supporting most wisely the friendly, neighborhood services which go on day after day, month after month, in 850 cities and towns in America. The total sum to be raised is more than 170 million dollars, which includes more than half of the USO's total budget of 19 million dollars. Sample studies show that four out of ten families—nearly half the families in Community Chest cities—benefit directly through Community Chest Red Feather services, such as aid to handicapped, boys clubs, Boy Scouts, Campfire Girls, child guidance children's aid, clinics, community centers, day nurseries, family services, Girl Scouts, homes for the aged, hospitals, maternity homes, neighborhood houses, Salvation Army, social hygiene, summer camps, Travelers Aid, visiting nurses, YWCA. There are over 2 million contributors to Red Feather services—a total equivalent to one for every family in the Chest cities. By combining a number of welfare appeals in one, Community Chests cut down administrative expenses and save not only money but time and effort for the real purpose: giving needed services to the Community. This year more money than ever before is needed because: 1. Costs of everything—commodities, personnel, equipment, services—which health and welfare agencies use in behalf of the millions of people they serve have risen sharply; 2. Since 1941 the population in Community Chest cities has increased about 25% and the need for Red Feather services has increased accordingly; 3. Many established agencies, not formerly included in Community Chests, were added during the war years and will remain as Red Feather agencies.—"EVERYBODY BENEFITS—EVERYBODY GIVES." (Fact Sheet No. 33)

Atomic Energy

Man's control of atomic energy has created the most serious problem ever to face this nation and the world. With the discovery of a new principle of the universe, weapons of war have assumed immeasurable powers of destruction. In addition to the atom bomb, recently perfected methods of germ and gas warfare offer further possibilities for mass extermination. The problem of how to prevent the use of scientific knowledge for destructive purposes, and to promote its use for the benefit of mankind, is one that is immediate and personal to every man, woman and child. It is the problem of life itself. The overwhelming majority of scientists and experts who developed the atomic bomb agree that: (1) the atomic bomb is primarily a weapon against cities and concentrations of people. (2) Present-day atomic weapons could kill 30 per cent or more of a country's population and destroy most of its industry in attacks on its major cities over a short period of time. More powerful atomic bombs are possible. (3) There is no effective defense against atomic bombs and none can be expected. (4) No single big secret protects the atomic bomb. Other nations could perfect atomic bombs within as little as three to five years, and many powers have access to the necessary raw materials. An Atomic Energy Commission has been set up in the United Nations to work toward the control of atomic energy in order to insure its use for peaceful purposes only. To this Atomic Energy Commission, the representative of the United States, Mr. Bernard Baruch, has submitted a plan as a basis for beginning a discussion on control measures to be taken. The United States' proposal to the Atomic Energy Commission rests on the belief that it is not enough merely to outlaw atomic weapons and to police nations to see that such weapons are not being manufactured. To eliminate atomic weapons.

(Continued on next page)
the United States plan maintains all development and use of atomic energy must be controlled, starting with the placing under international control of the dangerous raw materials, uranium and thorium. The United States' plan, therefore, proposes the creation of an international Atomic Development Authority which would assume control (including ownership if necessary) of all atomic energy activities potentially dangerous to world security, actively conduct atomic research, and supervise through license and inspection all atomic activities throughout the world. To such an Authority we would in time disclose any exclusive knowledge of atomic energy in our possession—but we would make these disclosures in a series of stages, as various parts of the plan go into successful operation. It should be stressed that the building of effective atomic control will involve the cooperative efforts of many nations and peoples. The opinion of the citizens of the nation which developed the atomic bomb is of key importance. Ultimately, whatever method is arrived at for atomic control must be ratified by the people's representatives in the form of a treaty subject to the approval of a two-thirds vote of the Senate. Unless whatever international policy is arrived at is backed by American public opinion, it will not stand. The people cannot become scientists or nuclear physicists. But every American who makes any pretense of good citizenship can and should inform himself of the proposals made by his government to the U.N. Atomic Energy Commission—and follow every modification or counter-proposal. Then, when the time of decision comes, that decision will be made by a citizenry armed with facts—instead of swayed by emotions or prejudices. (Fact Sheet No. 30)

Television

FCC Announces 78 Television Applicants Licensed, Granted CP's or Awaiting Decision

The FCC issued a report on the status of television broadcast applications on Monday (30). The report includes the number of licensed commercial television stations, the number of construction permits authorized for such stations and the number of applications pending as of September 25, 1946.

Following is a summary of the report:

- Licensed stations rendering broadcast service: 6
- Outstanding CP's authorizing new stations: 31
- Applications designated for hearing and awaiting decision: 14
- Applications pending disposition of hearings in related cases: 11
- Applications pending receipt of information requested by the Commission: 10
- Applications being processed: 6

* Wm. Penn Broadcasting Co., Philadelphia, was granted a CP on September 30. The grant increases the outstanding authorized CP's to 32, and decreases the applications being processed to five.

The FCC announced at the same time, that similar reports will be issued from time to time for the information of interested parties. A copy of the status report has been sent by the Commission to all television applicants.

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, October 7. They are subject to change.

Monday, October 7

WOW—Radio Station WOW, Inc., Omaha, Nebraska—Renewal of license. 590 kc., 5 KW, unlimited.

NEW—La Crosse Broadcasting Co., La Crosse, Wis.—C. P. 580 kc., 1 KW night, 1 KW day, unlimited.

Other Participants

WILL, Urbana, Illinois (Intervenor)

(At 10:00 o'clock a.m.)

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.—C. P. 680 kc., 10 KW day, 5 KW night, unlimited.

NEW—The Tower Realty Co., Baltimore, Md.—C. P. 680 kc., 10 KW night, 10 KW day, directional antenna, unlimited.

NEW—Mark A. Braymes and Frank Z. Temerson, d/b as Lorain Broadcasting Co., Lancaster, Pa.—C. P. 680 kc., 5 KW day, 1 KW night, DA night, unlimited.

Other Participants

WLAW, Lawrence, Massachusetts (Intervenor)

WPTF, Raleigh, North Carolina (Intervenor)

The Foundation Company of Washington (Pending)

At Lorain, Ohio

(To be held in the Auditorium of St. Mary's School, 7th St. and Reid Avenue)

NEW—Northern Ohio Broadcasting Co., Amherst, Ohio—C. P. 1010 kc., 1 KW, daytime.

NEW—LBC, Inc., Lorain, Ohio—C. P. 1010 kc., 1 KW day, daytime.

Wednesday, October 9

At Mansfield, Ohio

(To be held in auditorium of McVey Post, American Legion, at 126 Park Ave., W.)

NEW—Unity Corporation, Mansfield, Ohio—For FM facilities.

NEW—Richland Incorporated, Mansfield, Ohio—For FM facilities.

NEW—Mansfield Journal Company, Mansfield, Ohio—For FM facilities.

Thursday, October 10

NEW—Lake Broadcasting Co., Inc., Gary, Ind.—C. P. 1560 kc., 500 watts night, 1 KW day, unlimited.

Other Participants

WQXR—New York, N. Y. (Respondent)

(Continued on next page)
NEW—Coast Ventura Company, Ventura, Calif.—C. P. 1450

NEW—Arthur H. Croghan, Santa Monica, Calif.—Granted

NEW—Ventura Broadcasters, Inc., Ventura, Calif.—C. P.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—-

WJBW—Charles C. Carlson, New Orleans, La.—Renewal of power; antenna height given is height above average terrain:

NEW—Gulfport Broadcasting Co., Inc., Pensacola, Fla.—

NEW—Wm. Penn Broadcasting Co., Philadelphia, Pa.—

NEW—Altoona Broadcasting Co., Altoona, Pa.—Granted

NEW—Eli Daniels and Harry Daniels, d/b as Daniels & Sons Broadcasting System, Deadwood, S. Dak.—Granted CP(*) for a new station to operate on 1450 kc., 250 watts, unlimited time. (B5-P-4236)

NEW—John Daniels, Eli Daniels and Harry Daniels, d/b as Daniels & Sons Broadcasting System, Deadwood, S. Dak.—Granted CP(*) for a new station to operate on 1450 kc., 250 watts, unlimited time. (B5-P-4236)

NEW—Troy Broadcasting Co., Inc., Troy, N. Y.—Class B; Channel: 102.5 mc. (No. 272); 2.4 KW; antenna 1000 feet. (B3-PH-1560)

The following were granted conditional grants subject to engineering conditions:

FM CONDITIONAL GRANTS

The following were given conditional grants subject to engineering conditions:

FM FINAL CP'S GRANTED

The following permits were granted regular construction permits. (Note: power given is effective radiated power; antenna height given is height above average terrain):

Radio Columbus, Inc., Columbus, Ga.—Class B; Channel: 97.1 mc. (No. 246); 16.4 KW; antenna 515 feet. (B3-PH-184)

(*) Subject to the filing, within 60 days of grant, an application for the modification of CP specifying transmitter location and antenna system meeting the requirements of the Standards.

FM CONDITIONAL GRANTS

The following were given conditional grants subject to engineering conditions:
Licenses for the following stations were further extended upon a temporary basis for the period ending December 1, 1946, for the reasons shown:

KGDE—Fergus Radio Corp., Fergus Falls, Minn.—Pending further engineering study.

KHUB—Luther E. Gibson, near Watsonville, Calif.—Pending consideration of information requested under Sec. 308(b) of the Act.

KICA—Hugh D'Willis Landis, Clovis, New Mexico—Pending consideration of information requested under Sec. 308(b) of the Act.

KODY—Radio Station WOW, Inc., North Platte, Neb.—Pending final decision upon renewal application of WOW.

KROY—Harmco, Inc., Sacramento, Calif.—Pending consideration of information requested under Sec. 308(b) of the Act.

Federal Trade Commission

Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

California Marine Curing & Packing Co.—Violation of the Robinson-Patman Act by payment of brokerage fees to buyers of seafood products for their own accounts has been issued by the Commission against California Marine Curing & Packing Co., Monterey, Calif., and Wilbur-Ellis Co., 430 California St., San Francisco, as well as officers of each corporation. Julian G. Burnette is listed as president and Frank J. Leard as vice president of Custom House, while Brayton Willbur is president and Thomas G. Franeck vice president and treasurer of Wilbur-Ellis. (5404)

CEASE AND DESIST ORDER

Custom House Packing Corp.—An order prohibiting payment of brokerage fees to buyers of seafood products for their own accounts has been issued by the Commission against Custom House Packing Corp., Monterey, Calif., and Wilbur-Ellis Co., 430 California St., San Francisco, as well as officers of each corporation. Julian G. Burnette is listed as president and Frank J. Leard as vice president of Custom House, while Brayton Willbur is president and Thomas G. Franeck vice president and treasurer of Wilbur-Ellis. (5404)

Complete Lineup For Convention Announced

Program Replete with Top Executives to Lead Numerous Significant Sessions

(The complete agenda is printed in chronological form beginning on the next page.)

With the largest number of broadcasters ever to assemble in a single session expected to begin converging on Chicago next weekend, NAB has announced full details of the agenda for its 24th Annual Convention.

Under the leadership of NAB President Justin Miller, who will deliver his keynote address on Tuesday morning at the opening general session, many of the foremost executives in the broadcasting industry, along with several guest speakers from allied fields, will lead a variety of timely and significant sessions concerning matters of prime industry importance.

Judge Miller will set the tone for the meeting with a keynote address entitled "Broadcasting—An Opportunity—A Challenge." Following the keynote address, William S. Paley, chairman of the CBS Board, will address the assembly.

Business Session Scheduled for Wednesday

The NAB business session, which will be of great interest and importance to members, has been scheduled for Wednesday afternoon. In addition to electing directors-at-large for the coming year, and considering the proposed amendments to the By-Laws, this session will consider resolutions proposed by members.

In order that proper and full consideration may be given to suggested resolutions, Association officials have requested that they be given to the NAB Secretary-Treasurer prior to 5:00 p.m. on Tuesday, October 22nd.

Freedom of Speech Panel Set

One of the highlights of the convention announced last week is the "no host" dinner on Wednesday night (23). Feature of the dinner is a panel discussion by top executives of radio, the press and motion pictures who will present the viewpoints of their respective industries on the vital subject "Do We Have Freedom of Speech in the United States?"

Edgar Kobak, president, Mutual Broadcasting System, will serve as moderator for the panel which will include John S. Knight, president, American Society of Newspaper Editors; Byron Price, vice president, Motion Picture Association of America, and former head of the Office of Censorship; and A. D. Willard, Jr., executive vice president, NAB.

Earlier the same day there will be a panel discussion of the topic "Broadcasters' Public Relations," over which President Miller will preside. The panel participants will include Edgar Kobak, MBS president, Harold V. Hough, general manager of WBAP, Fort Worth, Texas, and Alma Kitchell, president, Association of Women Broadcasters.

Facsimile to Be Discussed

Four of the top authorities in the field of facsimile broadcasting have accepted invitations to participate as panel discussion leaders during the facsimile session slated for Monday afternoon.

Scheduled to speak first when the facsimile meeting gets underway at 4 P.M. is Captain W. G. H. Finch, president, Finch Telecommunications, Inc., whose subject is "Facsimile Broadcasting." He will be followed by Mr. Philip G. Caldwell, sales manager for General Electric Company's Television and Facsimile Equipment, Mr. Caldwell (Continued on page 188)

(Continued on page 789)
Complete Lineup for Convention Announced

(Continued from page 785)

will discuss “Modern Facsimile Broadcast Equipment.”

Third speaker on the panel is Mr. Elliott Crooks, director, Newspaper Publishers Facsimile Service, Radio Inventions, Inc. Mr. Crooks will speak on “Programming Your Facsimile Newspaper.” Final discussion leader on the panel is John V. L. Hogan, president, Radio Inventions, Inc. Mr. Hogan's topic is “Facsimile and the Broadcaster.”

Each of the speakers will discuss his respective subject for ten minutes. Following these introductory remarks, the panel leaders will answer questions from the floor. The meeting will provide broadcasters with information on the present status of facsimile development.

Breakfast on Tuesday

Under the auspices of the Chicago Radio Management Club, a no host breakfast has been arranged for Tuesday morning, October 22.

Presiding at the breakfast will be Holman Faust, president, Mitchell Faust Advertising Co.; David W. Cole, executive of Henri, Hurst & McDonald, Inc., is program chairman. Guest speaker at the breakfast is Fulton Lewis, Jr., whose subject is “The Clinical Indications of World War III”.

On Tuesday afternoon, following the general luncheon, delegates to the convention will hear a discussion by Richard P. Doherty, NAB Director, Employee-Employer Relations Department. Mr. Doherty's address is titled “A Program for Sound Industrial Relations.”

Broadcast Measurement Bureau

The work of the Broadcast Measurement Bureau will be thoroughly covered in a two and a half hour meeting on Tuesday afternoon. Judge Miller will introduce the BMB, Board, technical committees and staff and J. Harold Ryan, BMB chairman of the board, will acknowledge the introductions. Hugh Feltis, president, BMB will make his “Report on BMB Study No. 1”. Mr. Ryan will then address the delegates on BMB's plans. Title of his talk is “A Glance into the Future of BMB”.

Following Mr. Ryan, remarks by AAAA members and ANA members of BMB will be heard. “The Advertising Agency Looks at BMB” will be presented by Frederic Gamble, president, AAAA, who will be followed by Paul West, president, ANA who will discuss “The Advertiser Looks at BMB”. A summary and conclusion of the discussions will be presented by Judge Miller.

Broadcast Advertising Discussions

Most of the discussion scheduled for Thursday, final day of the convention, will be devoted to the subject of advertising.

Featuring the luncheon session, Niles Trammell, president of the National Broadcasting Company, will speak on the topic “Advertising in the Public Interest.”

Preceding the luncheon, a retail advertising clinic is scheduled for an hour and a half forum, which will be devoted largely to a discussion of the Joske Report, “Radio for Retailers.” Members of the panel will consist of the Joske Advisory Subcommittees.

The final general session of the convention, Thursday afternoon, will be devoted entirely to a Broadcast Advertising Clinic. James V. McConnel, chairman of the Sales Managers Executive Committee, will preside, and the meeting will feature reports by the various committees and subcommittees concerned with broadcast advertising.

Though the convention will be officially adjourned at the close of the business sessions on Thursday afternoon, it is expected that some broadcasters will remain in Chicago overnight, since they seem to anticipate a festive evening at banquet.

Management Studies No. 3 and No. 4 Released

Two new issues, numbers 3 and 4, of the NAB RADIO MANAGEMENT STUDY, were released last week-end. This study of actual operations of small stations is being mailed to the NAB membership of Small Market Stations (less than 5000 watts in cities of 50,000 population and under.) Special mailings will be made to larger stations requesting copies.

A presentation on the Management Study will be made at the convention by Wayne W. Cribb, KHMO, Hannibal, Mo., member of the Small Market Stations Executive Committee. The Survey was done by Arthur C. Stringer, NAB director of Special Services.

Feature for Wednesday Evening at the Convention

A “no host” dinner at 6:00 followed by a Panel of Leaders from the Press . . . Screen . . . Radio

EDGAR KOBK
President, Mutual Broadcasting System will serve as moderator . . . .

State Department Seeks Candidates for Public Affairs Positions Abroad

At the request of the State Department, NAB is cooperating in locating personnel to help complete the staff of Public Affairs Officers to be appointed for service in United States Embassies abroad.

The State Department proposes to appoint some 372 information officers in sixty-two countries.

Though no minimum educational requirements are specified, it is desirable that candidates for the positions have a speaking knowledge of the language of the country to which they are assigned. In some instances, such knowledge is nearly essential. Naturally, in many of the countries, including those of the British Empire, a knowledge of English is sufficient. The positions are open to alert and well-informed men and women, preferably between twenty-eight and thirty-five years old, who are capable of interpreting American life and institutions to the people of the country to which they are assigned.

The State Department expects that the appointments will be made for somewhere between eighteen and twenty-four months.

Candidates should possess a high degree of patriotism, and must have been American citizens for at least fifteen years.

The proposed salary for Public Affairs Officers will be about $4000 or $5000 a year. In addition, there will be an allowance for living expenses, varying according to the cost of living in the respective countries, but averaging about $1500. Appointees will be permitted to take their families with them, with an additional allowance contemplated for families. Transportation to and from the countries assigned will be provided for the appointees and their families. If the present employer of a man or woman appointed desires to continue to pay the difference between the salary now being earned and the sum the Department will pay, there is no objection.

NAB will welcome any recommendations of available, qualified personnel which radio industry executives may wish to make.

Australian Broadcasters, Meeting Next Month, Saluted by Judge Miller

Australian broadcasters will hold their first post-war annual convention in Tasmania early next month. NAB President Justin Miller has sent a message to A. C. Paddison, president, Australian Federation of Commercial Broadcasting Stations, conveying the best wishes of American broadcasters to the radio men “down under.”

Text of Judge Miller’s letter follows:

“On behalf of the more than 1,000 United States broadcasters represented by the National Association of Broadcasters, I extend greetings and very best wishes to your Federation and the commercial broadcasting stations of Australia on the occasion of your first post-war convention.

“The commercial broadcasters of Australia and the United States played a glorious part in the common defense of our countries. Now, that defense is happily concluded and our stations are preparing to perform an equally large and important work in the reconversion and in the struggle for the peace. I have no doubt that their ingenuity, energy and spirit will make a substantial contribution to these all-important objectives.

“We share with you the firm conviction that only through the absolute maintenance of our peoples’ right to listen to a free and unhampered radio can world understanding and permanent peace be achieved, and we join with you in pledging to our respective peoples our eternal vigilance in their behalf.”

OCTOBER 14, 1946 — 789
Network-AFRA Negotiations Underway

The major networks are now engaged in contract negotiations with AFRA.

Although to date neither the Union nor the networks have issued any statements concerning these negotiations, the trade press claims that AFRA demands include the following:

1. That the networks agree not to feed programs to outlets which refuse to negotiate with AFRA.
2. Equalization of commercial and sustaining rates.
3. Elimination of Pacific Coast regional differentials.
4. Mutual cancellation rights, by which artists as well as producers could cancel contracts.
5. Commercial fees for sound effects men.
6. Payment for non-professionals at AFRA rates.

Broadcast Advertising

Meeting In N. Y., Joske Committees Discuss
“Radio for Retailers,” Advertising Clinic

The Joske Advisory Committees met in New York on Tuesday (8) to review copy for “Radio for Retailers” and to discuss plans for the retail advertising clinic at the convention.

Discussion of “Radio for Retailers” covered the next three chapters of the book consisting of “Copy,” “Programs,” and “Promotion and Merchandising.”

Lewis H. Avery, president, Lewis H. Avery, Inc., will be chairman of the retail radio advertising clinic to be held on Thursday morning, Oct. 24. Members of the Joske Advisory Committees will serve as speakers on the panel.

Attending the meeting in New York were: James Shand, assistant to the president of Joske's; Russell Brown, vice president in charge of sales promotion and advertising, Allied Purchasing Corp.; Walt Dennis, director of radio and television, Allied Purchasing Corp.; Howard P. Abraham, sales promotion director, NRDGA; Walter Johnson, assistant general manager, WTIC; Lewis H. Avery; Lee Hart and Frank E. Pellegrin, NAB.

Suggestion Is Made For National Contest
To Find New Name For “Spot Broadcasting”

A sub-committee of the Sales Managers Executive Committee met in New York on October 3 to discuss standardization of a definition for the term “spot broadcasting.”

Following the discussion, it was moved that the sub-committee recommend to the executive committee that a national contest be conducted to find a new name for the term.

A motion was passed also recommending that the sub-committee meet with the executive committee during the convention in Chicago to discuss an overall plan for the promotion of “spot broadcasting.”

Attending the sub-committee meeting were: Chairman Beverly Middleton, WSTR; Lewis H. Avery, Lewis H. Avery, Inc.; John Blair, John Blair & Company; Joseph Timlin, Branham Company; Eugene Katz, The Katz Agency; Stanley Bailey, Burn-Smith Company; Robert McNamara, Free & Peters, Inc.; Henry Christal, Edward Petry & Co.; Arthur Hull Hayes, WCBS; and Hugh M. P. Higgins, NAB.

FCC Rule On Overlapping Service Is Basis For Two Decisions

In a proposed decision issued last week the FCC granted WGAR, Cleveland, permission to increase its power from 5 to 50 KW on 1220 kc. In so doing the Commission denied the application of WADC, Talmadge, Ohio, for the same facilities. The Commission granted the application of WGAR in spite of the fact that the primary service areas of WGAR and WJR, Detroit, which are under common control, overlap. However, the Commission found that the overlap existed at the time of the adoption of Rule 3.35, that it existed as a consequence of the classification of WJR as a clear channel station, and that the overlap was incidental to the necessity of rendering service to rural areas. Other factors influencing the Commission were that the two stations had separate network affiliations, advertising representatives, news services, and local programs, and that Cleveland and Detroit have distinct and separate trading areas.

In considering the application of WADC the Commission pointed to two factors favoring a grant: The first was the local residence of the licensee and the second was the question of Rule 3.35 in the WGAR application. However, the FCC concluded that “the advantage which local residence normally gives . . . is negative by the evidence in this case which discloses a complete lack of concern by WADC of the local needs of its service area.” The Commission pointed out that WADC proposed to become simply a conduit for the network programs of CBS and that the applicant had stated that he could think of no case in which he would be interested in substituting a local program for the network program. In contrast, WGAR, though not locally owned, had manifested considerable concern in the wants and needs of its local audience.

Both Applicants Denied in Biloxi

The FCC released a proposed decision on Tuesday (8) which denies both of two mutually exclusive applications to operate on 1490 kc. in Biloxi, Miss.

The Commission denied the application of WGCM (Continued on next page)
on the ground that it already operates a station at Gulfport, Miss., the service of which would overlap the proposed operation at Biloxi. Consequently, the FCC applied Rule 3.35 which prohibits dual ownership of facilities rendering substantially the same primary service. The Commission said that the applicant had failed “to make a sufficient showing that public interest, convenience and necessity will be served through the multiple operations. . . . Dual ownership would not afford the two communities . . . that competition in radio service which the enactment of 3.35 of the Rules was intended to accomplish.”

The application of WLOX Broadcasting Company was denied by the FCC which stated in its decision that the principal stockholder, the owner of a hotel in Biloxi, was a consistent violator of the Mississippi gambling and liquor laws, and consequently, failed to measure up to the standards of public responsibility which the Commission considers is required of licensees by the Communications Act.

5 CG—Conditional Grant.

**Small Market Stations**

**District Chairmen to Meet with Executive Committee on Opening Day of Convention**

When the NAB convention convenes in Chicago on Monday, October 21st, small market stations from every state and district in the nation will be officially represented. The small station chairman from each of the seventeen NAB districts will meet for a “committee session” with members of the Small Market Stations Executive Committee, headed by chairman Marshall H. Pengra, KRKR, Roseburg, Ore. The meeting is scheduled for 10:00 A.M. Monday.

The district chairmen are well informed on problems confronting the small station in each section of the nation. Matters of a national and sectional nature will be given in “first hand” reports to the Executive Committee, which represents the some 750 small market stations in the country. There is keen interest in the convention throughout the small station field since stations of this category (less than 5000 watts in cities of 50,000 or under) have had approximately a 100% increase in number since the NAB War Conference two years ago.

Shortage of radio operators, multiple station grants, FCC regulation 91-D, re-evaluation of local and national rate structure, programming with local emphasis, spot announcement vs. program sales, salesmen’s compensation, developing local business, value of fresh brief commercials, sales aids, reduction in costs of services purchased by stations, station promotion, use of NAB management studies, employee-employer relations, community leadership, local news programming and sales, public relations, use of BMB Report and group selling are some of the subjects of special interest to small market stations which will be covered at the convention.

**Public Interest Programming**

**Navy Day—Sunday, October 27, 1946**

*(Message from OWMR)*

One hundred and seventy one years ago, the First Continental Congress received a bill providing for the establishment of a United States Fleet. Therefore, President Truman, by Presidential proclamation, will designate Sunday, October 27 as NAVY DAY. In recognition of the Navy’s part in the war so recently won, and to honor the veterans of that war, as well as to stress the importance of guarding our Nation’s fought-for freedom, this year’s NAVY DAY slogan is “Your Navy—Victor in War, Guardian in Peace.”

The Navy is anxious to have a nation-wide radio tribute, not only on NAVY DAY, but during the week previous and on the Monday following. As a suggestion, various salutes and spot announcements might be given at convenient times during the preceding week and on Monday. Interviews with Naval personnel and veterans including Ex-Sailors, Ex-Marines, Ex-Waves and Ex-Nurses would be desirable. The fact that NAVY DAY falls on Sunday makes religious observance especially appropriate.

Any program assistance you may be able to give will be greatly appreciated.

For further information concerning special Navy celebrations, communicate with the Public Information Officer in your nearest Naval Activity, or write Comdr. H. H. Holton, Radio Program Section, Navy Department, Washington 25, D. C.; or Comdr. Merle Macbain, Radio Section, Public Information Office, 90 Church Street, New York, N. Y.

**Ad Council Network Campaigns**

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of October 21-27, 1946 by The Advertising Council and the Media Programming Division of the OWMR. Copies of individual Fact Sheets, and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West Forty-Second Street, New York 18, New York.

**Community Chests of America**

The largest voluntary campaign in American this year for the support of health and welfare services will be the combined campaigns of local Community Chest of America this October. President Truman has urged full support of the Community Chest Red Feather services vital to the health and welfare of millions of Americans. Every city of more than 100,000 population in the United States, with the exception of New York, Wilmington, Delaware, and Fall River, Mass., has a Community Chest. By giving generously to his local Community Chest every citizen can be sure that he is supporting most wisely the friendly, neighborhood services which go on day after day, month after month, in 850 cities and towns in America. The total sum to be raised is more than 170 million dollars, which includes more than half of the USO’s total budget of 19 million dollars. Sample studies show that four out of ten families—nearly half the families in Community Chest cities—benefit directly through Community Chest Red Feather services, such as aid to handicapped, boys clubs, Boy Scouts, Campfire Girls, Child guidance, children’s aid, clinics, community centers, day nurseries, family services, Girl Scouts, homes for the aged, hospitals, maternity homes, visiting nurses, YMCA, YWCA. There are some 20 million contributors to Red Feather services—a total equivalent to one for every family in the Chest cities. By combining a number of welfare appeals in one, Community Chests cut down administrative expenses and save not only money but time and effort for the real purpose: giving needed services to the community. This year more money than ever before is needed because: 1. Costs of everything—commodities, personnel, equipment, services—which health and welfare agencies use in behalf of the millions of people they serve—have risen sharply; 2. Since 1941 the population in Community Chest cities has increased about 25% and the need for Red Feather services has increased accordingly; 3. Many established agencies, not formerly included in Community Chests, were added during the war years and will remain as Red Feather agencies.—“EVERYBODY BENEFITS—EVERYBODY GIVES.” (Fact Sheet No. 33)

**Group Prejudice—A Post War Menace**

Radio is asked to help with this campaign, approved with top priority by the Public Advisory Committee of The Advertising Council—BECAUSE... in the midst of present post-war tensions public opinion surveys show that racial and religious antagonisms exist. BECAUSE... experience after the last war, both here and abroad, indicates that such antagonisms, following in the wake of war, menace existing institutions—interfere with production in offices, shops, mines, factories—constantly (Continued on next page)
threaten to break out into open acts of destructive violence. BECAUSE ... division at home weakens the United States on the international scene—group strife here lowers the prestige of the United States among the nations of the world, hampers our country in its efforts towards world peace, promotes the belief that democracy has failed, encourages aggression in the hope of easy conquests. Division at home hampers production—discrimination against fellow employees or business associates because of race, religion, or national origin annually robs the United States of millions of hours of productive labor and the best skill and talents of countless workers. In a prejudice-filled America, no one can be secure—in his job, his business, his church, his home. The problem is especially acute now because of the many real difficulties that confront the American people—such as housing, jobs for servicemen, shortages, strikes, rising costs of living. We must not let ourselves be diverted from serious efforts to overcome these post-war difficulties by the "scapegoat" technique that blames them on some racial, religious, or national group. Every individual citizen can help keep America strong by: 1. Isolating and quarantining group antagonism. (If someone runs down a neighbor's race or religion, remind him that this is bad business for America both at home and abroad.) 2. Alertly guarding himself and his family against infection by racial and religious prejudice. (Don't spread prejudice now, any more than you would have spread enemy rumors during the war. Through your own behavior and otherwise, encourage respect in your children for neighbors of different races and religions—remind them that these very differences among Americans have resulted in a variety of contributions that have made our country great and kept her free.) 3. Working in your community—your church, your business, your trade union, your school—to promote the American principles of racial and religious freedom. (Fact Sheet No. 31)

FCC ACTIONS

DOCKET CASE DECISIONS

The Commission announces its Order (B-261) making final the grant of application of the Arkansas-Oklahoma Broadcasting Corporation for a construction permit for a new standard broadcast station in Fort Smith, Arkansas (Docket 6831), to operate on the frequency of 1230 kc., 250 watts, unlimited time, subject to reaffirmation by CAA of antenna site.

The Commission announces its final Decision (B-275) granting the application of James L. Stapleton et al., d/b as Grand Canyon Broadcasting Company for a new station at Flagstaff, Arizona, to operate on 1540 kc., 250 watts, unlimited time (Docket 7000), subject to approval by CAA of antenna site, and a denial of the application of N. Pratt Smith (Docket 6999) seeking the same facilities.

The Commission announces its final Decision (B-270) granting the application of Valley Broadcasting Association, Inc., for a new station at McAllen, Texas, to operate on 910 kc., 1 KW, directional antenna, unlimited time (Docket 6859), subject to CAA approval of antenna system and transmitter site, and subject to installation of appropriate monitoring equipment as required by Section 3.55(b) when such equipment is available. At the same time the Commission denied the applications of Radio Station KEEN, Ltd., to change operating assignment of Station KPAL, Brownsville, Texas, from 1190 kc., 250 watts, to 910 kc., 1 KW, directional antenna, unlimited time (Docket 6861), and of Howard W. Davis seeking the same facilities as Valley Broadcasting Assn., Inc., at McAllen, Texas (Docket 6866).

The Commission announced its Proposed Decision (B-282) looking towards the grant of an application of Wade R. Sperry, Edgar J. Sperry and Josephine T. Sperry, d/b as Daytona Beach Broadcasting Co., for a new station at Daytona Beach, Florida, to operate on 1340 kc., with 250 watts, unlimited time (B3-P-4123; Docket 6862), subject to the filing of a modification of permit, within 90 days, specifying (1) a transmitter site which will meet Commission approval; and (2) complete information in regard to proposed transmitter.

Mutually exclusive applications of Forderick T. Peacecock, et al., d/b as Daytona Beach Broadcasting Co. (B3-P-4122; Docket 6861), and News Journal Corporation (B3-P-4238; Docket 7133), for the same facilities, are proposed to be denied.

The Commission announces its Proposed Decision (B-283) looking towards denial of the application of WGCM Broadcasting Company (B3-P-3988; Docket 6861), and the application of WLOX Broadcasting Company (B3-P-4178; Docket 6862), both requesting a new station in Biloxi, Miss., to operate on the frequency of 1190 kc., with 250 watts, unlimited time.

The Commission also announced a Proposed Decision (B-285) looking towards the grant of application (B3-P-3942; Docket 7529) of WGAR, the WGAR Broadcasting Company, Cleveland, Ohio, to increase its power from 5 to 50 KW on the frequency 1220 kc., and denial of application (B2-P-4233; Docket 7539) of WADC, Allen T. Simmons, Tallmadge, Ohio, requesting a change of frequency from 1350 to 1220 kc., and increase in power from 5 to 50 KW.

The Commission announces its Order (B-261) making final the grants of new stations to operate on the regional frequency 1600 kc., to the following applicants:

1600 kc., 1 KW, unlimited time. (B2-P-2391; Docket 6230).
Valley Broadcasting Co., Pomona, Calif.
1600 kc., 500 watts, unlimited time. (B5-P-3610; Docket 6533).
1600 kc., 1 KW, unlimited time. (B3-P-3635; Docket 6628).
The Gazette Co., Cedar Rapids, Iowa.
1600 kc., 5 KW, unlimited time. (B4-P-4162; Docket 6830).
Pleasant Carolina Broadcasting Co., Reidsville, N. C.
1600 kc., 500 watts, unlimited time, 1 KW day, unlimited time. (B4-P-4164; Docket 6832).

(Continued on next page)
The application of WWRL, Long Island Broadcasting Co., Woodside, L. I., to increase power from 250 watts to 5 KW, to install a new transmitter and change transmitter location and antenna system by CAX, (B3-P-1163; Docket 6821), and application of WXYE, Charlotte, N. C., to operate on 1600 kc., 1 KW, unlimited time (B3-P-3847; Docket 6825), and application of Four Lakes Broadcasters, Madison, Wis., to operate on 1600 kc., 250 watts, unlimited time (B4-P-3366; Docket 7171) are denied.

AM APPLICATIONS GRANTED

NEW—R. L. Broadcasting Co., Providence, R. I.—Granted CP for a new station to operate on 1230 kc., 250 watts, daytime only, providing applicant conforms with Sec. 3.36 and be subject to the waiver of Secs. 3.55(b) and 3.60 and the approval of transmitter site and antenna system by CAX, (B3-P-5065).

NEW—Gene Burke, Brophy, Flagstaff, Ariz.—Granted CP for a new Class IV station (*) to operate on 1210 kc., 250 watts, unlimited time, (B3-P-3572).

NEW—Joseph H. Roller and Edythe G. Sweeney, d/b as XEW—Joseph H. Roller and Edythe G. Sweeney, d/b as XEW—Donald W. Reynolds, Ft. Smith, Ark.—Granted petition of John T. Fashion, and Doris B. Brown, d/b as Wilkes Broadcasting Co., requesting that application of Ralph D. Epperson be reconsidered and granted without a hearing an application for a new station (*) to operate on 1020 kc., 250 watts, daytime only. (B3-P-1822)

NEW—Monte Stanford Dudley, Lake Charles, La.—Granted CP for a new station (*) to operate on 1100 kc., 250 watts, unlimited time, (B3-P-5065).

NEW—Wm. F. Butt and Paris G. Singer, d/b as The Voice of Thomaston, Thomaston, Ga.—Granted CP for a new station (*) to operate on 1030 kc., 250 watts, daytime only. (B3-P-1822)

NEW—Ralph D. Epperson, Mount Airy, N. C.; John T. Cashion and Doris B. Brown, d/b as Wilkes Broadcasting Co., near Wilkesboro, N. C.—Adopted an order granting petition of John T. Cashion, and Doris B. Brown, d/b as Wilkes Broadcasting Co., requesting that application of Ralph D. Epperson be reconsidered and granted without a hearing an application for a new station (*) to operate on 350 kc., 1 KW, daytime only. (B3-P-3572). The application of Charlotte Broadcasting Co., Charlotte, N. C., to operate on 1600 kc., 1 KW, unlimited time (B3-P-3847; Docket 6825), and application of Four Lakes Broadcasters, Madison, Wis., to operate on 1600 kc., 250 watts, unlimited time (B4-P-3366; Docket 7171) are denied.

FM CONSTRUCTION PERMITS

The following were authorized construction permits; conditions. (Note: Power given is effective radiated power; antenna height given is height above average terrain):

- Donald W. Reynolds, Fort Smith, Ark.—Class B; Channel: 1013.5 mc. (No. 267); 180 KW; 992 feet. (B3-P-1558)
- Marysville-Yuba City Broadcasters, Inc., Marysville, Cal.—Class B; Channel: 93.7 mc. (No. 224); 4.7 KW; 335 feet. (B3-P-3209)
- Belvedere Broadcasting Corp., Baltimore, Md.—Class B; Channel: 98.9 mc. (No. 250); 20 KW; 390 feet. (B3-P-782)
- E. F. Peffer, Steckton, Cal.—Class B; Channel: 1013 mc. (No. 267); 39 KW; 310 feet. (B3-P-296)
- Cornbelt Broadcasting Corp., Lincoln, Neb.—Class B; Channel: 97.3 mc. (No. 247); 25 KW; 820 feet. (B3-P-334)
- F. C. Todd, Gasonic, N. C.—Class B; Channel: 1023.1 mc. (No. 271); 11.1 KW; 890 feet. (B3-P-572)
- Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Class B; Channel: 99.5 mc. (No. 258); 180 KW; 965 feet. (B3-P-347)
- Radio America Corp., San Juan, P. R.—Class A; Channel: 105.1 mc. (No. 281); 230 watts; 270 feet. (B3-P-822)
- Tri-State Broadcasting Corp., Evansville, Ind.—Class B; Channel: 93.9 mc. (No. 250); 20 KW; 330 feet. (B3-P-741)
- Thomas Garland Tinsley, Jr., Richmond, Va.—Class B; Channel: 97.9 mc. (No. 250); 21 KW; 290 feet. (B3-P-1911)
- Mayflower Broadcasting Co., Inc., Huntington, W. Va.—Class A; Channel: 1013 mc. (No. 282); 275 watts; 130 feet. (B3-P-1851)
- Voice of Alabama, Birmingham, Ala.—Class B; Channel: 91.3 mc. (No. 232); 13.7 KW; 610 feet. (B3-P-249)
- Northern Broadcasting Co., Inc., Wausau, Wis.—Class B; Channel: 91.9 mc. (No. 235); 19.5 KW; 500 feet. (B3-P-956)
- Stark Broadcasting Corp., Canton, Ohio.—Class B; Channel: 96.3 mc. (No. 242); 15 KW; 275 feet. (B3-P-906)
- The Scioto Broadcasting Co., Portsmouth, Ohio.—Class B; Channel: 106.9 mc. (No. 280); 4 KW; 525 feet. (B3-P-960)
- Sharon Herald Broadcasting Co., Sharon, Pa.—Class B; Channel: 102.9 mc. (No. 275); 26 KW; 455 feet. (B3-P-1911)
- Findlay Radio Co., Findlay, Ohio.—Class B; Channel: 101.5 mc. (No. 280); 8.2 KW; 245 feet. (B3-P-107)
- Santa Clara Broadcasting Co., San Jose, Cal.—Class A; Channel: 106.5 mc. (No. 288); 1 KW; 610 feet. (B3-P-737)
- Cornell University, Ithaca, N. Y.—Class B; Channel: 101.3 mc. (No. 267); 40 KW; 730 feet. (B3-P-248)
- North Shore Broadcasting Co., Inc., Evanston, Ill.—Class A; Channel: 101.3 mc. (No. 282); 965 watts; 220 feet. (B3-P-608) (*)

(*) In lieu of previous conditions specified.
The following application, heretofore designated for hearing, was removed from the docket and given a conditional grant subject to engineering conditions (Commissioner Wakefield voting "No"):

North Carolina Broadcasting Co., Greensboro, N. C.—Class B station. (Permittee is licensee of station WBIG, Greensboro.)

The following were given conditional grants, subject to engineering approval:

(*) This application was inadvertently included by the Commission in a previous report. No previous action has been taken.

**COMMERCIAL TELEVISION APPLICATIONS GRANTED**

**NEW—**Minnesota Broadcasting Corp., Minneapolis, Minn.—Granted CP for a new station: Channel (No. 4), 66-75 mc.; visual power 17.9 kw; aural 9.2 kw; antenna 331 feet; conditions. (B4-PCT-126)

**NEW—**The Wm. H. Block Co., Indianapolis, Ind.—Granted CP for a new television station: Frequency 60-66 mc. (Channel #3); power: 14.4 kw visual; 7.6 kw aural; antenna 333 feet; conditions. (B4-PCT-126)

**EXPERIMENTAL TELEVISION APPLICATION GRANTED**

**NEW—**The St. Louis University, St. Louis, Mo.—Granted CP for new experimental television station; frequencies to be assigned by the Commission's Chief Engineer. To operate as an experimental television broadcast station in accordance with Secs. 4.101 to 4.184 of the Rules: type of emission: A-5 with aural transmission transmitted by multiplex during horizontal pedestal interval. (B4-PCH-174)

**DESIGNATED FOR HEARING**

T. J. Shriner, Hobart, Okla.—Designated for hearing application for new station to operate on 1100 kc., 250 watts, unlimited time (B5-P-5267; Docket 7902), for new stations to operate on 1170 kc., 500 watts power, unlimited time, in a consolidated proceeding with applications of Baltimore Broadcasting Co., WCBM, Tower Realty Co., and Lamor Broadcasting Co.; ordered that the Commission's orders of March 13, May 2, and Sept. 19 designating these latter three for hearing be amended to include Baltimore Broadcasting Co., and on its own motion the Commission ordered that the hearing presently scheduled for October 7 on applications of WCBM, et al., be continued to November 5.

Fred H. Whitlly, Kannapolis, N. C.; and Publix Broadcasting Service of Charlotte, Inc., Charlotte, N. C.—Designated for consolidated hearing applications of Fred H. Whitlly (B3-P-2999; Docket 7908) and Publix Broadcasting Service of Charlotte, Inc. (B3-P-5267; Docket 7902), for new stations to operate on 870 kc., 1 kw, daytime only, at Kannapolis, N. C., and Charlotte, N. C., respectively.

**MISCELLANEOUS ACTIONS**

**Correction**

According to a correction by the Commission this item appearing in last week's REPORTS referring to WTAW should read as follows:

**WTAW—**Agr. and Mech. College of Texas, College Station, Texas.—Dismissed petition for reconsideration directed against the action of the Commission on May 13, 1946, granting application of WACO (B3-MP-1967), to install a new transmitter, move transmitter, and extend commencement and completion dates to 60 days after grant and 120 days thereafter, respectively.

**KSAM—**W. J. Harpole and J. C. Rothwell, d/b/a Radio Station KSAM (assignor), J. G. Long (assignee), Huntsville, Texas.—Granted consent to voluntary assignment of license of Station KSAM from W. J. Harpole and J. C. Rothwell, d/b/a Radio Station KSAM, to J. G. Long for a consideration of $12,500 plus. (B3-AL-539)

(Continued on next page)
KVO—W. J. Harpole and J. C. Rothwell, a partnership (assignor), W. J. Harpole (assignee), Plainview, Texas.—Granted consent to its own motion, continued the consolidated hearing on these applications now scheduled for Oct. 10 and 11 to October 30.

Lake Broadcasting Co., Inc., Gary, Ind.; WAML—New Laurel Radio Stations, Inc., Laurel, Miss.—The Commission ordered that the consolidated hearing on these applications now scheduled for October 7 be continued to October 9.

Radio Broadcasters, Binghamton, N. Y.—The Commission, on its own motion, ordered that the consolidated proceeding be rescinded, and said application (Bl-P-4330) be consolidated for hearing with the Don Lee renewal applications (Dockets 7395, 7399, 7415, 7416) on the issues specified in Commission order of April 3, 1946, with respect to engineering conditions. (Docket 7457)

KLXN—Harold Sudbury, Blytheville, Ark.—Dismissed as moot petition for reconsideration of action of the Commission granting application of Purchase Broadcasting Co., Inc., Mayfield, Ky., for CP.

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Dismissed as moot petition requesting reconsideration of application for a new Class B FM station be designated for hearing to be heard in consolidated proceeding with applications of Yankee Network, Inc., et al; ordered that application (Bl-PH-1078) be designated for consolidated hearing with Yankee Network, Inc., et al. and further ordered that the order heretofore issued be amended to include Fairfield application.

WBT—Southeastern Broadcasters, Charlotte, N. C.—Granted CP for installation of a booster station at Shelby, N. C., to be operated on 1110 kc., 1 KW, nighttime only, using a DA and synchronized with WBT operating on 1110 kc., 30 KW, unlimited time; waiver of Secs. 3.554 and 3.60 required. (133-P-4055)

Navarro Broadcasting Assn. (Assignor), J. C. West, Pres., Altus, Okla. (Assignee), Corsicana, Texas.—Denied petition of Altus, Okla. (Assignee), for reconsideration and grant without a hearing application (Bl-AL-504) for voluntary assignment of license of KAND. (Comm. Jett voting to grant)

Andrew Jarema and Frank H. Albadeffer, tr./as Binghamton Broadcasters, Binghamton, N. Y.—The Commission, on its own motion, ordered that its action of September 30 designating for hearing the application of Binghamton Broadcasters in a consolidated proceeding, be rescinded, and said application (Bl-P-5244) removed from the hearing docket; and further ordered that the orders of September 19 designating for hearing in a consolidated proceeding the applications of WBAX and WARM, he amended to exclude Fairfield application.

Coast Ventura Co., Ventura, Cal.: Ventura Broadcasters, Inc., Ventura, Cal.—Granted joint petition requesting with respect to the consolidated proceeding in re these applications, that the Commission accept the engineering reports submitted with these applications in lieu of engineering testimony; that the deposits filed by the applicants be accepted and admitted into evidence; that further hearing in this consolidated proceeding now scheduled for Oct. 11 be cancelled, and that a period of 20 days be allowed for submission of revised engineering reports; and that the order heretofore issued be amended to exclude said application of Binghamton Broadcasters.

Capitol Broadcasting Corp., Indianapolis, Ind.; Almanac Broadcasting Co., Burlington, N. C.—Granted joint petition requesting advancement of the hearing on their applications for CP (Dockets 7651 and 7670) from October 18 to October 17.

The Northern Ohio Broadcasting Co., Amherst, Ohio.—Granted petition for waiver of Sec. 1.387 of the rules and accepted late appearance in re their application for CP (Docket 7455)

Peninsula Newspapers, Inc., Palo Alto, Cal.—Granted petition for admission of Adron A. Beene to practice Pro Hoc Vice before the Communications Bar for the purpose of taking depositions in re their application for a new station. (Docket 7677)

Peninsula Newspapers, Inc., Palo Alto, Cal.—Granted motion to take depositions in re their application. (Docket 7677)

Cherokee Broadcasting Corp., Morristown, Tenn.—Granted petition requesting that the hearing upon its application for CP (Docket 7653), presently scheduled for hearing on November 25 and 26 at Middleboro, Ky., in consolidation with application of Middleboro Broadcasting Co., Inc., Middleboro, Ky. (Docket 7002), be held at Morristown, Tenn., and the Middleboro Broadcasting Co., Inc., hearing be held at Middleboro, Ky., as scheduled. The Commission ordered that the hearing on application of Cherokee Broadcasting Corp. be scheduled for Nov. 25 at Middlebro, Ky., and the hearing on application of Cherokee Broadcasting Corp. be scheduled for Nov. 26 at Morristown, Tenn.

Unity Corp., Inc., Mansfield, Ohio.—Granted petition for leave to amend its application for a new FM station (12-PH-569; Docket 7589), so as to add two members to the board of directors of corporation.

WRTM—Piedmont Broadcasting Corp., Danville, Va.—Dismissed as moot petition for continuation of oral arguments scheduled for Oct. 2 at Washington, D. C., for CP, as petitioner was granted leave to amend its application so as to specify a different frequency, and the application was removed from the hearing docket on Sept. 30. (Continued on next page)
WAVE, Inc., Louisville, Ky.—Denied petition for leave to intervene in the hearing on application of Radio Peoria, Inc. (Doc. 7690), presently scheduled for hearing on Nov. 1.

Oklahoma A. & M. College, Stillwater, Okla.—Granted petition for leave to amend its application for CP (B5-P-4748; Doc. 7789) so as to specify the frequency 810 kc., with 10 KW power, daytime only, instead of 1500 kc., 10 KW, daytime only. The amendment was accepted and application as amended removed from hearing docket.

Democrat Printing Co., Durant, Okla.—The Commission, on its own motion, ordered that the application of Democrat Printing Co. (B5-P-4867; Docket 7700), which was designated for consolidated hearing with application of Oklahoma A. & M. College, be removed from the hearing docket.

WJAR—The Outlet Company, Providence, R. I.—Denied petition request for reconsideration of the Commission's action, on its own motion, ordered that the consolidated hearing on these applications, he scheduled for Novem¬ber 1.

Tyler Broadcasting Co., Texarkana, Ark.—The Commission, on its own motion, ordered that the consolidated hearing on these applications, be scheduled for October 16 at Washington.

WJWB—Charles C. Carlson, New Orleans, La.; Louise C. Carlson, New Orleans, La.—Grant petition of WJWB requesting Commission to dismiss its intervention in the proceeding upon application of La Crosse Broadcasting Co. (B4-P-4567; Docket 7473) Scheduled for hearing on Oct. 10 in New Orleans, on these applications, and continued said hearing to November 4 at New Orleans.

WILL—Univ. of Illinois, Urbana, Ill.—Grant petition requesting Commission to dismiss its intervention in the proceeding upon application of La Crosse Broadcasting Co. (B4-P-4567; Docket 7473), Schedule for hearing on Oct. 10 in New Orleans, on these applications, and continued said hearing to November 4 at New Orleans.

La Crosse Broadcasting Co., La Crosse, Wis.—Grant petition requesting the Commission to strike issues 1, 3 and 8 in the order of March 27 designating this application for hearing, and the said issues were deleted.

WJAR—The Outlet Company, Providence, R. I.—Grant petition for reconsideration of the Commission's action (Docket 7473) for extension of completion date.

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Grant petition for a new standard broadcast station to be operated on 1360 kc., power of 10 KW, daytime only, and change transmitter location.

WGAC—The Twin States Broadcasting Co., Augusta, Ga.—Grant petition for a new developmental broadcast station to be operated on 1360 kc., power of 10 KW, daytime only, and change transmitter location.

WJAR—The Outlet Company, Providence, R. I.—Grant petition for a new standard broadcast station to be operated on 1360 kc., power of 10 KW, daytime only, and change transmitter location.

FCC APPLICATIONS

AM APPLICATIONS ACCEPTED FOR FILING

540 Kilocycles

NEW—Herbert L. Spencer, area of the State of Maryland (P. O. Main Post Office Box 1722, Baltimore 3, Md.)—Construction permit for a new developmental broadcast station to be operated on 530 kc., or as assigned, power of 10 watts and A3 emission.

580 Kilocycles

WGAC—The Twin States Broadcasting Co., Augusta, Ga.—Modification of construction permit (13-P-5791), which authorized to change frequency, increase in power, installation of new transmitter, changes in directional antenna for night use and to change transmitter location (for extension of completion date).

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Construction permit to increase power from 1 KW day and night to 1 KW night and 5 KW day and install new transmitter.

630 Kilocycles

NEW—Boise Broadcasting Co., Boise, Idaho—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended to change in frequency, power, and change transmitter location.

680 Kilocycles

WRXY—Monroe Broadcasting Co., Inc., Rochester, N. Y.—Construction permit to change hours of operation from daytime to unlimited time; increase power from 250 watts day to 500 watts night, 1 KW day; install new transmitter, directional antenna for day and night use, and change transmitter location.

Federal Trade Commission Actions

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Foley & Co.—Misrepresentation of the effectiveness and safety of Foley’s Pain Relief Tablets is charged in a complaint issued by the Commission against Foley & Co., 945 George St., Chicago, and its advertising representative, A. M. Salomon, trading at Lameson & Salomon, 520 North Michigan Ave., Chicago. (5464)

Magazine Management Co.—Misrepresentation in the sale of books and other publications is charged in a complaint issued by the Commission against Martin Goodman and Jean Goodman, copartners, trading as Magazine Management Co., 350 Fifth Ave., New York, and twelve subsidiary publishing corporations. (5465)

CEASE AND DESIST ORDERS

Gattis Chemical Co., 214-216 Woodland St., Nashville, Tenn., must stop advertising that a medicinal preparation sold under the name of Gattis K & B Pills is a cure or remedy for, or a competent and effective treatment of, any kidney disorder or disease, under the terms of a cease and desist order issued by the Commission. (5014)

High Seas Tuna Packing Co.—Payment of brokerage fees to interstate purchasers of fish products who buy for their own accounts is prohibited in a cease and desist order issued by the Commission against High Seas Tuna Packing Co., Inc., 2802 Canon St., Point Loma, San Diego, Calif. (5428)

STIPULATION AND ORDER DISMISSING COMPLAINT

Welch Grape Juice Co., Westfield, N. Y., and its advertising representative, H. W. Kastor & Sons Advertising Co., 2982 North Michigan Ave., Chicago, entered into a stipulation with the Commission to discontinue making certain representations with respect to the weight-reducing properties and laxative ingredients of Welch’s Grape Juice. After approving the stipulation, the Commission dismissed without prejudice its complaint charging the respondents with false and misleading advertising. (4953).
Two New FM Panel Leaders, CAA Speaker, American Forum Airing, on Convention Agenda

The names of two additional members of the panel which will discuss frequency modulation broadcasting and the name of the representative of the Civil Aeronautics Authority who will speak at the NAB convention were announced Wednesday (16). It was also announced that the American Forum of the Air, Mutual network program, will be broadcast from the convention. The program, heard on Tuesday night, will be aired from the Palmer House from 9:30 to 10:15 P.M. EST. Theodore Granik, moderator on the program will be in Chicago to assume his regular role.

When the FM panel convenes at lunch today (21) at the Palmer House in Chicago, A. D. Willard, Jr., NAB executive vice president, and Paul A. deMars, consulting radio engineer, will be present, in addition to the four persons previously named.

Mr. deMars will answer questions concerning engineering aspects of FM and Mr. Willard will reply to queries concerning activities of the NAB FM Department. Mr. deMars, who was one of the early proponents of FM, is a former vice president of the Yankee Network.

The panel participants previously announced are Acting FCC Chairman Charles R. Denny; Dr. W. R. G. Baker, director of the Engineering Department of the Radio Manufacturers Association and vice president of the General Electric Company; T. A. M. Craven, vice president of the Cowles Stations; Walter J. Damm, chairman of the NAB FM Executive Committee and president of FM Broadcasters, Inc.; and Lester H. Nafzger, general manager of WELD, FM station in Columbus, Ohio.

CAA Policy Discussion

The CAA representative who will speak at the convention was announced Wednesday (16). It was announced that the American Forum of the Air, Mutual network program, will be broadcast from the convention. The program, heard on Tuesday night, will be aired from the Palmer House from 9:30 to 10:15 P.M. EST. Theodore Granik, moderator on the program will be in Chicago to assume his regular role.

When the FM panel convenes at lunch today (21) at the Palmer House in Chicago, A. D. Willard, Jr., NAB executive vice president, and Paul A. deMars, consulting radio engineer, will be present, in addition to the four persons previously named.

Mr. deMars will answer questions concerning engineering aspects of FM and Mr. Willard will reply to queries concerning activities of the NAB FM Department. Mr. deMars, who was one of the early proponents of FM, is a former vice president of the Yankee Network.

The panel participants previously announced are Acting FCC Chairman Charles R. Denny; Dr. W. R. G. Baker, director of the Engineering Department of the Radio Manufacturers Association and vice president of the General Electric Company; T. A. M. Craven, vice president of the Cowles Stations; Walter J. Damm, chairman of the NAB FM Executive Committee and president of FM Broadcasters, Inc.; and Lester H. Nafzger, general manager of WELD, FM station in Columbus, Ohio.

NC Broadcasters Hear Willard, Doherty; Re-elect Officers for Another Term

The North Carolina Association of Broadcasters met in Durham on October 11-12, re-elected all of their officers to serve another term, and heard discussions by NAB Executive Vice President A. D. Willard, Jr., and Richard P. Doherty, director of NAB's Employee-Employer Relations Department.

At the annual session, attended by representatives of almost all N. C. stations, the broadcasters voted to keep in their offices J. Frank Jarman, WDNC, president; Richard A. Dunlea, WMFD, Wilmington, vice president; and Harold Essex, WSJS, Winston-Salem, secretary-treasurer.

Mr. Willard, speaking at the Friday morning session, discussed some of the basic problems confronting the broadcasting industry. He reaffirmed NAB’s position on the FCC Blue Book and explained the association’s position concerning the wholesale licensing policy of the Commission. Mr. Willard also discussed the results of the NORC survey and suggested methods by which broadcasters could utilize the survey profitably.

In the afternoon session, Mr. Doherty explained the importance of building better labor relations under all conditions. He suggested that regardless of whether or not a station is unionized, management should take the lead in developing effective employee-employer relations.

Among the resolutions adopted by the representatives of the North Carolina stations was one urgently requesting the FCC to reinstate Section 91-C of the Commission’s rules and regulations at the earliest possible date, for at least a period sufficient to permit stations to train qualified personnel to fulfill present operator requirements specified by the Commission.

INSIDE THIS ISSUE

The decision of the three-judge federal court was upheld by the Supreme Court's action in the New Mexico tax case. Lower court ruled that action could be taken only in state courts. (p. 806)

NAB has received a flood of orders for copies of the Joske Report, along with comments attesting to the value of the book. (p. 807)

A $10,000 campaign has been approved by the RMA Board of Directors for the promotion of National Radio Week. Promotion material is now being prepared for distribution to radio dealers and retailers. (p. 806)

A new sub-committee of the Sales Managers Executive Committee has been formed to promote the use and effectiveness of radio as an advertising medium. (p. 805)

The FCC applied the new Administrative Procedure Act in amending its Rules to protect the Bahama Islands rather than Cuba in the use of 1540 kc. (p. 806)

OCTOBER 21, 1946 — 805

vention is James Douglas, superintendent of flight operations for the CAA's third region. Mr. Douglas will discuss policy matters affecting both the radio and aviation industries, and answer questions from the floor. He will speak Wednesday morning (23), at ten o'clock. The discussion of "Music Copyright and Broadcast Music, Inc." previously scheduled for this hour has been shifted to three o'clock the afternoon of the same day.

Legal Department

FCC Applies Administrative Procedure Act in Protecting Bahamas on 1540 Kc.

On Oct. 10, 1946, the FCC had occasion to apply Section 4 of the new Administrative Procedure Act, which requires the agency to give notice of proposed rule making and to afford interested persons an opportunity to participate, except, among other things, where the agency finds that such procedure is "impracticable, unnecessary, or contrary to the public interest."

In amending Rule 3.25 to protect the Bahama Islands rather than Cuba in the use of 1540 kc., the FCC found the procedure required by Sec. 4 unnecessary on the ground that the Rule was amended for the purpose of conforming it to Article III of the Interim Agreement made at the second NARBA conference, which is presently in effect.

Lower Court Ruling in New Mexico Tax Case Approved in Supreme Court Action

The Supreme Court of the United States upheld on Monday (14) the decision of a three judge federal court in the New Mexico tax case, KGFL v. Ormsbee. The lower court had dismissed the case on the grounds that it did not have jurisdiction and that under applicable federal statutes the only available remedy was in the state courts.

The litigation began when KGFL entered suit for an injunction against the collection of a state tax on the gross receipts of radio stations—a tax for the privilege of doing business in the state of New Mexico.

Milton Kibler, who represented NAB amicus curiae before the Court in New Mexico, and Lake Frazier of Roswell, New Mexico, attorney for KGFL, as well as Don Petty, NAB general counsel, are studying the case with a view to determining the future course of action.

General

$10,000 Promotion Campaign Approved By RMA for National Radio Week

The Board of Directors, Radio Manufacturers Association has appropriated $10,000 to be spent by the RMA Advertising Committee in the promotion of National Radio Week, November 24-30.

Observance of radio week, backed jointly by NAB and RMA, will have the cooperation of some 30,000 radio dealers and for the first time will have the active support of organized retail trade organizations such as NRDGA, National Retail Furniture Association, National Music Merchants Association and the National Electrical Retailers Association.

Promotion material, being prepared by the RMA Advertising Committee, will include two types of posters along with other material to be utilized by radio dealers in window and showroom displays.

RMA announced that many set manufacturers will have their latest receivers ready for display during National Radio Week, including new AM-FM sets.

Broadcast Advertising

New NAB Sales Promotion Group Formed To Aid Effectiveness of Radio Advertising

A new committee on sales promotion which will operate as a standing sub-committee of the NAB Sales Managers Executive Committee has been organized and will enter upon its 1946-47 term following the NAB Convention in Chicago, it was announced Wednesday (16) by James V. McConnell, Director, NBC National Spot Sales Department, chairman of the SMEC.

Heading the sales promotion group as chairman will be John R. Outler, General Manager, Station WSB, Atlanta, Ga. Appointed to membership for the

(Continued on next page)
1946-47 term were representatives from each of the following categories: national sales representative: H. Preston Peters, President, Free & Peters, Inc., New York, N. Y.; national network: Louis Hausman, Director of Presentation, CBS, New York, N. Y.; large market station: Joseph Creamer, Advertising and Promotion Director, Station WOR, New York, N. Y.; medium sized station: Edward P. J. Shurick, Director Promotion, Press Relations, and Merchandising, Station KMBC, Kansas City, Mo.; small market station: John Carl Jeffrey, General Manager, Station WKMO, Kokomo, Ind. Hugh M. P. Higgins, NAB assistant director of broadcast advertising, will act as secretary.

Organized to increase the use and promote the effectiveness of radio as an advertising medium, the group will also assist in the development and distribution of information about broadcast advertising as a gainful occupation.

**Reaction to Joske Report Favorable; Orders for Book Pour Into NAB**

Initial reaction to the Joske Report, "Radio for Retailers" has been most favorable from both the retail and radio fields.

Orders for copies of the book are being received in large quantities at NAB headquarters. Due to recent negotiations for new labor contracts in both the printing and transportation industries, delays in production and delivery of the book have been experienced. It is expected that members waiting for their copies of the report will receive them with delays of one to two weeks.

Reprinted below is the text of a letter to Judge Miller from Walter L. Dennis, director, Radio and Television, Allied Purchasing Corporation, regarding the value of the Joske Report:

"In my travels for Allied from coast to coast and border to border I have had occasion to work with many department stores and to talk and work with many broadcasters on the problem of radio advertising for department stores.

"I have accumulated quite a store of information as to the relations between the two industries and the needs and problems which exist when they do business together.

"So it is that I want to praise as strongly as I know how the great contribution toward solution of many of the problems and meeting of many of the needs that the Joske retail radio report will make. Frank Pellegrin, Lee Hart and before them, Lew Avery, and the other NAB personnel who helped have done and are doing a great job and no one is more conscious of this job and the contribution it will make than we are here at Allied.

"I will even go as far as to say that in a commercial sense this is the greatest single contribution ever made to furthering the cause of broadcasting in the local areas where it will have to turn in increasing amounts in the years ahead.

"It will help my work immeasurably. I have been privileged to work on this report as a member of the committee and will do all I can at Chicago to spread the good word, but I did want to express my feeling directly to you."

**Audience Measurement Methods Reviewed At Sales Managers Subcommittee Meeting**

The NAB Sales Managers Subcommittee met in New York on Tuesday (15) to discuss various current methods of audience measurement and to review recent publications on the subject produced by NAB's Research Department.

A special set of charts showing the adaptability of audience measurement research to station sales was discussed and approved for presentation at the Sales Managers Clinic, October 24, in Chicago, at the NAB Convention. Other routine activities of the Subcommittee were discussed and will be incorporated in its report to the convention body in Chicago.

**Women Broadcasters**

**Two New AWD Chairmen Appointed in Districts 3 and 14**

The appointment of two new district chairmen in Districts 3 and 14 has been announced by the Association of Women Directors.

The new leaders and their districts are Kay Witmer, Station WKBO, Harrisburg, Pa., who replaces Ruth Welles in District 3; and Louise Hill Howe, Station KSL, Salt Lake City, who replaces Evadna Hammersley in District 14.

**Public Interest Programming**

**Ad Council Network Campaigns**

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of October 28-November 3, 1946 by The Advertising Council and the Media Programming Division of the OWMR. Copies of individual Fact Sheets, and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West Forty-Second Street, New York 18, New York.

**Army Prestige Campaign**

Wanted—An All-Volunteer Army. To preserve the peace, America has undertaken world wide commitments.

(Continued on page 808)
Buy U. S. Savings Bonds—"Back Your Future"

The Advertising Council has selected this campaign as important to the public interest—because surplus cash invested in U. S. Savings Bonds, instead of being used to bid up the price of still-scarce goods, helps to combat inflation. Because regular, substantial purchases of U. S. Savings Bonds create a reserve of buying power that will be essential to our economy when consumers’ goods are again in adequate supply. Besides these compelling reasons why buying and holding U. S. Savings Bonds are the ideal way of providing for the future: (a) Besides being the safest investment in the world, U. S. Savings Bonds are a very profitable investment—for every three dollars invested with your government today in E Bonds you will receive four dollars when the bonds mature. (b) U. S. Savings Bonds can be conveniently purchased at banks, post offices or through the Pay Roll Savings Plan where you work. (c) Series E Bonds can be redeemed at any time after sixty days of purchase at purchase price plus accrued interest. (d) Unlike currency, Savings Bonds can be replaced if lost or destroyed. "Back Your Future" today by—buying and holding as many U. S. Savings Bonds as possible, and by stepping up your Pay Roll Savings as much as you can. (Fact Sheet No. 11-D)

Federal Communications Commission Docket
